Item 8.01 Other Events.

The Defense Logistics Agency (DLA) of the Department of Defense (DOD) has awarded United States Antimony Corporation (USAC) a grant (BAA-DLA-2018-01) of \$510,528 to establish a new source of antimony trisulfide meeting the specifications of Production of 500 kg samples Mil-A-159D, Class 1, and Type 1. The goal is to establish a new domestic source to supply antimony trisulfide in the United States as an alternative to supply from China. USAC will select and test samples from its mine in Mexico. USAC will process six batches mined from Mexico and report those findings to the contracting office, which will report its finding to DLA Strategic Materials.

The project operating period will be September 13, 2019 to September 12, 2020, and USAC will deliver six batches of block trisulfide from Montana to Perkins Rouge and Paint (PRP) to be ground, sized, packaged, and QCd. USAC would be a part of the integrated product team (IPT) including PRP, DLA Strategic Materials and US ARMY (RDECOM-ARDEC PYROTECHNICS TECHNOLOGY DIVISION, PICATINNY ARSENAL NJ 07806).

USAC is expected to review the testing feedback from the IPT and to use this feedback to improve the production of each subsequent lot of antimony trisulfide until the material meets Specification MIL-A-159D.

This award to US Antimony Corp. is being issued to establish a firm fixed price contract. The purpose of this research and development acquisition is to qualify MIL-A-159-D antimony trisulfide from sources in North America for the DLA Strategic Materials, National Defense Stockpile.

Antimony trisulfide is a major component of primers for all center-fired ordnance. The product has historically been supplied by the People's Republic of China (PRC).
