SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

(Mark One)

- ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the fiscal year ended December 31, 2009

OR

- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**
For the transition period from _____ to _____

Commission file number 0-50295

ADVANCED CELL TECHNOLOGY, INC.

(Exact name of registrant as specified in its charter)

Delaware

(STATE OR OTHER JURISDICTION OF
INCORPORATION OR ORGANIZATION)

87-0656515

(I.R.S. EMPLOYER IDENTIFICATION NO.)

381 Plantation Street, Worcester, Massachusetts 01605

(508) 756-1212

(Address and telephone number, including area code, of registrant's principal executive offices)

Securities registered pursuant to Section 12(b) of the Act:

None.

(Title of Class)

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$0.01 par value per share

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act.) Yes No

The aggregate market value of the registrant's Common Stock held by non-affiliates of the registrant (based upon the closing price of \$0.25 for the registrant's Common Stock as of June 30, 2009) was approximately \$124.0 million (based on 497,569,398 shares of common stock outstanding and held by non-affiliates on such date). Shares of the registrant's Common Stock held by each executive officer and director and by each entity or person that, to the registrant's knowledge, owned 5% or more of the registrant's outstanding Common Stock as of June 30, 2009 have been excluded in that such persons may be deemed to be affiliates of the registrant. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of outstanding shares of the registrant's Common Stock, \$0.01 par value, was 747,932,679 shares as of March 12, 2010.

CAUTIONARY STATEMENT RELATING TO FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K and the information incorporated by reference includes “forward-looking statements” All statements regarding our expected financial position and operating results, our business strategy, our financing plans and the outcome of any contingencies are forward-looking statements. Any such forward-looking statements are based on current expectations, estimates, and projections about our industry and our business. Words such as “anticipates,” “expects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” or variations of those words and similar expressions are intended to identify such forward-looking statements. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those stated in or implied by any forward-looking statements.

PART I

Item 1. Business

Overview

Advanced Cell Technology, Inc., a Delaware corporation (the “Company”, “we”, “us”, or our” is a biotechnology company focused on developing and commercializing human embryonic and adult stem cell technology in the emerging field of regenerative medicine.

We were incorporated in Nevada under the name Two Moon Kachinas Corp. on May 18, 2000. On December 30, 2004, we filed an amendment to our articles of incorporation to change our corporate name to A.C.T. Holdings, Inc. On January 31, 2005, we completed the acquisition of Advanced Cell Technology, Inc., a Delaware corporation (prior to the Reincorporation (as defined below), “ACT”), pursuant to the terms of an Agreement and Plan of Merger dated January 3, 2005. As a result of the transaction, we terminated our kachina doll business and succeeded to the business operations and research efforts of ACT in the field of biotechnology. On June 17, 2005, we filed an amendment to our articles of incorporation to change our corporate name to Advanced Cell Technology, Inc. On November 18, 2005, we consummated a merger with and into our wholly-owned subsidiary ACT (the “Reincorporation”). As a result of the Reincorporation, we became a Delaware corporation.

We have acquired, developed and maintain a portfolio of patents and patent applications that form the proprietary base for our research and development efforts in the area of embryonic and adult stem cell research. We believe that our intellectual property portfolio is one of the strongest in the field. Our team includes some of the world's leading scientists in the field of stem cell research and development, and experts in conducting clinical trials. We believe our technology base, combined with our know-how, provides us with a strong competitive advantage and will facilitate the successful development and commercialization of products for use in the treatment of a wide array of chronic, degenerative diseases and in regenerative repair of a variety of acute diseases, such as trauma, myocardial infarction and burns.

Our belief that our intellectual property represents one of the strongest portfolios in the field is supported by:

- The early and consistent pace of filing, and the breadth of the large number of filings in the portfolio.
- The relative immaturity of this field of study.
- The limited number of truly competitive portfolios of intellectual property.

Regenerative medicine is a new and emerging field of study involving development of medical therapies based on advances in stem cell and nuclear transfer technology. We have developed and maintain a broad intellectual property (IP) portfolio, with ownership or exclusive licensing of over 28 issued patents and over 170 patent applications in the field of regenerative medicine and related areas. This significant volume of patents and patent licenses has been developed in the short span of approximately the past eight to eleven years.

Although we have strong competitors in this field, they are limited in number. We believe our intellectual property portfolio compares favorably with those of our competition based upon its size, focus and filing dates. With respect to the focus of our human embryonic stem cell portfolio, we believe that somatic cell nuclear transfer and chromatin transfer are, and will prove to be, one of the technological keys to successful development of stem cell therapies (see "Cellular Reprogramming," below). In addition, we have succeeded in deriving human embryonic cell lines without destroying the donor embryo through our proprietary single blastomere derivation technology. We own or have a license to numerous other technologies for dealing with transplant rejection, including means of activating oocytes during nuclear transfer, parthenogenesis, transdifferentiation, and dedifferentiation. Our intellectual property also includes patent rights and applications for specific applications of stem cell technology in producing retinal pigment epithelium (RPE), hemangioblasts, myoblast stem cells and numerous methods and compositions for the use of these technologies and derived cells in retinal disease, heart disease, immunodeficiency estates and cancer.

The company has secured Food and Drug Administration (FDA) clearance to proceed to a Phase II Clinical Trial for its Myoblast program for the treatment of heart failure, and the trial is currently being developed. We believe that the company's myoblast technology has demonstrated that a myoblast transplantation treatment is feasible and safe in clinical trials conducted to date and that the technology could address the large market potential presented by heart failure.

Our research efforts to date in human embryonic technologies are at the level of clinical trials, pre-clinical development and basic research. In November of 2009 we filed an Investigational New Drug (IND) Application with the US Food and Drug Administration (FDA) to initiate a Phase I/II multicenter study using embryonic stem cell derived retinal cells to treat patients with Stargardt's Macular Dystrophy (SMD), as part of our RPE program. These retinal cells were developed using our proprietary blastomere derivation techniques.

The company's Hemangioblast program for the treatment of Diseases and Disorders of Circulatory and Vascular System is in preclinical development. These precursor cells derived from human embryonic stem (ES) cells can be used to achieve vascular repair in animal models of vascular injury.

We are focused on leveraging our key assets, including our intellectual property, our scientific team, our facilities and our capital, to accelerate the advancement of our stem cell technologies. In addition, we continue to pursue strategic collaborations with members of academia, industry and foundations to further accelerate the pace of our research efforts.

The Field of Regenerative Medicine

The emerging field of treatment called "regenerative medicine" or "cell therapy" refers to treatments that are founded on the concept of producing new cells to replace malfunctioning or damaged cells as a vehicle to treat disease and injury. Our focus is the development of effective methods to generate replacement cells from both human embryonic and adult stem cells.

Many significant and currently untreatable human diseases arise from the loss or malfunction of specific cell types in the body. This is especially true of diseases associated with aging such as Alzheimer's disease, Parkinson's disease, type II diabetes, heart failure, osteoarthritis, macular degeneration, and aging of the immune system, known as immunosenescence. This is also true for medical conditions resulting from damage to cells due to acute disease, such as trauma, infarction and burns. We believe that replacing damaged or malfunctioning cells with fully functional ones may be a useful therapeutic strategy in treating many of these diseases and conditions.

A stem cell is a cell that has the ability to branch out and change, or differentiate, into two or more different cell types. Stem cells are self-renewing primitive cells that have the ability to develop into functional, differentiated cells. In general, there are two broad categories of stem cells: adult stem cells and embryonic stem cells. Adult stem cells are derived from various tissues in the human body. Because they can branch out into many different cell types, they are referred to as "multipotent." Multipotent means these cells develop into multiple, but not all, types of cells in the body.

Embryonic stem cells, referred to as ES cells, which are derived from pre-implantation embryos, are unique because they are "pluripotent," which means that they can develop into all cells and tissues in the body, and they self-renew indefinitely in their undifferentiated state. The ability of ES cells to divide indefinitely in the undifferentiated state without losing pluripotency is a unique characteristic that distinguishes them from all other stem cells discovered to date in humans.

Our business is focused on both the development and commercialization of adult stem cell transplantation therapies and ES cell based technologies.

Our adult stem cell-based products are specifically targeted at therapies for heart and other cardiovascular disease and are at a more advanced stage of development than our human ES cell based technologies. Our first human ES cell-based product retinal pigmented epithelial cells are poised to enter Phase I clinical trials pending clearance by the FDA. We believe retinal pigmented epithelial cells technologies have potentially broader and more powerful applications with respect to a wide range of diseases.

Human ES Cell Programs

Since the discovery of the human ES cell, medical researchers worldwide have generally recognized the significance of this new technology and have begun to focus research on the translation of this discovery into important new therapies. Specifically, researchers have focused on several key challenges including:

- isolating and purifying cell lines,
- growing stable cell lines in culture for long periods without mutations,
- manufacturing cell lines in numbers sufficient for therapy,
- differentiating ES cells into all of the cell types desired for therapies, and
- solving the potential rejection of ES cells used in therapies due to immuno-incompatibility with the patient.

We believe that solving the potential rejection of ES cells in patients is the greatest scientific obstacle to developing successful therapeutics. Our research and technologies are focused on solving this obstacle by creating stem cell therapeutics with compatible tissues. Compatible tissues are referred to as being histocompatible.

We believe the potential markets for regenerative medicine and stem cell therapy are large. The table below summarizes the potential United States patient populations which we believe may be amenable to cell or organ transplantation and represent target markets for products generated through our regenerative medicine technology.

POTENTIAL U.S. PATIENT POPULATIONS FOR CELL-BASED THERAPIES

[chart format]

Medical Condition	Number of Patients*
Cardiovascular disease	70 million *
Autoimmune disease	50 million *
Diabetes	18 million
Osteoporosis	10 million
Cancer	10 million
Alzheimer's disease	4.5 million
Parkinson's disease	1 million
Burns (severe)	1.1 million
Spinal-cord injuries	0.25 million
Birth defects	0.15 million/year

* These estimates are based on patient estimates published by the following organizations from April 2005 to the present: the American Heart Association, the American Autoimmune Related Diseases Association, SEER (Surveillance, Epidemiology and End Result), American Burn Association, March of Dimes, the Alzheimer's Association, the Alzheimer's Disease Education & Referral Center (National Institute on Aging), the National Institutes of Health's National Institute on Neurological Disorders and Stroke, the Foundation for Spinal Cord Injury Prevention, Care & Cure, the Centers for Disease Control and Prevention, the American Association of Diabetes Educators, the Northwest Parkinson's Foundation and the Parkinson's Action Network.

Our Human Embryonic Stem Cell Technologies

The ability to produce embryonic stem cells that are immunologically compatible with the patient is the hallmark and the strength of our technology platform. We believe our technology platform will enable the transformation of a patient's cells into an embryonic state where those cells can be differentiated into specific therapeutically relevant cell types that are genetically identical to the patient. We believe our technology may also enable the production of stem cell lines, from sources external to the patient, that have a sufficiently high level of histocompatibility to be useful in making cell therapies readily accessible to a large segment of the patient population, without the need for exact genetic matching of tissues.

As a result, our technology avoids reliance on more limited approaches that involve use of cell lines that are not histocompatible with the recipient, or therapies based upon use of adult stem cells.

The use of human embryonic stem cells gives rise to ethical, legal and social issues previously rooted in the fact that ES-cell derivation deprives preimplantation embryos of the potential to develop into a human being. We have developed a method to derive human embryonic stem cell lines at the blastomere stage that does not result in the destruction of the preimplantation embryo.

In August 2001, then-President George Bush set guidelines for federal funding of research on embryonic stem cells from human embryos created by in-vitro fertilization, referred to as IVF, limiting funding to just 60 lines. IVF-ES cells have the drawback that they are not genetically matched to the recipient patient. These ES cells are allogeneic. The word allogeneic literally means "other DNA type." Therapies using allogeneic cell lines can result in immune system incompatibilities where the host immune system attacks and rejects the transplanted cells or the transplanted cells attack the host. These incompatibilities may be partially suppressed with powerful immunosuppressive drugs, but the side effects can be severe and result in life-threatening complications. As a result, these incompatibilities have the potential to generate significant inefficiencies in the application of cell therapies.

However, in March 2009, President Barack Obama issued an executive order opening the door to a significant increase in federal funding for ES cell research. That led to the National Institutes of Health (NIH) approval of 13 additional stem cell lines for use in agency-funded research. The NIH is considering whether to approve an additional 96 lines, including blastomere derived lines we submitted for consideration.

The strategic focus of our human ES cell technology is to produce cell lines that are both histocompatible with the patient and pluripotent. We have numerous proprietary technologies that we believe will generate histocompatible, pluripotent stem cells for patient-specific application. These cells maximize the potential for effective use as transplants to replace diseased or destroyed cells in human patients. If successfully developed, our cellular reprogramming technologies will make it possible to produce cells that have the proliferative capacity of young cells, have specific therapeutic application, and are immunologically compatible with the patient.

All of our ES cell technologies are at the level of basic research or in the pre-clinical stage of development.

Our ES Cell Research Programs

Our ES cell research programs are divided into three core categories: cellular reprogramming, our reduced complexity program, and stem cell differentiation. Each of these core areas of focus is discussed below.

I. Cellular Reprogramming

This research program involves development of therapies based on the use of genetically identical pluripotent stem cells generated by our cellular reprogramming technologies. These technologies can be used to generate patient-specific pluripotent cells and tissues for transplantation. We believe our technology platform will enable the transformation of a patient's cells into pluripotent ES cells that are histocompatible with the patient and have the potential to be differentiated into any of the over 200 different human cell types that may be therapeutically relevant in treating diseased or destroyed tissues in human patients. We expect that our cellular reprogramming technologies will offer a new avenue for the introduction of targeted genetic modifications in cells and for the regeneration of cell lifespan, thereby making youthful cells available for aging patients. The combination of these advances, the ability to produce young cells of certain kinds that are histocompatible with the patient, is a core potential application of our technology. We believe these cellular reprogramming technologies will be effective therapies where there is time to prepare customized therapy through reprogramming of the patient's own cells.

Some of the technologies that support our cellular reprogramming program are somatic cell nuclear transfer, chromatin transfer, factor reprogramming, and fusion technologies.

Somatic cell nuclear transfer (SCNT) refers to the process wherein a body cell is transferred to an egg cell from which the nuclear DNA has been removed. This results in the body cell being "reprogrammed" by the egg cell. This reprogramming transforms the cell from the type of cell it was, for instance a skin cell, into an embryonic cell with the power to become any cell type in the body. A related technology is called chromatin transfer. Through this technology, the DNA and attached proteins, or chromatin, of the somatic cell is reprogrammed prior to transfer into an egg cell. Chromatin transfer has the potential to improve the efficiencies and therefore reduce the cost of nuclear transfer. We believe that one critical advantage of our proprietary SCNT and chromatin transfer technologies is that the cells are "rejuvenated" by returning the cell to a youthful state. This is important because these youthful cells will have the proliferative capacity of young cells. These healthy replacement cells, which would be genetically identical to the patient's own cells, would then be used for cell transplantation.

Our fusion technologies involve the fusion of the cytoplasm of one cell into another. In the same manner that the cytoplasm of an egg cell is capable of transforming any cell back to an embryonic state, the fusion of the cytoplasm of other cell types, including differentiated cell types (such as blood cells) is capable of reprogramming another cell type, such as a skin cell. These technologies have the potential of transforming a cell from a patient into another medically-useful cell type also identical to the patient. They also have the potential to fuse the cytoplasm of undifferentiated cells, such as embryonic stem cells, with somatic cells to transport the somatic cell DNA back to pluripotency. Alternatively, factors expressed by embryonic stem cells can be introduced into somatic cells to induce pluripotency. We believe that the fusion and factor reprogramming technologies we are developing can be developed into as broad and powerful techniques as SCNT, producing histocompatible, youthful stem cells that are multi and potentially even pluripotent. If successfully developed, this technology may also provide a pathway that does not utilize human egg cells which would reduce the cost of the procedure and increase the number of patients that could benefit from its implementation.

II. Stem Cell Differentiation

Regenerative medicine requires that stem cells, from whatever source derived, be differentiated, or re-differentiated, into specific body cell types and then physically transplanted into a patient. Differentiation into tissues such as cardiac muscle, blood, and other tissues occurs spontaneously in ES cells being cultured in a dish. Successful application of stem cell technology will require control over the specific kinds of cells into which stem cells differentiate. Control of differentiation and the culture and growth of stem and differentiated cells are important current areas of research for us. Also, some chemicals, such as retinoic acid, can be used to trigger differentiation into specific cell types such as nerve cells. We intend to pursue differentiation approaches both in-house and through collaborations with other researchers who have particular interests in, and skills related to, cellular differentiation. These efforts include using both animal and human stem cell lines. Our research in this area includes projects focusing on developing many different cell types that may be used in the future to treat a wide range of diseases. Our researchers have generated stable retinal pigment epithelium, or RPE, cell lines for use in our clinical retinal program and are working on projects to generate stable cell lines with particular focus on blood lineage and vascular epithelial cell lines from hemangioblast cells.

Retinal Pigment Epithelium Program. In November, 2006 we published data demonstrating human ES cell-derived RPE cells were capable of rescuing visual function in Royal College of Surgeon rats. Following the publication of that data, we entered into a pre-clinical development collaboration with Casey Eye Institute at Oregon Health & Science University. The purpose of the collaboration was to conduct dosage and safety studies in preparation for IND and Phase I human clinical trials. As mentioned, in November of last year we filed an Investigational New Drug (IND) Application with the US Food and Drug Administration (FDA) to initiate a Phase I/II multicenter study using embryonic stem cell derived retinal cells to treat patients with Stargardt's Macular Dystrophy (SMD).

Hemangioblast Program. Hemangioblasts are a newly-characterized stem cell capable of differentiating into both hematopoietic, meaning blood cell-forming, and angiogenic, meaning blood vessel endothelium-forming, cells. We believe it will be possible to utilize hemangioblast cells in engraftment to repair age-related endothelial dysfunction associated with numerous significant age-related diseases, including cardiovascular disease, stroke, and perhaps even cancer. In 2006 we successfully derived hemangioblast cells generated from the company's blastomere-derived human embryonic stem cell lines. In 2007, we published data reporting that through utilization of hemangioblast based therapy we generated function *in vivo* with respect to the repair of ischemic retinal vasculatures and restoration of blood flow in ischemic limbs. In addition, we also reported increased survival rates of animals suffering from myocardial infarction. The hemangioblast program is currently in preclinical development.

III. Adult Stem Cell Program

Our adult stem cell-based program is developing an autologous myoblast transplantation therapy delivered using a minimally invasive catheter injection system to restore cardiac function in patients with advanced heart disease. The key target for the therapy will be heart failure patients with New York Heart Association ("NYHA") scores Class II to IV. The company's therapy could also benefit patients supported on ventricular assistance devices and potential additional indications, such as acute myocardial infarction, peripheral artery disease, and non-cardiac tissue repair. Currently available treatment options for heart failure patients are inadequate and can only slow the progression of heart failure; none can halt or reverse the process. We believe our autologous myoblast transplantation therapy uses patented myoblast compositions for catheter delivery to the heart offering repair of the disease in heart failure patients and for those end-stage disease patients on ventricular assistance device support.

These indications represent a significant unmet medical need and hold significant potential for clinical approval.

Our transplantation therapy involves extraction through simple biopsy from a patient's thigh of myoblasts, which are non-embryonic, skeletal muscle stem cells, that can be expanded in culture and injected back into damaged and scarred regions of the heart. This therapy promotes repair of damaged cardiac tissue by autologous cells, thereby avoiding immune rejection as each patient receives their own cells. Skeletal muscle, unlike heart muscle, can repair itself after injury. Skeletal muscle contains immature myoblasts that can fuse with surrounding myoblasts or with damaged muscle fibers to regenerate contractile skeletal muscle. In experimental models, our researchers have demonstrated that skeletal myoblasts can be transplanted into an infarcted myocardium with the subsequent development of elongated, striated cells characteristic of both skeletal and cardiac muscle. Our Phase I clinical studies have demonstrated the efficacy of this therapy on a preliminary basis.

We have received FDA approval to proceed with our Phase II clinical trial, to evaluate the applications for myoblast transplantation in slowing and/or reversing the impact of heart failure.

We perform our myoblast expansion, packaging, shipment, and quality testing using proprietary procedures that adhere to GMP regulations for manufacturing clinical trial material. After expansion, the myoblasts are packaged and delivered to the clinical site for implantation into the injured heart tissue by a surgeon or interventional cardiologist. To maximize cell therapy effectiveness, adequate numbers of cells must be delivered to the site of damage in a repeatable and safe manner. Our therapy utilizes a minimally invasive catheter-based delivery methodology, which provides a safe, targeted and high efficiency approach to cell delivery to the infarct area.

We believe that, unlike currently available treatment options, myoblast therapy has the ability to repair and improve the function of a damaged heart.

Our preclinical and Phase I clinical studies support the conclusion that our therapy presents significant advantages over currently available treatments, including:

- Ability to restore cardiac function through new muscle formation
- Ability to prevent further decline of heart function
- No risk immunological rejection of myoblasts due to autologous nature of the therapy
- Complementary to and capable of improving outcomes of current therapeutic options for heart disease
- hematopoietic cells for blood diseases and cancer,
- myocardial and endothelial vascular tissue for cardiovascular disease,
- congestive heart failure, myocardial infarction and other cardiovascular disease
- skin cells for dermatological conditions,
- retinal pigment epithelium cells as treatment for macular degeneration and retinal pigmentosis,
- neural cells for spinal cord injury, Parkinson's disease and other neuro-degenerative diseases,
- pancreatic islet β cells for diabetes,
- liver cells for hepatitis and cirrhosis,
- cartilage cells for arthritis, and
- lung cells for a variety of pulmonary diseases.

Potential Commercial Applications of our ES Cell and Adult Stem Cell Technologies

We believe that, if successfully developed, stem cell-based therapy has the potential to provide treatment for a broad range of acute and chronic degenerative diseases. We believe the potential applications of cell-based therapeutics include

While we expect that any future products will take the form of medical procedures, tangible therapeutics, or combinations thereof, we currently have no products, and the identity of our future products, if any, is dependent upon the results of our ongoing research efforts, and, therefore cannot be determined at this time.

Our Intellectual Property

Our research and development is supported by a broad intellectual property portfolio. We currently own or have exclusive licenses to over 45 patents and have over 170 patent applications pending worldwide in the field of regenerative medicine and stem cell therapy. We also have non-exclusive rights to a portfolio of patents and patent applications that support our core intellectual property.

Our success will likely depend upon our ability to preserve our proprietary technologies and operate without infringing the proprietary rights of other parties. However, we may rely on certain proprietary technologies and know-how that are not patentable. We protect such proprietary information, in part, by the use of confidentiality agreements with our employees, consultants and certain of our contractors.

We maintain a disciplined patent policy and, when appropriate, seek patent protection for inventions in our core technologies and in ancillary technologies that support our core technologies or which we otherwise believe will provide us with a competitive advantage. We pursue this strategy by filing patent applications for discoveries we make, either alone or in collaboration with scientific collaborators and strategic partners. Typically, although not always, we file patent applications both in the United States and in select international markets. In addition, we plan to obtain licenses or options to acquire licenses to patent filings from other individuals and organizations that we anticipate could be useful in advancing our research, development and commercialization initiatives and our strategic business interests.

The following table identifies the issued patents we own or license that we believe currently support our technology platform.

Owned by Advanced Cell Technology, Inc.

* Actual patent expiration dates may differ from the dates listed herein including due to patent term adjustments pursuant to 35 U.S.C. § 154(b) and 37 C.F.R. §§ 1.702-1.705.

The fundamental consequence of patent expiration is that the invention covered by that patent will enter the public domain. However, the expiration of patent protection, or anticipated patent protection, for the bulk of our portfolio is not scheduled to begin for approximately ten to fifteen years. Due to the rapid pace of technology development in this field, and the volume of intellectual property we anticipate will be generated over the next decade, it is unlikely that the expiration of any existing patents or patent rights would have an adverse affect on our business. Due to our current stage of development, our existing patent portfolio is not currently supporting a marketed product, so we will not suffer from any reduction in product revenue from patent expiration. Any actual products that we develop are expected to be supported by intellectual property covered by current patent applications that, if granted, would not expire for 20 years from the date first filed. For example, our patent rights under the University of Massachusetts license listed in the patent table, above, do not begin to expire until 2016. Due to the early stage of our business, we differ from, for example, the pharmaceutical industry where the loss of a key significant patent can result in contemporaneous loss of products, programs or revenues. As our table demonstrates, our business is at the front end of the patent protection spectrum and is not expected to be significantly impacted by expiration of existing patents or patents issued in response to existing applications.

Research and License Agreements

Licenses of Intellectual Property to Us

The following summarizes technology licensed to us.

UMass License - On February 1, 2002 and April 16, 1996, we entered into exclusive license agreements (indefinite license period) with the University of Massachusetts. The 1996 Agreement has been amended by amendments dated September 1, 1997, May 31, 2000 and September 19, 2002. Pursuant to these agreements, the University of Massachusetts, referred to as UMass, exclusively licensed to us certain biological materials, patent rights and related technology for commercialization in specified fields. The license agreements require us to use diligent efforts to develop licensed products and licensed services and require us to pay certain royalties, minimum annual royalties, milestone payments and sublicense income to UMass. UMass received 73,263 shares of common stock of ACT as partial consideration of the license granted. We are currently behind on our payments of all UMass license fees, since 2008, and as such we are in breach of the license agreement.

2002 License - Under the 2002 license, UMass licenses to us certain patent rights relating to the cloning of non-human animals for use in connection with the development, manufacture and sale of products and services in the field of non-human animals for agriculture, companion animals, research and diagnostic products, non-human and human therapeutics, and neutraceuticals, except production of immunoglobulin in the blood of *Bos taurus* and *Bos indicus*. We are required to pay royalties to UMass ranging from 1.5% to 2.0% based on the covered product or service. We agreed to pay minimum royalty payments of \$15,000 on the first and second anniversary of the agreement, \$20,000 on the third anniversary, \$25,000 on the fourth anniversary, and increasing to \$45,000 on the fifth anniversary and for each year thereafter. We also agreed to make milestone payments to UMass of up to \$1,630,000 upon the achievement of various development and commercialization milestones. Finally, we have agreed to pay UMass 18% of all sublicense income.

1996 License - The 1996 license covers certain patent rights, biological materials and know-how related to the cloning of non-human animals and cells for use in cell fields except the production of immunoglobulin in the blood of *Bos taurus* and *Bos indicus*. We are required to pay royalties ranging from 2.5% to 4.5% on net sales of products and services covered by the license, and minimum royalty payments in the amount of \$15,000 per year (beginning on the later of the fourth year after the effective date of the agreement or the completion of certain clinical trials) for net sales on products and services for use in human therapeutics, and \$30,000 per year (beginning in the third year after the effective date of the agreement) for net sales on products and services for all uses other than in human therapeutics. UMass agreed to waive minimum royalty payments during any calendar year in which we fund research at UMass in the aggregate amount of \$300,000. There are no milestone payments. We agreed to pay UMass 18% of all sublicense income except for equity. With respect to equity, we are required to pay UMass an amount equal to 10% of the total equity we receive for any transfer of rights under the 1996 license.

Both the 2002 agreement and the 1996 agreement remain in effect until all issued patents within the patent rights licensed under the agreement have expired, or for a period ten years after the effective date of the agreement if no patents have issued within that ten-year period. Each party has the right to terminate the agreement upon the occurrence of a material uncured breach. We also have the right to terminate at any time for any reason with ninety days' written notice.

Wake Forest License - On January 26, 2001, we entered into a materials and research data license agreement with Wake Forest University (indefinite license period), pursuant to which WFU granted to us a worldwide, exclusive, royalty-free, perpetual and irrevocable right and license to use certain data and stem cells and stem cell cultures created by us from biological materials provided by WFU to us for specified purposes only. The agreement allows us to utilize certain primate skin cells and ovary materials produced by WFU and transferred to us pursuant to an agreement relating to the transfer of biological materials. There are no milestone payments. There are no royalty requirements unless we desire to negotiate a commercial license for use of the biological materials provided to us by WFU. WFU received 60,000 shares of common stock of ACT Group, Inc., a now dissolved Delaware corporation referred to hereinafter as ACT Group. We have agreed to provide WFU samples of stem cells for WFU's research, education and teaching purposes and we have a first option to obtain an exclusive license to any intellectual property rights claimed by WFU in connection with the use of such stem cells. The term of the license granted is perpetual and irrevocable absent a breach by us.

Start Licensing License - On August 30, 2006, we entered into a Settlement and License Agreement with UMass and Start Licensing, Inc. (indefinite license period). Pursuant to this agreement Start Licensing licenses to us, on a nonexclusive, royalty-free and paid-up basis, certain patent rights for use with non-human animal research or studies, including preclinical trials, in connection with the research, development and sale of therapeutic and diagnostic human cell products.

GenVec Agreement - On December 28, 2005, Mytogen and GenVec, Inc. entered into a patent assignment and security agreement (indefinite period). Under the agreement, as amended on July 31, 2007, GenVec assigned certain agreements and intellectual property to Mytogen, and retained a royalty-free non-exclusive license, with the right to grant sublicenses, to practice the intellectual property in connection with products, processes or services developed or provided by GenVec other than autologous and allogenic skeletal myoblasts for cardiac therapy. Under the original agreement, Mytogen granted a security interest in the assigned intellectual property, but the security interest was released in the amendment to the agreement. Under the agreement, as amended, Mytogen must use commercially reasonable efforts to commercialize the assigned intellectual property, including by spending specified amounts in support of research and development in support of such commercialization; Mytogen must pay GenVec one-half of the first milestone payment (anticipated to be two million U.S. dollars) received by Mytogen under the Terumo Agreement; and Mytogen must also pay GenVec four percent (4%) of the net sales revenue from sales or other provision of products, processes or services covered by the agreement.

Exclusive Licenses of Intellectual Property by Us

The following summarizes licenses from us to third parties.

Exeter Life Sciences License -On October 22, 2003, we entered into an exclusive license with Exeter Life Sciences, Inc. (indefinite license period), pursuant to which we exclusively licensed to Exeter certain technology and patent rights for use in the fields of agriculture, endangered species, companion animals and equine animals. The license also grants Exeter a right of first negotiation to any improvement patents that are obtained by us that relate to the licensed intellectual property or which are useful, necessary or required to develop or manufacture certain animals, cells or tissues within the defined fields of use.

Under the agreement, we license rights to certain patent rights and technology useful for the fields of use of non-human animals for agriculture, endangered animals and companion animals; excluding production of such animals for the primary purpose of producing human and non-human animal therapeutics and human healthcare products, including without limitation the production of biopharmaceutical agents in milk, such as proteins, peptides and polypeptides for pharmaceutical, nutraceutical or other use, and excluding the production of immunoglobulin in the blood of *Bos taurus* and *Bos indicus*. The field includes:

- the cloning, development, manufacture and sale of cloned non-human animals, including without limitation, bovine, hircine, ovine, porcine, equine animals and ungulates (as well as any transgenic variance or enhancements thereto) or products that are composed of, made in or derived, extracted or isolated from cells or tissues of such animals for the production of food or fiber, and the rendering of services or uses that relate to the production of such products;
- the cloning, development, manufacture and sale of endangered species for purposes of researching, aiding, reproducing or assisting in the reproduction of such endangered species;
- the cloning, development, and sale of hircine, ovine, feline, canine and equine animals (as well as any transgenic variance or enhancements thereto) for personal, business or commercial purposes, specifically excluding the sale of these animals as scientific research laboratory subjects; and
- the cloning, development, manufacture and sale of cloned equine animals (as well as any transgenic variance or enhancements thereto) or products that are composed of, made in or derived, extracted or isolated from cells or tissues of such animals for non-therapeutic purposes, including but not limited to, for use in agriculture, for use as food, for use as companion, service, work or recreational animals, or for use as racing or other equine event animals, and the rendering of services or uses that relate to the production of such products.

In consideration of the rights and licenses granted to Exeter, Exeter paid to us an initial license fee of \$1,000,000, and has agreed to pay royalties equal to 5% of the net sales of all products and services covered by the license; provided that, sublicense income for license products that are the progeny of cloned animals covered by the license or products obtained from such progeny, the royalty is 3%. Exeter is required to pay an annual maintenance fee for the license, equal to \$100,000 in 2005, increasing annually by \$50,000 up to \$500,000. Exeter's obligation to pay the annual maintenance fee was suspended until certain intellectual property that is the subject of litigation, namely the matter styled *University of Massachusetts v. James M. Robl and Phillippe Collas* Massachusetts Superior Court, Suffolk County, Docket No. 04-0445-BLS, was settled in dispute. Negotiations are continuing to amend the license subject to the outcome of the settlement. The license also provides that we will refund certain amounts to Exeter if certain conditions concerning the referenced litigation are not met and that we will extend to Exeter rights associated with "improvement patents" that are obtained by us or the University in connection with the referenced litigation or any patent interference or opposition proceedings involving us that relate to the licensed intellectual property or which are useful, necessary or required to develop or manufacture cloned and/or transgenic non-human animals and cloned and/or transgenic cells and tissues from non-human animals within the field of use. The license grants Exeter a right of first negotiation to any improvement patents. There are no milestone payments. Exeter agrees to pay us a total of 25% of all sublicense income under the license. Either party may terminate the agreement in the event of an uncured breach. Exeter may terminate without cause on 60 days' prior written notice to us, or may terminate immediately in the event of a change in law that materially affects Exeter's ability to commercialize the licensed intellectual property under the license.

We expect that the Exeter Life Science License will be amended as a result of the Start Settlement and the settlement of the *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh), Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00706 RMU), and *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh), Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00353 RMU).

Lifeline License -On May 14, 2004, we entered into three license agreements (indefinite license periods) with Lifeline Cell Technology, formerly known as PacGen Cellco, LLC; the licenses were subsequently amended in August 2005. Pursuant to the license agreements, as amended, we licensed to Lifeline, on an exclusive or non-exclusive basis, as applicable, certain know-how and patent rights for, among other things, the research, development, manufacture and sale of human cells for cell therapy in the treatment of human diabetes and liver diseases, and retinal diseases and retinal degenerative diseases. The license agreements require milestone payments up to \$1.75 million in the aggregate. The agreement requires Lifeline to meet minimum research and development requirements. The licenses continue until expiration of the last valid claim within the licensed patent rights. Either party may terminate the agreements for an uncured breach, and Lifeline may terminate the agreement at any time with 30 days' notice.

Exclusive License Agreement Number 1, as amended, covers patent rights and technology developed by us that are relevant to:

- the research, development, manufacture and sale of human and non-human animal cells for commercial research and

- the manufacture and selling of human cells for therapeutic and diagnostic use in the treatment of human diabetes and liver diseases, and retinal diseases and retinal degenerative diseases.

Lifeline has agreed to pay us royalties ranging from 3% to 10% on net sales of products and services covered by the license, and a minimum royalty fee of \$175,000 in the first year, plus, commencing 12 months after the effective date of the agreement, additional minimum royalty fees in the amount of \$15,000 at 12 months, \$37,500 at 24 months, \$60,625 at 36 months, and \$75,000 annually thereafter. Lifeline also agreed to pay a license fee in the amount of \$225,000 in the form of a Convertible Promissory Note, which was repaid in cash in 2007.

We expect that Lifeline Exclusive License Agreement Number 1, as amended, will be further amended as a result of the Start Settlement and the settlement of *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh)*, *Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00706 RMU), and *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh)*, *Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00353 RMU).

Exclusive License Agreement Number 2, as amended, covers patent rights and technology developed by UMass relevant to:

- the research, development, manufacture and sale of human and non-human animal cells and defined animal cell lines for commercial research,
- the manufacture and selling of human cells for therapeutic and diagnostic use in the treatment of human diabetes and liver diseases and retinal diseases and retinal degenerative diseases, and
- the use of defined animal cell lines in the process of manufacturing and selling human cells for therapeutic and diagnostic use in the treatment of human diabetes and liver diseases.

Lifeline is required to pay us royalties ranging from 3% to 12% on net sales of products and services covered by the license, and a minimum royalty fee of \$100,000 in the first year, plus, commencing 12 months after the effective date of the agreement, additional minimum royalty fees in the amount of \$15,000 at 12 months, \$30,000 at 24 months, \$45,000 at 36 months, and \$60,000 annually thereafter. Lifeline also paid a license fee in the amount of \$150,000 on June 1, 2007.

We expect that Lifeline Exclusive License Agreement Number 2, as amended, will be further amended as a result of the Start Settlement and the settlement of *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh)*, *Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00706 RMU), and *University of Massachusetts and Advanced Cell Technology, Inc. v. Roslin Institute (Edinburgh)*, *Geron Corporation and Exeter Life Sciences, Inc.*, U.S. District Court for the District of Columbia (Case No. 1:05-cv-00353 RMU).

Exclusive License Agreement Number 3, as amended, covers patent rights and technology developed by Infigen relevant to the research, development, manufacture and sale of human cells for cell therapy in the treatment of therapeutic and diagnostic use in the treatment of human diabetes and liver diseases, and retinal diseases and retinal degenerative diseases. Lifeline is required to pay us royalties equal to 6% of net sales of products and services covered by the license, and a minimum royalty fee of \$25,000 in the first year, plus, commencing 12 months after the effective date of the agreement, additional minimum royalty fees in the amount of \$7,500 at 12 months, \$7,500 at 24 months, \$6,875 at 36 months, and \$15,000 annually thereafter. Lifeline also paid a license fee in the amount of \$225,000 in cash on June 1, 2007.

We expect that Lifeline Exclusive License Agreement Number 3, as amended, will be further amended or terminated, as a result of the dissolution of Infigen and the acquisition by us of certain of the Infigen patent rights.

Start Licensing License -On August 30, 2006, we entered into a Settlement and License Agreement with UMass and Start Licensing, Inc. (indefinite license period). See description of this agreement above. Pursuant to this agreement, we granted Start Licensing a worldwide, exclusive, fully paid-up and royalty-free license, with the right to grant sublicenses, to certain patent rights for use in connection with all uses and applications in non-human animals. The agreement was reached in connection with the settlement of the patent interference actions. The terms of the agreement also includes an initial payment to us, which has been made, and certain milestone payments. In addition, under the agreement, Start, Geron Corporation and Roslin Institute ("Roslin") each agree not to sue us under certain patent applications owned by Roslin.

Terumo Agreement -Diacrin, Inc. and Terumo Corporation entered into a development and license agreement on September 4, 2002 (indefinite license period); the agreement was transferred to Mytogen on December 28, 2005. Under the agreement, the parties agreed to collaborate to develop and commercialize products in the field described as autologous skeletal myoblasts for cardiac therapy (and conditionally allogenic skeletal myoblasts for cardiac therapy) in Japan and such other Asian countries as the parties may agree. Pursuant to the agreement, Terumo has an exclusive, royalty-bearing license, with a limited right to grant sublicenses, under certain technology and patent rights controlled by Mytogen; and a non-exclusive, non-royalty bearing right and license to use certain data resulting from clinical trials for products based on the licensed technology and patent rights for purposes of seeking regulatory approvals. The agreement specifies the rights and obligations of the parties with respect to collaboration and development of products covered by the agreement. The agreement also requires Terumo to make certain milestone payments, including the following: two million dollars upon initiation of any clinical trials of any covered product in Japan; two million dollars upon the first filing for regulatory approval of a covered product in Japan; one million dollars upon the first filing for regulatory approval of a covered product in any country other than Japan if the territory is expanded to include countries other than Japan; two million dollars upon the first commercial sale of a covered product in Japan; and one million dollars upon the first commercial sale of a covered product in any country other than Japan if the territory is expanded to include countries other than Japan. Terumo is also required under the agreement to pay royalties in an amount equal to ten percent (10%) of the net sales on covered products. In May 2008, Terumo exercised an option to extend a milestone for one year for \$300,000. The milestone consisted of a Phase I clinical trial for the Myoblast Program in Japan and was extended for two years.

Pharming Technologies B.V. License -On February 26, 2008, we entered into a License Agreement with Pharming Technologies B.V., referred to as Pharming, pursuant to which we exclusively licensed to Pharming certain patents including oocyte activation patents for all uses and applications in or related to non-human animals (indefinite license period). We retained all use and applications of such patents in or related to humans.

Transition Holdings, Inc. - On December 18, 2008, we entered into a license agreement with an Ireland-based investor, Transition Holdings Inc. ("Transition"), for certain of our non-core technology (indefinite license period). Under the agreement, Transition agreed to acquire a license to the technology for \$3.5 million in cash.

Stem Cell & Regenerative Medicine International, Inc. - On December 1, 2008, the Company and CHA Bio & Diostech Co., Ltd. ("CHA"), a leading Korean-based biotechnology company focused on the development of stem cell technologies, formed an international joint venture. The new company, Stem Cell & Regenerative Medicine International, Inc. ("SCRMI"), will develop human blood cells and other clinical therapies based on our Hemangioblast Program, one of our core technologies. SCRMI has agreed to pay the Company fee of \$500,000 for an exclusive, worldwide, license to the Hemangioblast Program (indefinite license period).

CHA – On March 31, 2009, we entered into a licensing agreement (indefinite license period) under which we have licensed our retinal pigment epithelium ("RPE") technology, for the treatment of diseases of the eye, to CHA for development and commercialization exclusively in Korea. We are eligible to receive up to \$1.9 million in fees based upon achieving certain milestones, including us making an IND submission to the US FDA to commence clinical trials in humans using the technology, which we currently plan to do during the second half of 2009. We received an up-front fee of \$250,000 and additional consideration under the agreement in the amount of \$850,000. Under the terms of the agreement, CHA will incur all of the cost associated with RPE clinical trials in Korea.

CHA – On May 21, 2009, we have entered into a licensing agreement (indefinite license period) under which we will license our proprietary single blastomere technology, which has the potential to generate stable cell lines, including retinal pigment epithelium (RPE) cells for the treatment of diseases of the eye, to CHA for development and commercialization exclusively in Korea. We received a \$300,000 up-front license fee. We believe there are some 200 different retinal diseases that may be impacted by this stem cell derived therapy including macular degeneration. Age-related macular degeneration (AMD) affects more than 30 million people worldwide and is the leading cause of blindness in people over 60 years of age in the United States (Source: Foundation For Fighting Blindness).

Embryome Sciences, Inc. – In 2008, we entered into a license agreement (indefinite license period) whereby we licensed to Embryome Sciences certain cell processing technologies, including the technology licensed from Kirin Beer. We received an up-front payment of \$470,000 and will receive royalties from future sales of product that utilizes the technologies from the licenses.

Nonexclusive Licenses of Intellectual Property by Us

We have entered into numerous nonexclusive license agreements pursuant to which we have granted non-exclusive rights to various parties to use certain patent rights in defined fields. These licenses generally provide for commercialization of our intellectual property and typically contain minimum royalties, milestones and continuing royalties based upon percentages of revenue.

Regulations

In addition to safety regulations enforced by the FDA, we are also subject to regulations under the Occupational Safety and Health Act, the Environmental Protection Act, the Toxic Substances Control Act and other present and potential future and federal, state, local, and foreign regulations.

Outside the United States, we will be subject to regulations that govern the import of drug products from the United States or other manufacturing sites and foreign regulatory requirements governing human clinical trials and marketing approval for our products. The requirements governing the conduct of clinical trials, product licensing, pricing and reimbursements vary widely from country to country.

The United States Congress, several states and foreign countries have considered legislation banning or restricting human application of ES cell-based and nuclear transfer based technologies. No assurance can be given regarding future restrictions or prohibitions that might affect our technology and business. In addition, we cannot assure you that future judicial rulings with respect to nuclear transfer technology or human ES cells will not have the effect of delaying, limiting or preventing the use of nuclear transfer technology or ES cell-based technology or delaying, limiting or preventing the sale, manufacture or use of products or services derived from nuclear transfer technology or ES cell-derived material. Any such legislative or judicial development would harm our ability to generate revenues and operate profitably.

For additional information about governmental regulations that will affect our planned and intended business operations, see "RISK FACTORS " beginning below.

Employees

As of March 16, 2010, we had 14 full-time employees, of whom 6 hold Ph.D. or M.D. degrees. Eleven employees are directly involved in research and development activities and 3 are engaged in business development and administration. We also use the services of numerous outside consultants in business and scientific matters. We believe that we have good relations with our employees and consultants.

Item 1A. RISK FACTORS

Below we describe a number of uncertainties and risks which, in addition to uncertainties and risks presented elsewhere in this annual report, may adversely affect our business, operating results, financial condition and share price. The uncertainties and risks enumerated below as well as those presented elsewhere in this Annual Report should be considered carefully in evaluating our company and our business and the value of our securities. The following important factors, among others, could cause our actual business, financial condition and future results to differ materially from those contained in forward-looking statements made in this Annual Report or presented elsewhere by management from time to time.

Risks Relating to the Company's Early Stage Development

Our business is at an early stage of development and we may not develop therapeutic products that can be commercialized. We do not yet have any product candidates in late-stage clinical trials or in the marketplace. Our potential therapeutic products will require extensive preclinical and clinical testing prior to regulatory approval in the United States and other countries. We may not be able to obtain regulatory approvals (see REGULATORY RISKS), enter clinical trials for any of our products, or commercialize any products. Our therapeutic and product candidates may prove to have undesirable and unintended side effects or other characteristics adversely affecting their safety, efficacy or cost-effectiveness that could prevent or limit their use. Any product using any of our technology may fail to provide the intended therapeutic benefits, or achieve therapeutic benefits equal to or better than the standard of treatment at the time of testing or production. In addition, we will need to determine whether any of our potential products can be manufactured in commercial quantities or at an acceptable cost. Our efforts may not result in a product that can be or will be marketed successfully. Physicians may not prescribe our products, and patients or third party payors may not accept our products. For these reasons we may not be able to generate revenues from commercial production.

We have limited clinical testing, regulatory, manufacturing, marketing, distribution and sales capabilities which may limit our ability to generate revenues. Due to the relatively early stage of our therapeutic products, regenerative medical therapies and stem cell therapy-based programs, we have not yet invested significantly in regulatory, manufacturing, marketing, distribution or product sales resources. We cannot assure you that we will be able to invest or develop any of these resources successfully or as expeditiously as necessary. The inability to do so may inhibit or harm our ability to generate revenues or operate profitably.

We have limited capital resources and we may not obtain the significant additional capital required to sustain our research and development efforts. We will need additional capital to conduct our operations and develop our products and our ability to obtain the necessary funding is uncertain. (see FINANCIAL RISKS) We have losses from operations, negative cash flows from operations and a substantial stockholders' deficit and we do not believe that our cash from all sources (including cash, cash equivalents, anticipated revenues from licensing fees and sponsored research contracts) is sufficient for us to continue operations beyond March 16, 2011.

Management continues to evaluate alternatives and sources of additional funding. These may include public and private investors, strategic partners, and grant programs available through specific states, the federal government, or foundations. However, there is no assurance that such sources will result in raising additional capital.

Lack of necessary funding may require us to delay, scale back or eliminate some or all of our research and product development programs and/or capital expenditures, to license our potential products or technologies to third parties, to consider business combinations related to ongoing business operations, or to shut down some, or all, of our operations.

Additionally, our cash requirements may vary materially from our current projections due to unforeseen and unexpected results in product research and development, or changes in any of the following: potential relationships with strategic partners, the focus and direction of our research and development programs, the competitive landscape, litigation required to protect our technology, technological advances, the cost of pre-clinical and clinical testing, the regulatory process of the FDA (and of foreign regulators), among others. Our current cash reserves are not sufficient to fund our operations through the commercialization of our first products and/or services.

We have a history of operating losses and we may not achieve future revenues or operating profits.We have generated modest revenue to date from our operations. Historically we have had net operating losses each year since our inception. We have limited current potential sources of income from licensing fees and the Company does not generate significant revenue outside of licensing non-core technologies. Additionally, even if we are able to commercialize our technologies or any products or services related to our technologies it is not certain that they will result in revenue or profitability.

We are in the Early Stages of a Strategic Joint Venture which may slow, impede or result in the termination of potential therapeutic products whose development is now the responsibility of the partnership and not solely of the Company. In 2008, we entered into a new partnership (CHA) and as a result, we are subject to 3rd party interests (see RISKS RELATED TO THIRD PARTY RELIANCE) and control issues, not the least of which relates to certain of our employees no longer being exclusively managed by us. We therefore could be at risk for losing key employees. Additionally substantial operating and working capital will be required and there is no assurance that CHA Biotech Co. limited, partner in our joint venture, will be able to fund their requirements.

We have a limited operating history on which investors may evaluate our operations and prospects for profitable operations. If we continue to suffer losses as we have in the past, investors may not receive any return on their investment and may their entire investment. Our prospects must be considered speculative in light of the risks, expenses and difficulties frequently encountered by companies in their early stages of development, particularly in light of the uncertainties relating to the new, competitive and rapidly evolving markets in which we anticipate we will operate. To attempt to address these risks, we must, among other things, further develop our technologies, products and services, successfully implement our research, development, marketing and commercialization strategies, respond to competitive developments and attract, retain and motivate qualified personnel. A substantial risk is involved in investing in us because, as an early stage company we have fewer resources than an established company, our management may be more likely to make mistakes at such an early stage, and we may be more vulnerable operationally and financially to any mistakes that may be made, as well as to external factors beyond our control.

Risks Relating to Technology

We are dependent on new and unproven technologies. Our risks as an early stage company are compounded by our heavy dependence on emerging and sometimes unproven technologies. If these technologies do not produce satisfactory results, our business may be harmed. Additionally some of our technologies and significant potential revenue sources involve ethically sensitive and controversial issues which could become the subject of legislation or regulations that could materially restrict our operations and, therefore, harm our financial condition, operating results and prospects for bringing our investors a return on their investment.

Over the last two years we have narrowed our potential product pool to focusing on our Retinal Program as well as our Hemangioblast and Blastomere programs, which will limit our revenue sources. Our human embryonic stem cell program is in the IND phase; our myoblast program has received FDA clearance to proceed to Phase II human clinical trials; our Hemangioblast program is in the preclinical development stage, and the Company doesn't foresee having a commercial product until clinical trials are completed. We have identified the programs that we are working to get into the clinical testing phase. We have narrowed the scope of our developmental focus to our Retinal Program and those related therapies, our blastomere program and, as part of our recently established partnership with CHA, developing products in the hemangioblast/immunology arena (see BUSINESS Section of 10K). As a result of our narrower product focus we have fewer revenue sources. Our emphasis on fewer programs may hinder our results if these programs are not successful. Although our adult stem cell myoblast program has been approved for a Phase II clinical trial, we have suspended that program indefinitely due to a lack of funding. As a result of our emphasis on our retinal program, our hemangioblast program and our blastomere program, our ability to progress as a company is more significantly hinged on the success of fewer programs and thus, a setback or adverse development relating to any one of them could potentially have a significant impact on share price as well as an inhibitory effect on our ability to raise additional capital. Additionally, we partially rely on nuclear transfer and embryonic stem cell technologies that we may not be able to successfully develop, which will prevent us from generating revenues, operating profitably or providing investors any return on their investment. We cannot guarantee that we will be able to successfully develop our retinal, hemangioblast, blastomere, nuclear transfer technology, embryonic stem cell or myoblast technologies or that such development will result in products or services with any significant commercial utility. We anticipate that the commercial sale of such products or services, and royalty/licensing fees related to our technology, would be our primary sources of revenues. If we are unable to develop our technologies, investors will likely lose their entire investment in us.

We may not be able to commercially develop our technologies and proposed product lines, which, in turn, would significantly harm our ability to earn revenues and result in a loss of investment. Our ability to commercially develop our technologies will be dictated in large part by forces outside our control which cannot be predicted, including, but not limited to, general economic conditions, the success of our research and pre-clinical and field testing, the availability of collaborative partners to finance our work in pursuing applications of nuclear transfer technology and technological or other developments in the biomedical field which, due to efficiencies, technological breakthroughs or greater acceptance in the biomedical industry, may render one or more areas of commercialization more attractive, obsolete or competitively unattractive. It is possible that one or more areas of commercialization will not be pursued at all if a collaborative partner or entity willing to fund research and development cannot be located. Our decisions regarding the ultimate products and/or services we pursue could have a significant adverse affect on our ability to earn revenue if we misinterpret trends, underestimate development costs and/or pursue wrong products or services. Any of these factors either alone or in concert could materially harm our ability to earn revenues or could result in a loss of any investment in us.

If we are unable to keep up with rapid technological changes in our field or compete effectively, we will be unable to operate profitably. We are engaged in activities in the biotechnology field, which is characterized by extensive research efforts and rapid technological progress. If we fail to anticipate or respond adequately to technological developments, our ability to operate profitably could suffer. We cannot assure you that research and discoveries by other biotechnology, agricultural, pharmaceutical or other companies will not render our technologies or potential products or services uneconomical or result in products superior to those we develop or that any technologies, products or services we develop will be preferred to any existing or newly-developed technologies, products or services.

Risks Related to Intellectual Property

Our business is highly dependent upon maintaining licenses with respect to key technology Several of the key patents we utilize are licensed to us by third parties. These licenses are subject to termination under certain circumstances (including, for example, our failure to make minimum royalty payments or to timely achieve development and commercialization benchmarks). The loss of any of such licenses, or the conversion of such licenses to non-exclusive licenses, could harm our operations and/or enhance the prospects of our competitors.

Certain of these licenses also contain restrictions, such as limitations on our ability to grant sublicenses that could materially interfere with our ability to generate revenue through the licensing or sale to third parties of important and valuable technologies that we have, for strategic reasons, elected not to pursue directly. The possibility exists that in the future we will require further licenses to complete and/or commercialize our proposed products. We cannot assure you that we will be able to acquire any such licenses on a commercially viable basis.

Certain of our technology is not protectable by patent. Certain parts of our know-how and technology are not patentable. To protect our proprietary position in such know-how and technology, we intend to require all employees, consultants, advisors and collaborators to enter into confidentiality and invention ownership agreements with us. We cannot assure you, however, that these agreements will provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use or disclosure. Further, in the absence of patent protection, competitors who independently develop substantially equivalent technology may harm our business.

Patent litigation presents an ongoing threat to our business with respect to both outcomes and costs. We have previously been involved in patent interference litigation, and it is possible that further litigation over patent matters with one or more competitors could arise. We could incur substantial litigation or interference costs in defending ourselves against suits brought against us or in suits in which we may assert our patents against others. If the outcome of any such litigation is unfavorable, our business could be materially adversely affected. To determine the priority of inventions, we may also have to participate in interference proceedings declared by the United States Patent and Trademark Office, which could result in substantial cost to us. Without additional capital, we may not have the resources to adequately defend or pursue this litigation.

We may not be able to protect our proprietary technology, which could harm our ability to operate profitably. The biotechnology and pharmaceutical industries place considerable importance on obtaining patent and trade secret protection for new technologies, products and processes. Our success will depend, to a substantial degree, on our ability to obtain and enforce patent protection for our products, preserve any trade secrets and operate without infringing the proprietary rights of others. We cannot assure you that:

- we will succeed in obtaining any patents in a timely manner or at all, or that the breadth or degree of protection of any such patents will protect our interests,
- the use of our technology will not infringe on the proprietary rights of others,
- patent applications relating to our potential products or technologies will result in the issuance of any patents or that, if issued, such patents will afford adequate protection to us or not be challenged, invalidated or infringed, and
- patents will not issue to other parties, which may be infringed by our potential products or technologies.
- we will continue to have the financial resources necessary to prosecute our existing patent applications, pay maintenance fees on patents and patent applications, or file patent applications on new inventions.

We are aware of certain patents that have been granted to others and certain patent applications that have been filed by others with respect to nuclear transfer technologies. The fields in which we operate have been characterized by significant efforts by competitors to establish dominant or blocking patent rights to gain a competitive advantage, and by considerable differences of opinion as to the value and legal legitimacy of competitors' purported patent rights and the technologies they actually utilize in their businesses.

Patents obtained by other persons may result in infringement claims against us that are costly to defend and which may limit our ability to use the disputed technologies and prevent us from pursuing research and development or commercialization of potential products. A number of other pharmaceutical, biotechnology and other companies, universities and research institutions have filed patent applications or have been issued patents relating to cell therapies, stem cells, and other technologies potentially relevant to or required by our expected products. We cannot predict which, if any, of such applications will issue as patents or the claims that might be allowed. We are aware that a number of companies have filed applications relating to stem cells. We are also aware of a number of patent applications and patents claiming use of stem cells and other modified cells to treat disease, disorder or injury.

If third party patents or patent applications contain claims infringed by either our licensed technology or other technology required to make and use our potential products and such claims are ultimately determined to be valid, there can be no assurance that we would be able to obtain licenses to these patents at a reasonable cost, if at all, or be able to develop or obtain alternative technology. If we are unable to obtain such licenses at a reasonable cost, we may not be able to develop some products commercially. We may be required to defend ourselves in court against allegations of infringement of third party patents. Patent litigation is very expensive and could consume substantial resources and create significant uncertainties. And adverse outcome in such a suit could subject us to significant liabilities to third parties, require disputed rights to be licensed from third parties, or require us to cease using such technology.

We are not in full compliance with some of our license agreements. We are not in full compliance with some of our licenses (see Our Intellectual Property in the BUSINESS section of this 10k) and due to limited financial resources we cannot guarantee that we will regain full compliance status. If we are unable to be in compliance with our license agreements, our business may be harmed.

We may not be able to adequately defend against piracy of intellectual property in foreign jurisdictions. Considerable research in the areas of stem cells, cell therapeutics and regenerative medicine is being performed in countries outside of the United States, and a number of potential competitors are located in these countries. The laws protecting intellectual property in some of those countries may not provide adequate protection to prevent our competitors from misappropriating our intellectual property. Several of these potential competitors may be further along in the process of product development and also operate large, company-funded research and development programs. As a result, our competitors may develop more competitive or affordable products, or achieve earlier patent protection or product commercialization than we are able to achieve. Competitive products may render any products or product candidates that we develop obsolete.

Regulatory Risks

We cannot market our product candidates until we receive regulatory approval. We must comply with extensive government regulations in order to obtain and maintain marketing approval for our products in the United States and abroad. The process of obtaining regulatory approval is lengthy, expensive and uncertain. In the United States, the FDA imposes substantial requirements on the introduction of biological products and many medical devices through lengthy and detailed laboratory and clinical testing procedures, sampling activities and other costly and time-consuming procedures. Satisfaction of these requirements typically takes several years and the time required to do so may vary substantially based upon the type and complexity of the biological product or medical device.

In addition, product candidates that we believe should be classified as medical devices for purposes of the FDA regulatory pathway may be determined by the FDA to be biologic products subject to the satisfaction of significantly more stringent requirements for FDA approval. Any difficulties that we encounter in obtaining regulatory approval may have a substantial adverse impact on our business and cause our stock price to significantly decline.

We cannot assure you that we will obtain FDA or foreign regulatory approval to market any of our product candidates for any indication in a timely manner or at all. If we fail to obtain regulatory approval of any of our product candidates for at least one indication, we will not be permitted to market our product candidates and may be forced to cease our operations.

Even if some of our product candidates receive regulatory approval, these approvals may be subject to conditions, and we and our third party manufacturers will in any event be subject to significant ongoing regulatory obligations and oversight. Even if any of our product candidates receives regulatory approval, the manufacturing, marketing and sale of our product candidates will be subject to stringent and ongoing government regulation. Conditions of approval, such as limiting the category of patients who can use the product, may significantly impact our ability to commercialize the product and may make it difficult or impossible for us to market a product profitably. Changes we may desire to make to an approved product, such as cell culturing changes or revised labeling, may require further regulatory review and approval, which could prevent us from updating or otherwise changing an approved product. If our product candidates are approved by the FDA or other regulatory authorities for the treatment of any indications, regulatory labeling may specify that our product candidates be used in conjunction with other therapies.

Once obtained, regulatory approvals may be withdrawn and can be expensive to maintain. Regulatory approval may be withdrawn for a number of reasons, including the later discovery of previously unknown problems with the product. Regulatory approval may also require costly post-marketing follow-up studies, and failure of our product candidates to demonstrate sufficient efficacy and safety in these studies may result in either withdrawal of marketing approval or severe limitations on permitted product usage. In addition, numerous additional regulatory requirements relating to, among other processes, the labeling, packaging, adverse event reporting, storage, advertising, promotion and record-keeping will also apply. Furthermore, regulatory agencies subject a marketed product, its manufacturer and the manufacturer's facilities to continual review and periodic inspections. Compliance with these regulatory requirements are time consuming and require the expenditure of substantial resources.

If any of our product candidates is approved, we will be required to report certain adverse events involving our products to the FDA, to provide updated safety and efficacy information and to comply with requirements concerning the advertisement and promotional labeling of our products. As a result, even if we obtain necessary regulatory approvals to market our product candidates for any indication, any adverse results, circumstances or events that are subsequently discovered, could require that we cease marketing the product for that indication or expend money, time and effort to ensure full compliance, which could have a material adverse effect on our business.

If our products do not comply with applicable laws and regulations our business will be harmed. Any failure by us, or by any third parties that may manufacture or market our products, to comply with the law, including statutes and regulations administered by the FDA or other U.S. or foreign regulatory authorities, could result in, among other things, warning letters, fines and other civil penalties, suspension of regulatory approvals and the resulting requirement that we suspend sales of our products, refusal to approve pending applications or supplements to approved applications, export or import restrictions, interruption of production, operating restrictions, closure of the facilities used by us or third parties to manufacture our product candidates, injunctions or criminal prosecution. Any of the foregoing actions could have a material adverse effect on our business.

Our products may not be accepted in the marketplace If we are successful in obtaining regulatory approval for any of our product candidates, the degree of market acceptance of those products will depend on many factors, including:

- Our ability to provide acceptable evidence and the perception of patients and the healthcare community, including third party payors, of the positive characteristics of our product candidates relative to existing treatment methods, including their safety, efficacy, cost effectiveness and/or other potential advantages,
- The incidence and severity of any adverse side effects of our product candidates,
- The availability of alternative treatments,
- The labeling requirements imposed by the FDA and foreign regulatory agencies, including the scope of approved indications and any safety warnings,
- Our ability to obtain sufficient third party insurance coverage or reimbursement for our products candidates,
- The inclusion of our products on insurance company coverage policies,
- The willingness and ability of patients and the healthcare community to adopt new technologies,
- The procedure time associated with the use of our product candidates,
- Our ability to manufacture or obtain from third party manufacturers sufficient quantities of our product candidates with acceptable quality and at an acceptable cost to meet demand, and
- Marketing and distribution support for our products.

We cannot predict or guarantee that physicians, patients, healthcare insurers, third party payors or health maintenance organizations, or the healthcare community in general, will accept or utilize any of our product candidates. Failure to achieve market acceptance would limit our ability to generate revenue and would have a material adverse effect on our business. In addition, if any of our product candidates achieve market acceptance, we may not be able to maintain that market acceptance over time if competing products or technologies are introduced that are received more favorably or are more cost-effective.

Risks Related to Domestic Governmental Regulation

Restrictions on the use of human embryonic stem cells, and the ethical, legal and social implications of that research, could prevent us from developing or gaining acceptance for commercially viable products in these areas. Some of our most important programs involve the use of stem cells that are derived from human embryos. The use of human embryonic stem cells gives rise to ethical, legal and social issues regarding the appropriate use of these cells. In the event that our research related to human embryonic stem cells becomes the subject of adverse commentary or publicity, the market price for our common stock could be significantly harmed. Some political and religious groups have voiced opposition to our technology and practices. We use stem cells derived from human embryos that have been created for in vitro fertilization procedures but are no longer desired or suitable for that use and are donated with appropriate informed consent for research use. Many research institutions, including some of our scientific collaborators, have adopted policies regarding the ethical use of human embryonic tissue. These policies may have the effect of limiting the scope of research conducted using human embryonic stem cells, thereby impairing our ability to conduct research in this field.

Despite the rescission of the President Bush's Exec order in August 2001 by President Barak Obama in March 2009, and the subsequent renewal in some funding for human embryonic stem cell lines by the NIH, the overall effect of new laws drafted by the NIH and put into effect regarding the dropping of restrictions on hES research has yet to be seen or made clear. While it is unclear whether Federal law continues to restrict the use of federal funds for human embryonic cell research, commonly referred to as hES cell research, there can be no assurance that our operations will not be restricted by any future legislative or administrative efforts by politicians or groups opposed to the development of hES cell technology or nuclear transfer technology. Additionally the executive order does not overturn the Dickey–Wicker Amendment, a 13-year-old ban on federal funding for the actual creation of new stem cell lines, an act that destroys an embryo. In the United States these efforts still must be funded privately or by state governments. Further, there can be no assurance that legislative or administrative restrictions directly or indirectly delaying, limiting or preventing the use of hES technology, nuclear transfer technology, IPS technology, the use of human embryonic material, or the sale, manufacture or use of products or services derived from nuclear transfer technology or other hES technology will not be adopted or extended in the future.

Because we or our collaborators must obtain regulatory approval to market our products in the United States and other countries, we cannot predict whether or when we will be permitted to commercialize our products. Federal, state and local governments in the United States and governments in other countries have significant regulations in place that govern many of our activities. We are or may become subject to various federal, state and local laws, regulations and recommendations relating to safe working conditions, laboratory and manufacturing practices, the experimental use of animals and the use and disposal of hazardous or potentially hazardous substances used in connection with our research and development work. The preclinical testing and clinical trials of the products that we or our collaborators develop are subject to extensive government regulation that may prevent us from creating commercially viable products from our discoveries. In addition, the sale by us or our collaborators of any commercially viable product will be subject to government regulation from several standpoints, including manufacturing, advertising and promoting, selling and marketing, labeling, and distributing.

If, and to the extent that, we are unable to comply with these regulations, our ability to earn revenues will be materially and negatively impacted. The regulatory process, particularly in the biotechnology field, is uncertain, can take many years and requires the expenditure of substantial resources. Biological drugs and non-biological drugs are rigorously regulated. In particular, proposed human pharmaceutical therapeutic product candidates are subject to rigorous preclinical and clinical testing and other requirements by the FDA in the United States and similar health authorities in other countries in order to demonstrate safety and efficacy. We may never obtain regulatory approval to market our proposed products. For additional information about governmental regulations that will affect our planned and intended business operations, see "DESCRIPTION OF BUSINESS—*Government Regulation*" above.

Our products may not receive FDA approval, which would prevent us from commercially marketing our products and producing revenues. The FDA and comparable government agencies in foreign countries impose substantial regulations on the manufacture and marketing of pharmaceutical products through lengthy and detailed laboratory, pre-clinical and clinical testing procedures, sampling activities and other costly and time-consuming procedures. Satisfaction of these regulations typically takes several years or more and varies substantially based upon the type, complexity and novelty of the proposed product. We cannot assure you that FDA approvals for any products developed by us will be granted on a timely basis, if at all. Any such delay in obtaining, or failure to obtain, such approvals could have a material adverse effect on the marketing of our products and our ability to generate product revenue. For additional information about governmental regulations that will affect our planned and intended business operations, see "DESCRIPTION OF BUSINESS—*Government Regulation*" above.

For-profit entities may be prohibited from benefiting from grant funding. There has been much publicity about grant resources for stem cell research, including Proposition 71 in California, which is described more fully under the heading "DESCRIPTION OF BUSINESS—*California Proposition 71*" above. While the California Institute CIRM has provided grant funds to some for-profit entities, there is no guarantee that it will continue to do so, particularly given the state's current budgetary conditions. As a result of these uncertainties regarding Proposition 71, we cannot assure you that funding, if any, will be available to us.

The government maintains certain rights in technology that we develop using government grant money and we may lose the revenues from such technology if we do not commercialize and utilize the technology pursuant to established government guidelines. Certain of our and our licensors' research has been or is being funded in part by government grants. In connection with certain grants, the U.S. government retains rights in the technology developed with the grant. These rights could restrict our ability to fully capitalize upon the value of this research.

Risks Related to International Regulation

We may not be able to obtain required approvals in other countries. The requirements governing the conduct of clinical trials and cell culturing and marketing of our product candidates outside the United States vary widely from country to country. Foreign approvals may take longer to obtain than FDA approvals and can require, among other things, additional testing and different clinical trial designs. Foreign regulatory approval processes generally include all of the risks associated with the FDA approval processes. Some foreign regulatory agencies also must approve prices of the products. Regulatory approval in one country does not ensure regulatory approval in another, but a failure or delay in obtaining regulatory approval in one country may negatively impact the regulatory process in others. We may not be able to file for regulatory approvals and may not receive necessary approvals to market our product candidates in any foreign country. If we fail to comply with these regulatory requirements or fail to obtain and maintain required approvals in any foreign country, we will not be able to sell our product candidates in that country and our ability to generate revenue will be adversely affected.

Financial Risks

We may not be able to raise the required capital to conduct our operations and develop and commercialize our products. We require substantial additional capital resources in order to conduct our operations and develop and commercialize our products and run our facilities. We will need significant additional funds or a collaborative partner, or both, to finance the research and development activities of our therapies and potential products. Accordingly, we are continuing to pursue additional sources of financing. Our future capital requirements will depend upon many factors, including:

- The continued progress and cost of our research and development programs,
- The progress with pre-clinical studies and clinical trials,
- The time and costs involved in obtaining regulatory clearance,
- The costs in preparing, filing, prosecuting, maintaining and enforcing patent claims,
- The costs of developing sales, marketing and distribution channels and our ability to sell the therapies/products if developed,
- The costs involved in establishing manufacturing capabilities for commercial quantities of our proposed products,
- Competing technological and market developments,
- Market acceptance of our proposed products,
- The costs for recruiting and retaining employees and consultants, and
- The costs for educating and training physicians about our proposed therapies/products.

Additional financing through strategic collaborations, public or private equity financings or other financing sources may not be available on acceptable terms, or at all. Additional equity financing could result in significant dilution to our shareholders. Further, if additional funds are obtained through arrangements with collaborative partners, these arrangements may require us to relinquish rights to some of our technologies, product candidates or products that we would otherwise seek to develop and commercialize on our own. If sufficient capital is not available, we may be required to delay, reduce the scope of or eliminate one or more of our programs or potential products, any of which could have a material adverse affect on our financial condition or business prospects.

Risks Relating to Our Debt Financings

If we are required for any reason to repay our outstanding debt financings we would be required to deplete our working capital, if available, or raise additional funds. Our failure to repay the convertible debentures, if required, could result in legal action against us, which could require the sale of substantial assets. We have outstanding, as of December 31, 2009, \$14,014,584 aggregate original principal amount of debt. We are required to repay on a monthly basis, by payment, at our option, with cash or with shares of our common stock.

There are a large number of shares underlying our debt in full, and warrants that and the Company is liable to provide. The sale of these shares may depress the market price of our common stock. As of December 31, 2009, on an aggregated basis our debt and preferred stock financings may result in being converted into 148,000,000 shares of our common stock, and warrants and options that may be converted into approximately 219,000,000 shares of our common stock.

Sales of a substantial number of shares of our common stock in the public market could adversely affect the market price for our common stock and make it more difficult for you to sell shares of our common stock at times and prices that you feel are appropriate.

The issuance of shares upon conversion of the convertible debentures and exercise of outstanding warrants will cause immediate and substantial dilution to our existing stockholders. The issuance of shares upon conversion of the convertible debentures and exercise of warrants, including the replacement warrants, will result in substantial dilution to the interests of other stockholders since the selling security holders may ultimately convert and sell the full amount issuable on conversion. Although no single selling security holder may convert its convertible debentures and/or exercise its warrants if such conversion or exercise would cause it to own more than 4.99% of our outstanding common stock, this restriction does not prevent each selling security holder from converting and/or exercising some of its holdings and then converting the rest of its holdings. In this way, each selling security holder could sell more than this limit while never holding more than this limit. There is no upper limit on the number of shares that may be issued which will have the effect of further diluting the proportionate equity interest and voting power of holders of our common stock.

Our outstanding indebtedness on our Debentures imposes certain restrictions on how we conduct our business. In addition, all of our assets, including our intellectual property, are pledged to secure this indebtedness. If we fail to meet our obligations under the Debentures, our payment obligations may be accelerated and the collateral securing the debt may be sold to satisfy these obligations.

The Debentures and related agreements contain various provisions that restrict our operating flexibility. Pursuant to the agreement, we may not, among other things:

- Except for certain permitted indebtedness, enter into, create, incur, assume, guarantee or suffer to exist any indebtedness for borrowed money of any kind, including but not limited to, a guarantee, on or with respect to any of its property or assets now owned or hereafter acquired or any interest therein or any income or profits therefrom,
- Except for certain permitted liens, enter into, create, incur, assume or suffer to exist any liens of any kind, on or with respect to any of its property or assets now owned or hereafter acquired or any interest therein or any income or profits therefrom,
- Amend our certificate of incorporation, bylaws or other charter documents so as to materially and adversely affect any rights of holders of the Debentures and Warrants,
- Repay, repurchase or offer to repay, repurchase or otherwise acquire more than a de minimis number of shares of our common stock or common stock equivalents,
- Enter into any transaction with any of our affiliates, which would be required to be disclosed in any public filing with the Securities and Exchange Commission, unless such transaction is made on an arm's-length basis and expressly approved by a majority of our disinterested directors (even if less than a quorum otherwise required for board approval),

- Pay cash dividends or distributions on any of our equity securities,
- Grant certain registration rights,
- Enter into any agreement with respect to any of the foregoing, or
- Make cash expenditures in excess of \$1,000,000 per calendar month, subject to certain specified exceptions.

These provisions could have important consequences for us, including (i) making it more difficult for us to obtain additional debt financing from another lender, or obtain new debt financing on terms favorable to us, (ii) causing us to use a portion of our available cash for debt repayment and service rather than other perceived needs and/or (iii) impacting our ability to take advantage of significant, perceived business opportunities.

Our obligations under a Securities Purchase Agreement are secured by substantially all of our assets. Our obligations under certain security agreements, executed in connection with certain financings, with the holders of the debentures and warrants are secured by substantially all of our assets. As a result, if we default under the terms of the security agreement, such holders could foreclose on their security interest and liquidate all of our assets. This would cause operations to cease.

Risks Related to Third Party Reliance

We depend on third parties to assist us in the conduct of our preclinical studies and clinical trials, and any failure of those parties to fulfill their obligations could result in costs and delays and prevent us from obtaining regulatory approval or successfully commercializing our product candidates on a timely basis, if at all. We engage consultants and contract research organizations to help design, and to assist us in conducting, our preclinical studies and clinical trials and to collect and analyze data from those studies and trials. The consultants and contract research organizations we engage interact with clinical investigators to enroll patients in our clinical trials. As a result, we depend on these consultants and contract research organizations to perform the studies and trials in accordance with the investigational plan and protocol for each product candidate and in compliance with regulations and standards, commonly referred to as "good clinical practice", for conducting, recording and reporting results of clinical trials to assure that the data and results are credible and accurate and the trial participants are adequately protected, as required by the FDA and foreign regulatory agencies. We may face delays in our regulatory approval process if these parties do not perform their obligations in a timely or competent fashion or if we are forced to change service providers.

We depend on our collaborators to help us develop and test our proposed products, and our ability to develop and commercialize products may be impaired or delayed if collaborations are unsuccessful. Our strategy for the development, clinical testing and commercialization of our proposed products requires that we enter into collaborations with corporate partners, licensors, licensees and others. We are dependent upon the subsequent success of these other parties in performing their respective responsibilities and the continued cooperation of our partners. Under agreements with collaborators, we may rely significantly on such collaborators to, among other things:

- Design and conduct advanced clinical trials in the event that we reach clinical trials;
- Fund research and development activities with us;
- Pay us fees upon the achievement of milestones; and

- Market with us any commercial products that result from our collaborations.

Our collaborators may not cooperate with us or perform their obligations under our agreements with them. We cannot control the amount and timing of our collaborators' resources that will be devoted to our research and development activities related to our collaborative agreements with them. Our collaborators may choose to pursue existing or alternative technologies in preference to those being developed in collaboration with us.

The development and commercialization of potential products will be delayed if collaborators fail to conduct these activities in a timely manner, or at all. In addition, our collaborators could terminate their agreements with us and we may not receive any development or milestone payments. If we do not achieve milestones set forth in the agreements, or if our collaborators breach or terminate their collaborative agreements with us, our business may be materially harmed.

We are in a Strategic Joint Venture which may slow, impede or result in the termination of potential therapeutic products whose development is now the responsibility of the partnership and not solely of the Company. In 2008, the Company entered into a new partnership (CHA) and as a result, we are subject to 3rd party interests and control issues, not the least of which relates to certain of our employees no longer being exclusively managed by us. We therefore could be at risk for losing key employees. Additionally substantial operating and working capital will be required and there is no assurance that CHA Biotech Co. limited, partner in our joint venture, will be able to fund their requirements. Any failure on their part could negatively impact our product development, human capital and financial resources allocated to other of our programs.

Our reliance on the activities of our non-employee consultants, research institutions, and scientific contractors, whose activities are not wholly within our control, may lead to delays in development of our proposed products. We rely extensively upon and have relationships with scientific consultants at academic and other institutions, some of whom conduct research at our request, and other consultants with expertise in clinical development strategy or other matters. These consultants are not our employees and may have commitments to, or consulting or advisory contracts with, other entities that may limit their availability to us. We have limited control over the activities of these consultants and, except as otherwise required by our collaboration and consulting agreements to the extent they exist, can expect only limited amounts of their time to be dedicated to our activities. These research facilities may have commitments to other commercial and non-commercial entities. We have limited control over the operations of these laboratories and can expect only limited amounts of time to be dedicated to our research goals.

Preclinical & Clinical Product Development Risks

Limited experience in conducting and managing preclinical development activities, clinical trials and the application process necessary to obtain regulatory approvals. Our limited experience in conducting and managing preclinical development activities, clinical trials and the application process necessary to obtain regulatory approvals might prevent us from successfully designing or implementing a preclinical study or clinical trial. If we do not succeed in conducting and managing our preclinical development activities or clinical trials, or in obtaining regulatory approvals, we might not be able to commercialize our product candidates, or might be significantly delayed in doing so, which will materially harm our business.

Our ability to generate revenues from any of our product candidates will depend on a number of factors, including our ability to successfully complete clinical trials, obtain necessary regulatory approvals and implement our commercialization strategy. In addition, even if we are successful in obtaining necessary regulatory approvals and bringing one or more product candidates to market, we will be subject to the risk that the marketplace will not accept those products. We may, and anticipate that we will need to, transition from a company with a research and development focus to a company capable of supporting commercial activities and we may not succeed in such a transition.

Because of the numerous risks and uncertainties associated with our product development and commercialization efforts, we are unable to predict the extent of our future losses or when or if we will become profitable. Our failure to successfully commercialize our product candidates or to become and remain profitable could depress the market price of our common stock and impair our ability to raise capital, expand our business, diversify our product offerings and continue our operations.

None of the products that we are currently developing has been approved by the FDA or any similar regulatory authority in any foreign country. Our approach of using cell-based therapy for the treatment of Retinal disease (we are beginning with a treatment for Startgardt's disease, for which we filed an IND with the FDA) is risky and unproven and no products using this approach have received regulatory approval in the United States or Europe. We believe that no company has yet been successful in its efforts to obtain regulatory approval in the United States or Europe of a cell-based therapy product for the treatment of retinal disease or degeneration in humans. Cell-based therapy products, in general, may be susceptible to various risks, including undesirable and unintended side effects, unintended immune system responses, inadequate therapeutic efficacy or other characteristics that may prevent or limit their approval by regulators or commercial use. Many companies in the industry have suffered significant setbacks in advanced clinical trials, despite promising results in earlier trials. If our clinical trials are unsuccessful or significantly delayed, or if we do not complete our clinical trials, we will not receive regulatory approval for or be able to commercialize our product candidates.

Our lead product candidate, our therapeutic Retinal program for Startgardt's disease has not yet started Phase I Clinical Trials and has not yet received approval from the FDA or any similar foreign regulatory authority for any indication. We cannot market any product candidate until regulatory agencies grant approval or licensure. In order to obtain regulatory approval for the sale of any product candidate, we must, among other requirements, provide the FDA and similar foreign regulatory authorities with preclinical and clinical data that demonstrate to the satisfaction of regulatory authorities that our product candidates are safe and effective for each indication under the applicable standards relating to such product candidate. The preclinical studies and clinical trials of any product candidates must comply with the regulations of the FDA and other governmental authorities in the United States and similar agencies in other countries. Our therapeutic Retinal program may never receive approval from the FDA or any similar foreign regulatory authority.

We may experience numerous unforeseen events during, or as a result of, the clinical trial process that could delay or prevent regulatory approval and/or commercialization of our product candidates, including the following:

- The FDA or similar foreign regulatory authorities may find that our product candidates are not sufficiently safe or effective or may find our cell culturing processes or facilities unsatisfactory,

- Officials at the FDA or similar foreign regulatory authorities may interpret data from preclinical studies and clinical trials differently than we do,
- Our clinical trials may produce negative or inconclusive results or may not meet the level of statistical significance required by the FDA or other regulatory authorities, and we may decide, or regulators may require us, to conduct additional preclinical studies and/or clinical trials or to abandon one or more of our development programs,
- The FDA or similar foreign regulatory authorities may change their approval policies or adopt new regulations,
- There may be delays or failure in obtaining approval of our clinical trial protocols from the FDA or other regulatory authorities or obtaining institutional review board approvals or government approvals to conduct clinical trials at prospective sites,
- We, or regulators, may suspend or terminate our clinical trials because the participating patients are being exposed to unacceptable health risks or undesirable side effects,
- We may experience difficulties in managing multiple clinical sites,
- Enrollment in our clinical trials for our product candidates may occur more slowly than we anticipate, or we may experience high drop-out rates of subjects in our clinical trials, resulting in significant delays,
- We may be unable to manufacture or obtain from third party manufacturers sufficient quantities of our product candidates for use in clinical trials, and
- Our product candidates may be deemed unsafe or ineffective, or may be perceived as being unsafe or ineffective, by healthcare providers for a particular indication.

Any delay of regulatory approval will harm our business.

Risks Related to Competition

The market for therapeutic stem cell products is highly competitive. We expect that our most significant competitors will be fully integrated pharmaceutical companies and more established biotechnology companies. These companies are developing stem cell-based products and they have significantly greater capital resources in research and development, manufacturing, testing, obtaining regulatory approvals, and marketing capabilities. Many of these potential competitors are further along in the process of product development and also operate large, company-funded research and development programs. As a result, our competitors may develop more competitive or affordable products, or achieve earlier patent recognition and filings.

The biotechnology industries are characterized by rapidly evolving technology and intense competition. Our competitors include major multinational pharmaceutical companies, specialty biotechnology companies and chemical and medical products companies operating in the fields of regenerative medicine, cell therapy, tissue engineering and tissue regeneration. Many of these companies are well-established and possess technical, research and development, financial and sales and marketing resources significantly greater than ours. In addition, certain smaller biotech companies have formed strategic collaborations, partnerships and other types of joint ventures with larger, well established industry competitors that afford these companies' potential research and development and commercialization advantages. Academic institutions, governmental agencies and other public and private research organizations are also conducting and financing research activities which may produce products directly competitive to those we are developing. Moreover, many of these competitors may be able to obtain patent protection, obtain FDA and other regulatory approvals and begin commercial sales of their products before we do.

In the general area of cell-based therapies (including both ES cell and autologous cell therapies), we compete with a variety of companies, most of whom are specialty biotechnology companies, such as Geron Corporation, Genzyme Corporation, StemCells, Inc., Aastrom Biosciences, Inc., Viacell, Inc., MG Biotherapeutics, Celgene, BioHeart, Inc., Baxter Healthcare, Osiris Therapeutics and Cytori. Each of these companies are well-established and have substantial technical and financial resources compared to us. However, as cell-based products are only just emerging as medical therapies, many of our direct competitors are smaller biotechnology and specialty medical products companies. These smaller companies may become significant competitors through rapid evolution of new technologies. Any of these companies could substantially strengthen their competitive position through strategic alliances or collaborative arrangements with large pharmaceutical or biotechnology companies.

The diseases and medical conditions we are targeting have no effective long-term therapies. Nevertheless, we expect that our technologies and products will compete with a variety of therapeutic products and procedures offered by major pharmaceutical companies (in the Retinal Disease indication one of our primary competitors is Celgene). Many pharmaceutical and biotechnology companies are investigating new drugs and therapeutic approaches for the same purposes, which may achieve new efficacy profiles, extend the therapeutic window for such products, alter the prognosis of these diseases, or prevent their onset. We believe that our products, when and if successfully developed, will compete with these products principally on the basis of improved and extended efficacy and safety and their overall economic benefit to the health care system.

Competition for any stem cell products that we may develop may be in the form of existing and new drugs, other forms of cell transplantation, ablative and simulative procedures, and gene therapy. We believe that some of our competitors are also trying to develop stem and progenitor cell-based technologies. We expect that all of these products will compete with our potential stem cell products based on efficacy, safety, cost and intellectual property positions. We may also face competition from companies that have filed patent applications relating to the use of genetically modified cells to treat disease, disorder or injury. In the event our therapies should require the use of such genetically modified cells, we may be required to seek licenses from these competitors in order to commercialize certain of our proposed products, and such licenses may not be granted.

If we develop products that receive regulatory approval, they would then have to compete for market acceptance and market share. For certain of our potential products, an important success factor will be the timing of market introduction of competitive products. This timing will be a function of the relative speed with which we and our competitors can develop products, complete the clinical testing and approval processes, and supply commercial quantities of a product to market. These competitive products may also impact the timing of clinical testing and approval processes by limiting the number of clinical investigators and patients available to test our potential products.

Our competition includes both public and private organizations and collaborations among academic institutions and large pharmaceutical companies, most of which have significantly greater experience and financial resources than we do. Private and public academic and research institutions also compete with us in the research and development of therapeutic products based on human embryonic and adult stem cell technologies. In the past several years, the pharmaceutical industry has selectively entered into collaborations with both public and private organizations to explore the possibilities that stem cell therapies may present for substantive breakthroughs in the fight against disease.

The biotechnology and pharmaceutical industries are characterized by intense competition. We compete against numerous companies, both domestic and foreign, many of which have substantially greater experience and financial and other resources than we have. Several such enterprises have initiated cell therapy research programs and/or efforts to treat the same diseases targeted by us. Companies such as Geron Corporation, Genzyme Corporation, StemCells, Inc., Aastrom Biosciences, Inc. and Viacell, Inc., as well as others, many of which have substantially greater resources and experience in our fields than we do, are well situated to effectively compete with us. Any of the world's largest pharmaceutical companies represents a significant actual or potential competitor with vastly greater resources than ours. These companies hold licenses to genetic selection technologies and other technologies that are competitive with our technologies. These and other competitive enterprises have devoted, and will continue to devote, substantial resources to the development of technologies and products in competition with us.

In addition, many of our competitors have significantly greater experience than we have in the development, pre-clinical testing and human clinical trials of biotechnology and pharmaceutical products, in obtaining FDA and other regulatory approvals of such products and in manufacturing and marketing such products. Accordingly our competitors may succeed in obtaining FDA approval for products more rapidly or effectively than we can. Our competitors may also be the first to discover and obtain a valid patent to a particular stem cell technology which may effectively block all others from doing so. It will be important for us or our collaborators to be the first to discover any stem cell technology that we are seeking to discover. Failure to be the first could prevent us from commercializing all of our research and development affected by that discovery. Additionally, if we commence commercial sales of any products, we will also be competing with respect to manufacturing efficiency and sales and marketing capabilities, areas in which we have no experience.

General Risks Relating to Our Business

We are subject to litigation that will be costly to defend or pursue and uncertain in its outcomeOur business may bring us into conflict with our licensees, licensors, or others with whom we have contractual or other business relationships, or with our competitors or others whose interests differ from ours. If we are unable to resolve those conflicts on terms that are satisfactory to all parties, we may become involved in litigation brought by or against us. That litigation is likely to be expensive and may require a significant amount of management's time and attention, at the expense of other aspects of our business. The outcome of litigation is always uncertain, and in some cases could include judgments against us that require us to pay damages, enjoin us from certain activities, or otherwise affect our legal or contractual rights, which could have a significant adverse effect on our business. See "LEGAL PROCEEDINGS" set forth in Part I, Item 3 of this Annual Report on Form 10-K for a more complete discussion of currently pending litigation against the Company.

We may not be able to obtain third-party patient reimbursement or favorable product pricing, which would reduce our ability to operate profitably. Our ability to successfully commercialize certain of our proposed products in the human therapeutic field may depend to a significant degree on patient reimbursement of the costs of such products and related treatments at acceptable levels from government authorities, private health insurers and other organizations, such as health maintenance organizations. We cannot assure you that reimbursement in the United States or foreign countries will be available for any products we may develop or, if available, will not be decreased in the future, or that reimbursement amounts will not reduce the demand for, or the price of, our products with a consequent harm to our business. We cannot predict what additional regulation or legislation relating to the health care industry or third-party coverage and reimbursement may be enacted in the future or what effect such regulation or legislation may have on our business. If additional regulations are overly onerous or expensive, or if health care related legislation makes our business more expensive or burdensome than originally anticipated, we may be forced to significantly downsize our business plans or completely abandon our business model.

Our products are likely to be expensive to manufacture, and they may not be profitable if we are unable to control the costs to manufacture them. Our products are likely to be significantly more expensive to manufacture than most other drugs currently on the market today. Our present manufacturing processes produce modest quantities of product intended for use in our ongoing research activities, and we have not developed processes, procedures and capability to produce commercial volumes of product. We hope to substantially reduce manufacturing costs through process improvements, development of new science, increases in manufacturing scale and outsourcing to experienced manufacturers. If we are not able to make these or other improvements, and depending on the pricing of the product, our profit margins may be significantly less than that of most drugs on the market today. In addition, we may not be able to charge a high enough price for any cell therapy product we develop, even if they are safe and effective, to make a profit. If we are unable to realize significant profits from our potential product candidates, our business would be materially harmed.

Our current source of revenues depends on the stability and performance of our sub-licensees Our ability to collect royalties on product sales from our sub-licensees will depend on the financial and operational success of the companies operating under a sublicense. Revenues from those licensees will depend upon the financial and operational success of those third parties. We cannot assure you that these licensees will be successful in obtaining requisite financing or in developing and successfully marketing their products. These licensees may experience unanticipated obstacles including regulatory hurdles, and scientific or technical challenges, which could have the effect of reducing their ability to generate revenues and pay us royalties.

We depend on key personnel for our continued operations and future success, and a loss of certain key personnel could significantly hinder our ability to move forward with our business plan. Because of the specialized nature of our business, we are highly dependent on our ability to identify, hire, train and retain highly qualified scientific and technical personnel for the research and development activities we conduct or sponsor. The loss of one or more certain key executive officers, or scientific officers, would be significantly detrimental to us. In addition, recruiting and retaining qualified scientific personnel to perform research and development work is critical to our success. Our anticipated growth and expansion into areas and activities requiring additional expertise, such as clinical testing, regulatory compliance, manufacturing and marketing, will require the addition of new management personnel and the development of additional expertise by existing management personnel. There is intense competition for qualified personnel in the areas of our present and planned activities, and there can be no assurance that we will be able to continue to attract and retain the qualified personnel necessary for the development of our business. The failure to attract and retain such personnel or to develop such expertise would adversely affect our business.

Our credibility as a business operating in the field of human embryonic stem cells is largely dependent upon the support of our Ethics Advisory Board. Because the use of human embryonic stem cells gives rise to ethical, legal and social issues, we have instituted an Ethics Advisory Board. Our Ethics Advisory Board is made up of highly qualified individuals with expertise in the field of human embryonic stem cells. We cannot assure you that these members will continue to serve on our Ethics Advisory Board, and the loss of any such member may affect the credibility and effectiveness of the Board. As a result, our business may be materially harmed in the event of any such loss.

Our insurance policies may be inadequate and potentially expose us to unrecoverable risks. We have limited director and officer insurance and commercial insurance policies. Any significant insurance claims would have a material adverse effect on our business, financial condition and results of operations. Insurance availability, coverage terms and pricing continue to vary with market conditions. We endeavor to obtain appropriate insurance coverage for insurable risks that we identify, however, we may fail to correctly anticipate or quantify insurable risks, we may not be able to obtain appropriate insurance coverage, and insurers may not respond as we intend to cover insurable events that may occur. We have observed rapidly changing conditions in the insurance markets relating to nearly all areas of traditional corporate insurance. Such conditions have resulted in higher premium costs, higher policy deductibles, and lower coverage limits. For some risks, we may not have or maintain insurance coverage because of cost or availability.

We have no product liability insurance, which may leave us vulnerable to future claims we will be unable to satisfy. The testing, manufacturing, marketing and sale of human therapeutic products entail an inherent risk of product liability claims, and we cannot assure you that substantial product liability claims will not be asserted against us. We have no product liability insurance. In the event we are forced to expend significant funds on defending product liability actions, and in the event those funds come from operating capital, we will be required to reduce our business activities, which could lead to significant losses.

We cannot assure you that adequate insurance coverage will be available in the future on acceptable terms, if at all, or that, if available, we will be able to maintain any such insurance at sufficient levels of coverage or that any such insurance will provide adequate protection against potential liabilities. Whether or not a product liability insurance policy is obtained or maintained in the future, any product liability claim could harm our business or financial condition.

We presently have members of management and other key employees located in various locations throughout the country which adds complexities to the operation of the business. Presently, we have members of management and other key employees located in both California and Massachusetts, which adds complexities to the operation of our business.

We face risks related to compliance with corporate governance laws and financial reporting standards. The Sarbanes-Oxley Act of 2002, as well as related new rules and regulations implemented by the Securities and Exchange Commission and the Public Company Accounting Oversight Board, require changes in the corporate governance practices and financial reporting standards for public companies. These new laws, rules and regulations, including compliance with Section 404 of the Sarbanes-Oxley Act of 2002 relating to internal control over financial reporting, referred to as Section 404, have materially increased our legal and financial compliance costs and made some activities more time-consuming and more burdensome.

Risks Relating to Our Common Stock

Stock prices for biotechnology companies have historically tended to be very volatile. Stock prices and trading volumes for many biotechnology companies fluctuate widely for a number of reasons, including but not limited to the following factors, some of which may be unrelated to their businesses or results of operations:

- Clinical trial results,
- The amount of cash resources and ability to obtain additional funding,
- Announcements of research activities, business developments, technological innovations or new products by companies or their competitors,
- Entering into or terminating strategic relationships,
- Changes in government regulation,
- Disputes concerning patents or proprietary rights,
- Changes in revenues or expense levels,
- Public concern regarding the safety, efficacy or other aspects of the products or methodologies being developed,
- Reports by securities analysts,
- Activities of various interest groups or organizations,
- Media coverage, and
- Status of the investment markets.

This market volatility, as well as general domestic or international economic, market and political conditions, could materially and adversely affect the market price of our common stock and the return on your investment.

A significant number of shares of our common stock have become available for sale and their sale could depress the price of our common stock. In 2008, a significant number of our outstanding securities that were previously restricted became eligible for sale under Rule 144 of the Securities Act, and their sale will not be subject to any volume limitations.

We may also sell a substantial number of additional shares of our common stock in connection with a private placement or public offering of shares of our common stock (or other series or class of capital stock to be designated in the future). The terms of any such private placement would likely require us to register the resale of any shares of capital stock issued or issuable in the transaction. We have also issued common stock to certain parties, such as vendors and service providers, as payment for products and services. Under these arrangements, we may agree to register the shares for resale soon after their issuance. We may also continue to pay for certain goods and services with equity, which would dilute your interest in the company.

Sales of a substantial number of shares of our common stock under any of the circumstances described above could adversely affect the market price for our common stock and make it more difficult for you to sell shares of our common stock at times and prices that you feel are appropriate.

We do not intend to pay cash dividends on our common stock in the foreseeable future. Any payment of cash dividends will depend upon our financial condition, results of operations, capital requirements and other factors and will be at the discretion of our board of directors. We do not anticipate paying cash dividends on our common stock in the foreseeable future. Furthermore, we may incur additional indebtedness that may severely restrict or prohibit the payment of dividends.

Our common stock is subject to "penny stock" regulations and restrictions on initial and secondary broker-dealer sales. The Securities and Exchange Commission (SEC) has adopted regulations which generally define "penny stock" to be any listed, trading equity security that has a market price less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exemptions. Penny stocks are subject to certain additional oversight and regulatory requirements. Brokers and dealers affecting transactions in our common stock in many circumstances must obtain the written consent of a customer prior to purchasing our common stock, must obtain information from the customer and must provide disclosures to the customer. These requirements may restrict the ability of broker-dealers to sell our common stock and may affect your ability to sell your shares of our common stock in the secondary market.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our headquarters are located in Worcester, Massachusetts, where we lease approximately 14,000 square foot of office and laboratory facilities. The monthly rent for this property is \$20,271. We have the Worcester facility under an eight year sub-lease which expires on April 30, 2010. We also lease approximately 700 square feet of corporate office space in Santa Monica, CA. The lease for our Santa Monica office terminates on February 28, 2010. The monthly rent for this space is \$2,170.

Item 3. Legal Proceedings

Gary D. Aronson v. Advanced Cell Technology, Inc., Superior Court of California, County of Alameda, Case No. RG07348990 *John S. Gorton v. Advanced Cell Technology, Inc, Superior Court of California, County of Alameda Case No. RG07350437.* On October 1, 2007 Gary D. Aronson brought suit against us with respect to a dispute over the interpretation of the anti-dilution provisions of our warrants issued to Mr. Aronson on or about September 14, 2005. John S. Gorton initiated a similar suit on October 10, 2007. The two cases have been consolidated. The plaintiffs allege that we breached warrants to purchase securities issued by us to these individuals by not timely issuing stock after the warrants were exercised, failing to issue additional shares of stock in accordance with the terms of the warrants and failing to provide proper notice of certain events allegedly triggering Plaintiffs' purported rights to additional shares. Plaintiffs assert monetary damages in excess of \$14 million. Plaintiffs may alternatively seek additional shares in the Company with a value potentially in excess of \$14 million, or may seek a combination of monetary damages and shares in the Company. Plaintiffs also seek prejudgment interest and attorney fees. Discovery is completed, but no conclusions have been reached as to the potential exposure to us or whether we have liability. A trial date has been set for March 22, 2010.

Alexandria Real Estate-79/96 Charlestown Navy Yard v. Advanced Cell Technology, Inc. and Mytogen, Inc. (Suffolk County, Massachusetts) : The Company and its subsidiary Mytogen, Inc. are currently defending themselves against a civil action brought in Suffolk Superior Court, No. 09-442-B, by their former landlord at 79/96 Thirteenth Street, Charlestown, Massachusetts, a property vacated by us and Mytogen effective May 31, 2008. In that action, Alexandria Real Estate-79/96 Charlestown Navy Yard (“ARE”) is alleging that it has been unable to relet the premises and therefore seeking rent for the vacated premises since September 2008. Alexandria is also seeking certain clean-up and storage expenses. We are defending against the suit, claiming that ARE had breached the covenant of quiet enjoyment as of when Mytogen vacated, and that had ARE used reasonable diligence in its efforts to secure a new tenant, it would have been more successful. No trial date has been set.

Bristol Investment Fund, Ltd. as Collateral Agent for the Holders of Certain Original Issue Discount Senior Convertible Debentures v. Alexandria Real Estate—79/96 Charlestown Navy Yard, LLC (Suffolk Superior Court). The Company has been named as a third party defendant in this action, filed September 16, 2009, in which the plaintiff alleges that Alexandria Real Estate (“Alexandria”) improperly charged a trustee holding approximately \$146,000 of funds in a Company account that Bristol claimed as collateral. Alexandria brought a third party complaint against the Company for indemnification.

Bristol Investment Fund, Ltd. and Bristol Capital, LLC v. Advanced Cell Technology, Inc. and Mytogen, Inc. (Supreme Court of the State of New York, County of New York): On March 9, 2009, plaintiffs filed a complaint and summons in the Supreme Court of the State of New York, County of New York against the Company and its subsidiary Mytogen, Inc. Plaintiffs’ complaint alleges, among other things, that the Company has breached the terms of certain contracts with plaintiffs; namely, convertible debentures and a consulting agreement. Plaintiffs seek preliminary and permanent injunctive relief directing the Company to deliver to plaintiff Bristol Investment Fund, Ltd. (“Bristol”) 2.5 million shares of its common stock, declaring a conversion price of \$0.02 for the convertible debentures held by plaintiffs, and directing the Company to honor plaintiff’s future conversion requests. Plaintiffs also seek compensatory damages in an amount to be determined at trial, but alleged in the complaint to exceed \$1.5 million. On May 1, 2009, the Company filed an answer to plaintiffs’ complaint. On May 13, 2009, the Company filed a motion to stay the action and to compel arbitration of all claims by Bristol. The court has not yet ruled on the Company’s motion to stay the action and to compel arbitration. On or about September 16, 2009, plaintiffs filed an order to show cause, seeking the issuance of a preliminary injunction directing the Company to deliver to Bristol 2.5 shares of its common stock pursuant to a convertible debenture and 47.4 million shares of its common stock pursuant to common stock purchase warrants, declaring a conversion price of \$0.02 for the convertible debenture held by plaintiffs, and enjoining or restraining the Company from issuing shares of its common stock to any entity other than plaintiffs or the other holders of convertible debentures. On September 25, 2009, the Company submitted its response in opposition to plaintiffs’ motion and moved by cross-motion for dismissal of the complaint, based on the terms of the consent, waiver, amendment and exchange agreement entered into between the Company and the holders of over 95% of the outstanding principal amount of the Amended and Restated Debentures. The court has not yet ruled on the respective motions. The Company intends to continue to contest the case vigorously.

Item 4. [Reserved]

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is quoted on the OTCBB under the symbol "ACTC.OB." For the periods indicated, the following table sets forth the high and low bid prices per share of our common stock. These prices represent inter-dealer quotations without retail markup, markdown, or commission and may not necessarily represent actual transactions.

Fiscal Year 2008	High Bid	Low Bid
First Quarter	\$ 0.25	\$ 0.14
Second Quarter	\$ 0.13	\$ 0.06
Third Quarter	\$ 0.07	\$ 0.01
Fourth Quarter	\$ 0.05	\$ 0.02

Fiscal Year 2009	High Bid	Low Bid
First Quarter	\$ 0.29	\$ 0.04
Second Quarter	\$ 0.27	\$ 0.10
Third Quarter	\$ 0.24	\$ 0.12
Fourth Quarter	\$ 0.13	\$ 0.09

Trades of our common stock are subject to Rule 15c-9 of the Securities and Exchange Commission, known as the Penny Stock Rule. This rule imposes requirements on broker/dealers who sell securities subject to the rule to persons other than established customers and accredited investors. For transactions covered by the rule, brokers/dealers must make a special suitability determination for purchasers of the securities and receive the purchaser's written agreement to the transaction prior to sale. The Securities and Exchange Commission also has rules that regulate broker/dealer practices in connection with transactions in "penny stocks." Penny stocks generally are equity securities with a price of less than \$5.00, other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in that security is provided by the exchange or system. The Penny Stock Rules requires a broker/dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document prepared by the Commission that provides information about penny stocks and the nature and level of risks in the penny stock market. The broker/dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker/dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker/dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. These disclosure requirements have the effect of reducing the level of trading activity in the secondary market for our common stock. As a result of these rules, investors may find it difficult to sell their shares.

Holdings

As of March 12, 2010, there were approximately 214 shareholders of record of our common stock.

Dividends

We have never paid cash dividends and have no plans to do so in the foreseeable future. Our future dividend policy will be determined by our board of directors and will depend upon a number of factors, including our financial condition and performance, our cash needs and expansion plans, income tax consequences, and the restrictions that applicable laws, our current preferred stock instruments, and our future credit arrangements may then impose.

Currently under Delaware law, unless further restricted in its certificate of incorporation, a corporation may declare and pay dividends out of surplus, or if no surplus exists, out of net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year (provided that the amount of capital of the corporation is not less than the aggregate amount of the capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets).

Securities Authorized for Issuance Under Equity Compensation Plans

The following table shows information with respect to each equity compensation plan under which the Company's common stock is authorized for issuance as of the fiscal year ended December 31, 2009.

EQUITY COMPENSATION PLAN INFORMATION

<u>Plan Category</u>	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted average exercise price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for issuance under equity compensation plans (excluding securities reflected in column (a))</u>
	<u>(a)</u>	<u>(b)</u>	<u>(c)</u>
Equity compensation plans approved by security holders	28,486,119(1)	\$ 0.32	119,826,292(2)
Equity compensation plans not approved by security holders	5,930,391	0.50	-
Total	34,416,510	0.35	119,826,292

(1) Awards for 2,492,000 options have been issued under the Advanced Cell Technology, Inc. 2004 Stock Option Plan I ("2004 Plan 1"), 1,301,161 options have been issued under the Advanced Cell Technology, Inc. 2004 Stock Option Plan II ("2004 Plan 2" and together with the 2004 Plan I, the "2004 ACT Plans"), and 26,594,958 options have been issued under the 2005 Stock Plan.

(2) This number included 370,000 shares available under the 2004 Plan I, 230,000 shares available under the 2004 Plan II, and 119,226,292 shares available under the 2005 Stock Plan.

Recent Sales of Unregistered Securities; Uses of Proceeds From Registered Securities

Recent Sales of Unregistered Securities

None.

Use of Proceeds from Registered Securities

Not Applicable.

Item 6. Selected Financial Data

	For the Year Ended December 31,				
	2009	2008	2007 (restated)	2006 (restated)	2005
Revenue	\$ 1,415,979	\$ 787,106	\$ 647,349	\$ 440,842	\$ 395,007
Net loss	(36,758,208)	(33,903,513)	(15,898,725)	(16,861,789)	(9,393,778)

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Certain statements in this annual report on Form 10-K that are not historical in fact constitute "forward-looking statements." Words such as, but not limited to, "believe," "expect," "anticipate," "estimate," "intend," "plan," and similar expressions are intended to identify forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors based on the Company's estimates and expectations concerning future events that may cause the actual results of the Company to be materially different from historical results or from any results expressed or implied by such forward-looking statements. These risks and uncertainties, as well as the Company's critical accounting policies, are discussed in more detail under "Management's Discussion and Analysis—Critical Accounting Policies" and in periodic filings with the Securities and Exchange Commission. The

Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

You should read the following discussion of our financial condition and results of operations together with the audited financial statements and the notes to the audited financial statements included in this annual report. This discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results may differ materially from those anticipated in these forward-looking statements.

Executive Level Overview

We are a biotechnology company focused on developing and commercializing human stem cell technology in the emerging fields of regenerative medicine and stem cell therapy.

Critical Accounting Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. We regularly review our estimates and assumptions, which are based upon historical experience, as well as current economic conditions and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of certain assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and assumptions.

We believe that the following critical accounting policies are affected by significant judgments and estimates used in the preparation of our consolidated financial statements.

Fair Value Measurements — For certain financial instruments, including accounts receivable, accounts payable, accrued expenses, interest payable, advances payable and notes payable, the carrying amounts approximate fair value due to their relatively short maturities.

On January 1, 2008, we adopted ASC 820-10, "*Fair Value Measurements and Disclosures*." ASC 820-10 defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

We analyze all financial instruments with features of both liabilities and equity under ASC 480, “*Distinguishing Liabilities From Equity*” and ASC 815, “*Derivatives and Hedging*.” Derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in results of operations as adjustments to fair value of derivatives. The effects of interactions between embedded derivatives are calculated and accounted for in arriving at the overall fair value of the financial instruments. In addition, the fair values of freestanding derivative instruments such as warrant and option derivatives are valued using the Black-Scholes model.

We did not identify any other non-recurring assets and liabilities that are required to be presented in the consolidated balance sheets at fair value in accordance with ASC 815.

Revenue Recognition— Our revenues are generated from license and research agreements with collaborators. Licensing revenue is recognized on a straight-line basis over the shorter of the life of the license or the estimated economic life of the patents related to the license. License fee revenue begins to be recognized in the first full month following the effective date of the license agreement. Deferred revenue represents the portion of the license and other payments received that has not been earned. Costs associated with the license revenue are deferred and recognized over the same term as the revenue. Reimbursements of research expense pursuant to grants are recorded in the period during which collection of the reimbursement becomes assured, because the reimbursements are subject to approval.

Stock Based Compensation— We record stock-based compensation in accordance with ASC 718, “Compensation – Stock Compensation.” ASC 718 requires companies to measure compensation cost for stock-based employee compensation at fair value at the grant date and recognize the expense over the employee’s requisite service period. We recognize in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees and non-employees.

Recent Accounting Pronouncements

In September 2008, the FASB issued new accounting guidance regarding credit derivatives and certain guarantees. This guidance, found under ASC 815, Derivatives and Hedging, applies to credit derivatives within the scope of the guidance, hybrid instruments that have embedded credit derivatives, and guarantees within the scope of the guidance. This guidance is effective for reporting periods (annual or interim) ending after November 15, 2008. The impact of the adoption of this guidance was not significant to our consolidated financial statements.

In April 2009, the FASB issued new accounting guidance regarding business combinations. This guidance, found under ASC 805, Business Combinations, amends the guidance relating to the initial recognition and measurement, subsequent measurement and accounting and disclosures of assets and liabilities arising from contingencies in a business combination. This guidance is effective for fiscal years beginning after December 15, 2008. We adopted this guidance as of the beginning of fiscal 2009. We will apply the requirements of this guidance prospectively to any future acquisitions.

On July 1, 2009, the Company adopted Accounting Standards Update ("ASU") No. 2009-01, "Topic 105 - Generally Accepted Accounting Principles - amendments based on Statement of Financial Accounting Standards No. 168, "The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles" ("ASU No. 2009-01"). ASU No. 2009-01 re-defines authoritative GAAP for nongovernmental entities to be only comprised of the FASB Accounting Standards Codification™ ("Codification") and, for SEC registrants, guidance issued by the SEC. The Codification is a reorganization and compilation of all then-existing authoritative GAAP for nongovernmental entities, except for guidance issued by the SEC. The Codification is amended to effect non-SEC changes to authoritative GAAP. Adoption of ASU No. 2009-01 only changed the referencing convention of GAAP in Notes to the consolidated financial statements.

In August 2009, the FASB issued Accounting Standards Update 2009-05, Fair Value Measurements and Disclosures (ASC 820) Measuring Liabilities at Fair Value. This guidance clarifies that in circumstances in which a quoted price in an active market for an identical liability is not available, a reporting entity is required to measure fair value of such liability using one or more of the techniques prescribed by the update. This guidance is effective for the first reporting period beginning after issuance, which is the period ending December 31, 2009. The impact of the adoption of this guidance was not significant to our consolidated financial statements.

In October 2009, the FASB issued an Accounting Standards Update ("ASU") regarding accounting for own-share lending arrangements in contemplation of convertible debt issuance or other financing. This ASU requires that at the date of issuance of the shares in a share-lending arrangement entered into in contemplation of a convertible debt offering or other financing, the shares issued shall be measured at fair value and be recognized as an issuance cost, with an offset to additional paid-in capital. Further, loaned shares are excluded from basic and diluted earnings per share unless default of the share-lending arrangement occurs, at which time the loaned shares would be included in the basic and diluted earnings-per-share calculation. This ASU is effective for fiscal years beginning on or after December 15, 2009, and interim periods within those fiscal years for arrangements outstanding as of the beginning of those fiscal years. We are currently evaluating the impact of this ASU on our consolidated financial statements.

On December 15, 2009, the FASB issued ASU No. 2010-06 Fair Value Measurements and Disclosures Topic 820 "Improving Disclosures about Fair Value Measurements". This ASU requires some new disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in Codification Subtopic 820-10. The FASB's objective is to improve these disclosures and, thus, increase the transparency in financial reporting. The adoption of this ASU will not have a material impact on our consolidated financial statements.

RESULTS OF OPERATIONS

Comparison of the Years Ended December 31, 2009 and 2008

	2009		2008	
	Amount	% of Revenue	Amount	% of Revenue
Revenue	\$ 1,415,979	100.0%	\$ 787,106	100.0%
Cost of Revenue	500,899	35.4%	765,769	97.3%
Gross profit	915,080	64.6%	21,337	2.7%
Research and development expenses and Grant reimbursements	3,394,700	239.7%	8,530,408	1083.8%
General and administrative expenses	3,439,085	242.9%	5,009,418	636.4%
Loss on settlement of litigation	4,903,949	346.3%	5,436,137	690.6%
Non-operating income (expense):	(25,935,554)	-1831.6%	(14,948,887)	-1899.2%
Net loss	\$(36,758,208)	-2596.0%	\$(33,903,513)	-4307.4%

Revenues

Revenues relate to license fees and royalties collected that are being amortized over the period of the license granted, and are therefore typically consistent between periods. The increase in revenue during the year ended December 31, 2009, was due to more new licenses being granted as compared to the year ended December 31, 2008 as well as license agreements that were terminated in 2009 that were recognized in 2009 revenue. During 2009, we recognized approximately \$382,000 in license fee revenue for licenses that were terminated in 2009. Further, we received \$3,600,000 in license fees in 2009, and of that we recognized an additional \$231,000 in license fee revenues during the year ended December 31, 2009 as compared with 2008. We expect that our collaboration efforts with CHA Biotech in the SCRMI joint venture will provide us valuable opportunities to develop and license our technologies.

Research and Development Expenses and Grant Reimbursements

Research and development expenses ("R&D") consists mainly of facility costs, payroll and payroll related expenses, research supplies and costs incurred in connection with specific research grants, and for scientific research. R&D expenditures declined from \$8,635,577 in 2008 to \$3,531,540 for 2009. The decline in R&D expenditures during the 2009 as compared to 2008 is primarily due to the fact that we closed our Charlestown, Massachusetts and Alameda, California facilities at the end of May 2008 and that we laid off a majority of our employees.

Our research and development expenses consist primarily of costs associated with basic and pre-clinical research exclusively in the field of human stem cell therapies and regenerative medicine, with focus on development of our technologies in cellular reprogramming, reduced complexity applications, and stem cell differentiation. These expenses represent both pre-clinical development costs and costs associated with non-clinical support activities such as quality control and regulatory processes. The cost of our research and development personnel is the most significant category of expense; however, we also incur expenses with third parties, including license agreements, sponsored research programs and consulting expenses.

We do not segregate research and development costs by project because our research is focused exclusively on human stem cell therapies as a unitary field of study. Although we have three principal areas of focus for our research, these areas are completely intertwined and have not yet matured to the point where they are separate and distinct projects. The intellectual property, scientists and other resources dedicated to these efforts are not separately allocated to individual projects, but rather are conducting our research on an integrated basis.

We expect that research and development expenses will increase in the foreseeable future as we add personnel, expand our pre-clinical research, begin clinical trial activities, and increase our regulatory compliance capabilities. The amount of these increases is difficult to predict due to the uncertainty inherent in the timing and extent of progress in our research programs, and initiation of clinical trials. In addition, the results from our basic research and pre-clinical trials, as well as the results of trials of similar therapeutics under development by others, will influence the number, size and duration of planned and unplanned trials. As our research efforts mature, we will continue to review the direction of our research based on an assessment of the value of possible commercial applications emerging from these efforts. Based on this continuing review, we expect to establish discrete research programs and evaluate the cost and potential for cash inflows from commercializing products, partnering with others in the biotechnology or pharmaceutical industry, or licensing the technologies associated with these programs to third parties.

We believe that it is not possible at this stage to provide a meaningful estimate of the total cost to complete our ongoing projects and bring any proposed products to market. The use of human embryonic stem cells as a therapy is an emerging area of medicine, and it is not known what clinical trials will be required by the FDA in order to gain marketing approval. Costs to complete could vary substantially depending upon the projects selected for development, the number of clinical trials required and the number of patients needed for each study. It is possible that the completion of these studies could be delayed for a variety of reasons, including difficulties in enrolling patients, delays in manufacturing, incomplete or inconsistent data from the pre-clinical or clinical trials, and difficulties evaluating the trial results. Any delay in completion of a trial would increase the cost of that trial, which would harm our results of operations. Due to these uncertainties, we cannot reasonably estimate the size, nature nor timing of the costs to complete, or the amount or timing of the net cash inflows from our current activities. Until we obtain further relevant pre-clinical and clinical data, we will not be able to estimate our future expenses related to these programs or when, if ever, and to what extent we will receive cash inflows from resulting products.

General and Administrative Expenses

General and administrative expenses for 2009 compared to 2008 decreased by \$1,570,333 to \$3,439,085 in 2009. This expense decrease was primarily a result of management's efforts to reduce costs and streamline operations so that we could move closer to achieving profitability. General and administrative expenses should continue to slightly decrease over the short term as we continue to streamline our operations. We expect that with the successful IND submission of our core technologies and a rebound of the U.S. and world economy there will come additional opportunities for growth and capital.

Loss on Settlement of Litigation

In 2008, we settled \$603,474 in accounts payable through the issuance of 220,735,436 shares of our common stock. In 2009, we settled \$505,199 in accounts payable through the issuance of 39,380,847 shares of our common stock. We recorded a loss on settlement of \$4,793,949 and \$5,436,137 in our accompanying statements of operations for the years ended December 31, 2009 and 2008, respectively.

On June 30, 2009, an investor submitted a conversion notice in the principal amount of \$150,000 into 7,500,000 shares of common stock at \$0.02 per share. At that time, we did not have sufficient authorized shares to satisfy this conversion notice. On July 6, 2009, by means of a settlement between the two parties, we agreed to deliver the 7,500,000 shares of our common stock no later than September 25, 2009. We delivered the 7,500,000 shares on September 25, 2009. Further, we agreed to provide the investor with an additional \$110,000 principal, which is to be upon the same terms and conditions as the original 2008 debenture. Accordingly, we recognized a loss on settlement in the amount of \$110,000 during the year ended December 31, 2009.

Other Income (Expense)

Other income (expense), net, for 2009 and 2008 was (\$25,935,554) and (\$14,948,887), respectively. The change of (\$10,986,667) is primarily due to the \$38,517,692 loss on extinguishment of convertible debentures and note, offset by the decrease in the adjustments to fair value of derivatives of 23,103,668 also by interest expense of \$10,86,498 as compared to \$26,614,761 in 2008.

Interest expense including late fees was \$9,190,807 and \$26,614,761, for the years ended 2009 and 2008, respectively. The decrease in interest expense is due to the additional debt that was issued in 2008 and the late fees incurred as we did not issue shares to convert the debt to equity and we do not have the cash to pay down the notes. Further, the interest expense in 2008 was greater than in 2009 because we amortized remaining debt discounts on all outstanding debentures as a result of our default on August 6, 2008.

The gain on the fair value of derivatives was \$23,103,668 and \$13,082,247, for the years ended 2009 and 2008, respectively. The decline in our share price in 2007 and 2008 contributed most significantly to the gain on the fair value of derivatives, as well as issuance of new debt and warrants during 2009. In periods when the share price declines, the derivative securities become less attractive to exercise or out-of-the-money, and therefore the value of the derivative liabilities declines.

Comparison of the Years Ended December 31, 2008 and 2007

	2008		2007	
	Amount	% of Revenue	Amount	% of Revenue
Revenue	\$ 787,106	55.6%	\$ 647,349	82.2%
Cost of Revenue	765,769	54.1%	428,913	54.5%
Gross profit	21,337	1.5%	218,436	27.8%
Research and development expenses and Grant reimbursements	8,530,408	602.4%	16,772,470	2130.9%
General and administrative expenses	5,009,418	353.8%	6,781,705	861.6%
(Gain) loss on settlement of litigation	5,436,137	383.9%	(193,862)	-24.6%
Non-operating income (expense):	(14,948,887)	-1055.7%	7,243,152	920.2%
Net loss	\$(33,903,513)	-2394.4%	\$(15,898,725)	-2019.9%

Revenues

Revenues relate to license fees and royalties collected that are being amortized over the period of the license granted, and are therefore typically consistent between periods. The increase in revenue during the year ended December 31, 2008, was due to more new licenses being granted as compared to the year ended December 31, 2007. We received approximately \$3,500,000 in license fees in 2008, and of that we recognized just \$300,000 in license fee revenues during the year ended December 31, 2008. We also received an additional \$1,500,000 from Transition Holdings, Inc. as license fee revenue in the first quarter 2009. We expect that our collaboration efforts with CHA Biotech in the SCRMI joint venture will provide us valuable opportunities to develop and license our technologies.

Research and Development Expenses and Grant Reimbursements

Research and development expenses ("R&D") consists mainly of facility costs, payroll and payroll related expenses, research supplies and costs incurred in connection with specific research grants, and for scientific research. R&D expenditures declined from \$16,839,649 in 2007 to \$8,635,577 for 2008. The decline in R&D expenditures during the 2008 as compared to 2007 is primarily due to the fact that we closed our Charlestown, Massachusetts and Alameda, California facilities at the end of May 2008.

Our research and development expenses consist primarily of costs associated with basic and pre-clinical research exclusively in the field of human stem cell therapies and regenerative medicine, with focus on development of our technologies in cellular reprogramming, reduced complexity applications, and stem cell differentiation. These expenses represent both pre-clinical development costs and costs associated with non-clinical support activities such as quality control and regulatory processes. The cost of our research and development personnel is the most significant category of expense; however, we also incur expenses with third parties, including license agreements, sponsored research programs and consulting expenses.

We do not segregate research and development costs by project because our research is focused exclusively on human stem cell therapies as a unitary field of study. Although we have three principal areas of focus for our research, these areas are completely intertwined and have not yet matured to the point where they are separate and distinct projects. The intellectual property, scientists and other resources dedicated to these efforts are not separately allocated to individual projects, but rather are conducting our research on an integrated basis.

We expect that research and development expenses will increase in the foreseeable future as we add personnel, expand our pre-clinical research, begin clinical trial activities, and increase our regulatory compliance capabilities. The amount of these increases is difficult to predict due to the uncertainty inherent in the timing and extent of progress in our research programs, and initiation of clinical trials. In addition, the results from our basic research and pre-clinical trials, as well as the results of trials of similar therapeutics under development by others, will influence the number, size and duration of planned and unplanned trials. As our research efforts mature, we will continue to review the direction of our research based on an assessment of the value of possible commercial applications emerging from these efforts. Based on this continuing review, we expect to establish discrete research programs and evaluate the cost and potential for cash inflows from commercializing products, partnering with others in the biotechnology or pharmaceutical industry, or licensing the technologies associated with these programs to third parties.

We believe that it is not possible at this stage to provide a meaningful estimate of the total cost to complete our ongoing projects and bring any proposed products to market. The use of human embryonic stem cells as a therapy is an emerging area of medicine, and it is not known what clinical trials will be required by the FDA in order to gain marketing approval. Costs to complete could vary substantially depending upon the projects selected for development, the number of clinical trials required and the number of patients needed for each study. It is possible that the completion of these studies could be delayed for a variety of reasons, including difficulties in enrolling patients, delays in manufacturing, incomplete or inconsistent data from the pre-clinical or clinical trials, and difficulties evaluating the trial results. Any delay in completion of a trial would increase the cost of that trial, which would harm our results of operations. Due to these uncertainties, we cannot reasonably estimate the size, nature nor timing of the costs to complete, or the amount or timing of the net cash inflows from our current activities. Until we obtain further relevant pre-clinical and clinical data, we will not be able to estimate our future expenses related to these programs or when, if ever, and to what extent we will receive cash inflows from resulting products.

General and Administrative Expenses

General and administrative expenses for 2008 compared to 2007 decreased by \$1,772,287 to \$5,009,418 in 2008. This expense decrease was primarily a result of management's efforts to reduce costs and streamline operations so that we could move closer to achieving profitability. General and administrative expenses should continue to slightly decrease over the short term as we continue to streamline our operations and reduce our costs until we are able to expand.

Loss on Settlement of Litigation

In 2008, we settled \$603,474 in accounts payable through the issuance of 220,735,436 shares of our common stock. We recorded a loss on settlement of \$5,436,137 in our accompanying statement of operations for the year ended December 31, 2008. In 2007, we recognized a gain on settlement in the amount of \$193,862.

Other Income (Expense)

Other income (expense), net, for 2008 and 2007 was (\$20,385,024) and \$7,437,014, respectively. The change of (\$27,822,038) is primarily due to the increase in interest expense, the decrease in the adjustments to fair value of derivatives and the loss on settlement of debt.

The interest expense including late fees was \$26,614,761 and \$21,023,663, for the years ended 2008 and 2007, respectively. The increase in interest expense is due to the additional debt that was issued and the late fees incurred as we have not issued shares to convert the debt to equity and we do not have the cash to pay down the notes. Further, the interest expense in 2008 was greater than in 2007 because we amortized remaining debt discounts on all outstanding debentures as a result of our default on August 6, 2008.

The gain on the fair value of derivatives was \$13,082,247 and \$32,835,057, for the years ended 2008 and 2007, respectively. The decline in our share price in 2007 and 2008 contributed most significantly to the gain on the fair value of derivatives. In periods when the share price declines, the derivative securities become less attractive to exercise or out-of-the-money, and therefore the value of the derivative liabilities declines.

During the year ended 2008, we had a loss of \$5,436,137 related to debt settlement compared to a gain of \$193,862 during the year ended 2007. Between September 29, 2008 and January 20, 2009, the Company settled certain past due accounts payable by the issuance of shares of its common stock. In aggregate, the Company settled \$1,108,673 in accounts payable through the issuance of 260,116,283 shares of its common stock. A loss of \$4,695,289 was recorded related to the settlement of this debt during the year ended December 31, 2008 related to the settlement of these payable balances.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

The following table sets forth a summary of our cash flows for the periods indicated below:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Net cash used in operating activities	\$ (5,142,778)	\$ (2,964,820)	\$(16,031,464)
Net cash used in investing activities	(7,538)	(174,514)	(139,873)
Net cash provided by financing activities	6,872,250	2,790,122	8,648,117
Net decrease in cash and cash equivalents	1,721,934	(349,212)	(7,523,220)
Cash and cash equivalents at the end of the period	\$ 2,538,838	\$ 816,904	\$ 1,166,116

Cash used in operating activities changed from \$2,964,820 in 2008 to \$5,142,778 in 2009. The decrease is primarily attributable to the fact that we closed 2 facilities in May 2008 and have correspondingly reduced our operating costs. Cash used in operating activities in 2007 was \$16,031,464. The primary difference between 2007 and 2008 is cash used to fund operations during 2007.

Cash used in investing activities was minimal in 2009, 2008 and 2007, and primarily consisted of purchases of property and equipment.

Cash generated by financing activities in 2009, 2008 and 2007 arose from proceeds from new convertible debt and preferred stock that we successfully raised.

We plan to fund our operations for the next twelve months primarily from the following financings:

- During 2009 and the first quarter of 2010, we received \$3,120,000 from our convertible promissory note financings with JMJ Financial. As of December 31, 2009, \$2,880,000 remain available to us.
- During 2009 and the first quarter of 2010, we received \$3,483,000 from a convertible debenture issuance. The convertible debenture contains an Additional Investment Right that allows the Company to an additional \$3,483,000 in funding.
- During 2009, we received \$2,588,000 from the issuance of a Series A-1 convertible preferred stock credit facility. We received an additional \$283,000 in the first quarter 2010. The facility allows for a maximum placement of \$5,000,000.
- During 2009, we entered into a Series B preferred stock agreement that allows for an aggregate purchase price of \$10,000,000. As of December 31, 2009, we had not received any proceeds from this financing.
- We continue to repay our debt financings in shares of common stock, enabling us to use our cash resources to fund our operations.

On a longer term basis, we have no expectation of generating any meaningful revenues from our product candidates for a substantial period of time and will rely on raising funds in capital transactions to finance our research and development programs. Our future cash requirements will depend on many factors, including the pace and scope of our research and development programs, the costs involved in filing, prosecuting and enforcing patents, and other costs associated with commercializing our potential products. We intend to seek additional funding primarily through public or private financing transactions, and, to a lesser degree, new licensing or scientific collaborations, grants from governmental or other institutions, and other related transactions. If we are unable to raise additional funds, we will be forced to either scale back or business efforts or curtail our business activities entirely. We anticipate that our available cash and expected income will be sufficient to finance most of our current activities for at least four months from the date we file these financial statements, although certain of these activities and related personnel may need to be reduced. We cannot assure you that public or private financing or grants will be available on acceptable terms, if at all. Several factors will affect our ability to raise additional funding, including, but not limited to, the volatility of our Common Stock.

Contractual Obligations

At December 31, 2009, our significant contractual obligations were as follows:

	Payments due by Period				Total
	Less than One Year	One to Three Years	Three to Five Years	More Than Five Years	
Operating lease obligations	164,165	311,943	318,210	80,878	875,196
Total	<u>\$ 164,165</u>	<u>\$ 311,943</u>	<u>\$ 318,210</u>	<u>\$ 80,878</u>	<u>\$ 875,196</u>

Off-Balance Sheet Arrangements

We do not maintain any off-balance sheet arrangements, transactions, obligations or other relationships with unconsolidated entities that would be expected to have a material current or future effect upon our financial condition or results of operations.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk is limited primarily to interest income sensitivity, which is affected by changes in the general level of U.S. interest rates, particularly because a significant portion of our investments are in short-term debt securities issued by the U.S. government and institutional money market funds. The primary objective of our investment activities is to preserve principal. Due to the nature of our marketable securities, we believe that we are not exposed to any material market risk. We do not have any derivative financial instruments or foreign currency instruments. If interest rates had varied by 10% in the year ended December 31, 2009, it would not have had a material effect on our results of operations or cash flows for that period.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders
Advanced Cell Technologies, Inc. and subsidiary

We have audited the accompanying consolidated balance sheets of Advanced Cell Technologies, Inc. and subsidiary as of December 31, 2009 and 2008, and the related consolidated statements of operations, stockholders' deficit, and cash flows for each of the three years in the period ended December 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Advanced Cell Technologies, Inc. and subsidiary as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Advanced Cell Technologies, Inc. and subsidiary's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 16, 2010 expressed an unqualified opinion on the effectiveness of Advanced Cell Technologies, Inc. and subsidiary's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

ADVANCED CELL TECHNOLOGY, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2009, 2008 and 2007

1. ORGANIZATIONAL MATTERS

Organization and Nature of Business

Advanced Cell Technology, Inc. (the "Company") is a biotechnology company, incorporated in the state of Delaware, focused on developing and commercializing human embryonic and adult stem cell technology in the emerging fields of regenerative medicine. Principal activities to date have included obtaining financing, securing operating facilities, and conducting research and development. The Company has no therapeutic products currently available for sale and does not expect to have any therapeutic products commercially available for sale for a period of years, if at all. These factors indicate that the Company's ability to continue its research and development activities is dependent upon the ability of management to obtain additional financing as required.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation—The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). References to GAAP issued by the FASB in these footnotes are to the FASB Accounting Standards Codification,TM sometimes referred to as the Codification or ASC.

Principles of Consolidation— The accounts of the Company and its wholly-owned subsidiary Mytogen, Inc. ("Mytogen") are included in the accompanying consolidated financial statements. All intercompany balances and transactions were eliminated in consolidation.

Segment Reporting—ASC 280, "*Segment Reporting*" requires use of the "management approach" model for segment reporting. The management approach model is based on the way a company's management organizes segments within the company for making operating decisions and assessing performance. The Company determined it has one operating segment. Disaggregation of the Company's operating results is impracticable, because the Company's research and development activities and its assets overlap, and management reviews its business as a single operating segment. Thus, discrete financial information is not available by more than one operating segment.

Use of Estimates— These consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States and, accordingly, require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Specifically, the Company's management has estimated variables used to calculate the Black-Scholes option pricing model used to value derivative instruments as discussed below under "Fair Value Measurements". In addition, management has estimated the expected economic life and value of the Company's licensed technology, the Company's net operating loss for tax purposes, share-based payments for compensation to employees, directors, consultants and investment banks, and the useful lives of the Company's property and equipment and its accounts receivable allowance. Actual results could differ from those estimates.

Reclassifications— Certain prior year financial statement balances have been reclassified to conform to the current year presentation. These reclassifications had no effect on the recorded net loss.

Cash and Cash Equivalents— Cash equivalents are comprised of certain highly liquid investments with maturities of three months or less when purchased. The Company maintains its cash in bank deposit accounts, which at times, may exceed federally insured limits. The Company has not experienced any losses related to this concentration of risk. As of December 31, 2009 and December 31, 2008, the Company had deposits in excess of federally-insured limits totaling \$2,028,195 and \$655,074, respectively.

Accounts Receivable — The Company periodically assesses its accounts receivable for collectability on a specific identification basis. Past due status on accounts receivable is based on contractual terms. If collectability of an account becomes unlikely, the Company records an allowance for that doubtful account. Once the Company has exhausted efforts to collect, management writes off the account receivable against the allowance it has already created. The Company does not require collateral for its trade accounts receivable.

Property and Equipment— The Company records its property and equipment at historical cost. The Company expenses maintenance and repairs as incurred. Upon disposition of property and equipment, the gross cost and accumulated depreciation are written off and the difference between the proceeds and the net book value is recorded as a gain or loss on sale of assets. In the case of certain assets acquired under capital leases, the assets are recorded net of imputed interest, based upon the net present value of future payments. Assets under capital lease are pledged as collateral for the related lease.

The Company provides for depreciation over the assets' estimated useful lives as follows:

Machinery & equipment	4 years
Computer equipment	3 years
Office furniture	4 years
Leasehold improvements	Lesser of lease life or economic life
Capital leases	Lesser of lease life or economic life

Equity Method Investment — The Company follows ASC 323 "*Investments-Equity Method and Joint Ventures*" in accounting for its investment in the joint venture. In the event the Company's share of the joint venture's net losses reduces the Company's investment to zero, the Company will discontinue applying the equity method and will not provide for additional losses unless the Company has guaranteed obligations of the joint venture or is otherwise committed to provide further financial support for the joint venture. If the joint venture subsequently reports net income, the Company will resume applying the equity method only after its share of that net income equals the share of net losses not recognized during the period the equity method was suspended.

Deferred Issuance Costs— Payments, either in cash or share-based payments, made in connection with the sale of debentures are recorded as deferred debt issuance costs and amortized using the effective interest method over the lives of the related debentures. The weighted average amortization period for deferred debt issuance costs is 48 months.

Intangible and Long-Lived Assets— The Company follows ASC 360-10, "*Property, Plant, and Equipment*," which established a "primary asset" approach to determine the cash flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long-lived asset to be held and used. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell. Through December 31, 2009, the Company had not experienced impairment losses on its long-lived assets.

Fair Value Measurements — For certain financial instruments, including accounts receivable, accounts payable, accrued expenses, interest payable, advances payable and notes payable, the carrying amounts approximate fair value due to their relatively short maturities.

On January 1, 2008, the Company adopted ASC 820-10, "Fair Value Measurements and Disclosures." ASC 820-10 defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company analyzes all financial instruments with features of both liabilities and equity under ASC 480, "Distinguishing Liabilities From Equity" and ASC 815, "Derivatives and Hedging." Derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in results of operations as adjustments to fair value of derivatives. The effects of interactions between embedded derivatives are calculated and accounted for in arriving at the overall fair value of the financial instruments. In addition, the fair values of freestanding derivative instruments such as warrant and option derivatives are valued using the Black-Scholes model.

The Company's warrant and non-employee option derivative liabilities are carried at fair value totaling \$18,168,597 and \$2,655,849, as of December 31, 2009 and December 31, 2008, respectively. The Company's embedded conversion option liabilities are carried at fair value totaling \$8,609,804 and \$1,842,976 as of December 31, 2009 and December 31, 2008, respectively. The Company used Level 2 inputs for its valuation methodology for the warrant derivative liabilities and embedded conversion option liabilities as their fair values were determined by using the Black-Scholes option pricing model based on various assumptions. The Company's derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in results of operations as adjustments to fair value of derivatives.

At December 31, 2009, the Company identified the following assets and liabilities that are required to be presented on the balance sheet at fair value:

Derivative Liabilities	Fair Value As of December 31, 2009	Fair Value Measurements at December 31, 2009 Using Fair Value Hierarchy		
		Level 1	Level 2	Level 3
Warrant derivative liabilities	\$ 18,168,597	\$ -	18,168,597	-
Embedded conversion option liabilities	8,609,804	-	8,609,804	-
	\$ 26,778,401	\$ -	26,778,401	-

For the years ended December 31, 2009, 2008 and 2007, the Company recognized a gain of \$23,103,668, \$13,082,247, and \$32,835,057, respectively, for the changes in the valuation of derivative liabilities.

The Company did not identify any other non-recurring assets and liabilities that are required to be presented in the consolidated balance sheets at fair value in accordance with ASC 815.

Revenue Recognition— The Company's revenues are generated from license and research agreements with collaborators. Licensing revenue is recognized on a straight-line basis over the shorter of the life of the license or the estimated economic life of the patents related to the license. License fee revenue begins to be recognized in the first full month following the effective date of the license agreement. Deferred revenue represents the portion of the license and other payments received that has not been earned. Costs associated with the license revenue are deferred and recognized over the same term as the revenue. Reimbursements of research expense pursuant to grants are recorded in the period during which collection of the reimbursement becomes assured, because the reimbursements are subject to approval.

Research and Development Costs— Research and development costs consist of expenditures for the research and development of patents and technology, which cannot be capitalized. The Company's research and development costs consist mainly of payroll and payroll related expenses, research supplies and research grants. Reimbursements of research expense pursuant to grants are recorded in the period during which collection of the reimbursement becomes assured, because the reimbursements are subject to approval. Research and development costs are expensed as incurred.

Share-Based Compensation— The Company records stock-based compensation in accordance with ASC 718, "Compensation – Stock Compensation." ASC 718 requires companies to measure compensation cost for stock-based employee compensation at fair value at the grant date and recognize the expense over the employee's requisite service period. The Company recognizes in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees and non-employees. There were 28,486,119 options outstanding as of December 31, 2009.

Income Taxes— Deferred income taxes are provided using the liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of the changes in tax laws and rates of the date of enactment.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheets along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Applicable interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statements of operations.

Net Loss Per Share— Earnings per share is calculated in accordance with the ASC 260-10, "Earnings Per Share." Basic earnings per share is based upon the weighted average number of common shares outstanding. Diluted earnings per share is based on the assumption that all dilutive convertible shares and stock options were converted or exercised. Dilution is computed by applying the treasury stock method. Under this method, options and warrants are assumed to be exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase common stock at the average market price during the period.

At December 31, 2009, 2008 and 2007, approximately 395,549,000, 270,206,000 and 67,000,000 potentially dilutive shares, respectively, were excluded from the shares used to calculate diluted earnings per share as their inclusion would be anti-dilutive.

Concentrations and Other Risks— Currently, the Company’s revenues and accounts receivable are concentrated on a small number of customers. The following table shows the Company’s concentrations of its revenue for those customers comprising greater than 10% of total license revenue for the years ended December 31, 2009, 2008 and 2007.

	2009	2008	2007
Genzyme Transgenics Corporation	28%	17%	20%
Exeter Life Sciences, Inc.	*	16%	19%
START Licensing, Inc.	*	13%	15%
Terumo Corporation	*	25%	*
International Stem Cell Corporation	10%	11%	*
Transition Holdings, Inc.	14%	*	*

*License revenue earned during the period was less than 10% of total license revenue.

Other risks include the uncertainty of the regulatory environment and the effect of future regulations on the Company’s business activities. As the Company is a biotechnology research and development company, there is also the attendant risk that someone could commence legal proceedings over the Company’s discoveries. Acts of God could also adversely affect the Company’s business.

Recent Accounting Pronouncements

In September 2008, the FASB issued new accounting guidance regarding credit derivatives and certain guarantees. This guidance, found under ASC 815, Derivatives and Hedging, applies to credit derivatives within the scope of the guidance, hybrid instruments that have embedded credit derivatives, and guarantees within the scope of the guidance. This guidance is effective for reporting periods (annual or interim) ending after November 15, 2008. The impact of the adoption of this guidance was not significant to the Company’s consolidated financial statements.

In April 2009, the FASB issued new accounting guidance regarding business combinations. This guidance, found under ASC 805, Business Combinations, amends the guidance relating to the initial recognition and measurement, subsequent measurement and accounting and disclosures of assets and liabilities arising from contingencies in a business combination. This guidance is effective for fiscal years beginning after December 15, 2008. The Company adopted this guidance as of the beginning of fiscal 2009. The Company will apply the requirements of this guidance prospectively to any future acquisitions.

On July 1, 2009, the Company adopted Accounting Standards Update (“ASU”) No. 2009-01, “Topic 105 - Generally Accepted Accounting Principles - amendments based on Statement of Financial Accounting Standards No. 168, “The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles” (“ASU No. 2009-01”). ASU No. 2009-01 re-defines authoritative GAAP for nongovernmental entities to be only comprised of the FASB Accounting Standards Codification™ (“Codification”) and, for SEC registrants, guidance issued by the SEC. The Codification is a reorganization and compilation of all then-existing authoritative GAAP for nongovernmental entities, except for guidance issued by the SEC. The Codification is amended to effect non-SEC changes to authoritative GAAP. Adoption of ASU No. 2009-01 only changed the referencing convention of GAAP in Notes to the consolidated financial statements.

In August 2009, the FASB issued Accounting Standards Update 2009-05, Fair Value Measurements and Disclosures (ASC 820) Measuring Liabilities at Fair Value. This guidance clarifies that in circumstances in which a quoted price in an active market for an identical liability is not available, a reporting entity is required to measure fair value of such liability using one or more of the techniques prescribed by the update. This guidance is effective for the first reporting period beginning after issuance, which is the period ending December 31, 2009. The impact of the adoption of this guidance was not significant to the Company’s consolidated financial statements.

In October 2009, the FASB issued an Accounting Standards Update ("ASU") regarding accounting for own-share lending arrangements in contemplation of convertible debt issuance or other financing. This ASU requires that at the date of issuance of the shares in a share-lending arrangement entered into in contemplation of a convertible debt offering or other financing, the shares issued shall be measured at fair value and be recognized as an issuance cost, with an offset to additional paid-in capital. Further, loaned shares are excluded from basic and diluted earnings per share unless default of the share-lending arrangement occurs, at which time the loaned shares would be included in the basic and diluted earnings-per-share calculation. This ASU is effective for fiscal years beginning on or after December 15, 2009, and interim periods within those fiscal years for arrangements outstanding as of the beginning of those fiscal years. The Company is currently evaluating the impact of this ASU on its consolidated financial statements.

On December 15, 2009, the FASB issued ASU No. 2010-06 Fair Value Measurements and Disclosures Topic 820 "Improving Disclosures about Fair Value Measurements". This ASU requires some new disclosures and clarifies some existing disclosure requirements about fair value measurement as set forth in Codification Subtopic 820-10. The FASB's objective is to improve these disclosures and, thus, increase the transparency in financial reporting. The adoption of this ASU will not have a material impact on the Company's consolidated financial statements.

3. RESTATEMENT

The Company has issued a series of complex convertible debentures over the past several years. The convertible debentures are issued for less than face value, thus generating significant original issue discounts. In conjunction with the instruments, the Company has issued substantial numbers of warrants, and the value of these warrants as of the issue date is treated in the same manner as an original issue discount. These discounts are amortized into interest expense over the life of the debenture, which is a complex calculation due to the planned monthly redemptions after a certain point included in the debenture agreements. Further, the debentures are converted into shares at the holder's option, the timing of which depends on the price of the Company's stock. The Company also gives brokers and other intermediaries considerable value via cash and warrants in order to assist in selling the debentures. The costs associated with issuing the debt are capitalized and amortized over the life of the debt.

On September 6, 2006, the Company entered into a securities purchase agreement in which the purchasers purchased from the Company convertible debentures and warrants to purchase shares of the Company's common stock. In connection with that transaction, and for each quarter thereafter, the Company performed a valuation of the debentures and warrants.

On March 24, 2008, the Company discovered that it had been using an incorrect number of warrants in calculating the appropriate fair value. The Company had been using 4,541,672 warrants instead of the correct number of 19,064,670 warrants. Upon learning of the error, the Company recalculated the correct fair value and noted that this change in warrant valuation had no impact on the value of the related convertible debentures and all the related embedded derivatives.

In mid-May 2008, the Company discovered that the deferred issuance costs and discounts had been amortized over a period longer than the weighted average life of the instruments, with the result that the discounts and debt issuance costs should have been charged to interest expense on a faster basis than had been the case. Upon learning of the error the Company has recalculated the amortization and resulting interest expense. The Company also discovered that its calculation of the weighted average shares used in calculating basic and diluted earnings per share for the year ended December 31, 2007 was in error. The actual basic and diluted weighted average shares outstanding for the year ended December 31, 2007 was approximately 20,238,000 shares higher than reported.

In accordance with ASC 250, the Company has determined that these were errors, and has therefore restated the accompanying statements of operations, and cash flows for the year ended December 31, 2007 and the balance sheet as of December 31, 2007.

	<u>As Originally Reported</u>	<u>Restated</u>	<u>Difference</u>
<i>December 31, 2007</i>			
<i>Balance Sheet</i>			
Deferred issuance costs	\$ 5,107,599	\$ 4,772,087	\$ (335,512)
2005 Convertible debenture and embedded derivatives – current portion	\$ 1,040,156	\$ 1,276,871	\$ 236,715
2006 Convertible debenture and embedded derivatives – current portion	\$ 906,860	\$ 1,625,327	\$ 718,467
2007 Convertible debenture and embedded derivatives – current portion	\$ 363,805	\$ 1,160,847	\$ 797,042
2006 Convertible debenture and embedded derivatives, less current portion	\$ 793,504	\$ 1,422,164	\$ 628,660
2007 Convertible debenture and embedded derivatives, less current portion	\$ 2,364,731	\$ 2,321,695	\$ (43,036)
Accumulated deficit	\$ (53,240,732)	\$ (55,914,091)	\$ (2,673,359)
Total stockholders' deficit at December 31, 2007	\$ (18,853,371)	\$ (21,526,730)	\$ (2,673,359)

4. LICENSE REVENUE

On April 30, 2008 the Company received a one-time payment of \$300,000 from Terumo International which extended their ability to commence a Phase I Clinical Trial in Japan by one year. All other terms and conditions for the license agreement between Terumo and the Company remain the same.

On May 23, 2008 and June 17, 2009, the Company received \$150,000 and \$150,000, respectively, from International Stem Cells, Inc. as a continuing annual payment to renew its license fee for use of certain of the Company's technologies.

On July 10, 2008, the Company granted an exclusive license to Embryome Sciences, Inc., a wholly owned subsidiary of BioTime, Inc., to use its "ACTCellerate" embryonic stem cell technology and a bank of over 140 diverse progenitor cell lines derived using that technology. Under the agreement, the Company received an up-front payment of \$470,000, and is eligible to receive an 8% royalty on sales of products, services, and processes that utilize the licensed technology. However, in connection with the rent judgment discussed in Note 15, in connection with unpaid rents owed with its landlord, the Company has assigned the landlord rights and interest to 62.5% of all royalties on this contract, and 65% of all other consideration payable under this license agreement until such time that the Company has repaid amounts owed to the landlord that total \$475,000. The Company is recognizing revenue from this agreement over its 17-year patent useful life.

In connection with the joint venture agreement discussed in Note 5, on December 1, 2008, the Company entered into a license agreement with CHA for the exclusive, worldwide license to the Hemangioblast Program. Under the agreement, CHA agreed to acquire the Company's core technology for \$500,000 in cash. During the year ended December 31, 2008, the Company received \$250,000. The Company received the remaining \$250,000 in January 2009. Accordingly, the Company recorded \$250,000 in accounts receivable in its consolidated balance sheets at December 31, 2008. The Company is recognizing revenue from this agreement over its 17-year patent useful life.

On December 18, 2008, the Company entered into a license agreement with Transition Holdings, Inc. for certain of the Company's non-core technology. Under the agreement, Transition agreed to acquire a license to the technology for a total of \$3.5 million in cash. During the year ended December 31, 2008, the Company received \$2,000,000, less wire fees, in cash under this agreement. The Company received the remaining \$1,500,000 in 2009. The Company expects to apply the proceeds towards its retinal epithelium ("RPE") cells program. The Company is recognizing revenue from this agreement over its 17-year patent useful life.

On March 30, 2009, the Company entered into a second license agreement with CHA under which the Company will license its RPE technology, for the treatment of diseases of the eye, to CHA for development and commercialization exclusively in Korea. The Company is eligible to receive up to a total of \$1.9 million in fees based upon the parties achieving certain milestones, including the Company making an IND submission to the US FDA to commence clinical trials in humans using the technology. The Company received an up-front fee under the license in the amount of \$1,100,000 during the second quarter of 2009, and another \$300,000 progress payment on December 3, 2009. Under the agreement, CHA will incur all of the costs associated with the RPA clinical trials in Korea. The Company is recognizing revenue from this agreement over its 17-year patent useful life.

On May 13, 2009, the Company entered into a third license agreement with CHA under which the Company will license its proprietary "single blastomere technology," which has the potential to generate stable cell lines, including RPE for the treatment of diseases of the eye, for development and commercialization exclusively in Korea. The Company received an upfront license fee of \$300,000 on May 8, 2009. The Company is recognizing revenue from this agreement over its 17-year patent useful life.

In connection with the above license agreements, the Company has recorded \$553,448 and \$302,239 in license fee revenue for the years ended December 31, 2009 and 2008, respectively, in its accompanying consolidated statements of operations, and the remainder of the license fee has been accrued in deferred revenue at December 31, 2009 and 2008, respectively.

5. INVESTMENT IN JOINT VENTURE

On December 1, 2008, the Company and CHA Bio & Diostech Co., Ltd. formed an international joint venture. The new company, Stem Cell & Regenerative Medicine International, Inc. ("SCRMI"), will develop human blood cells and other clinical therapies based on the Company's hemangioblast program, one of the Company's core technologies. Under the terms of the agreement, the Company purchased upfront a 33% interest in the joint venture, and will receive another 7% interest upon fulfilling certain obligations under the agreement over a period of 3 years. The Company's contribution includes (a) the uninterrupted use of a portion of its leased facility at the Company's expense, (b) the uninterrupted use of certain equipment in the leased facility, and (c) the release of certain of the Company's research and science personnel to be employed by the joint venture. In return, for a 67% interest, CHA has agreed to contribute \$150,000 cash and to fund all operational costs in order to conduct the hemangioblast program.

The Company has agreed to collaborate with the joint venture in securing grants to further research and development of its technology. Additionally, SCRMI has agreed to pay the Company a fee of \$500,000 for an exclusive, worldwide license to the Hemangioblast Program. The Company recorded \$29,412 and \$2,450 in license fee revenue for the years ended December 31, 2009 and 2008, respectively, in its accompanying consolidated statements of operations, and the balance of unamortized license fee of \$469,363 and \$497,550 was accrued in deferred revenue in the accompanying consolidated balance sheets at December 31, 2009 and 2008, respectively.

ASC 323 "*Investments-Equity Method and Joint Ventures*" requires that the difference between the cost of an investment and the amount of underlying equity in net assets of an investee should be accounted for as if the investee were a consolidated subsidiary. The Company has calculated the difference between the cost of the investment and the amount of underlying equity in net assets of the joint venture to be \$196,130, based on the Company's initial cost basis in the investment of \$246,130, less its 33.3% of the initial equity in net assets of the joint venture of \$50,000. The Company will amortize the \$196,130 over the term of the shorter of the equipment usage or lease term (through April 2010, or 17 months from December 1, 2008). The amortization will be applied against the value of the Company's investment. Amortization expense for the years ended December 31, 2009 and 2008 was \$80,762 and \$11,537, respectively.

The following table is a summary of key financial data for the joint venture as of and for the year ended December 31, 2009:

Current assets	\$ 737,760
Noncurrent assets	\$ 501,744
Current liabilities	\$ 863,436
Noncurrent liabilities	\$ 488,297
Net revenue	\$ 26,775
Net loss	\$(1,526,851)

The following table is a summary of the activity from December 31, 2008 to December 31, 2009 in the Company's investment in the joint venture:

Balance, December 31, 2008	\$ 225,200
Losses attributable to investment	(144,438)
Amortization of premium	(80,762)
Balance, December 31, 2009	\$ -

6. PROPERTY AND EQUIPMENT

Property and equipment consisted of the following at December 31, 2009 and 2008:

	2009	2008
Machinery & equipment	\$ 1,470,306	\$ 1,470,141
Computer equipment	441,744	436,541
Office furniture	76,201	76,201
Leasehold improvements	127,197	127,197
Capital leases	51,235	51,235
Accumulated depreciation	(2,052,779)	(1,761,307)
Property and equipment, net	\$ 113,904	\$ 400,008

Depreciation expense for the years ended December 31, 2009, 2008 and 2007 amounted to \$291,472, \$402,867 and \$386,643, respectively.

7. AMENDED AND RESTATED CONVERTIBLE DEBENTURES

On July 29, 2009, the Company entered into a consent, amendment and exchange agreement (the "Consent and Amendment") with holders (the "Holders") of the Company's outstanding convertible debentures and warrants to purchase shares of the Company's common stock (the "Warrants"), which were issued in private placements to the 2005, 2006, 2007 and 2008 debentures.

Pursuant to the Consent and Amendment, the Company agreed to issue to each Holder in exchange for such Holder's Debenture an amended and restated Debenture (the "Amended and Restated Debentures") in a principal amount equal to the principal amount of such Holder's Debenture times 1.35 minus any interest paid thereon. The conversion price under the Amended and Restated Debentures was reduced to \$0.10, subject to further adjustment as provided therein (including for stock splits, stock dividends, and certain subsequent equity sales). The maturity date under the Amended and Restated Debentures was extended until December 31, 2010. The Amended and Restated Debentures bear interest at the rate of 12% per annum, which shall accrete to, and increase the principal amount payable upon maturity. The Amended and Restated Debentures amortize beginning on September 25, 2009 and then the first day of each month thereafter until maturity at a rate of 6.25% of the outstanding principal amount per month, valued at the lesser of the then conversion price and 90% of the average volume weighted average price for the ten prior trading days. The Company agreed to issue to each holder in exchange for the holder's amended and restated warrants (the "Amended and Restated Warrants"), as well as additional warrants exercisable into 79,076,873 shares of the Company's common stock for a total of warrants exercisable into 192,172,519 shares of common stock, both warrants containing a reduced exercise price of \$0.10, subject to certain customary anti-dilution adjustments (including for stock splits, stock dividends, and certain subsequent equity sales). The termination date under the Amended and Restated Warrants was extended until June 30, 2014. The Company agreed to amend its articles of incorporation to increase the number of authorized shares of Common Stock (the "Amendment"). The Company agreed to increase the number of shares available for issuance under the Company's 2005 Stock Incentive Plan to 129,000,000 shares. The Holders agreed to waive any event of default under the Debentures resulting solely from (i) any adjustment to the conversion price of the Debenture and exercise price of the Warrants that would result from the reduction of the conversion price of certain securities of the Company pursuant to the Stipulation of Settlement, dated March 11, 2009, between the Company and one of its Debenture holders, and (ii) any failure by the Company to reserve such number of authorized but unissued shares of common stock issuable upon conversion of the Debentures and exercise of the Warrants.

Simultaneously with the execution of Consent and Amendment, and as a condition of the Consent and Amendment, the Company and the Holders entered into a Standstill and Forbearance Agreement (the "Forbearance Agreement"). Pursuant to the Forbearance Agreement, the Company acknowledged certain defaults that have occurred under the Debentures and documents executed in connection therewith (the "Transaction Documents"). The Holders agreed to forbear from exercising their rights and remedies under the Debentures and the Transaction Documents, and the Company provided a general release in favor of the Holders. The obligation of the Holders to forbear from exercising their rights and remedies under the Debentures and the Transaction Documents will terminate on the earliest of (i) the date, if any, on which a petition for relief under the date, if any, on which a petition for relief under the United States Bankruptcy Code or any similar state or Canadian law is filed by or against the Company or any of its subsidiaries or (ii) the date the Forbearance Agreement is otherwise terminated or expires, it being understood that the Holders holding 67% of the then outstanding principal amount of the Debentures have the right to terminate the Forbearance Agreement on 3 business days' prior notice to the Company.

Other than as amended in the Transaction Documents, the rights and obligations of the holders and the Company with respect to the amended and restated debentures are identical in all respects to the rights and obligations of the holders and the Company with respect to the debentures and the underlying shares issued and issuable pursuant to each purchase agreement.

The original 2005, 2006, 2007 and 2008 debenture agreements entered into provides that the Company will pay certain cash amounts as liquidated damages in the event that the Company does not maintain an effective registration statement, or if the Company fails to timely execute stock trading activity. Additionally, penalties will be incurred by the Company in the event of certain default conditions.

As long as any portion of the amended and restated debentures remain outstanding, unless the holders of at least 67% in principal amount of the then outstanding debentures otherwise give prior written consent, the Company is not permitted to (a) guarantee or borrow any indebtedness, (b) enter into any liens, (c) amend its charter documents in any manner that materially and adversely affects any rights of the holders, (d) acquire more than a de minimis number of shares of its common stock equivalents other than as to conversion shares of warrant shares as permitted or required and repurchases of common stock or common stock equivalents of departing officers and directors of the Company, provided that such purchases do not exceed certain specified amounts, (e) repay any indebtedness, other than the debentures already issued on a pro-rata basis, other than regularly scheduled principal payments as such terms are in effect under this debenture, (f) pay cash dividends or distributions on any equity securities of the Company, (g) enter into any material transaction with any affiliate of the Company, unless such transaction is made on an arm's-length basis, or (h) enter into any agreement with respect to any of the above.

The Company has considered the impact of ASC 470-50 "Debt-Modifications and Extinguishments" on the accounting treatment of the change in conversion price of the 2005, 2006, 2007 and 2008 convertible debentures. ASC 470-50 states that a transaction resulting in a significant change in the nature of a debt instrument should be accounted for as an extinguishment of debt. The difference between the reacquisition price and the net carrying amount of the extinguished debt should be recognized currently in income of the period of extinguishment. The Company has concluded that the issuance of the amended and restated debentures constitutes a substantial modification. During the year ended December 31, 2009, the Company recognized a loss on extinguishment of convertible debentures of \$34,679,545 representing the difference between the fair value of the amended and restated convertible debentures and the carrying value of the original 2005, 2006, 2007 and 2008 convertible debentures. The fair value of the amended and restated convertible debentures at July 29, 2009 was \$18,192,813, net of debt discounts of \$2,011,065 that will be amortized over the remaining life of the amended and restated convertible debentures. The following table summarizes the convertible debentures:

December 31, 2008

2005 Convertible debenture and embedded derivatives, net of discounts of \$0	\$ 85,997
2006 Convertible debenture and embedded derivatives, fair value	1,993,354
2007 Convertible debenture and embedded derivatives, fair value	7,706,344
April 2008 Convertible debenture and embedded derivatives	4,066,505
Fair value 2005, 2006, 2007 and 2008 convertible debentures	<u>\$ 13,852,200</u>

Year ended December 31, 2009

Convertible debenture conversions	\$(12,495,486)
Change in fair value of embedded derivatives through July 29, 2009	6,823,641
Adjustment to bifurcate embedded derivatives upon adoption of ASC 815 on July 29, 2009	(7,629,147)
Addition to principal to Debenture Holder	110,000
Accrued default interest on 2005, 2006, 2007 and 2008 convertible debentures, December 31, 2008	3,522,964
Additional accrual of default interest through July 29, 2009	1,227,181
Loss on extinguishment on July 29, 2009	767,778
Amortization of debt discounts	1,425,976
December 31, 2009 Balance, Amended and restated convertible debentures	<u>\$ 7,605,107</u>
Less: current portion	(7,605,107)
Non-current portion	<u>\$ -</u>

Interest expense from amortization of debt discounts for the years ended December 31, 2009, 2008 and 2007 was \$2,917,266, \$22,542,636 and \$7,036,397, respectively. Default interest expense recognized for the years ended December 31, 2009, 2008 and 2007 was \$1,227,180 and \$3,522,964, and \$0, respectively.

In connection with the amended and restated convertible debentures, the Company issued an additional 79,076,873 warrants to all holders. The warrants are in addition to the 113,095,646 warrants held by the holders just before the issuance of the amended and restated convertible debentures, for a total of 192,172,519 issued to the holders of the amended and restated convertible debentures. The terms of the amended and restated warrants include a reduced exercise price of \$0.10, subject to certain customary anti-dilution adjustments. The termination date under the amended and restated warrants was extended until June 30, 2014. The fair value of the 113,095,646 warrants immediately prior to the July 29, 2009 modification was estimated at \$14,396,487 representing a decrease in the fair value of the liability of \$9,521,469 through the date of modification, which was recorded through the results of operations as an adjustment to fair value of derivatives. The assumptions used in the Black-Scholes option pricing model at July 29, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 190%, (3) risk-free interest rate of 0.50% - 1.72%, and (4) expected life of 1.09 – 3.68 years. The July 29, 2009 fair value of the 192,172,519 warrants was estimated at \$29,956,246 using the Black-Scholes pricing model. The warrants were again valued at \$16,072,842 at December 31, 2009 at fair value using the Black-Scholes model. The total decrease in the fair value of this warrant liability was \$5,195,108 during the year ended December 31, 2009, which was recorded through the results of operations as an adjustment to fair value of derivatives. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 2.69%, and (4) expected life of 4.5 years.

The Company has complied with the provisions of ASC 815 “*Derivatives and Hedging*”, and recorded the fair value of the embedded conversion option liability associated with the amended and restated convertible debentures. The fair value of the embedded conversion option was valued using the Black-Scholes model, resulting in a fair value of \$7,629,146 immediately prior to the July 29, 2009 modification. As of July 29, 2009, the convertible debentures were convertible at the option of the holders into a total of 101,213,921 shares, subject to anti-dilution and other customary adjustments. The decrease in fair value of \$8,550,020 was recorded through the results of operations as an adjustment to fair value of derivatives during the year ended December 31, 2009. The assumptions used in the Black-Scholes option pricing model at July 29, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 190%, (3) risk-free interest rate of 0.14% – 0.50%, and (4) expected life of 0.01 – 1.09 years. As of December 31, 2009, the convertible debentures were convertible at the option of the holders into a total of 81,901,980 shares, subject to anti-dilution and other customary adjustments. The fair value of the embedded conversion option was \$4,519,815 at December 31, 2009, representing a decrease in the fair value of the liability of \$17,644,086 during the year ended December 31, 2009. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 0.47%, and (4) expected life of 1.0 years. Additionally, \$1,796,368 was recorded in loss on extinguishment of the 2008 convertible debenture during the year ended December 31, 2009, prior to the July 29, 2009 modification, as a result of a settlement with a debenture holder in February 2009. See Note 13. The change in fair value of derivative liabilities related to the 2005-2007 debentures and warrants for the year ended December 31, 2007 was \$23,211,679.

8. AMENDED CONVERTIBLE PROMISSORY NOTES

On August 25, 2009, the Company entered into an amendment to its convertible promissory notes with JMJ Financial, originally executed on February 14, 2008. The note has been amended as follows:

- Note A: The original issue discount has been increased by 10%, or \$60,000, such that the new principal amount is \$660,000.
- Note B: The original issue discount has been increased by 10%, or \$120,000, such that the new principal amount is \$1,320,000.

All other terms and conditions of the original convertible promissory note remain in full force and effect.

Terms of the Original Notes

The Company issued and sold a \$600,000 unsecured convertible note dated as of February 15, 2008 (“Note A”) to JMJ Financial, for a net purchase price of \$500,000 (reflecting a 16.66% original issue discount) in a private placement. Note A bears interest at the rate of 12% per annum, and is due by February 15, 2010. At any time after the 180th day following the effective date of Note A, the holder may at its election convert all or part of Note A plus accrued interest into shares of the Company’s common stock at the conversion rate of the lesser of: (a) \$0.38 per share, or (b) 80% of the average of the three lowest trade prices in the 20 trading days prior to the conversion. Pursuant to the Use of Proceeds Agreement entered into in connection with the issuance of Note A, the Company is required to use the proceeds from Note A solely for research and development dedicated to adult stem cell research.

Effective February 15, 2008, in exchange for \$1,000,000 in the form of a Secured & Collateralized Promissory Note (the "JMJ Note") issued by JMJ Financial to the Company, the Company issued and sold an unsecured convertible note ("Note B") to JMJ Financial in the aggregate principal amount of \$1,200,000 or so much as may be paid towards the balance of the JMJ Note. Note B bears interest at the rate of 10% per annum, and is due by February 15, 2010. At any time following the effective date of Note B, the holder may at its election convert all or part of Note B plus accrued interest into shares of the Company's common stock at the conversion rate of the lesser of: (a) \$0.38 per share, or (b) 80% of the average of the three lowest trade prices in the 20 trading days prior to the conversion. In connection with the issuance of Note B, the Company entered into a Collateral and Security Agreement dated as of February 15, 2008 with JMJ Financial pursuant to which the Company granted JMJ Financial a security interest in certain of its assets securing the JMJ Note. As of December 31, 2009, the Company had drawn down and received the following amounts under Note B:

- On March 17, 2008 — \$60,000 for a net purchase price of \$50,000 (reflecting a 16.66% original issue discount).
- On June 17, 2008 — \$60,000 for a net purchase price of \$50,000 (reflecting a 16.66% original issue discount).
- On September 8, 2009 — \$316,964 for a net purchase price of \$250,000 (reflecting a 21.13% original issue discount).
- On September 30, 2009 — \$976,250 for a net purchase price of \$770,000 (reflecting a 21.13% original issue discount).

As long as any portion of this Notes remain outstanding, unless the holders of at least 67% in principal amount of the then outstanding debentures otherwise give prior written consent, the Company is not permitted to (a) guarantee or borrow any indebtedness, (b) enter into any liens, (c) amend its charter documents in any manner that materially and adversely affects any rights of the holders, (d) acquire more than a de minimis number of shares of its common stock equivalents other than as to conversion shares of warrant shares as permitted or required and repurchases of common stock or common stock equivalents of departing officers and directors of the Company, provided that such purchases do not exceed certain specified amounts, (e) repay any indebtedness, other than the debentures already issued on a pro-rata basis, other than regularly scheduled principal payments as such terms are in effect under this debenture, (f) pay cash dividends or distributions on any equity securities of the Company, (g) enter into any material transaction with any affiliate of the Company, unless such transaction is made on an arm's-length basis, or (h) enter into any agreement with respect to any of the above.

The Note agreement does not limit the number of shares that the Company could be required to issue. The convertible debenture is convertible at the option of the holders into a total of 12,707,990 shares of common stock as of December 31, 2009, subject to anti-dilution and other customary adjustments.

Impact of Modification

The Company has considered the impact of ASC 470-50 "*Debt-Modifications and Extinguishments*" on the accounting treatment of the change in conversion price of the Notes. ASC 470-50 states that a transaction resulting in a significant change in the nature of a debt instrument should be accounted for as an extinguishment of debt. The difference between the reacquisition price and the net carrying amount of the extinguished debt should be recognized currently in income of the period of extinguishment. The Company has concluded that the issuance of the amendment to the February 15, 2008 convertible promissory notes constitutes a substantial modification. During the year ended December 31, 2009, the Company recognized a gain on extinguishment of convertible debentures of \$199,418 representing the difference between the fair value of the amended and restated convertible promissory notes and the carrying value of the original convertible promissory notes. The fair value of the amended convertible debentures at August 25, 2009 was \$828,818, net of debt discounts of \$29,968 that will be amortized over the remaining life of the amended and restated convertible debentures. The following table summarizes the convertible promissory notes:

December 31, 2008

Fair value convertible promissory notes, December 31, 2008 \$ 1,757,470

Year ended December 31, 2009

Convertible promissory note conversions	\$ (1,269,026)
Additional proceeds from convertible promissory notes	2,620,000
Change in fair value of embedded derivatives through August 15, 2009	(478,521)
Adjustment to bifurcate embedded derivatives upon adoption of ASC 815 on August 15, 2009	(558,949)
Accrued default interest on convertible promissory notes, December 31, 2008	194,420
Additional accrual of default interest through August 15, 2009	84,151
Accrued convertible promissory note interest through August 15, 2009	79,720
Gain on extinguishment on August 15, 2009	(249,473)
Debt discounts	(2,409,199)
Amortization of debt discounts	973,824

December 31, 2009 Balance, Amended convertible promissory notes \$ 744,417

Less: current portion (685,233)

Non-current portion \$ 59,184

Interest expense from amortization of debt discounts for the years ended December 31, 2009 and 2008 was \$1,220,220 and \$157,235, respectively. Default interest expense recognized for the years ended December 31, 2009 and 2008 was \$84,151 and \$194,420, respectively.

The Company has complied with the provisions of ASC 815 "Derivatives and Hedging", and recorded the fair value of the embedded conversion option liability associated with the amended convertible promissory notes. The fair value of the embedded conversion option was valued using the Black-Scholes model, resulting in a fair value of \$558,949 immediately prior to the August 15, 2009 modification. As of August 15, 2009, the convertible promissory notes were convertible at the option of the holders into a total of 7,934,211 shares just prior to modification and into a total of 8,644,737 shares just after the modification, subject to anti-dilution and other customary adjustments. The decrease in fair value of \$496,955 was recorded through the results of operations as an adjustment to fair value of derivatives during the year ended December 31, 2009. The assumptions used in the Black-Scholes option pricing model at August 15, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 185%, (3) risk-free interest rate of 0.26%, and (4) expected life of 0.48 years. As of December 31, 2009, the convertible promissory notes were convertible at the option of the holders into a total of 12,707,990 shares, subject to anti-dilution and other customary adjustments. The fair value of the embedded conversion option was \$387,391 at December 31, 2009, representing a decrease in the fair value of the liability of \$603,062 during the years ended December 31, 2009. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 0.06%, and (4) expected life of 0.13 years.

During the year ended December 31, 2009, the Company converted the entire \$732,000 of Note A into 8,061,264 shares of its common stock, and \$505,025 of Note B into 6,106,698 shares of its common stock.

Amendment to Convertible Promissory Notes with JMJ Financial

On October 1, 2009, October 29, 2009, October 29, 2009 and October 30, 2009, the Company entered into Addendums ("Notes B1-B4") to Note B convertible promissory note, under the same terms and conditions as Note B. The following table summarizes the key terms of Notes B1-B4:

Note B Addendum	Effective Date	Maturity Date	Available Consideration	Principal Sum	Interest Rate	Principal Outstanding December 31, 2009
Note B1	10/1/2009	10/1/2012	\$ 1,120,000	\$ 1,320,000	18%	\$ 1,320,000
Note B2	10/29/2009	10/29/2012	1,120,000	1,320,000	18%	330,000
Note B3	10/29/2009	10/29/2012	1,120,000	1,320,000	18%	117,857
Note B4	10/30/2009	1/19/2013	1,120,000	1,320,000	18%	117,857
			<u>\$ 4,480,000</u>	<u>\$ 5,280,000</u>		<u>\$ 1,885,714</u>

The conversion rate of Notes B1-B2 is the lesser of (a) \$0.38, or (b) 80% of the average of the three lowest trade prices in the 20 trading days prior to the conversion. The conversion rate of Notes B3-B4 is the lesser of (a) \$0.25, or (b) 80% of the average of the three lowest trade prices in the 20 trading days prior to the conversion.

The following table summarizes the JMJ Financial convertible promissory notes outstanding at December 31, 2009:

Convertible promissory notes, principal	\$ 2,800,690
Debt discounts	<u>(2,056,273)</u>
Net convertible promissory notes	\$ 744,417
Less current portion	<u>(685,233)</u>
Convertible promissory notes, long term	<u>\$ 59,184</u>

The Company has complied with the provisions of ASC 815 "Derivatives and Hedging", and recorded the fair value of the embedded conversion option liability associated with the Note B Addendums. The initial fair value of the embedded conversion option was valued using the Black-Scholes model, resulting in a fair value of \$2,065,370 between October 9 and December 16, 2009 on the various dates that the money was drawn. The fair value of the embedded conversion option was again valued using the Black-Scholes model at December 31, 2009, resulting in a fair value of \$2,084,336 as of December 31, 2009. The increase in fair value of \$18,966 was recorded through the results of operations as an adjustment to fair value of derivatives during the year ended December 31, 2009. The assumptions used in the Black-Scholes option pricing model between October 9 and December 16, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180 - 185%, (3) risk-free interest rate of 1.27 - 1.52%, and (4) expected life of 2.79 - 3.22 years. As of December 31, 2009, the Note B Addendums were convertible at the option of the holders into a total of 26,190,476 shares, subject to anti-dilution and other customary adjustments. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 1.7%, and (4) expected life of 2.75 - 3.05 years.

The Company recorded finance costs in the amount of \$465,370 in its accompanying consolidated statement of operations for the year ended December 31, 2009, representing the excess of the fair value of the conversion option feature over the face value of Notes B2-B4. Interest expense from amortization of debt discounts on Notes B1-B4 for the years ended December 31, 2009 and 2008 was \$92,306 and \$0, respectively.

9. 2009 CONVERTIBLE PROMISSORY NOTES

On November 12, 2009, the Company entered into a subscription agreement (the "Subscription Agreement") with certain subscribers (the "Subscribers"). Pursuant to the Subscription Agreement, the Company agreed to sell, and the Subscribers agreed to purchase, subject to the terms and conditions therein, original issue discount promissory notes in the principal amount of a minimum of \$2,400,000, for a purchase price of a minimum of \$2,000,000 (the "Notes"), representing a 16.67% original issue discount. The Notes will be convertible into shares of the Company's common stock at a conversion price of \$0.10. Pursuant to the Subscription Agreement, the Company also agreed to issue (i) one-and-one third Class A warrants ("Class A Warrants") for each two shares of common stock underlying the Notes, to purchase shares of the Company's common stock with a term of five years and an exercise price of \$0.108, (ii) additional investment rights, exercisable until 9 months after the initial closing date of the Subscription Agreement ("Additional Investment Rights"), to purchase (a) original issue discount promissory notes ("AIR Notes"), with the same terms as the Notes, in the principal amount of up to the principal amount of the Notes to be purchased by the Subscribers, for a purchase price of up to the purchase price paid by the Subscribers for the Notes, with a conversion price of \$0.10, and (b) one-and-one third Class B warrants ("Class B Warrants") for each two shares of common stock underlying the AIR Notes, to purchase shares of the Company's common stock with a term of five years and an exercise price of \$0.108.

The Company will be required to redeem the Notes monthly commencing in May 2010, in the amount of 14.28% of the initial principal amount of the Notes, in cash or common stock at the Company's option (subject to the conditions set forth in the Notes), until the Notes are paid in full. The maturity date of the 2009 convertible promissory notes is November 12, 2010.

The initial closing under the Subscription Agreement occurred on November 12, 2009, pursuant to which, the Company sold Notes in the principal amount of \$1,662,000 for a purchase price of \$1,385,000. In addition, on November 13, 2009, the Company sold Notes in the principal amount of \$441,000 for a purchase price of \$367,500 (including \$67,500 previously owed to a subscriber for legal services). The closing that occurred on November 13, 2009 was deemed part of the initial closing, such that, pursuant to the initial closing under the Subscription Agreement, the Company sold Notes in the aggregate principal amount of \$2,103,000 for an aggregate purchase price of \$1,752,500. Pursuant to the initial closing under the Subscription Agreement, the Company also issued an aggregate of (i) 13,984,950 Class A Warrants, and (ii) Additional Investment Rights for the purchase of up to (a) \$4,206,000 principal amount of AIR Notes for a purchase price of up to \$3,505,000 and (b) 28,040,000 Class B Warrants.

The term of the warrants is five years and is subject to anti-dilution and other customary adjustments. The initial fair value of the warrants was estimated at \$1,345,539 using the Black-Scholes pricing model. The warrants were again valued at \$1,200,151 at December 31, 2009 at fair value using the Black-Scholes model, representing a decrease in the fair value of the liability of \$145,388 from the inception date, which was recorded through the results of operations as an adjustment to fair value of derivatives. The assumptions used in the Black-Scholes option pricing model at November 12 and 13, 2009 for all warrants issued in connection with these promissory notes are as follows: (1) dividend yield of 0%; (2) expected volatility of 185%, (3) risk-free interest rate of 2.28%, and (4) expected life of 5.0 years. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 for all warrants issued in connection with these promissory notes are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 2.69%, and (4) expected life of 4.87 years.

The Company has complied with the provisions of ASC 815 "*Derivatives and Hedging*", and recorded the fair value of the embedded conversion option liability associated with the convertible promissory notes. The fair value of the embedded conversion option liability was valued using the Black-Scholes model, resulting in an initial fair value of \$1,357,408 at November 12 and 13, 2009. The convertible debenture is convertible at the option of the holders into a total of 21,030,000 shares of common stock at a conversion price of \$0.10 per share, subject to anti-dilution and other customary adjustments. The assumptions used in the Black-Scholes option pricing model at November 12 and 13, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 185%, (3) risk-free interest rate of 0.32%, and (4) expected life of 1.0 years. The fair value of the embedded conversion option liability was \$1,092,273 at December 31, 2009. The assumptions used in the Black-Scholes option pricing model at December 31, 2009 are as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 0.47%, and (4) expected life of 0.87 years. The change in fair value of the embedded conversion option of \$265,135 was recorded through the results of operations as an adjustment to the fair value of derivatives for the year ended December 31, 2009.

Interest expense for the year ended December 31, 2009 was \$281,272. The Company recorded finance costs in the amount of \$950,448 in its accompanying consolidated statement of operations for the year ended December 31, 2009, representing the excess of the fair value of the conversion option feature over the face value of the convertible promissory notes.

The following table summarizes the 2009 convertible promissory notes outstanding at December 31, 2009:

Convertible promissory notes, principal	\$ 2,103,000
Debt discounts	(1,821,729)
Net convertible promissory notes	\$ 281,271
Less current portion	(246,893)
Convertible promissory notes, long term	<u>\$ 34,378</u>

10. SERIES A-1 REDEEMABLE CONVERTIBLE PREFERRED STOCK

Effective March 3, 2009, the Company entered into a \$5 million credit facility ("Facility") with a life sciences fund. Under the terms of the agreement, the Company may draw down funds, as needed, from the investor through the issuance of Series A-1 redeemable convertible preferred stock, par value \$.001, at a basis of 1 share of Series A-1 redeemable convertible preferred stock for every \$10,000 invested.

Conversion Rights

Any shares of Series A-1 redeemable convertible preferred stock may, at the option of the holder, be converted at any time into shares of common stock. The conversion price for the preferred stock is equal to \$0.75 per share of common stock. The Company must keep available out of its authorized but unissued shares of common stock, such number of shares sufficient to effect a conversion of all then outstanding shares of the Series A-1 redeemable convertible preferred stock. If at any time the number of authorized but unissued shares of common stock is not sufficient to effect a conversion of all then outstanding shares of the Series A-1 redeemable convertible preferred stock, the Company must take necessary action to increase its authorized but unissued shares of common stock to such number of shares as is sufficient for conversion.

Dividends

The preferred stock pays dividends, in kind of preferred stock, at an annual rate of 10%, matures in four years from the initial drawdown date, and is convertible into common stock at \$0.75 per share.

Redemption Rights

Upon the earlier of (i) the fourth anniversary of the issuance date, and (ii) the occurrence of a major transaction, each holder shall have the right, at such holder's option, to require the Company to redeem all or a portion of such holder's share of Series A-1 preferred stock, at a price per share equal to the Series A-1 liquidation value. The Company has the option to pay the redemption price in cash or in shares of its common stock. The Company shall have the right, at its own option, to redeem all or a portion of the shares of Series A-1 redeemable preferred stock, at any time at a price per share of Series A-1 redeemable preferred stock equal to 100% of the Series A-1 liquidation value. In the event the closing price of the our common stock during the 5 trading days following the put notice falls below 75% of the average of the closing bid price in the 5 trading days prior to the put closing date, the investor may, at its option, and without penalty, decline to purchase the applicable put shares on the put closing date.

Termination and Liquidation Rights

The Company may terminate this agreement and its right to initiate future draw-downs by providing 30 days advanced written notice to the investor. Upon any liquidation, dissolution or winding up of the Company, whether voluntary or involuntary, after payment or provision for payment of debts and other liabilities of the Corporation, before any distribution or payment shall be made to the holders of any other equity securities of the Company by reason of their ownership thereof, the holders of the Series A-1 redeemable convertible preferred stock shall first be entitled to be paid out of the assets of the Company available for distribution to its stockholders an amount with respect to each share of Series A-1 redeemable convertible preferred stock equal to \$10,000, plus any accrued by unpaid dividends. If, upon dissolution or winding up of the Company, the assets of the Company shall be insufficient to make payment in full to all holders, then such assets shall be distributed among the holders at the time outstanding, ratably in proportion to the full amounts to which they would otherwise be respectively entitled. During the year ended December 31, 2009, the Company drew down \$2,588,000 on this credit facility.

Because this instrument is redeemable, the Company determined that the Series A-1 redeemable preferred stock has been classified within the mezzanine section between liabilities and equity in its consolidated balance sheets. The embedded conversion option has been recorded as a derivative liability in the Company's consolidated balance sheets, and changes in the fair value each reporting period will be reported in adjustments to fair value of derivatives in the consolidated statements of operations.

The outstanding balance at December 31, 2009 of \$920,696 is convertible into 6,606,958 shares of the Company's common stock. The Company values the conversion option initially when each draw takes place. The assumptions used in the Black-Scholes model to value the embedded conversion option at each draw date were as follows: (1) dividend yield of 0%; (2) expected volatility of 180 - 190%, (3) risk-free interest rate of 1.70 - 2.86%, and (4) expected life of 3.27 - 4.00 years.

The embedded conversion option was again valued at \$525,986 at December 31, 2009 at fair value using the Black-Scholes model. The decrease in the fair value of the embedded conversion option liability of \$2,094,924 for the year ended December 31, 2009 was recorded through the results of operations as an adjustment to fair value of derivatives. The assumptions used in the Black-Scholes model to value the embedded conversion option at December 31, 2009 were as follows: (1) dividend yield of 0%; (2) expected volatility of 180%, (3) risk-free interest rate of 1.70%, and (4) expected life of 3.27 years.

The following table summarizes the Series A-1 redeemable convertible preferred stock and embedded derivative outstanding at December 31, 2009:

	December 31, 2009
Principal due	\$ 920,696
Accrued dividend	123,609
Debt discount	(136,110)
	<u>908,195</u>
Less current portion	-
Non-current portion	<u>\$ 908,195</u>
Aggregate liquidation value*	<u><u>1,044,305</u></u>

* Represents the sum of principal due and accrued dividends.

The dividends are accrued at a rate of 10% per annum, and the Company records the accrual as interest expense in its consolidated statements of operations in the period incurred. The Company recorded accrued dividends on the Series A-1 redeemable convertible preferred stock of \$123,609 for the year ended December 31, 2009.

For providing investor relations services in connection with the Series A-1 redeemable convertible preferred stock credit facility, the Company issued a consultant 24,900,000 shares of its common stock on February 9, 2009. The Company valued the issuance of these shares at \$4,731,000 based on a closing price of \$0.19 on February 9, 2009 and recorded the value of the shares as deferred financing costs associated with the financing on the date they were issued. Beginning on the date of the first draw-down on April 6, 2009 (the loan maturity date is 4 years after the initial draw-down), each quarter the Company will amortize the deferred issuance costs ratably over the term of the Series A-1 redeemable convertible preferred stock facility.

The Company also incurred a non-refundable commitment fee to the holder of this convertible preferred stock facility in the amount of \$250,000. The fee is payable by the Company in either (a) cash, or (b) common stock. If paid in common stock, the Company will issue a number of shares valued at 97% of the volume-weighted average price of its common stock for the five trading days immediately preceding the effective date of the facility, or March 3, 2009. Based on this, the Company would be required to issue approximately 2,152,000 shares of the Company's common stock. Beginning on the date of the first draw-down on April 6, 2009 (the loan maturity date is 4 years after the initial draw-down), each quarter the Company amortizes the deferred issuance costs ratably over the term of the Series A-1 redeemable convertible preferred stock facility.

Interest expense from amortization of the debt discount and deferred issuance costs for the year ended December 31, 2009 was \$3,778,850.

Modification of Series 1-A Convertible Redeemable Preferred Stock

On October 19, 2009, the Company entered into two letter agreements with Volation, pursuant to which (i) the Company reduced the conversion price of its outstanding Series A-1 convertible preferred stock issued to Volation to \$.10 per share resulting in 22,880,000 shares of Common Stock upon conversion, (ii) the Company is to issue Volation 2,500,000 shares of its Common Stock at \$.10 per share in payment of an outstanding commitment fee, and (iii) Volation waived the delinquency in non-payment of the \$250,000 commitment fee required pursuant to the preferred stock purchase agreement between the Company and Volation. The Company has considered the impact of ASC 470-50 "Debt-Modifications and Extinguishments" on the accounting treatment of the change in conversion price of the preferred stock. The Company calculated the fair value of the conversion option for the preferred stock immediately prior to and after the change in the conversion price, and evaluated the impact of the change in conversion price. The Company has concluded that the change in conversion price for this investor constitutes a substantial modification in the terms of the preferred stock agreement. The change in fair value of the conversion option on the preferred stock was \$2,241,197, or a 98% change relative to the face value of the preferred stock. The Company recorded a loss on extinguishment of debentures in the amount of \$2,241,197 during the year ended December 31, 2009 as a result of this modification, representing the difference between the fair value of the new preferred stock instrument and the carrying value of the original instrument.

11. SERIES B REDEEMABLE PREFERRED STOCK

On November 2, 2009 ("Effective Date"), the Company entered into a preferred stock purchase agreement with Optimus Life Sciences Capital Partners, LLC ("Investor"). Pursuant to the purchase agreement, the Company agreed to sell, and the Investor agreed to purchase, in one or more purchases from time to time in the Company's sole discretion, (i) up to 1,000 shares of Series B preferred stock at a purchase price of \$10,000 per share, for an aggregate purchase price of up to \$10,000,000, and (ii) five-year warrants to purchase shares of the Company's common stock with an aggregate exercise price equal to 135% of the purchase price paid by the Investor, at an exercise price per share equal to the closing bid price of the Company's common stock on the date the Company provides notice of such tranche. The Warrants will be issued in replacement of a five-year warrant to purchase 119,469,027 shares of common stock with an exercise price per share of \$0.113 the Company issued on the Effective Date.

The Company agreed to pay to the Investor a commitment fee of \$500,000, at the earlier of the closing of the first Tranche or the six month anniversary of the effective date, payable at the Company's election in cash or common stock valued at 90% of the volume weighted average price of the Company's common stock on the five trading days preceding the payment date. The \$500,000 commitment fee remained outstanding and has been recorded in accrued expenses in the Company's consolidated balance sheet at December 31, 2009. The commitment fee will amortize beginning from the initial issuance date (determined as the first date upon which shares of the Series B preferred stock are issued) and will amortize over the four-year term.

On November 3, 2009, the Company filed a certificate of designations for the Series B preferred stock (the "Certificate of Designations"). Pursuant to the Certificate of Designations, the preferred shares shall, with respect to dividend, rights upon liquidation, winding-up or dissolution, rank: (i) senior to the Company's common stock, and any other class or series of preferred stock of the Company, except Series A-1 Convertible Preferred Stock which shall rank senior in right of liquidation and *pari passu* with respect to dividends; and (ii) junior to all existing and future indebtedness of the Company.

Dividends

Commencing on the date of the issuance of any shares of Series B preferred stock, Holders of Series B preferred stock will be entitled to receive dividends on each outstanding share of Series B preferred stock, which will accrue in shares of Series B preferred stock at a rate equal to 10% per annum from the issuance date. Accrued dividends will be payable upon redemption of the Series B preferred stock.

Redemption Rights

Upon or after the fourth anniversary of the initial issuance date, the Company will have the right, at the Company's option, to redeem all or a portion of the shares of the Series B preferred stock, at a price per shares equal to 100% of the Series B liquidation value. The preferred stock may be redeemed at the Company's option, commencing 4 years from the issuance date at a price per share of (a) \$10,000 per share plus accrued but unpaid dividends (the "Series B Liquidation Value"), or, at a price per share of : (x) 127% of the Series B Liquidation Value if redeemed on or after the first anniversary but prior to the second anniversary of the initial issuance date, (y) 118% of the Series B Liquidation Value if redeemed on or after the second anniversary but prior to the third anniversary of the initial issuance date, and (z) 109% of the Series B Liquidation Value if redeemed on or after the third anniversary but prior to the fourth anniversary of the initial issuance date.

Termination and Liquidation Rights

If the Company determines to liquidate, dissolve or wind-up its business, it must redeem the Series B preferred stock at the prices set forth above. Upon any liquidation, dissolution or winding up of the Company, whether voluntary or involuntary, after payment of provision for payment of debts and other liabilities of the Company, before any distribution payment shall be made to the holders of any Junior Securities, the Holders of Series B preferred stock shall be first entitled to be paid out of the assets of the Company available for distribution to its stockholders an amount with respect to each share of Series B preferred stock equal to \$10,000, plus any accrued and unpaid dividends. If, upon dissolution or winding up of the Company, the assets of the Company shall be insufficient to make payment in full to all holders, then such assets shall be distributed among the holders at the time outstanding, ratably in proportion to the full amounts to which they would otherwise be respectively entitled.

Because this instrument is redeemable, the Company determined that the Series B redeemable preferred stock should be classified within the mezzanine section between liabilities and equity in its consolidated balance sheets.

As of December 31, 2009, zero shares of Series B preferred stock were outstanding.

12. WARRANT SUMMARY

Warrant Activity

A summary of warrant activity for the years ended December 31, 2009, 2008 and 2007 is presented below:

	Number of Warrants	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (000)
Outstanding, January 1, 2007	102,375,522	\$ 0.29	4.50	\$ 105
Granted	2,325,000	-		
Exercised	-	-		
Forfeited/Canceled	-	-		
Outstanding, December 31, 2007	104,700,522	\$ 0.29	3.55	\$ 495
Granted	31,870,465	0.15		
Exercised	-	-		
Forfeited/Canceled	(7,173,036)	0.25		
Outstanding, December 31, 2008	129,397,951	\$ 0.26	3.23	\$ -
Granted	95,620,697	0.10		
Exercised	(3,019,527)	0.10		
Forfeited/Canceled	(3,373,333)	\$ 1.47		
Outstanding, December 31, 2009	<u>218,625,788</u>	\$ 0.13	4.35	49
Vested and expected to vest at December 31, 2009	<u>218,625,788</u>	\$ 0.13	4.35	49
Exercisable, December 31, 2009	<u>218,625,788</u>	\$ 0.13	4.35	49

The aggregate intrinsic value in the table above is before applicable income taxes and is calculated based on the difference between the exercise price of the warrants and the quoted price of the Company's common stock as of the reporting date.

The following table summarizes information about warrants outstanding and exercisable at December 31, 2009:

Exercise Price	Warrants Outstanding			Warrants Exercisable		
	Number of Shares	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	
\$ 0.05	1,226,000	2.68	\$ 0.05	1,226,000	\$ 0.05	
0.10 - 0.11	205,974,261	4.50	0.10	205,974,261	0.10	
0.34	3,720,588	0.76	0.34	3,720,588	0.34	
0.38 - 0.40	3,080,636	3.94	0.39	3,080,636	0.39	
0.85 - 0.96	4,231,386	1.05	0.95	4,231,386	0.95	
2.20	72,917	1.63	2.20	72,917	2.20	
2.48 - 2.54	320,000	1.30	2.54	320,000	2.54	
	<u>218,625,788</u>			<u>218,625,788</u>		

The Company recorded finance costs in the amount of \$288,717 in its accompanying consolidated statement of operations for the year ended December 31, 2009, representing the value of warrants re-granted that had previously expired.

13. STOCKHOLDERS' EQUITY TRANSACTIONS

In January 2007, the Company issued 300,000 warrants to purchase common stock at \$0.96 per share in connection with consulting services provided during the quarter. The warrants were valued at approximately \$225,000 using the Black Scholes pricing model with the following assumptions: (1) dividend yield of 0%; (2) expected volatility of 165%, (3) risk-free interest rate of 4.90%, and (4) expected life of 4.0 years. This warrant is classified as a warrant derivative.

In January 2007, the Company issued 35,909 fully vested shares of Common Stock as consideration for service on the Company's Board of Directors and Audit Committee. These shares are valued at market price on date of grant.

In January 2007, the Company issued 515,000 share of Common Stock, valued at \$407,000, to employees. These shares are fully vested at issuance and are valued at fair market proce on date of grant.

In February 2007, the Company issued 800,00 shares of Common Stock, valued at \$608,000 based upon the closing price per share on the date of issuance, to Infigen, Inc. in connection with the execution of a Patent Assignment Agreement. The Company recorded the \$608,000 as deferred royalty fees and will amortize over an estimated useful life of 10 years.

In April 2007, the Company issued 85,000 shares of common stock in settlement of legal fees of approximately \$68,000. The shares were valued at the closing price per share on the date of issuance.

In September 2007, the Company issued 8,064,507 shares of common stock with a value of approximately \$2,419,000 for the acquisition of Mytogen. The shares were valued at the closing price per share on the date of issuance.

In September 2007, the Company issued 650,000 warrants to purchase common stock at \$0.38 per share in connection with consulting services provided during the quarter. The warrants were valued at approximately \$176,000 using the Black Scholes pricing model with the following assumptions: (1) dividend yield of 0%; (2) expected volatility of 151%, (3) risk-free interest rate of 4.25%, and (4) expected life of 5.0 years. This warrant is classified as a warrant derivative.

In October 2007, the Company issued 1,250,000 warrants to purchase common stock at \$0.40 per share in connection with consulting services provided during the quarter. The warrants were valued at approximately \$337,000 using the Black Scholes pricing model with the following assumptions: (1) dividend yield of 0%; (2) expected volatility of 148%, (3) risk-free interest rate of 4.22%, and (4) expected life of 5.0 years. This warrant is classified as a warrant derivative.

In December 2007, the Company issued 500,000 warrants to purchase common stock at \$0.40 per share in connection with consulting services provided during the quarter. The warrants were valued at approximately \$19,000 using the Black Scholes pricing model with the following assumptions: (1) dividend yield of 0%; (2) expected volatility of 145%, (3) risk-free interest rate of 4.51%, and (4) expected life of 5.0 years. This warrant is classified as a warrant derivative.

The Company is authorized to issue two classes of capital stock, to be designated, respectively, preferred stock and common stock. The total number of shares of preferred stock the Company is authorized to issue is 50,000,000, par value \$0.001 per share. On September 10, 2009, upon approval by a vote of the Company's stockholders, the Company increased its authorized shares of common stock, par value \$0.001 from 500,000,000 to 1,750,000,000 shares, effective immediately. The total number of shares of common stock the Company is authorized to issue is 1,750,000,000, par value \$0.001 per share. The Company had 92 shares of Series A-1 preferred Stock outstanding and zero shares of Series B preferred stock outstanding as of December 31, 2009. The Company had 663,649,294 shares of common stock outstanding as of December 31, 2009.

Effective as of April 1, 2008, Jonathan F. Atzen, the Company's Senior Vice President, General Counsel and Secretary, resigned from his positions with the Company and terminated his employment arrangement with the Company. Pursuant to the terms of an agreement between the Company and Mr. Atzen effective April 1, 2008, the Company agreed to (i) pay Mr. Atzen \$48,333.33 in cash as a severance payment, (ii) issue a fully vested option to purchase an aggregate of 400,000 shares of common stock pursuant to the Company's 2005 Stock Incentive Plan, as amended (the "2005 Plan"), (iii) issue an aggregate of 936,692 shares of the common stock pursuant to the 2005 Plan, (iv) provide for the vesting of all outstanding stock options held by Mr. Atzen and (v) provide Mr. Atzen and his family with full healthcare and dental coverage for a period of 6 months as was provided to Mr. Atzen during his employment.

Effective as of March 17, 2008, Ivan Wolkind, the Company's Senior Vice President—Finance, Administration & Chief Accounting Officer, resigned from all positions with the Company and voluntarily terminated his employment arrangement with the Company for personal reasons. On April 2, 2008, the Company entered into a Consulting Agreement with Mr. Wolkind. Pursuant to the Consulting Agreement, Mr. Wolkind agreed for a period of 90 days to provide up to 20 hours per week of financial consulting services to the Company including but not limited to (i) assisting with general accounting and investor diligence, (ii) commenting on the structure of proposed financial transactions, (iii) responding to queries regarding ACT's corporate structure, and (iv) reviewing strategic and financial documents as appropriate. As consideration for the services to be provided, the Company agreed to pay Mr. Wolkind an aggregate of \$45,834 of which was paid on April 2, 2008. As additional consideration for the services to be provided, the Company agreed to issue to Mr. Wolkind 238,719 shares of common stock pursuant to the 2005 Plan. On May 2, 2008, the consulting contract was terminated with no future payments due.

Between September 29, 2008 and January 20, 2009, the Company was ordered by the Circuit Court of the Twelfth Judicial District Court for Sarasota County, Florida to settle certain past due accounts payable, for previous professional services and other operating expenses incurred, by the issuance of shares of its common stock. In aggregate, as of January 30, 2009, the Company settled \$1,108,673 in accounts payable through the issuance of 260,116,283 shares of its common stock. In 2008, the Company settled \$603,474 in accounts payable through the issuance of 220,735,436 shares of its common stock. In 2009, the Company settled \$505,199 in accounts payable through the issuance of 39,380,847 shares of its common stock. The Company recorded a loss on settlement of \$4,793,949 and \$5,436,137 in its accompanying statements of operations for the years ended December 31, 2009 and 2008, respectively. The losses were calculated as the difference between the amount of accounts payable relieved and the value of the shares (based on the closing share price on the settlement date) that were issued to repay the accounts payable.

On March 5, 2009, the Company settled a lawsuit originally brought by an investor in January 2009, who is an investor in the 2007 and 2008 debentures, and associated with the default on August 6, 2008 on all debentures. As a result of the lawsuit, the Company was required by court order to reduce the conversion price on convertible debentures held by this investor to \$0.02 per share, effective immediately, so long as the Company has a sufficient number of authorized shares to honor the request for conversion. During the year ended December 31, 2009, the Company issued 4,847,050 shares of its common stock to this investor in conversion of approximately \$97,000 of its 2006 debenture at \$0.02 per share, and 1,252,950 shares of its common stock to this investor in conversion of approximately \$25,000 of its 2007 debenture at \$0.02 per share. The Company has considered the impact of ASC 470-50 "*Debt-Modifications and Extinguishments*" on the accounting treatment of the change in conversion price of the 2007 and 2008 convertible debentures. ASC 470-50 states that a transaction resulting in a significant change in the nature of a debt instrument should be accounted for as an extinguishment of debt. The difference between the reacquisition price and the net carrying amount of the extinguished debt should be recognized currently in income of the period of extinguishment. The Company calculated the fair value of the conversion option for the 2007 and April 2008 debentures immediately prior to and after the change in the conversion price, and evaluated the impact of the change in conversion price. The Company has concluded that the change in conversion price for this investor constitutes a substantial modification in the terms of the 2007 and 2008 debenture agreements. Based on the Company's evaluation, the below table summarizes the impact relative to the debentures' face value on March 5, 2009.

Impact on Debentures	Change	Debenture	
		Face Value	% Change
2007 Debenture	\$1,319,354	\$ 6,739,214	20%
April 2008 Debenture	\$ 477,014	\$ 4,038,880	12%
	<u>\$1,796,368</u>	<u>\$10,778,094</u>	

The Company recorded a loss on extinguishment of debentures in the amount of \$1,796,368 during the year ended December 31, 2009 as a result of this modification, representing the difference between the fair value of the new debt and the carrying value of the original debt.

On June 30, 2009, an investor submitted a conversion notice in the principal amount of \$150,000 into 7,500,000 shares of common stock at \$0.02 per share. At that time, the Company did not have sufficient authorized shares to satisfy this conversion notice. On July 6, 2009, by means of a settlement between the two parties, the Company agreed to deliver the 7,500,000 shares of its common stock no later than September 25, 2009. The Company delivered the 7,500,000 shares on September 25, 2009. Further, the Company agreed to provide the investor with an additional \$110,000 principal, which is to be upon the same terms and conditions as the original 2008 debenture. Accordingly, the Company recognized a loss on settlement in the amount of \$110,000 during the year ended December 31, 2009 for the amount of principal that was added to the 2008 convertible debenture. Additionally, the Company recognized interest expense in the amount of \$1,210,021, representing the fair value of the conversion option of the \$110,000 on July 6, 2009. The full amount of \$1,210,021 was recognized in interest expense in the accompanying consolidation statements of operations for the year ended December 31, 2009 as a result of the debenture's default at the time.

During the year ended December 31, 2009, the Company issued 375,000 shares of its common stock in payment for legal services provided. The Company recorded professional fees in its accompanying statements of operations in the amount of \$38,250 during the year ended December 31, 2009.

During the year ended December 31, 2009, the Company issued 2,122,495 shares of its common stock in a cashless exercise of warrants.

14. STOCK-BASED COMPENSATION

Stock Plans

The following table summarizes the Company's stock incentive plans as of December 31, 2009:

Stock Plan	Options/Shares	Options	Options/Shares
	Issued	Outstanding	Available For Grant
2004 Stock Plan	2,492,000	820,000	370,000
2004 Stock Plan II	1,301,161	1,071,161	230,000
2005 Plan	29,605,484	26,594,958	117,729,029
	<u>33,398,645</u>	<u>28,486,119</u>	<u>118,329,029</u>

On September 10, 2009, upon approval by a vote of the Company's stockholders, the Company increased the number of shares of common stock issuable under the 2005 Plan to a total of 145,837,250 shares, issuable as options or shares of common stock.

Stock Option Activity

A summary of option activity for the years ended December 31, 2009, 2008 and 2007 is presented below:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (000)
Outstanding, January 1, 2007	12,874,163	\$ 0.71	8.20	\$ 1,771
Granted	1,300,000	0.75		
Exercised	(340,000)	0.05		
Forfeited/canceled	(2,213,192)	0.83		
Outstanding, December 31, 2007	11,620,971	\$ 0.78	7.16	\$ 255
Granted	11,875,734	0.21		
Exercised	(1,200,000)	0.05		
Forfeited/canceled	(8,169,015)	0.53		
Outstanding, December 31, 2008	14,485,580	\$ 0.51	7.71	\$ -
Granted	14,501,273	-		
Exercised	-	-		
Forfeited/canceled	(500,734)	-		
Outstanding, December 31, 2009	<u>28,486,119</u>	\$ 0.32	8.09	\$ 33
Vested and expected to vest at December 31, 2009	<u>27,152,520</u>	0.33	8.03	33
Exercisable, December 31, 2009	<u>18,227,664</u>	0.43	7.37	33

The aggregate intrinsic value in the table above is before applicable income taxes and is calculated based on the difference between the exercise price of the options and the quoted price of the Company's common stock as of the reporting date.

A summary of the status of unvested employee stock options as of December 31, 2009 and changes during the periods ended December 31, 2009, 2008 and 2007, is presented below:

	Shares	Weighted Average Grant Date Fair Value Per Share
Unvested at January 1, 2007	3,812,762	\$ 0.22
Granted	1,300,000	0.69
Vested	(2,115,756)	0.27
Forfeited	(2,213,192)	0.36
Unvested at December 31, 2007	783,814	\$ 0.46
Granted	10,735,621	0.21
Vested	(2,372,518)	0.39
Forfeited	(4,377,758)	0.26
Unvested at December 31, 2008	4,769,159	\$ 0.23
Granted	14,501,273	0.10
Vested	(9,011,977)	0.13
Forfeited	-	-
Unvested at December 31, 2009	<u>10,258,455</u>	\$ 0.13

As of December 31, 2009, total unrecognized stock-based compensation expense related to nonvested stock options was approximately \$1,006,000, which is expected to be recognized over a weighted average period of approximately 9.38 years.

The following table summarizes information about stock options outstanding and exercisable at December 31, 2009.

Exercise Price	Options Outstanding			Options Exercisable		
	Number of Shares	Weighted Average Remaining Life (Years)	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	
\$ 0.05	820,000	4.62	\$ 0.05	820,000	\$ 0.05	
0.10	14,501,273	9.87	0.10	7,114,024	0.10	
0.21	5,811,669	7.86	0.21	2,940,462	0.21	
0.25 - 0.76	1,071,161	5.00	0.25	1,071,161	0.25	
0.85	5,604,099	5.09	0.85	5,604,100	0.85	
1.35 - 2.48	677,917	5.86	2.04	677,917	2.04	
	<u>28,486,119</u>			<u>18,227,664</u>		

The assumptions used in calculating the fair value of options granted using the Black-Scholes option-pricing model for options granted during the years ended December 31, 2009, 2008 and 2007 are as follows:

	2009	2008	2007
Risk-free interest rate	2.3 – 3.4%	2.5%	4.7%
Expected life of the options	5 - 10 years	4 years	4 years
Expected volatility	180-185%	148%	163%
Expected dividend yield	0%	0%	0%
Forfeiture rate	13%	13%	13%

15. COMMITMENTS AND CONTINGENCIES

The Company entered into a lease for office and laboratory space in Worcester, Massachusetts commencing December 2004 and expiring March 31, 2010. On January 29, 2010, the Company signed a new lease to move from its Worcester facility to a new 10,607 square-foot facility in Marlboro, Massachusetts. The lease term is from April 1, 2010 through June 30, 2015. Monthly base rent in 2010 will be \$12,596. The Company also entered into a lease for office space in Los Angeles, California commencing November 2005 and expiring May 2008. The Company's rent at its Los Angeles, California site was on a month-to-month basis after May 2008. On March 1, 2009, the Company vacated its site in Los Angeles, California and moved to another site in Los Angeles. The term on this new lease is through February 28, 2011. Monthly base rent is \$2,170. Annual minimum lease payments are as follows:

Year 1	\$ 164,165
Year 2	156,816
Year 3	155,127
Year 4	157,779
Year 5	160,431
Thereafter	80,878
	<u>\$ 875,196</u>

Rent expense recorded in the financial statements for the years ended December 31, 2009, 2008 and 2007 was approximately \$134,000, \$2,183,000 and \$1,485,218, respectively.

Effective as of April 1, 2008, Jonathan F. Atzen, the Company's Senior Vice President, General Counsel and Secretary, resigned from his positions with the Company and terminated his employment arrangement with the Company. Mr. Atzen had no disagreements with the Company, its Board of Directors or its management in any matter relating to the Company's operations, policies or practices.

Effective as of March 17, 2008, Ivan Wolkind, the Company's Senior Vice President—Finance, Administration & Chief Accounting Officer, resigned from all positions with the Company and voluntarily terminated his employment arrangement with the Company for personal reasons. Mr. Wolkind had no disagreements with the Company, its Board of Directors or its management in any matter relating to the Company's operations, policies or practices.

On May 26, 2008, Alan G. Walton, Ph., D.Sc. announced his resignation from the Board of Directors of the Company, effective immediately. Dr. Walton had no disagreements with the Company, its Board of Directors or its management in any matter relating to the Company's operations, policies or practices.

On October 1, 2009 (the "Effective Date"), the Company entered into an employment agreement with Robert Lanza, the Company's chief scientific officer since October 2007. Pursuant to the agreement, the parties agreed as follows:

- Robert P. Lanza will continue to serve as the Company's chief scientific officer, for a term of two years commencing on the Effective Date, subject to earlier termination as provided in the agreement. The term under the employment agreement may be extended by mutual written agreement.
- The Company will pay Mr. Lanza a base salary of \$375,000 per annum, which may be increased during the term at the sole discretion of the Company's board of directors. The Company may also pay Mr. Lanza annual bonuses in the Company's sole discretion.
- The Company will issue to Mr. Lanza 30,270,203 shares of free trading common stock from the Company's 2005 Employee Incentive Plan (approved by the Board of Directors in January 2010).
- If Mr. Lanza's employment under the Agreement is terminated by the Company without cause (as defined therein), the Company will pay Mr. Lanza severance of one year's base salary.

On May 31, 2008, the Company settled a dispute as a subtenant to its Alameda, California office for nonpayment of rent to its sublandlord. The sublease expired on May 31, 2008. As of that date, \$445,000 of base rent, additional rent, and equipment payments, plus late fees and costs due under the sublease for a grand total of approximately \$475,000 remained unpaid during the period from January 1, 2008 through May 31, 2008. On the date of the lease expiration, the Company vacated the premises but failed to remove the equipment that belonged to the Company. Consequently, the Company has agreed to assign all rights to the equipment to the sublandlord in partial settlement of amounts owed. Further, the Company has agreed to assign the sublandlord 62.5% of the Company's right, title, and interest in all royalties and 65% of subtenant's right, title, and interest in all other consideration payable to the Company under a license agreement with Embryome Sciences, Inc., dated July 10, 2008, until such time as the sublandlord has received royalty and other payments equal to \$475,000, including the value of the equipment assigned to the sublandlord. No further amounts were owed by the Company under the judgment as of December 31, 2009 and 2008, respectively.

On September 19, 2008, the Company was delivered judgment with respect to the landlord of its Charlestown, Massachusetts site over unpaid lease amounts. The Company failed to make its monthly lease payments after December 2007, which constituted an event of default under the lease agreement. Accordingly, the Company settled with the landlord in total of \$1,751,543 for unpaid rent expenses, attorney fees, interest and damages for unpaid rent incurred through September 9, 2008. The Company abandoned its fixed assets at this site upon vacating the space, and recorded a loss on disposal of fixed assets amounting to \$227,543 in its accompanying consolidated statement of operations during the year ended December 31, 2008. The Company accrued the remaining balance for the portion of damages incurred from January 1, 2008 through September 30, 2008 in accrued expenses its accompanying balance sheet at December 31, 2008, net of one payment of approximately \$147,000. As of December 31, 2009, the Company had paid the entire amount under the judgment, plus approximately \$104,000 in interest, and no longer has any obligations with respect to this judgment.

Between April 1, 2008 and December 31, 2008, ACT issued 6,619,072 shares of common stock to several Holders of the 2005, 2006, 2007 and 2008 Debentures primarily for two reasons: (a) duplicate pre-redemption shares at the time of true-up and (b) negotiated shares with investors in settlement of various complaints from Debenture holders. The Company's policy is to expense the value of these shares to financing costs in the period the shares were issued or the costs were otherwise incurred. In 2008, the Company recorded \$482,430 as financing costs associated with the issuance of these shares. At this time, the Company cannot determine potential legal ramifications arising from the issuance of these shares, and the Company has concluded that the likelihood of unfavorable ramifications from the issuance of these shares is remote and not estimable.

On October 1, 2007 Gary D. Aronson brought suit against the Company with respect to a dispute over the interpretation of the anti-dilution provisions of our warrants issued to Mr. Aronson on or about September 14, 2005. John S. Gorton initiated a similar suit on October 10, 2007. The two cases have been consolidated. The plaintiffs allege that we breached warrants to purchase securities issued by us to these individuals by not timely issuing stock after the warrants were exercised, failing to issue additional shares of stock in accordance with the terms of the warrants and failing to provide proper notice of certain events allegedly triggering Plaintiffs' purported rights to additional shares. Plaintiffs assert monetary damages in excess of \$14 million. Plaintiffs may alternatively seek additional shares in the Company with a value potentially in excess of \$14 million, or may seek a combination of monetary damages and shares in the Company. Plaintiffs also seek prejudgment interest and attorney fees. Discovery is completed, but no conclusions have been reached as to the potential exposure to us or whether we have liability. A trial date has been set for March 22, 2010.

The Company and its subsidiary Mytogen, Inc. are currently defending themselves against a civil action brought in Suffolk Superior Court, No. 09-442-B, by their former landlord at 79/96 Thirteenth Street, Charlestown, Massachusetts, a property vacated by us and Mytogen effective May 31, 2008. In that action, Alexandria Real Estate-79/96 Charlestown Navy Yard ("ARE") is alleging that it has been unable to relet the premises and therefore seeking rent for the vacated premises since September 2008. Alexandria is also seeking certain clean-up and storage expenses. The Company is defending against the suit, claiming that ARE had breached the covenant of quiet enjoyment as of when Mytogen vacated, and that had ARE used reasonable diligence in its efforts to secure a new tenant, it would have been more successful. No trial date has been set. No conclusions have been reached as to the potential exposure to the Company or whether the Company has a liability.

The Company has been named as a third party defendant in this action, filed September 16, 2009, in which the plaintiff alleges that Alexandria Real Estate ("Alexandria") improperly charged a trustee holding approximately \$146,000 of funds in a Company account that Bristol claimed as collateral. Alexandria brought a third party complaint against the Company for indemnification. No conclusions have been reached as to the potential exposure to the Company or whether the Company has a liability.

On March 9, 2009, plaintiffs filed a complaint and summons in the Supreme Court of the State of New York, County of New York against the Company and its subsidiary Mytogen, Inc. Plaintiffs' complaint alleges, among other things, that the Company has breached the terms of certain contracts with plaintiffs; namely, convertible debentures and a consulting agreement. Plaintiffs seek preliminary and permanent injunctive relief directing the Company to deliver to plaintiff Bristol Investment Fund, Ltd. ("Bristol") 2.5 million shares of its common stock, declaring a conversion price of \$0.02 for the convertible debentures held by plaintiffs, and directing the Company to honor plaintiff's future conversion requests. Plaintiffs also seek compensatory damages in an amount to be determined at trial, but alleged in the complaint to exceed \$1.5 million. On May 1, 2009, the Company filed an answer to plaintiffs' complaint. On May 13, 2009, the Company filed a motion to stay the action and to compel arbitration of all claims by Bristol. The court has not yet ruled on the Company's motion to stay the action and to compel arbitration. On or about September 16, 2009, plaintiffs filed an order to show cause, seeking the issuance of a preliminary injunction directing the Company to deliver to Bristol 2.5 million shares of its common stock pursuant to a convertible debenture and 47.4 million shares of its common stock pursuant to common stock purchase warrants, declaring a conversion price of \$0.02 for the convertible debenture held by plaintiffs, and enjoining or restraining the Company from issuing shares of its common stock to any entity other than plaintiffs or the other holders of convertible debentures. On September 25, 2009, the Company submitted its response in opposition to plaintiffs' motion and moved by cross-motion for dismissal of the complaint, based on the terms of the consent, waiver, amendment and exchange agreement entered into between the Company and the holders of over 95% of the outstanding principal amount of the Amended and Restated Debentures. The court has not yet ruled on the respective motions. The Company intends to continue to contest the case vigorously. Management believes the Company will prevail, and accordingly, the Company did not recognize a liability in its accompanying consolidated balance sheet at December 31, 2009.

The Company has entered into employment contracts with certain executives and research personnel. The contracts provide for salaries, bonuses and stock option grants, along with other employee benefits. The employment contracts generally have no set term and can be terminated by either party. There is a provision for payments of three months to one year of annual salary as severance if we terminate a contract without cause, along with the acceleration of certain unvested stock option grants.

16. INCOME TAXES

The items accounting for the difference between income taxes computed at the federal statutory rate and the provision for income taxes were as follows:

	2009	2008	2007
Statutory federal income tax rate	(34) %	(34) %	(34) %
State income taxes, net of federal taxes	(6) %	(6) %	(6) %
Non-includable items	(25) %	8%	(19) %
Increase in valuation allowance	65%	32%	59%
Effective income tax rate	<u>-</u>	<u>-</u>	<u>-</u>

Significant components of deferred tax assets and (liabilities) are as follows:

	2009	2008
Deferred tax assets:		
Net operating loss carryforwards	\$ 28,666,867	\$ 39,265,458
Depreciation	84,159	-
Capitalized R&D expenses	175,309	441,000
Deferred revenue	1,826,336	1,250,210
Losses from joint venture	133,414	-
Shares issued in settlement of accounts payable	4,102,264	-
Professional fees paid in stock	575,524	-
Deferred interest and finance charges	-	43,000
Stock-based compensation	1,341,125	1,008,424
Reversal of unpaid liabilities	1,582,754	-
Valuation allowance	<u>(38,487,752)</u>	<u>(42,008,092)</u>
Net deferred tax asset	\$ -	\$ -

The Company files income tax returns in the U.S. federal jurisdiction, and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2002.

At December 31, 2009, the Company had federal and state net operating loss carry forwards available to offset future taxable income of approximately \$73 million and \$64 million respectively. These carry forwards will begin to expire in the years ending December 31, 2024 and December 31, 2014, respectively. These net operating losses are subject to various limitations on utilization based on ownership changes in the prior years under Internal Revenue Code Section 382. The Company is in the process of analyzing the impact of the ownership changes but management does not believe they will have a material impact on the Company's ability to utilize the net operating losses in the future.

The Company periodically evaluates the likelihood of the realization of deferred tax assets, and adjusts the carrying amount of the deferred tax assets by the valuation allowance to the extent the future realization of the deferred tax assets is not judged to be more likely than not. The Company considers many factors when assessing the likelihood of future realization of its deferred tax assets, including its recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income or loss, the carryforward periods available to the Company for tax reporting purposes, and other relevant factors.

At December 31, 2009, based on the weight of available evidence, including cumulative losses in recent years and expectations of future taxable income, the Company determined that it was more likely than not that its deferred tax assets would not be realized and have a \$38.0 million valuation allowance associated with its deferred tax assets.

The Company adopted the provisions of ASC 740. ASC 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC 740 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

As a result of the implementation of ASC 740, the Company reduced its net operating loss carryforward by \$1,550,000. This reduction of the net operating loss carryforward translated into a reduction of the gross deferred tax asset of \$658,500, with a corresponding reduction of the valuation allowance against that deferred tax asset. Due to the offsetting effect of the reduction of the valuation allowance, the adoption of FIN 48 had no impact on the Company's balance sheets or statements of operations.

The following table summarizes the activity related to its unrecognized tax benefits:

	Total
Balance at January 1, 2009	\$ 658,500
Increase related to prior period tax positions	-
Increase related to current year tax positions	-
Expiration of the statute of limitations for the assessment of taxes	-
Other	-
Balance at December 31, 2009	<u>\$ 658,500</u>

The components of income tax expense are as follows:

	2009	2008	2007
Current federal income tax	\$ -	\$ -	\$ -
Current state income tax	-	-	-
Deferred taxes	(3,520,340)	15,414,416	9,192,476
Valuation allowance	3,520,340	(15,414,416)	(9,192,476)
	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

Future changes in the unrecognized tax benefit will have no impact on the effective tax rate due to the existence of the valuation allowance. The Company estimates that the unrecognized tax benefit will not change significantly within the next twelve months. The Company will continue to classify income tax penalties and interest as part of general and administrative expense in its consolidated statements of operations. There were no interest or penalties accrued as of December 31, 2009, 2008 or 2007.

The following table summarizes the open tax years for each major jurisdiction:

<u>Jurisdiction</u>	<u>Open Tax Years</u>
Federal	2007 - 2009
States	2006 - 2009

17. RELATED PARTY TRANSACTIONS

Dr. Shapiro, one of the Company's directors, may be deemed the beneficial owner of the securities owned by The Shapiro Family Trust. Refinanced bridge debt consisted of \$70,000 in unsecured convertible notes previously issued and sold to The Shapiro Family Trust on March 21, 2008. The net outstanding amount of principal plus interest of the Notes was converted into the debt within the 2008 debenture on a dollar-for-dollar basis.

Gary Rabin, a member of the Board of Directors may be deemed the beneficial owner of the securities owned by PDPI, LLC, in which he holds a partnership interest. Refinanced debt consisted of \$60,000 in an unsecured note previously issued and sold to PDPI, LLC, and another \$61,000 assumed by PDPI, LLC, and consisted of amounts owed by a third party which were rolled over into the 2008 Debenture.

18. SELECTED QUARTERLY DATA (UNAUDITED)

	Quarterly Periods Ended			
	March 31, 2009	June 30, 2009	September 30, 2009	December 31, 2009

19. SUBSEQUENT EVENTS

Subsequent events have been evaluated through March 16, 2010, which is the date the financial statements were issued.

Lease

On January 29, 2010, the Company signed a new lease to move from its Worcester facility to a new 10,607 square-foot facility in Marlboro, Massachusetts. The lease term is from April 1, 2010 through June 30, 2015. Monthly base rent in 2010 will be \$12,596.

2009 Convertible Promissory Note

On February 16, 2010, pursuant to the 2009 convertible promissory notes described in Note 9, the Company completed the second closing, issuing additional Notes in the principal amount of up to \$2,076,451 for a purchase price of \$1,730,376 (including \$45,376 previously owed to a subscriber for legal services), in a closing that was to occur within 90 days of the initial closing. Pursuant to the initial closing under the Subscription Agreement, the Company also issued an aggregate of (i) 13,808,400 Class A Warrants.

JMJ Financing

On March 2, 2010, the Company received from JMJ Financial Note B2 a total of \$500,000, which equates to a principal amount of \$589,286, including an \$89,286 original issue discount.

Series A-1 Convertible Preferred Stock

On March 1, 2010, the Company issued 28 shares of its Series A-1 convertible preferred stock upon receipt of \$283,224 under the financing.

Employment Agreement with Chief Executive Officer

On February 22, 2010, the Company entered into an employment agreement with William M. Caldwell, IV, who has been the Company's chief executive officer and chairman since January 2005. Pursuant to the Employment Agreement, the parties agreed as follows:

- Mr. Caldwell will continue to serve as the Company's chief executive officer, for a term of two and 1/3 years commencing on October 1, 2009, subject to earlier termination as provided therein. The term under the Employment Agreement will renew automatically for additional one year terms unless either party provides written notice of intent not to renew the employment agreement at least 90 days prior to such automatic renewal.
- The Company will pay Mr. Caldwell an initial base salary of \$480,000 per annum, which base salary will increase annually by not less than the annual increase in the consumer price index, and may be increased during the term by a greater amount at the sole discretion of the Company's board of directors.
- Within 10 days of execution of the employment agreement, Mr. Caldwell received a retention bonus of \$100,000.
- Commencing in the 2010 calendar year, the Company will pay Mr. Caldwell an annual bonus based on the performance of the Company's common stock. The Company may also pay Mr. Caldwell additional bonuses in the Company's sole discretion.
- The Company will recommend to the Company's board of directors that the Company issue to Mr. Caldwell restricted common stock in an amount equal to the greater of (a) 70,000,000 shares or (b) 7% of the Company's fully diluted shares of issued and outstanding common stock.
- If Mr. Caldwell's employment under the Employment Agreement is terminated by the Company without cause, or by Mr. Caldwell for good reason, the Company will pay Mr. Caldwell severance of two years' base salary.

Shares of Common Stock Issued to Board of Directors

On March 10, 2010, the Company issued 5,000,000 shares of its restricted common stock to each of its directors in connection with their services on the board of directors.

On March 2, 2010, the Company delivered its first tranche notice to Optimus Life Sciences Capital Partners, LLC under the Series B redeemable preferred stock (see Note 11) for funding in the amount of \$1,500,000. On March 8, 2010, in connection with the funding, the Company issued 19,285,714 shares of its common stock upon exercise of the same number of warrants, which were granted simultaneously with the Company's tranche notice. The Company received a secured promissory note in the amount of \$2,025,000 to settle the warrant exercise. Under the terms of the agreement, the Investor is required to provide funding on the preferred stock facility on or within 10 trading days from the Company's tranche notice date.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2009. Based upon such evaluation, the Chief Executive Officer and Chief Financial Officer has concluded that, as of December 31, 2009, these disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act. Internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, and effected by the board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States ("US GAAP"), including those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with US GAAP and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies and procedures may deteriorate.

Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. In making this assessment, our management used the criteria described in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment and those criteria, our management concluded that our internal control over financial reporting as of December 31, 2009 was effective.

Our internal control over financial reporting as of December 31, 2009 has been audited by SingerLewak LLP, an independent registered public accounting firm, as stated in their report that is included in Item 8 of this report and is incorporated by reference herein.

Changes in Internal Control over Financial Reporting

There were no significant changes in our internal controls over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act) during the three months ended December 31, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

We have audited Advanced Cell Technology, Inc. and subsidiary's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Advanced Cell Technology, Inc. and subsidiary's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Advanced Cell Technology, Inc. and subsidiary maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2009 and 2008 and the related consolidated statements of operations, stockholders' deficit, and cash flows for each of the three years in the period ended December 31, 2009 of Advanced Cell Technology, Inc. and subsidiary and our report dated March 16, 2010 expressed an unqualified opinion.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Our executive officers, key employees and directors are described below. There are no family relationships among our executive officers or directors.

<u>Name</u>	<u>Age</u>	<u>Position</u>
William M. Caldwell, IV	62	Chief Executive Officer and Chairman of the Board of Directors
Robert P. Lanza M.D.	53	Chief Scientific Officer
Alan C. Shapiro, Ph.D.	64	Member of the Board of Directors
Erkki Ruoslahti, M.D., Ph.D.	69	Member of the Board of Directors
Gary Rabin	44	Member of the Board of Directors

William M. Caldwell, IV has been our Chief Executive Officer and Chairman of the Board of Directors since January 2005. He has a 30-year management career working with emerging technologies and restructuring distressed corporate environments. During his career he has served in senior executive positions both in marketing and finance. He has worked with Booz Allen and Hamilton; the Flying Tiger Line Inc.; Van Vorst Industries; and Kidder Peabody. He started a firm specializing in strategy and financial planning which was instrumental in restructuring over \$1.0 billion of debt for over twenty companies and partnerships. He was a pioneer in the satellite radio auctions as President of Digital Satellite Broadcasting Corporation; assisted in the financing and became President and ultimately CEO in the restructuring of CAIS Internet, and has advised corporations, both public and private, in technology, telecommunications, retailing, real estate, hospitality, publishing, and transportation. He received his B.A. degree from the University of Southern California and was a Multinational Enterprise Fellow at the Wharton School of Finance. He serves as a director of Lee Pharmaceuticals and King Koil Franchising Corp. Mr. Caldwell is not an officer or director of any other reporting company. Mr. Caldwell's long career as a CEO and board member with companies in diverse industries qualifies him to be a board member of Advanced Cell Technology, Inc.

Robert P. Lanza, M.D. is our Chief Scientific Officer. Dr. Lanza has over 20 years of research and industrial experience in the areas of tissue engineering and transplantation medicine. Before joining us in 1998, from 1990 to 1998, Dr. Lanza was Director of Transplantation Biology at BioHybrid Technologies, Inc., where he oversaw that company's xenotransplantation and bioartificial pancreas programs. He has edited or authored sixteen books, including Principles of Tissue Engineering (2d ed. co-edited with R. Langer and J. Vacante), Yearbook of Cell and Tissue Transplantation, One World The Health & Survival of the Human Species in the Twenty-First Century, and Xeno: The Promise of Transplanting Animal Organs into Humans (co-authored with D.K.C. Cooper). Dr. Lanza received his B.A. and M.D. Degrees from the University of Pennsylvania, where he was both a University Scholar and Benjamin Franklin Scholar. Dr. Lanza is not an officer or director of any other reporting company.

Alan C. Shapiro, Ph.D. has served as director since 2005. He adds more than 30 years' experience in corporate and international financial management to Advanced Cell Technology. Dr. Shapiro is currently the Ivadelle and Theodore Johnson Professor of Banking and Finance at the Marshall School of Business, University of Southern California, where he previously served as the Chairman of the Department of Finance and Business Economics, Marshall School of Business. Prior to joining the University of Southern California, Dr. Shapiro taught as an Assistant Professor at the University of Pennsylvania, Wharton School of Business, and has been a visiting professor at Yale University, UCLA, the Stockholm School of Economics, University of British Columbia, and the U.S. Naval Academy. Dr. Shapiro has published over 50 articles in such academic and professional journals as the Journal of Finance, Harvard Business Review, and the Journal of Business, among many others. He frequently serves as an expert witness in cases involving valuation, economic damages, international finance, takeovers, and transfer financing through Trident Consulting Group LLC. He received his B.A. in Mathematics from Rice University, and a Ph.D. in Economics from Carnegie Mellon University. Dr. Shapiro is a trustee of Pacific Corporate Group's Private Equity Fund. Dr. Shapiro's board experience on multiple public company boards, his recognized expertise as a highly sought after financial advisor and his career as a professor and Chair in the field of Finance and Administration qualifies him as a valued member of Advanced Cell Technology's Board of Directors.

Erkki Ruoslahti, M.D., Ph.D. has served as a director since November 2005. Dr. Ruoslahti joined The Burnham Institute in 1979 and served as its President from 1989 to 2002. Dr. Ruoslahti is the recipient of the 2005 Japan Prize for his work in cell biology. Dr. Ruoslahti's other honors include the Gairdner Prize, and membership in the U.S. National Academy of Sciences, Institute of Medicine, and American Academy of Arts and Sciences. He is a Knight of the Order of the White Rose of Finland. Dr. Ruoslahti earned his M.D. and Ph.D. from the University of Helsinki in Finland. After postdoctoral training at the California Institute of Technology, he held various academic appointments in Finland and at City of Hope National Medical Center in Duarte, California. Dr. Ruoslahti's research has been the basis of several drugs currently on the market or in clinical trials. He has been a founder and director of several biotechnology companies. Dr. Ruoslahti is not an officer or director of any other reporting company. Based upon his scientific background and years as a senior operations manager in the scientific research and development community, Dr. Ruoslahti is uniquely qualified to be a member of Advanced Cell Technology's Board of Directors.

Gary Rabin has served as a director since December 2007. Mr. Rabin has a twenty year career in finance that primarily encompasses investment management and capital raising targeting small-cap and emerging growth companies. Currently, he is the Managing Partner of Vine Holdings, a long/short hedge fund focused on the media and communications industry. Until July 2007, he was a Portfolio Manager at MAC Investment Management, LLC ("MAC"), which he joined in November 2005. MAC is a long/short fundamental equity hedge fund concentrating on growth-oriented stocks including technology, communications and healthcare. Previously, he was a Managing Director and Portfolio Manager at Marketus Associates, a long/short hedge fund where he focused on communications, healthcare services, energy and special situations. Prior to that, he was Managing Director and Co-Head of the Media and Telecom Investment Banking Group at CIBC World Markets ("CIBC"), where he was responsible for all corporate finance and M&A, financial restructurings, and principal investing activities (both debt and equity) within the sector. Before joining CIBC, Mr. Rabin served in an operating capacity at a broadband services company when he was Chief Strategy Officer of CAIS Internet, Inc. ("CAIS"). At CAIS, he was responsible for raising over \$500 million of financing commitments in both the public equity markets and from his relationships at Kohlberg, Kravis Roberts & Co., Qwest Communications, Cisco, Nortel, 3Com and Microsoft. Mr. Rabin has also started and served as Managing Director and Head of the Global Telecom Investment Banking Group at ING Barings Furman Selz, and was a founder of the telecom group at UBS Securities. He began his career in finance in 1987, and concentrated on energy, utilities, and metals until 1993. Throughout his career, Mr. Rabin has been responsible for building and developing businesses. Mr. Rabin earned an AB in Economics from the University of Michigan. Mr. Rabin's long career as a senior manager in both the investment banking community and as a senior financial executive qualifies him to be a member of the Board of Directors of Advance Cell Technology, Inc.

CORPORATE GOVERNANCE

General

We believe that good corporate governance is important to ensure that the Company is managed for the long-term benefit of our stockholders. This section describes key corporate governance practices that we have adopted.

Board of Directors Meetings and Attendance

The Board of Directors has responsibility for establishing broad corporate policies and reviewing our overall performance rather than day-to-day operations. The primary responsibility of our Board of Directors is to oversee the management of our company and, in doing so, serve the best interests of the company and our stockholders. The Board of Directors selects, evaluates and provides for the succession of executive officers and, subject to stockholder election, directors. It reviews and approves corporate objectives and strategies, and evaluates significant policies and proposed major commitments of corporate resources. Our Board of Directors also participates in decisions that have a potential major economic impact on our company. Management keeps the directors informed of company activity through regular communication, including written reports and presentations at Board of Directors and committee meetings.

We have no formal policy regarding director attendance at the annual meeting of stockholders. The Board of Directors held one meeting in 2009. All five board members were present at the meeting.

Board Committees

Our Board of Directors has established an Audit Committee, a Compensation Committee and a Nominating and Corporate Governance Committee. The members of each committee are appointed by our Board of Directors, upon recommendation of the Nominating Committee, and serve one-year terms. Each of these committees operates under a charter that has been approved by the Board of Directors. The charter for each committee is available on our website. The Audit Committee met six times during 2009. The Compensation Committee met twice during 2009. The Nominating Committee did not meet during 2009.

Audit Committee

The Audit Committee's responsibilities include:

- Monitoring the integrity of the Company's financial reporting process and systems of internal controls regarding finance, accounting and legal compliance.
- Monitoring the independence and performance of the Company's internal and independent auditors.
- Monitoring compliance by the Company with legal and regulatory requirements.

- Facilitating open communication among the Company's independent auditors, internal auditors, employees, management, and the Board.

Dr. Shapiro, Dr. Ruoslahti and Mr. Rabin serve on our Audit Committee. Dr. Shapiro serves as chair of the Audit Committee. The Board of Directors has determined that Dr. Shapiro is an "audit committee financial expert" as defined in Item 401(e) of Regulation S-B. The Board has determined that Dr. Shapiro meets the additional independence requirements of Rule 10A-3 under the Securities Exchange Act of 1934.

Compensation Committee

The Compensation Committee's responsibilities include:

- Reviewing and recommending approval of the compensation of our executive officers,
- Overseeing the evaluation of our senior executives,
- Reviewing and making recommendations to the Board of Directors regarding incentive compensation and equity-based plans,
- Administering our stock incentive plans, and
- Reviewing and making recommendations to the Board of Directors regarding director compensation.

The members of the Compensation Committee are Dr. Shapiro, Dr. Ruoslahti, Mr. Rabin and Mr. Caldwell.

Nominating Committee

The Nominating Committee's responsibilities include:

- Identifying individuals qualified to become board members;
- Recommending to the Board the persons to be nominated for election as directors and to each of the board's committees;
- Reviewing and making recommendations to the Board with respect to senior management succession planning; and
- Overseeing an annual evaluation of the Board.

The members of the Nominating Committee are Dr. Shapiro, Dr. Ruoslahti and Mr. Rabin.

Changes in Nominating Procedures

None.

Director Candidates

The process followed by the Nominating Committee to identify and evaluate director candidates includes requests to board members and others for recommendations, meetings from time to time to evaluate biographical information and background material relating to potential candidates and interviews of selected candidates by members of the Nominating Committee and the Board.

In considering whether to recommend any particular candidate for inclusion in the Board's slate of recommended director nominees, the Nominating Committee applies certain criteria, including

- The candidate's honesty, integrity and commitment to high ethical standards,
- Demonstrated financial and business expertise and experience,
- Understanding of our company, its business and its industry,
- Actual or potential conflicts of interest, and
- The ability to act in the interests of all stockholders.

The Nominating Committee does not assign specific weights to particular criteria and no particular criterion is a prerequisite for each prospective nominee. We believe that the backgrounds and qualifications of our directors, considered as a group, should provide a significant breadth of experience, knowledge and abilities that will allow our Board to fulfill its responsibilities.

The Nominating Committee will consider director candidates recommended by stockholders or groups of stockholders who have owned more than 5% of our common stock for at least a year as of the date the recommendation is made. Stockholders may recommend individuals to the Nominating Committee for consideration as potential director candidates by submitting their names, together with appropriate biographical information and background materials and a statement as to whether the stockholder or group of stockholders making the recommendation has beneficially owned more than 5% of our common stock for at least a year as of the date such recommendation is made, to the Nominating Committee, c/o Corporate Secretary, Advanced Cell Technology, Inc., 381 Plantation Street, Worcester, Massachusetts. Assuming that appropriate biographical and background material have been provided on a timely basis, the Committee will evaluate stockholder-recommended candidates by following substantially the same process, and applying substantially the same criteria, as it follows for candidates submitted by others.

Communicating with the Directors

The Board will give appropriate attention to written communications that are submitted by stockholders, and will respond if and as appropriate. The chair of the Audit Committee is primarily responsible for monitoring communications from stockholders and for providing copies or summaries to the other directors as he considers appropriate.

Communications are forwarded to all directors if they relate to important substantive matters and include suggestions or comments that the chair of the Audit Committee considers to be important for the directors to know. In general, communications relating to corporate governance and corporate strategy are more likely to be forwarded than communications relating to ordinary business affairs, personal grievances and matters as to which we tend to receive repetitive or duplicative communications.

Stockholders who wish to send communications on any topic to the Board should address such communications to the Board of Directors, c/o Corporate Secretary, Advanced Cell Technology, Inc., 381 Plantation Street, Worcester, Massachusetts, 01605. You should indicate on your correspondence that you are an Advanced Cell Technology, Inc. stockholder.

Anyone may express concerns regarding questionable accounting or auditing matters or complaints regarding accounting, internal accounting controls or auditing matters to the Audit Committee by calling (508) 756-1212. Messages to the Audit Committee will be received by the chair of the Audit Committee and our Corporate Secretary. You may report your concern anonymously or confidentially.

Board Leadership Structure and Role in Risk Oversight

Although we have not adopted a formal policy on whether the Chairman and Chief Executive Officer positions should be separate or combined, we have traditionally determined that it is in the best interests of the Company and its shareholders to combine these roles. Mr. Caldwell has served as our Chairman since January 2005. Due to the small size and early stage of the Company, we believe it is currently most effective to have the Chairman and Chief Executive Officer positions combined.

Our Audit Committee is primarily responsible for overseeing our risk management processes on behalf of our board of directors. The Audit Committee receives and reviews periodic reports from management, auditors, legal counsel, and others, as considered appropriate regarding our company's assessment of risks. In addition, the Audit Committee reports regularly to the full Board of Directors, which also considers our risk profile. The Audit Committee and the full Board of Directors focus on the most significant risks facing our company and our company's general risk management strategy, and also ensure that risks undertaken by our Company are consistent with the Board's appetite for risk. While the Board oversees our company's risk management, management is responsible for day-to-day risk management processes. We believe this division of responsibilities is the most effective approach for addressing the risks facing our company and that our Board leadership structure supports this approach.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires the Company's directors, executive officers and persons who own more than 10% of the Company's stock (collectively, "Reporting Persons") to file with the SEC initial reports of ownership and changes in ownership of the Company's common stock. Reporting Persons are required by SEC regulations to furnish the Company with copies of all Section 16(a) reports they file. To the Company's knowledge, based solely on its review of the copies of such reports received or written representations from certain Reporting Persons that no other reports were required, the Company believes that during its fiscal year ended December 31, 2008, all Reporting Persons timely complied with all applicable filing requirements.

Code of Ethics

We have adopted a code of business conduct and ethics that applies to our directors, officers (including our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions) as well as our employees. A copy of our code of business conduct and ethics is available on our website at www.advancedcell.com under "Investors—Corporate Governance." We intend to post on our website all disclosures that are required by applicable law, the rules of the Securities and Exchange Commission or OTCBB listing standards concerning any amendment to, or waiver from, our code of business conduct and ethics.

ITEM 11. EXECUTIVE COMPENSATION

The following table summarizes the annual compensation paid to our named executive officers for the two years ended December 31, 2008 and 2007:

Summary Compensation Table

The following table summarizes the annual compensation paid to our named executive officers for the two years ended December 31, 2009, 2008 and 2007:

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	All Other Compensation (\$)	Total (\$)
William M. Caldwell, IV Chief Executive Officer,	2009	417,500	140,000	-	131,826	1,879(1)	691,205
Principle Financial Officer, and Chairman of the Board of Directors	2008	350,000	-	-	-	995(1)	350,995
	2007	348,374	150,000	-	-	2,376(1)	500,750
Robert P. Lanza, M.D., Chief Scientific Officer	2009	311,250	81,250	-	320,515	1,524(1)	714,539
	2008	290,000	35,000	-	168,237	636(1)	493,873
	2007	342,805	50,000	-	28,910	483(1)	422,198
Jonathan F. Atzen Sr. Vice President, General Counsel and Secretary (2)	2008	78,077	-	93,669	1,598	3,001(2)	176,345
	2007	338,537	60,000	-	6,391	12,360(2)	417,288

Please see the assumptions relating to the valuation of our stock option awards which are contained in Notes to audited Financial Statements included in this 10K.

(1) This amount represents a life insurance premium paid by the Company for the named executive officer.

(2) Effective as of March 7, 2008, Mr. Atzen resigned from his positions at the Company and terminated his employment arrangement with the Company. This amount in 2008 represents \$2,670 in payments made to Mr. Atzen as part of his \$1,000 monthly car allowance through his termination date and \$331 in life insurance premiums paid by the Company for Mr. Atzen. This amount in 2007 represents \$12,000 in payments made to Mr. Atzen as part of his \$1,000 monthly car allowance and \$360 in life insurance premiums paid by the Company for Mr. Atzen.

Employment Agreements

Employment Agreement with William M. Caldwell, IV On February 22, 2010, we entered into an employment agreement with William M. Caldwell, IV, who has been our chief executive officer and chairman since January 2005. Pursuant to the Employment Agreement, the parties agreed as follows:

- Mr. Caldwell will continue to serve as our chief executive officer, for a term of two and 1/3 years commencing on October 1, 2009, subject to earlier termination as provided therein. The term under the Employment Agreement will renew automatically for additional one year terms unless either party provides written notice of intent not to renew the employment agreement at least 90 days prior to such automatic renewal.

- We will pay Mr. Caldwell an initial base salary of \$480,000 per annum, which base salary will increase annually by not less than the annual increase in the consumer price index, and may be increased during the term by a greater amount at the sole discretion of the Company's board of directors.
- Within 10 days of execution of the employment agreement, Mr. Caldwell received a retention bonus of \$100,000.
- Commencing in the 2010 calendar year, we will pay Mr. Caldwell an annual bonus based on the performance of our common stock. We may also pay Mr. Caldwell additional bonuses in the Company's sole discretion.
- We will recommend to the Company's board of directors that the Company issue to Mr. Caldwell restricted common stock in an amount equal to the greater of (a) 70,000,000 shares or (b) 7% of the Company's fully diluted shares of issued and outstanding common stock.
- If Mr. Caldwell's employment under the Employment Agreement is terminated by the Company without cause, or by Mr. Caldwell for good reason, we will pay Mr. Caldwell severance of two years' base salary.

Employment Agreement with Robert P. Lanza, M.D. On October 1, 2009, the Company entered into an employment agreement (the "Agreement") with Robert P. Lanza, the Company's chief scientific officer since October 2007. Pursuant to the Agreement, the parties agreed as follows:

- Robert P. Lanza will continue to serve as the Company's chief scientific officer, for a term of two years commencing on October 1, 2009, subject to earlier termination as provided therein. The term under the Agreement may be extended by mutual written agreement.
- The Company will pay Mr. Lanza a base salary of \$375,000 per annum, which may be increased during the term at the sole discretion of the Company's board of directors. The Company may also pay Mr. Lanza annual bonuses in the Company's sole discretion.
- The Company will issue to Mr. Lanza 30,270,203 shares of free trading common stock from the Company's 2005 Employee Incentive Plan.
- If Mr. Lanza's employment under the Agreement is terminated by the Company without cause, the Company will pay Mr. Lanza severance of one year's base salary.

(1) These options held by Mr. Caldwell vested in full as of December 31, 2008.

(2) These options held by Mr. Caldwell vest as follows: 50% of the shares vest immediately with the remaining vesting at 1/12 per month.

(3) These options held by Dr. Lanza vested in full as of December 31, 2006.

(4) These options held by Dr. Lanza vested in full as of January 31, 2009.

(5) These options held by Dr. Lanza vest in equal monthly installments over 48 months.

(6) These options held by Dr. Lanza vest as follows: 50% of the shares vest immediately with the remaining vesting at 1/12 per month.

DIRECTOR COMPENSATION

Name and Principal Position	Year	Fees Earned or Paid in Cash (\$)	Stock Awards (\$)	Option Awards (\$)	All Other Compensation (\$)	Total (\$)
Alan C. Shapiro, Ph.D.	2009	72,188	-	-	-	72,188
Erkki Ruoslahti, M.D., Ph.D.	2009	15,850	-	-	-	15,850
Gary Rabin	2009	141,250	-	-	-	141,250

Director Compensation Arrangements

Non-executive members of the Company's Board of Directors receive (1) an initial grant of 100,000 shares of common stock, (2) an annual grant of 100,000 shares of common stock (this number has been increased to 200,000 for 2008), (3) an annual retainer of \$40,000 (payable quarterly) and (4) a cash payment for attendance at each board meeting in the amount of \$1,500 for in-person meetings and \$1,000 for telephonic meetings. Regarding members of the Company's Audit Committee, the Chair receives a payment of \$1,500 per meeting and the regular members receive \$1,000 per meeting. With respect to the Company's Compensation Committee and the Company's Nominating and Corporate Governance Committee, the Chair receives a payment of \$1,125 per meeting and the regular members receive \$750 per meeting. Each director is entitled to receive payment of the directors' fees in the form of shares of the Company's Common Stock valued at 150% of the actual directors' fees due and payable. The fee structure for the directors was established and approved by the Compensation Committee and ratified by the full Board of Directors.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Beneficial Ownership of Directors, Officers and 5% Stockholders

The following table sets forth certain information regarding the beneficial ownership of our Common Stock as of March 12, 2010. On such date, 747,932,679 shares of Common Stock were outstanding. Beneficial ownership is determined in accordance with the applicable rules of the Securities and Exchange Commission and includes voting or investment power with respect to shares of our Common Stock. The information set forth below is not necessarily indicative of beneficial ownership for any other purpose, and the inclusion of any shares deemed beneficially owned in this table does not constitute an admission of beneficial ownership of those shares. Unless otherwise indicated, to our knowledge, all persons named in the table have sole voting and investment power with respect to their shares of Common Stock, except, where applicable, to the extent authority is shared by spouses under applicable state community property laws.

The following table sets forth information regarding beneficial ownership of our capital stock as of March 12, 2010 by:

- Each person, or group of affiliated persons, known to us to be the beneficial owner of more than 5% of the outstanding shares of our Common Stock,
- Each of our directors and named executive officers, and
- All of our directors and executive officers as a group.

Name and Address ⁽¹⁾ of Beneficial Owner	Number of Shares Beneficially Owned	Percentage
5% or Greater Stockholders		
None		
Directors and Named Executive Officers		
William M. Caldwell, IV	5,210,586(2)	*
Robert P. Lanza, M.D.	6,594,469(3)	*
Alan C. Shapiro	15,901,144(4)	2.11%
Erkki Ruoslahti	5,120,086(5)	*
Gary Rabin	7,037,430(6)	*
Directors and Executive Officers as a Group (5 Persons)	39,863,715	5.19%

* Less than 1%

- (1) Unless otherwise indicated, the address of the beneficial owner is 381 Plantation Street, Worcester, Massachusetts 01605.
- (2) Includes 3,937,838 shares subject to stock options that are currently exercisable or exercisable within 60 days of December 31, 2009 that are held directly by Mr. Caldwell. Also includes 1,026,000 shares issuable upon exercise of certain warrants held by Andwell, LLC, which is 100% owned by Mr. Caldwell.
- (3) Includes 6,294,469 shares subject to stock options that are currently exercisable or exercisable within 60 days of December 31, 2009.
- (4) Includes (i) indirect ownership of 3,794,883 shares and 4,215,020 shares subject to convertible debentures held by The Shapiro Family Trust and of which Dr. Shapiro may be deemed the beneficial owner, (ii) 2,704,178 shares subject to warrants held by The Shapiro Family Trust and of which Dr. Shapiro may be deemed the beneficial owner, and (iii) 100,000 shares subject to stock options that are currently exercisable or exercisable within 60 days of December 31, 2009.
- (5) Includes 100,000 shares subject to stock options that are currently exercisable or exercisable within 60 days of December 31, 2009.
- (6) Includes indirect ownership of 2,037,430 shares issuable upon exercise of certain warrants held by PDP I, LLC, which such number of shares represents Mr. Rabin's proportional interest in the total number of shares held by PDPI, LLC, based on his 33.33% equity interest in the entity.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

None of the following parties has, during the year ended December 31, 2009, had any material interest, direct or indirect, in any transaction with us or in any presently proposed transaction that has or will materially affect us, other than as noted in this section:

- Any of our directors or officers,
- Any person proposed as a nominee for election as a director,
- Any person who beneficially owns, directly or indirectly, shares carrying more than 5% of the voting rights attached to our outstanding shares of common stock,
- Any of our promoters, and
- Any relative or spouse of any of the foregoing persons who has the same house as such person.

All references to share numbers in this section are on a pre-reverse split basis.

Board Determination of Independence

The Company complies with the standards of "independence" prescribed by rules set forth by the National Association of Securities Dealers ("NASD"). Accordingly, a director will only qualify as an "independent director" if, in the opinion of our Board of Directors, that person does not have a material relationship with our company which would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. A director who is, or at any time during the past three years, was employed by the Company or by any parent or subsidiary of the Company, shall not be considered independent. Accordingly, Dr. Alan Shapiro, Dr. Erkki Ruoslahti and Mr. Gary Rabin meet the definition of "independent director" under Rule 4200(A)(15) of the NASD Manual; Mr. Caldwell does not.

Item 14. Principal Accounting Fees and Services

The following table summarizes the fees of our current independent registered public accounting firm, SingerLewak LLP, billed to us for each of the last two fiscal years for audit services and billed to us in each of the last two years for other services:

Fee Category	2009	2008	2007
Audit Fees	\$ 213,859	\$ 212,838	\$ 254,046
Audit Related Fees	\$ 12,000	\$ 46,222	\$ 35,853
Tax Fees	\$ -	\$ -	\$ -
All Other Fees	\$ -	\$ -	\$ -

Audit fees consist of aggregate fees billed for professional services rendered for the audit of the Company's annual financial statements and review of the interim financial statements included in quarterly reports or services that are normally provided by the independent auditor in connection with statutory and regulatory filings or engagements for the fiscal years ended December 31, 2009, 2008 and 2007.

Audit related fees consist of aggregate fees billed for assurance and related services that are reasonably related to the performance of the audit or review of the Company's financial statements and are not reported under "Audit Fees." These fees include review of registration statements and participation at meetings of the audit committee.

Tax fees consist of aggregate fees billed for professional services for tax compliance, tax advice and tax planning.

All other fees consist of aggregate fees billed for products and services provided by the independent auditor, other than those disclosed above. These fees include services related to certain accounting research and assistance with a regulatory matter.

The Company's policy is to pre-approve all audit and permissible non-audit services provided by the independent auditors. These services may include audit services, audit-related services, tax services and other services. Pre-approval is generally provided for up to one year and any pre-approval is detailed as to the particular service or category of services and is generally subject to a specific budget. The independent auditors and management are required to periodically report to the audit committee regarding the extent of services provided by the independent auditors in accordance with this pre-approval, and the fees for the services performed to date. To the extent that additional services are necessary beyond those specifically budgeted for, the audit committee and management pre-approve such services on a case-by-case basis. All services provided by the independent auditors were approved by the Audit Committee.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a)(1) Financial Statements

The following is a list of the Financial Statements included in Item 8 of Part II of this Report.

	<u>Page</u>
Report of Independent Registered Public Accounting Firm	F-1
Balance Sheets as of December 31, 2009 and December 31, 2008	F-2
Statements of Operations for the Years Ended December 31, 2009, 2008 and 2007	F-3
Statements of Stockholders' Equity for the Years Ended December 31, 2009, 2008 and 2007	F-4
Statements of Cash Flows for the Years Ended December 31, 2009, 2008 and 2007	F-5
Notes to Financial Statements	F-6

(a)(2) Financial Statement Schedules

Schedules not included herein are omitted because they are inapplicable or not required or because the required information is given in the financial statements and notes thereto.

(b)

The exhibits required by this item and included in this report or incorporated herein by reference are as follows:

<u>Exhibit Number</u>	<u>Description</u>
2.1	Agreement and Plan of Merger between the Company, A.C.T. Acquisition Corp. and ACT, dated as of January 3, 2005 (previously filed as Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed on January 4, 2005 (File No. 000-50295) and incorporated by reference herein).
2.2	Agreement and Plan of Merger between Advanced Cell Technology, Inc., a Nevada corporation, and Advanced Cell Technology, Inc., a Delaware corporation, dated as of November 18, 2005 (previously filed as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on November 21, 2005 (File No. 000-50295) and incorporated by reference herein).
2.2	Agreement and Plan of Merger between Advanced Cell Technology, Inc., a Delaware corporation, and ACT, dated as of November 18, 2005 (previously filed as Exhibit 2.2 to the Registrant's Current Report on Form 8-K filed on November 21, 2005 (File No. 000-50295) and incorporated by reference herein).
3.1	Certificate of Incorporation of the Company (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on November 21, 2005 (File No. 000-50295) and incorporated by reference herein).
3.1.1	Certificate of Amendment to Articles of Incorporation dated April 1, 2004 (previously filed as Exhibit 3.1.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
3.1.2	Certificate of Amendment to Articles of Incorporation dated December 30, 2004 (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on January 4, 2005 (File No. 000-50295) and incorporated by reference herein).

- 3.1.3 Certificate of Amendment to Articles of Incorporation dated June 23, 2005 (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on June 22, 2005 (File No. 000-50295) and incorporated by reference herein).
- 3.1.4 Certificate of Amendment to Articles of Incorporation dated July 6, 2005 (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on July 7, 2005 (File No. 000-50295) and incorporated by reference herein).
- 3.15 Certificate of Amendment to Certificate of Incorporation dated September 15, 2009 (previously filed)
- 3.16 Certificate of Designation of Series B Preferred Stock 2005 (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on November 12, 2009 (File No. 000-50295) and incorporated by reference herein).
- 3.2 Bylaws of the Company (previously filed as Exhibit 3.2 to the Registrant's Current Report on Form 8-K filed on November 21, 2005 (File No. 000-50295) and incorporated by reference herein).
- 3.2.1 Amendment to Bylaws of the Company (previously filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on December 29, 2004 (File No. 000-50295) and incorporated by reference herein).
- 4.1 Specimen Stock Certificate (previously filed as Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on November 21, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.2 Form of \$0.05 Warrant to Purchase Common Stock of ACT. ACT issued warrants in this form for the purchase of an aggregate of 900,000 shares, including a warrant to purchase 250,000 shares of ACT common stock to Andwell, LLC, an entity affiliated with William Caldwell, IV, the Chief Executive Officer and a director of the Company (previously filed as Exhibit 4.2 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.3 Form of \$0.25 Warrant to Purchase Common Stock of ACT. ACT issued warrants in this form for the purchase of an aggregate of 1,954,000 shares, including (i) a warrant to purchase 236,000 shares of ACT common stock to Andwell, LLC, an entity affiliated with William Caldwell, IV, the Chief Executive Officer and a director of the Company, (ii) a warrant to purchase 75,000 shares of ACT common stock to Rocket Ventures, an entity affiliated with Jonathan Atzen, a Senior Vice President and the General Counsel of the Company (previously filed as Exhibit 4.3 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.4 \$0.25 Warrant to Purchase Common Stock of the Company issued to Gunnar Engstrom (previously filed as Exhibit 4.4 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.5 Form of \$0.85 Warrant to Purchase Common Stock of ACT (previously filed as Exhibit 4.5 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.6 Form of \$1.27 Warrant to Purchase Common Stock of ACT (previously filed as Exhibit 4.6 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.7 Form of \$2.00 Warrant to Purchase Common Stock of ACT (previously filed as Exhibit 4.7 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.8 Form of Subscription Agreement to Purchase Series A Convertible Preferred Units of ACT (previously filed as Exhibit 4.8 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).

- 4.9 Form of Share Purchase Agreement to purchase common stock of Two Moons Kachinas Corp. ("TMOO"), the predecessor to the Company (previously filed as Exhibit 4.9 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.10 Form of Lock-Up Agreement entered into by certain sellers of TMOO common stock (previously filed as Exhibit 4.10 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.11 Form of Lock-Up Agreement entered into by certain buyers of TMOO common stock (previously filed as Exhibit 4.11 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 4.12 Investor's Rights Agreement between ACT and Avian Farms, Inc. dated December 31, 1998 (previously filed as Exhibit 4.12 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 9.1 Form of Voting Agreement for shares of common stock of ACT held by certain parties effective as of January 31, 2005 (previously filed as Exhibit 9.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.1 Exclusive Development and License Agreement between GTC Biotherapeutics (f/k/a as Genzyme Transgenics Corporation) and ACT dated June 8, 1999 (previously filed as Exhibit 10.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.2 Exclusive License Agreement dated April 16, 1996 between the University of Massachusetts and ACT as amended on September 1, 1997, May 31, 2000 and September 19, 2002 (previously filed as Exhibit 10.2 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.3 Materials and Research Data License Agreement dated January 26, 2001 between Wake Forest University and ACT (previously filed as Exhibit 10.3 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.3.1 July 1, 2002 Assignment to Wake Forest University Health Sciences (previously filed as Exhibit 10.3.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.4 Exclusive License Agreement dated February 1, 2002 between the University of Massachusetts and ACT (previously filed as Exhibit 10.4 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.5 Non-Exclusive Sublicense Agreement between ACT and Infigen, Inc. dated August 1, 2003 (previously filed as Exhibit 10.5 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.6 Non-Exclusive License Agreements, dated January 1, 2001 between ACT and PPL Therapeutics (Scotland) Limited (previously filed as Exhibit 10.6 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.7 Nonexclusive License Agreement dated May 1, 2001 between ACT and Immerge BioTherapeutics, Inc. (previously filed as Exhibit 10.7 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.8 Nonexclusive License and Sponsored Research Agreement dated June 29, 2001 between ACT and Charles River Laboratories, Inc. (previously filed as Exhibit 10.8 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).

- 10.9 Non-Exclusive Sublicense Agreement between Cyagra, Inc., ACT, ACT Group and Goyaike, S.A. dated November 20, 2001 (previously filed as Exhibit 10.9 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.10 Exclusive Sublicense Agreement between ACT, ACT Group and Cyagra, Inc. dated June 28, 2002 (previously filed as Exhibit 10.10 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.11 Non-Exclusive License Agreement dated November 8, 2002 between ACT and Merial Limited (previously filed as Exhibit 10.11 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.12 Non-Exclusive Sublicense Agreement between ACT and Infigen, Inc. dated August 1, 2003 (previously filed as Exhibit 10.12 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.13 Exclusive License Agreement dated October 22, 2003 between ACT and Exeter Life Sciences, Inc. (previously filed as Exhibit 10.13 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.13.1 Letter of Intent between ELS and ACT dated March 16, 2003 (previously filed as Exhibit 10.13.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.13.2 Sponsored Research Agreement (previously filed as Exhibit 10.13.2 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.14 Non-Exclusive License Agreement dated January 4, 2002 between ACT and Genetic Savings & Clone (previously filed as Exhibit 10.14 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.15 Non-Exclusive License Agreement dated February 3, 2004 between ACT and Pureline Genetics (previously filed as Exhibit 10.15 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.16 Non-Exclusive License Agreement dated February 3, 2004 between ACT and First Degree Genetics (previously filed as Exhibit 10.6 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.17 Non-Exclusive License Agreement dated February 3, 2004 between ACT and One Degree Genetics (previously filed as Exhibit 10.17 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.18 Option to License Intellectual Property dated December 31, 2003 between ACT and PacGen Cellco, LLC (previously filed as Exhibit 10.18 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.18.1 First Amendment to Option to License Intellectual Property dated February 13, 2004 (previously filed as Exhibit 10.18.1 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.19 Exclusive License Agreement (Infigen IP) dated May 14, 2004 between ACT and PacGen Cellco, LLC (previously filed as Exhibit 10.19 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.19.1 First Amendment to Exclusive License Agreement (Infigen IP) dated August 25, 2005.
- 10.20 Exclusive License Agreement (UMass IP) dated May 14, 2004 between ACT and PacGen Cellco, LLC (previously filed as Exhibit 10.20 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).

- 10.20.1 First Amendment to Exclusive License Agreement (UMass IP) dated August 25, 2005, previously filed and incorporated by reference herein.
- 10.21 Exclusive License Agreement (ACT IP) dated May 14, 2004 between ACT and PacGen Cellco, LLC (previously filed as Exhibit 10.21 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.21.1 First Amendment to Exclusive License Agreement (ACT IP) dated August 25, 2005, previously filed and incorporated by reference herein.
- 10.22 Agreement to Amend ACT/CELLCO License Agreements dated September 7, 2004 ACT and PacGen Cellco, LLC (previously filed as Exhibit 10.22 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).
- 10.23 Indemnification Agreement of David Merrell to certain buyers of TMOO common stock dated December 31, 2004 (previously filed as Exhibit 10.23 to the Registrant's Quarterly Report on Form 10-QSB filed on May 23, 2005 (File No. 000-50295) and incorporated by reference herein).

EMPLOYMENT AGREEMENT

This **EMPLOYMENT AGREEMENT** (this "Agreement") is made effective as of October 1, 2009, by and between **ADVANCED CELL TECHNOLOGY, INC.**, a Delaware corporation (the "Company") and **WILLIAM M. CALDWELL, IV**, an individual (the "Executive").

WHEREAS, the Board of Directors of the Company (the "Board") has approved and authorized the entry into this Agreement with Executive; and

WHEREAS, Executive is currently employed by Company as Company's Chief Executive Officer and Chairman; and

WHEREAS, Company desires to retain the services of Executive as Company's Chief Executive Officer and Chairman, and Executive desires to continue to provide Executives' services as Chief Executive Officer and Chairman of Company, and, therefore, the parties desire to enter into this Agreement setting forth the terms and conditions for the retention of the services of Executive and specifying the terms and conditions of the continued employment relationship of Executive with the Company.

NOW, THEREFORE, in consideration of the promises and mutual covenants and agreements herein contained, and for other valuable consideration, the receipt and sufficiency of which is hereby acknowledged by Company and Executive, and intending to be legally bound hereby, the Company and Executive hereby agree as follows;

1. Term. Subject to the termination provisions of Section 11 below, the term of this Agreement shall be for a period of two and one third (2 1/3) years ("Term"), commencing October 1, 2009 (the "Commencement Date") and ending January 31, 2012 ("Termination Date"); provided, however, that this Agreement shall automatically be extended for additional one year terms beyond the Termination Date (the "Extended Termination Date") or the then current Extended Termination Date, unless at least 90 calendar days prior to the Termination Date or the then current Extended Termination Date, Executive or the Company shall have given notice that he or it does not wish to extend the Agreement.

2. Employment. Executive shall continue to be employed as and to hold the title of Chief Executive Officer from the Commencement Date until such employment is terminated in accordance with this Agreement. Executive, in his capacity as Chief Executive Officer will have the full range of executive duties and responsibilities that are customary for public company CEO positions. All Company officers shall report to and take direction from Executive, provided however, that nothing herein shall restrict the Board from conferring directly with Company officers and the Company shall have the right to enter into agreements with Company officers for the Board to determine specific employment-related issues such as compensation and termination. Executive shall have day-to-day responsibility for the affairs of the Company and shall have such other powers and duties as may be from time to time assigned to him by the Board of Directors of the Company (the "Board"). Executive shall report directly to the Board. All other employees of Company will report, either directly or through other officers of Company, to Executive. Executive shall devote substantially all of Executive's time, attention and energies to the business and affairs of the Company; provided, however, the Company acknowledges that Executive is an executive and/or director in the entities listed on Schedule "A" attached hereto, as described therein and may continue in such capacities only so long as such activities do not unreasonably or materially interfere with the performance of his duties under this Agreement and do not present any conflicts of interest with the Company.

3. Salary. The Company shall pay Executive an annual salary at an initial annual rate of four hundred eighty thousand (\$480,000), less applicable deductions (the "Base Salary"). Such Base Salary will be reviewed by the Board annually. The Base Salary shall be payable by the Company to Executive in substantially equal installments not less frequently than semi-monthly (two times per month). At the end of each full year of this Agreement, the Base Salary shall be increased (but not decreased) by an amount determined by the Board; provided, however, that each such annual increase will be not less than the percentage increase in the Consumer Price Index during the preceding year, provided further, however, that the increase set forth in this sentence shall never be zero or less. For purposes of this Agreement, the "Consumer Price Index" as of any particular date means the Consumer Price Index for Urban Wage Earners and Clerical Workers, Los Angeles/Anaheim/ Riverside CMSA, all items, in respect of the month immediately preceding such particular date, published by the U.S. Department of Labor, Bureau of Labor Statistics, or if such index is no longer published, the U.S. Department of Labor's most comprehensive official index then in use that most nearly corresponds to the index named above. The Company's awards of deferred compensation, discretionary bonus, retirement, stock option and other Executive benefit plans and in fringe benefits shall not reduce the Base Salary; provided, however, that voluntary deferrals or contributions by the Executive to such plans agreed to by Executive, if any, shall reduce the current cash compensation paid to Executive

4. Bonuses.

(a) Within ten (10) days following the execution of this Agreement by Company and Executive, Company will pay to Executive a retention bonus in the amount of one hundred thousand dollars (\$100,000) (the "Retention Bonus"). The Retention Bonus will be deemed fully earned by Executive upon Executive's execution of this Agreement and delivery of this Agreement by Executive to Company.

(b) Commencing for calendar year 2010, Executive shall be eligible for an additional annual cash bonus (a "Bonus" if the Company realizes a per share stock price increase at the end of each fiscal year of Company during the Term or the Extended Term of this Agreement. Any Bonus will be computed on an annual basis and earned at the close of Company's applicable fiscal year, and shall be paid to Executive within thirty days of completion of the Company's Compensation Committee's annual review for such fiscal year. The amount and award of each such Bonus, if any, shall be based upon the following schedule:

<u>Stock Price Accretion Attainment</u>	<u>Cash Bonus</u>
From minimum 20% increase for 4 th quarter over higher of same period a year ago or \$.10 per share	50% of salary cash bonus
50% increase for 4 th quarter over higher of same period a year ago or \$.10 per share	100% of salary cash bonus
100% or greater increase for 4 th quarter over higher of same period a year ago of \$.10 per share	200% of salary cash bonus

Stock Price Accretion Attainment "SPAA" for any year shall mean the average per day closing price for all fourth quarter trading days averaged over the quarter as determined by the Bloomberg closing price each day. If the Company completes a stock split or reverse split, the "SPAA" levels herein shall be appropriately adjusted in a manner the Board determines in good faith to be fair and equitable to Executive.

(c) In addition to the foregoing bonuses, Company may, in its discretion, award additional annual or other bonuses to Executive during the Term of this Agreement based upon the Executive's performance or such other criteria as may be determined from time to time by the Board including financial condition of the company and the attainment of company's operational milestones etc.

5. Benefits. Executive shall receive the following benefits and/or be entitled to participate in the following benefits programs of Company:

5.1 (a) Following the execution and delivery of this Agreement by Company and Executive, Company will recommend to the Board that Company grant to Executive restricted Common Stock of Company in an amount equal to the greater of (a) Seventy Million shares, or (b) seven percent (7%) of the fully diluted shares of issued and outstanding stock of Company, including all warrants, conversions of Preferred Stock, Debentures and all issued Subordinated stock, all of which grants will be made by the Board by no later than the January 2010 meeting of the Board. All such restricted stock granted to Executive will be restricted to provide that Executive cannot sell such stock for a period of one (1) year plus one (1) day following the grant date of such restricted stock; provided, however, that in the event of any "Change of Control", as that term is hereinafter defined, prior to the expiration of such restriction period, and if Executive is not retained as the Chief Executive Officer and Chairman of the Board of the acquiring or surviving entity, then all such restrictions on all of said restricted shares of stock shall be deemed to be removed and all such restricted stock will thereupon be unrestricted and may be sold by Executive in Executive's sole and absolute discretion. Executive may also receive additional future grants of restricted stock during the Term of this Agreement as may be determined by the Board in its sole discretion.

(b) Concurrently with the execution and delivery of this Agreement by Executive and Company, vesting of any and all stock options that were previously granted to Executive will immediately thereupon become fully vested, and the term during which Executive will be entitled to exercise all such stock options will immediately thereupon be extended to be a period of five (5) years following the Commencement Date (as that term is defined in this Agreement).

5.2 (a) In addition, at the first meeting of the Board following the Commencement Date of this agreement, Company will recommend to the Board that the Company grant to Executive options (the "Initial Options") to purchase an additional 100% of the existing aggregated employee options that were previously or are currently awarded to Executive under the Company's 2005 Stock Option Plan (the "Plan"). The exercise price of the Initial Options shall be equal to the per share price of the Company's Common Stock at the close of trading on the trading day that the Compensation Committee approves the award. Except as provided herein, the terms of the Initial Options shall be set by the Compensation Committee in accordance with the Plan and in the Company's standard form Incentive Option Agreement; provided, further, that the Initial Options shall be incentive stock options to the maximum extent permitted under the Company's Plan and applicable provisions of the Internal Revenue Code. Unless vesting is otherwise accelerated as provided in this Agreement in connection with a Change of Control, 100 % of the Initial Options shall vest immediately on the first anniversary of the Commencement Date.

(b) Executive shall also be eligible for subsequent grants of stock options during the term of this Agreement as determined by the Board in its sole discretion under the Plan. The parties intend that the award of such option, when considered with the other compensation provided to Executive and the financial performance of the Company under Executive's management, shall be commensurate with that offered to CEOs of similarly situated public companies in the same or similar industries as Company.

(c) Following the execution and delivery of this Agreement by Executive and Company, if a "Change of Control", as hereinafter defined, occurs and if Executive is not retained at the Chief Executive Officer and Chairman of the Board by the acquiring or surviving entity, then (a) vesting of all previously issued stock options, including but not limited to, the Initial Options and any other stock options to be granted to Executive by Company under and pursuant to this Agreement, will accelerate and all such stock options will thereupon become fully vested. Further, Executive will also thereafter be allowed to have a period of three (3) years to exercise all vested stock options then held by or previously issued to Executive in the event that Executive is no longer employed with Company.

(d) For purposes of this Agreement, "Change in Control" means the occurrence of any of the following events:

(i) the acquisition, directly or indirectly, by any "person" or "group" (as those terms are defined in Sections 3(a)(9), 13(d), and 14(d) of the Securities Exchange Act of 1934 (the "Exchange Act") and the rules thereunder) of "beneficial ownership" (as determined pursuant to Rule 13d-3 under the Exchange Act) of securities entitled to vote generally in the election of directors ("voting securities") of the Company that represent 50% or more of the combined voting power of the Company's then outstanding voting securities, other than:

a. an acquisition by a trustee or other fiduciary holding securities under any employee benefit plan (or related trust) sponsored or maintained by the Company or any person controlled by the Company or by any employee benefit plan (or related trust) sponsored or maintained by the Company or any person controlled by the Company, or

b. an acquisition of voting securities by the Company or a corporation owned, directly or indirectly, by the stockholders of the Company in substantially the same proportions as their ownership of the stock of the Company, or

c. an acquisition of voting securities pursuant to a transaction described in clause (iii) below that would not be a Change in Control under clause (iii);

(ii) individuals who, as of the date hereof, constitute the Board (the "Incumbent Board") cease for any reason to constitute at least a majority of the Board; provided, however, that any individual becoming a director subsequent to the date hereof whose election, or nomination for election by the Company's shareholders, was approved by a vote of at least a majority of the directors then comprising the Incumbent Board shall be considered as though such individual were a member of the Incumbent Board, but excluding, for this purpose, any such individual whose initial assumption of office occurs as a result of an actual or threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents by or on behalf of a person other than the Board; or

(iii) the consummation by the Company (whether directly involving the Company or indirectly involving the Company through one or more intermediaries) of (x) a merger, consolidation, reorganization, or business combination or (y) a sale or other disposition of all or substantially all of the Company's assets or (z) the acquisition of assets or stock of another entity, in each case, other than a transaction:

a. which results in the Company's voting securities outstanding immediately before the transaction continuing to represent (either by remaining outstanding or by being converted into voting securities of the Company or the person that, as a result of the transaction, controls, directly or indirectly, the Company or owns, directly or indirectly, all or substantially all of the Company's assets or otherwise succeeds to the business of the Company (the Company or such person, the "Successor Entity")) directly or indirectly, at more than 50% of the combined voting power of the Successor Entity's outstanding voting securities immediately after the transaction, or

b. after which no person or group beneficially owns voting securities representing 50% or more of the combined voting power of the Successor Entity; provided, however, that no person or group shall be treated for purposes of this clause b. as beneficially owning 50% or more of combined voting power of the Successor Entity solely as a result of the voting power held in the Company prior to the consummation of the transaction.

5.3 Executive and his spouse shall be entitled to participate in the Company's health insurance program effective as of the Commencement Date and the Company shall pay all premiums for said insurance for Executive and his spouse under the applicable plans. .

5.4 In addition to the foregoing, Executive shall be entitled to participate with other key executive officers of the Company based on position, tenure and salary in any plan of the Company relating to stock purchases, pension, thrift, profit sharing, life insurance, disability insurance, education, or other retirement or Executive benefits that the Company has adopted or may hereafter adopt for the benefit of its executive officers.

5.5 The Company shall pay all unreimbursed out-of-pocket costs associated with an annual physical examination of Executive, such amount not to exceed \$3,000 per year.

5.6 Executive shall be reimbursed for his legal fees incurred in connection with negotiating and drafting this Agreement up to a maximum of \$10,000.

5.7 Company will reimburse Executive for the requisite annual premiums for a policy of 25-year level-premium term life insurance coverage in the amount of Three Million Dollars (\$3,000,000) for Executive (with Executive designating the beneficiary of such life insurance). Executive will submit an invoice to Company for reimbursement of the annual premiums.

5.8 Executive agrees that the Company may apply for and take out in its own name and at its own expense such "key person" life insurance upon the life of Executive as the Company may deem necessary or advisable to protect its interests; provided, however, that (i) such insurance coverage does not otherwise diminish or restrict Executive's eligibility for and/or participation level in any benefit plan or arrangement described in this Section 5, and (ii) such coverage does not otherwise diminish any other economic benefit to which Executive is entitled pursuant to the terms of this Agreement, and (iii) no taxable income is attributed to Executive as a result of such coverage. Executive agrees to reasonably assist and reasonably cooperate with the Company in procuring such insurance, including (without limitation) submitting to medical examinations for purposes of obtaining and/or maintaining such insurance. Executive agrees that he shall have no right, title or interest in and to such insurance.

6. Automobile. The Company shall provide Executive a car allowance of \$600 per month, payable on the Commencement Date and on the 1st day of each calendar month thereafter. In addition, the Company shall reimburse Executive for reasonable actual expenses incurred (including, without limitation, gas, scheduled and unscheduled maintenance and repairs, insurance, registration fees and taxes) in operating the vehicle used for business purposes subject to the provisions of paragraph 8.

7. Vacation. Executive shall be entitled to six (6) weeks annual paid vacation in accordance with the Company's policy, in addition to holidays and other paid time off (excluding vacation) provided to similarly situated executive officers of the Company. The maximum amount of accrued vacation to which Executive may be entitled at any time is twelve (12) weeks.

8. Business Expenses. During such time as Executive is rendering services hereunder, Executive shall be entitled to incur and be reimbursed by the Company for all reasonable business expenses, including but not limited to, at least business class airfare while traveling at least 1,000 miles from Executive's home city (at least coach class for travel under 1,000 miles), first class hotel accommodations, ground transportation while traveling, reasonable meals or an agreed upon per diem while traveling, mobile telephone and text messaging charges. The Company agrees that it will reimburse Executive for all such expenses upon the presentation by Executive, on a monthly basis, of an itemized statement of such expenditures setting forth the date, the purposes for which incurred, and the amounts thereof, together with such receipts showing payments in conformity with the Company's established policies. Reimbursement for approved expenses shall be made within a reasonable period not to exceed 30 days after the receipt of foregoing statements and supporting documentation. Further, Company recognizes that the Executive's spouse will be traveling with Executive and that her airfare will be included as a business expense in accordance with IRS guidelines as to comporting to business duties requested by Executive.

9. Indemnity. Company shall to the extent permitted and required by law, indemnify and hold Executive harmless from costs, expense or liability arising out of or relating to any acts or decisions made by Executive in the course of his employment to the same extent Company indemnifies and holds harmless other officers and directors of Company in accordance with Company's established policies. This indemnity shall include, without limitation, advancing Executive attorneys fees to the fullest extent permitted by applicable law. Company agrees to continuously maintain Directors and Officers Liability Insurance with limits of coverage the same as currently in effect, unless a change is mutually agreed upon by Executive and the Board of Directors of Company, and to include Executive within said coverage while Executive is employed by Company and for at least thirty-six (36) months after the termination of Executive's employment by Company.

10. Termination. Executive's employment with Company may be terminated for the reasons set forth below. At the request of the Board, Executive agrees to resign from his position as a director of Company within 24 hours after his termination.

10.1 Death. This Agreement shall terminate upon Executive's death. Company shall pay Executive's estate (i) on the date it would have been payable to Executive any unpaid Base Salary and accrued vacation earned prior to the date of Executive's death, (ii) within 30 days of the conclusion of the quarter following Executive's death, any unpaid Bonus prorated to the date of Executive's death, and (iii) any unpaid reimbursements due Executive for expenses incurred by Executive prior to Executive's death upon receipt from Executive's personal representative of receipts therefore. Any Initial Options and subsequent stock options granted to Executive that have not vested as of the date of Executive's death shall terminate on the date of Executive's death, but all vested but unexercised Initial Options and subsequently granted stock options will be exercisable by Executive's heirs in accordance with the Plan; provided, however, that Executive's estate shall have a period of up to three (3) years within which to exercise any vested Initial Options or subsequently issued stock options following the date of death of Executive.

10.2 Disability. If, as a result of Executive's incapacity due to physical or mental illness, Executive shall have been absent from the full time performance of substantially all of his material duties with Company for 90 consecutive days or 180 days total within any 12-month period, Executive's employment may be terminated by Company or by Executive for "Disability." Termination shall occur 30 days after a notice of a written termination is delivered to Executive by Company or by Executive to Company (the "Effective Date of Termination"). In the event of such a termination, Company shall pay Executive (i) any unpaid Base Salary and accrued vacation earned prior to the date of Executive's Effective Date of Termination, (ii) within 30 days of the end of the quarter following Executive's Effective Date of Termination, any unpaid Bonus prorated to Executive's last day of actual employment, (iii) any unpaid reimbursements due Executive for expenses incurred by Executive prior to Executive's Effective Date of Termination, pursuant to paragraph 8, and (iv) if Executive is not covered by any other comprehensive insurance that provides a comparable level of benefits, Company will pay Executive an amount equivalent to Executive's COBRA payments up to 18 months following the Effective Date of Termination or the maximum term allowable by then applicable law for coverage of Executive and his eligible dependents. Any Initial Options and subsequent options that have not vested as of Executive's Effective Date of Termination shall terminate on the date of Executive's Effective Date of Termination for Disability, but all vested but unexercised Initial Options and subsequent options will be exercisable by Executive's in accordance with the Plan; provided, however, that in the event of such a termination, Executive or Executive's legal representative will have a period of up to three (3) years within which to exercise any vested Initial Options or subsequently issued stock options following the Effective Date of Termination.

10.3 Cause. The Company may terminate Executive's employment hereunder for Cause. For purposes of this Agreement, "Cause" means

- (i) an act or acts of fraud or dishonesty undertaken by Executive during the course of his employment;
- (ii) misconduct by Executive that is willful or deliberate on Executive's part and that, in either event, is materially injurious to Company, monetarily or otherwise;
- (iii) the indictment, formal charge, conviction of Executive of, or the Executive entering of a plea of nolo contendere to, a misdemeanor involving fraud, theft, dishonesty or moral turpitude or a felony, or Executive's debarment by the U.S. Food and Drug Administration from working in or providing services to any pharmaceutical or biotechnology company;
- (iv) the material breach of any terms and conditions of this Agreement by Executive, which failure or breach has not been cured by Executive within 30 days after written notice thereof to Executive from Company; or
- (v) Executive's failure to perform his duties or follow the lawful directions of the Board, which failure has not been cured by Executive within 30 days after written notice thereof to Executive from Company

The termination of Executive's employment shall not be deemed to be for Cause unless and until there shall have been delivered to Executive a copy of a resolution, duly adopted by the affirmative vote of not less than a majority of the entire membership of the Board (not including Executive) at a meeting of the Board (after reasonable notice to Executive and an opportunity for him, together with his counsel, to be heard before the Board), finding that, in the good faith opinion of the Board, one or more causes for termination exist under this Section 10.3, and specifying the particulars thereof in detail. In the event of termination for Cause, Executive will be entitled to such Base Salary, accrued vacation pay, and benefits as have accrued under this Agreement through the date of termination which accrued amounts shall be payable on the Effective Date of Termination, to exercise vested stock options in accordance with the terms of the Plan and to extend his insurance coverage at his own expense for up to 18 months following the Effective Date of Termination or the maximum term allowable by then applicable law for coverage of Executive and his eligible dependents, but will not be entitled to any other salary, benefits, bonuses or other compensation after such date.

10.4 Without Cause. This Agreement may also be terminated by Company without Cause, and for any reason or no reason, at any time by the delivery to Executive of a written notice of termination; provided, however, that upon any termination of this Agreement by Company other than for Cause, Executive shall be entitled to receive the following (collectively, the "Severance Benefits"): (a) on the Effective Date of Termination, Executive will be paid such Base Salary, vacation, pro rated bonus (pro rated on a daily basis based on the number of days during the year in which such termination occurs prior to the effective date of such termination, over a presumed 365 day year) and all other benefits as have been earned or accrued under this Agreement through the date of termination and (b) provided Executive executes the Company's standard general release for employees (and does not revoke such general release) (i) if Executive is not covered by any other comprehensive insurance, the Company will pay Executive an amount equivalent to Executive's and Executive's Spouse's COBRA payments up to 24 months following the Effective Date of Termination or the maximum term allowable by then applicable law for coverage of Executive and his Spouse, and (ii) Executive will also be paid a lump sum severance equal to two (2) year's then current Base Salary within thirty days of the Executive's execution of the general release, and (iii) Company will continue to reimburse Executive for the premiums on the 25 year level premium term life policy for Executive for a period of two (2) years following any such termination, and (iv) in the event of a termination without Cause during the twenty-four month (24) month period following a Change of Control, any Initial Options and subsequent options and any replacement options in any successor entity that were obtained by Executive in exchange for the Initial Options or subsequent options that have not vested as of Executive's Effective Date of Termination ("Unvested Options") shall vest on the date of Executive's Effective Date of Termination. For avoidance of any doubt, the Company shall not be obligated to pay Executive any Severance Benefits if his employment is terminated on a Termination Date or Extended Termination Date in accordance with the notice provision of Article 1 of this Agreement.

10.5 By Executive. Executive may terminate this Agreement for any reason or no reason at any time upon 30 days written notice to Company.

(a) In the event Executive terminates this Agreement for "Good Reason," Executive shall be entitled to receive the Severance Benefits. As used herein, "Good Reason" shall mean:

(i) any removal of Executive from, or any failure to nominate or re-elect Executive to, his current office and/or as the Chairman of the Board, except in connection with termination of Executive's employment for death, disability or Cause as provided above in this Agreement;;

(ii) the failure of Company to obtain the assumption of this Agreement by any successor to Company, as provided in this Agreement;

(iii) in the event of a Change in Control:

a. (1) any reduction in Executive's then-current Base Salary or any material reduction in Executive's comprehensive benefit package (other than changes, if any, required by group insurance carriers applicable to all persons covered under such plans or changes required under applicable law), or (2) the assignment to Executive of duties that represent or constitute a material adverse change in Executive's position, duties, responsibilities and status with Company immediately prior to a Change in Control, or (3) a material adverse change in Executive's reporting responsibilities, titles, offices, or any removal of Executive from, or any failure to re-elect Executive to, any of such positions; except in connection with the termination of Executive's employment for Cause, upon the disability or death of Executive, or upon the voluntary termination by Executive;

b. the relocation of Executive's place of employment from the location at which Executive was principally employed immediately prior to the date of the Change in Control to a location more than 50 miles from such location; or

c. the failure of any successor to Company to assume and agree to perform Company's obligations under this Agreement; or

(iv) the material breach of any terms and conditions of this Agreement by Company.

Within thirty (30) days of the initial existence of any event described above, Executive must give the Company a written notice which shall identify the above basis for termination for Good Reason and set forth in reasonable detail the facts and circumstances claimed to provide a basis for termination ("Good Reason Notice"). A separation for Good Reason shall not occur if the basis for Good Reason is remedied by the Company during such 30-day period. If the Company does not remedy the basis for Good Reason, the separation from service for Good Reason shall occur on the 31st day after receiving the Good Reason Notice from the Executive.

If it shall be determined that any payment or distribution by Company to or for the benefit of Executive hereunder (a "Payment") would be subject to the excise tax imposed by Section 4999 of the Internal Revenue Code of 1986, as amended (the "Code") or any interest or penalties are incurred by Executive with respect to such excise tax (such excise tax, together with any such interest and penalties, are hereafter collectively referred to as the "Excise Tax"), then Company shall calculate the amount Executive will retain net after-all-taxes, including Excise Taxes, if all payments are made and also calculate the amount Executive shall retain net after-all-taxes, including Excise Taxes, if payments are reduced to an amount so that no Excise Taxes are imposed, and Company shall pay Executive the amount that maximizes the amount Executive will receive after-all-taxes. Company will consult with Executive as to the appropriate Federal and any state income tax to be used in making such calculations. In the event that it is determined that Executive should receive an amount that results in the Payment not being subject to Excise Taxes (the "Reduced Payment"), Executive advise Company as to how to reduce or eliminate the Payment or Payments from among the following categories:

- (1) the portion denominated and payable in cash;
- (2) the portion payable in-kind, such as insurance coverage, or in cash as a reimbursement; and
- (3) equity-based compensation and enhancements, such as accelerated vesting and extended periods to exercise options.

Executive shall have full discretionary authority to determine which payments to reduce within any of the three categories described in the preceding sentence, and can determine to have Company reduce payments in any or all of the three categories in such order as Executive shall advise Company. As promptly as practicable following such determination and election by Executive and subject to any payment provisions otherwise applicable under this Agreement, Company shall pay to or distribute for the benefit of Executive such Payments as are then due to Executive under this Agreement. In the event that Executive is nevertheless subject to Excise Tax, the Company shall have no liability to Executive for payment thereof.

(b) In the event Executive terminates this Agreement other than because of Disability or other than for Good Reason, Company shall pay Executive: (i) on the date it would have been payable to Executive, any unpaid Base Salary and accrued vacation pay earned prior to the date of Executive's termination, and (ii) any unpaid reimbursements due Executive for expenses incurred by Executive prior to the date of Executive's termination, pursuant to this Agreement, and Executive shall have the right to exercise any vested stock options in accordance with the terms of the Plan but be allowed to due such exercise in over a thirty-six (36) month period after termination of this Agreement and to extend Executive's and Executive's eligible dependents' medial insurance coverage at Executive's own expense for up to twenty-four (24) months following the Effective Date of Termination, or the maximum term allowable by then applicable law for coverage of Executive and his eligible dependents.

10.6 Notwithstanding anything contained in this Agreement, under applicable law, or otherwise, in the event of any termination of this Agreement whereby Executive is entitled to receive all or any portion of the Severance Benefits (as defined and provided in this Agreement), then (a) Executive shall have no obligation to seek or accept any other employment or engagement with any other individual or entity following any such termination, and (b) in the event that Executive accepts any other employment or any engagement with any other individual or entity, Company will not be entitled to offset or reduce any portion of the Severance Benefits by any compensation, remuneration, consideration or other things of value received or to be received by Executive from or in connection therewith, it being expressly understood and agreed by Company and Executive that Executive will be entitled to receive all such Severance Benefits without deduction or offset as provided in this Agreement, except that any benefits otherwise receivable by Executive pursuant to Sections 10.4(b)(i) and 10.4(b)(iii) shall be reduced to the extent comparable benefits are received by Executive from a subsequent employer during the two years after termination of his employment.

11. Assignment.

11.1 This Agreement may not be assigned by Executive.

11.2 This Agreement may be assigned by Company provided that Company shall require any successor (whether direct or indirect, by purchase, merger, consolidation or otherwise) to all or substantially all of the business and/or assets of Company to expressly assume and agree to perform under this Agreement in the same manner and to the same extent that Company would be required to perform as if no such succession had taken place.

12. Covenants.

12.1 Confidential Information. During the term of this Agreement and thereafter, Executive shall not, except as may be required to perform his duties hereunder or as required by applicable law or court order, disclose to others for use, whether directly or indirectly, any Confidential Information regarding Company. "Confidential Information" shall mean information about Company, its subsidiaries and affiliates, and their respective clients and customers that is not available to the general public or that does not otherwise become available to the general public, and that was learned by Executive in the course of his employment by Company, including, without limitation, any data, formulae, recipes, methods, information, proprietary knowledge, trade secrets and client and customer lists and all papers, resumes, records and other documents containing such Confidential Information. Executive acknowledges that such Confidential Information is specialized, unique in nature and of great value to Company, and that such information gives Company a competitive advantage. Upon the termination of his employment, Executive will promptly deliver to Company all documents, maintained in any format, including electronic or print, (and all copies thereof) in his possession containing any Confidential Information.

12.2 Noncompetition. Except as otherwise provided herein, Executive agrees that during the term of this Agreement he will not, directly or indirectly, without the prior written consent of Company, provide consulting services with or without pay, or own, manage, operate, join, control, participate in, or be connected as a stockholder, employee, partner, or otherwise with any business, individual, partner, firm, corporation, or other entity which is then in competition with Company or any present affiliate of Company in the biotech industry; provided, however, that the "beneficial ownership" by Executive, either individually or as a member of a "group," as such terms are used in Rule 13d of the General Rules and Regulations under the Securities Exchange Act of 1934 ("Exchange Act"), of not more than 5 % of the voting stock of any corporation shall not be a violation of this Agreement. Notwithstanding the foregoing, Executive shall be permitted to maintain the ownership interests and directorship described on Exhibit "A" attached hereto so long as they do not interfere with the performance of his duties and do not constitute competitive activities.

12.3 Right to Company Materials. Executive agrees that all materials, books, files, reports, correspondence, records, and other documents ("Company Material") used, prepared, or made available to Executive, shall be and shall remain the property of Company. Upon the termination of his employment and/or the expiration of this Agreement, all Company Materials shall be returned immediately to Company, and Executive shall not make or retain any copies thereof, unless and except to the extent required by applicable law, rule or regulation and provided that Executive gives the Company with specific written notice of the copies retained and the purpose of retaining them.

12.4 Non-solicitation. Executive understands and agrees that in the course of employment with Company, Executive will obtain access to and/or acquire Company trade secrets, including Confidential Information, which are solely the property of Company. Therefore, to protect such trade secrets, Executive promises and agrees that during the term of this Agreement, and for a period of six (6) months thereafter, he will not solicit or assist or instruct others in soliciting any employees of Company or any of its present or future subsidiaries or affiliates, to divert their employment or business to or with any individual, partnership, firm, corporation or other entity then in competition with the business of Company, or any subsidiary or affiliate of Company.

12.5 Non-disparagement. Except for statements of fact, internal Company communications relating to the performance of Company, disclosures required under applicable law or in connection with any legal proceedings with respect to which Executive is a party or witness, Executive will not make any disparaging remarks regarding Company at any time during or after the termination of Executive's employment with Company. Except for statements of fact, internal communications relating to the performance of Executive, and disclosures required under applicable law or in connection with any legal proceedings with respect to which Company is a party or witness, Company will not make any disparaging remarks regarding Executive at any time during or after the termination of his employment with Company.

12.6 Survival. This Article 12 shall survive the termination or expiration of this Agreement for the periods of time indicated herein or indefinitely if no period of time is indicated.

13. Notice. For the purpose of this Agreement, notices and all other communications provided for in this Agreement shall be in writing and shall be deemed to have been duly given when delivered or when mailed by United States certified or registered mail, return receipt requested, postage prepaid, addressed to the respective addresses set forth below, or to such other addresses as either party may have furnished to the other in writing in accordance herewith, exception that notice of a change of address shall be effective only upon actual receipt:

Company: Advanced Cell Technology, Inc.
 381 Plantation Street,
 Biotech V.
 Worcester, Massachusetts 09605
 Attention: Rita Parker

Executive: William M. Caldwell, IV
 15516 W. Sunset, #205
 Pacific Palisades, CA 90272

14. Amendments or Additions. No amendment or additions to this Agreement shall be binding unless in writing and signed by both parties hereto.

15. Section Headings. The section headings used in this Agreement are included solely for convenience and shall not affect, or be used in connection with, the interpretation of this Agreement.

16. Severability. The provisions of this Agreement shall be deemed severable and the invalidity or unenforceability of any provision shall not affect the validity or enforceability of the other provisions hereof.

17. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed to be an original, but both of which together will constitute one and the same instrument.

18. Arbitration. Except as provided herein, any controversy or claim arising out of or relating in any way to this Agreement or the breach thereof, or Executive's employment and any statutory claims including all claims of employment discrimination shall be subject to private and confidential arbitration in Los Angeles County, California in accordance with the laws of the State of California. The arbitration shall be conducted in a procedurally fair manner by a mutually agreed upon neutral arbitrator selected in accordance with the National Rules for the Resolution of Employment Disputes ("Rules") of the American Arbitration Association or if none can be mutually agreed upon, then by one arbitrator appointed pursuant to the Rules. The arbitration shall be conducted confidentially in accordance with the Rules. The arbitration fees shall be paid by the Company. Each party shall have the right to conduct discovery including depositions, requests for production of documents and such other discovery as permitted under the Rules or ordered by the arbitrator. The statute of limitations or any cause of action shall be that prescribed by law. The arbitrator shall have the authority to award any damages authorized by law for the claims presented including punitive damages and shall have the authority to award reasonable attorneys fees to the prevailing party in accordance with applicable law. The decision of the arbitrator shall be final and binding on all parties and shall be the exclusive remedy of the parties. The award shall be in writing in accordance with the Rules, and shall be subject to judicial enforcement in accordance with California law. Notwithstanding anything to the contrary contained in this Section, nothing herein shall prevent or restrict the Company or Executive from seeking provisional injunctive relief from any forum having competent jurisdiction over the parties.

19. Section 409A. This Agreement is intended to comply with Section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and will be interpreted in a manner intended to comply with Section 409A of the Code. To the extent any reimbursements or in-kind benefits due to Executive under this Agreement constitute "deferred compensation" under Section 409A of the Code, any such reimbursements or in-kind benefits shall be paid to Executive in a manner consistent with Treas. Reg. Section 1.409A-3(i)(1)(iv). Each payment made under this Agreement shall be designated as a "separate payment" within the meaning of Section 409A of the Code. Notwithstanding anything herein to the contrary, if any payment of money or other benefits due to Executive hereunder could cause the application of an accelerated or additional tax under Section 409A of the Code, Company, in its reasonable discretion, may decide such payments or other benefits shall be deferred if deferral will make such payment or other benefits compliant under Section 409A of the Code ("a 409A Tax"), or otherwise such payment or other benefits shall be restructured, to the extent possible, in a manner, determined by Company that does not cause such accelerated or additional tax. In addition, to the extent Executive is a "specified employee" as defined in Section 409A of the Code as of the earlier of a Services Cessation Date or the date of termination of Executive's employment, and the deferral of the commencement of any compensation or benefits otherwise payable under this Agreement, or any other applicable separation program or plan, as a result of such Services Cessation Date or termination of employment is necessary in order to prevent a 409A Tax, then Company will postpone the commencement of such payment of any such compensations or benefits until the first business day of the seventh month following Executive's termination date (the "Delayed Payment Date"). Payment of the withheld and accumulated payments (with interest as calculated below) shall be treated as made on the Delayed Payment Date if the payment is made on such date or on a later date within the same calendar year as the Delayed Payment Date, or, if later, by the 15th day of the third month following the Delayed Payment Date, provided that Executive may not, directly or indirectly, designate the year of payment. In the event that this Paragraph 14(d) requires a delay of any payment or benefit, such payment shall be accumulated and paid in a single lump sum on the Delayed Payment Date, with interest for the period of delay, compounded monthly, equal to the prime or base lending rate then in effect as of the date the payment would have otherwise been made. Company shall consult with Executive in good faith regarding the implementation of the provisions of this Paragraph, but Company shall determine the terms of any such implementation. Executive acknowledges that Executive has been advised to obtain independent legal, tax or other counsel in connection with 409A, and that Executive has done so to the extent that you deemed necessary or appropriate.

20. Miscellaneous. No provision of this Agreement may be modified, waived or discharged unless such waiver, modification or discharge is agreed to in writing and signed by Executive and such officer as may be specifically designated by the Board. No waiver by either party hereto at any time of any breach by the other party hereto of, or compliance with, any condition or provision of this Agreement to be performed by such other party shall be deemed a waiver of similar or dissimilar provisions or conditions at the same or at any prior or subsequent time. No agreements or representations, oral or otherwise, express or implied, with respect to the subject matter hereof have been made by either party which are not expressly set forth in this Agreement. The validity, interpretation, construction and performance of this Agreement shall be governed by the laws of the State of California without regard to its conflicts of law principles. All references to sections of the Exchange Act shall be deemed also to refer to any successor provisions to such sections. This Agreement may be executed in counterparts, each of which shall constitute an original but all of which, taken together, shall constitute one document.

IN WITNESS WHEREOF, each of the parties hereto has executed this Agreement and has made it effective as of the date first indicated above.

EXHIBIT 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER AND PRINCIPAL FINANCIAL OFFICER

PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, William M. Caldwell, IV, certify that:

1. I have reviewed this annual report on Form 10-K of Advanced Cell Technology, Inc.;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
-

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
