BIOVIE INC.

Form: 424B4

Date Filed: 2020-09-18

Corporate Issuer CIK: 1580149

PROSPECTUS

1,565,200 Shares

BioVie Inc.

This is a firm commitment public offering of 1,565,200 shares of Class A common stock ("common stock") of BioVie Inc., at a price of \$10.00 per share. Prior to this offering, there has been a limited public market for our common stock on the OTCQB Marketplace under the ticker BIVI.

On August 31, 2020, the last reported sale price for our common stock as reported on the OTCQB Marketplace was \$21.00 per share. Our common stock has been approved for listing on The NASDAQ Capital Market ("Nasdaq") under the symbol "BIVI," subject only to official notice of issuance.

Investing in our securities is highly speculative and involves a high degree of risk. See "Risk Factors" beginning on page 5.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	<u>Per Share</u>	<u>Total</u>
Initial public offering price	\$ 10.00	\$ 15,652,000
Underwriting discounts and commissions (1)	\$ 0.70	\$ 1,095,640
Proceeds to us, before expenses	\$ 9.30	\$ 14,566,360

(1) We refer you to the "Underwriting" section of this prospectus beginning on page 50 for additional information regarding the underwriters' compensation.

We have granted a 45-day option to the Representatives of the underwriters to purchase up to 234,780 additional shares of common stock from us at the public offering price, less the underwriting discount, solely to cover over-allotments, if any.

The underwriters expect to deliver the common stock to purchasers on or about September 22, 2020.

BIV201 Projected Clinical Timeline

Ascites Due to Advanced Liver Cirrhosis

- Cirrhosis is the **11th leading** cause of death in the US¹
- Resulted in **42,000 US deaths** in 2017¹
- **Ascites** is the most common major complication²
- For **refractory ascites** the mean one-year survival rate is only **50%**³

Our first disease target is **ascites**, the accumulation of 5+ liters of fluid in the abdomen.

You should rely only on the information contained in this prospectus. We have not authorized any other person to provide you with information different from or in addition to that contained in this prospectus. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where an offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate only as of the date on the front cover of this prospectus. Our business, financial condition, results of operations and prospects may have changed since that date.

In this prospectus, we rely on and refer to information and statistics regarding our industry. We obtained this statistical, market and other industry data and forecasts from publicly available information. While we believe that the statistical data, market data and other industry data and forecasts are reliable, we have not independently verified the data.

As used in this prospectus, unless the context indicates or otherwise requires, "the Company," "our Company," "we," "us," and "our" refer to BioVie Inc., a Nevada corporation, and its consolidated subsidiaries.

PROSPECTUS SUMMARY

This summary highlights certain information appearing elsewhere in this prospectus. Because it is only a summary, it does not contain all of the information that you should consider before investing in our securities and it is qualified in its entirety by, and should be read in conjunction with, the more detailed information appearing elsewhere in this prospectus. Before you decide to invest in our securities, you should read the entire prospectus carefully, including "Risk Factors" beginning on page 5 and the financial statements and related notes included in this prospectus.

A 1:125 reverse stock split of our common stock was effected on November 22, 2019. All share amounts in this prospectus have been retroactively adjusted to give effect to this reverse stock split (subject to rounding up fractional shares).

This prospectus includes trademarks, service marks and trade names owned by us or other companies. All trademarks, service marks and trade names included in this prospectus are the property of their respective owners.

Our Company

We are a clinical-stage company pursuing the discovery, development, and commercialization of innovative drug therapies. We are currently focused on developing and commercializing BIV201 (continuous infusion terlipressin), a novel approach to the treatment of ascites due to chronic liver cirrhosis. BIV201 is based on a drug that is approved in about 40 countries to treat related complications of liver cirrhosis (part of the same disease pathway as ascites), but not yet available in the United States. The active agent in BIV201, terlipressin, is a potent vasoconstrictor and has shown efficacy for reducing portal hypertension in studies around the world. The goal of BIV201 therapy is to interrupt the ascites disease pathway, thereby halting the cycle of accelerating fluid generation in ascites patients.

In 2017, we began administering BIV201 to patients at the McGuire Research Institute Inc. in Richmond, VA. In April 2019, we announced top-line results for our Phase 2a clinical trial of BIV201 (continuous infusion terlipressin) in six patients with refractory ascites due to advanced liver cirrhosis. The following results were observed:

- Continuous infusion of terlipressin via portable infusion pump was maintained for 28 days in three patients with refractory ascites, and all patients remained hemodynamically stable during treatment.
- The steady state plasma concentration data characterized terlipressin pharmacokinetics (PK) within the predicted PK model concentrations.
- Four of the six patients treated with BIV201 experienced an increase in the number of days between paracenteses ranging from 71% to 414% compared to prior to initiating therapy.

In June 2019, we met with representatives of the U.S. Food & Drug Administration ("FDA") for a Type C Guidance Meeting to plan our next clinical study. We discussed our clinical development program with the FDA and proposed safety and efficacy endpoints required for future marketing approval. In September, the FDA granted our Type B meeting request and committed to providing feedback in early 2020 for our proposed clinical trial design. We subsequently submitted a proposed clinical trial protocol to the FDA supported by a detailed meeting information package. In April 2020, we received the FDA's written response to our Type B meeting questions which required changes to our clinical trial design. We then submitted a revised Phase 2 trial design and in June announced the receipt of further guidance from the FDA. Based on this guidance, the Company plans to commence a randomized 24-patient Phase 2 study in 2020, to be followed by a larger pivotal Phase 3 clinical trial targeted to begin in 2021. The FDA communicated that pending positive Phase 2 study results, a sufficiently large and well-controlled Phase 3 trial, with supportive data from the Phase 2 (statistical significance not required), could potentially yield the clinical data needed to apply for BIV201 marketing approval. The Phase 2 clinical trial protocol is summarized on www.clinicaltrials.gov, trial identifier NCT04112199.

In August 2019, we invented a proprietary novel liquid formulation of terlipressin that is intended to improve convenience for outpatient administration and avoid potential formulation errors when pharmacists reconstitute the powder version. In November 2019, we announced the completion of quality control testing and released the batch for use in our next clinical trial pending FDA clearance. In March 2020, we submitted a detailed information package the FDA's CMC division. In May 2020, we received CMC division feedback regarding the new BIV201 prefilled terlipressin syringe. We may use it in the upcoming Phase 2 trial subject to conducting certain additional standard analytical testing. In June 2020, we announced that room temperature stability of the prefilled syringe had been confirmed at 6 months, with the potential for 12 months or up to two years of stability (yet to be confirmed). Room temperature storage presents a key product differentiation versus terlipressin products in countries where the drug is approved. To the best of the Company's knowledge, all other terlipressin products sold globally must be stored under refrigeration and there is no prefilled syringe format of terlipressin available for treating patients in these countries. BioVie has filed a US Provisional patent application and a PCT ("Patent Cooperation Treaty") application in Europe. We intend to seek global patent protection for our novel liquid terlipressin formulations.

BIV201 (continuous infusion terlipressin) has the potential to improve the health of thousands of patients suffering from life-threatening complications of liver cirrhosis due to hepatitis, NASH, and alcoholism. The FDA has granted Fast-Track status and Orphan Drug designation for the most common of these complications, ascites, which represents a significant unmet medical need. Patients with cirrhosis and ascites account for an estimated 116,000 U.S. hospital discharges annually, with frequent early readmissions. Those requiring paracentesis (removal of ascites fluid) experience an average hospital stay lasting 8 days incurring over \$86,000 in medical costs (HCUP Nationwide Readmissions Database 2016). This translates into a total addressable ascites market size for BIV201 therapy exceeding \$650 million based on Company estimates. The FDA has never approved any drug specifically for treating ascites. For patients with refractory ascites the mean one-year survival rate is only 50% (Bureau et al. 2017). BIV201 has also received Orphan Drug designation for hepatorenal syndrome ("HRS"). Patients with refractory ascites often progress to HRS which is the onset of kidney failure and requires emergency hospitalization. About one-half of these patients typically succumb within only 2 to 4 weeks and no drug therapies have been FDA approved specifically to treat HRS.

Risks Associated with our Business

Our business and ability to execute our business strategy are subject to a number of risks of which you should be aware before you decide to buy our common stock. In particular, you should consider the following risks, which are discussed more fully in the section entitled "Risk Factors" in this prospectus:

- we are a development stage company with a limited operating history, making it difficult for you to evaluate our business and your investment;
- we have no products approved for commercial sale, have never generated any revenues and may never achieve revenues or profitability, which could cause us to cease operations;
- we will need to raise substantial additional capital in the future to fund our operations and we may be unable to raise such funds when needed and on acceptable terms;
- we have limited experience in drug development and may not be able to successfully develop any drugs, which would cause us to cease operations;
- we have no manufacturing experience, and the failure to comply with all applicable manufacturing regulations and requirements could have a materially adverse effect on our business;
- if we fail to maintain an effective system of internal controls, we may not be able to accurately report financial results or detect fraud;
- we may be unable to obtain or protect intellectual property rights relating to our products, and we may be liable for infringing upon the intellectual property rights of others, which could have a materially adverse effect on our business;
- the biotechnology and biopharmaceutical industries are characterized by rapid technological developments and a high degree of competition. We may be unable to compete with enterprises equipped with more substantial resources than us, which could cause us to curtail or cease operations;
- there can be no assurance that our securities will continue to be listed on Nasdaq or, if listed, that there will be liquidity in the trading market for our securities;
- certain stockholders who are also officers and directors may have significant control over our management;
- we are subject to risks associated with the recent outbreak of the novel coronavirus (also known as COVID-19), which may negatively affect our ability to recruit candidates for our clinical trials and financing to support the development of our product candidates, and
- we are subject to the periodic reporting requirements of the Exchange Act, which require us to incur audit fees and legal fees in connection with the preparation of such reports. These additional costs will negatively affect our ability to earn a profit.

Corporate Information

Our principal executive office is located at 2120 Colorado Avenue, #230, Santa Monica, California 90404, and our phone number (310) 444-4300.

THE OFFERING

Shares Offered:	1,565,200 shares of common stock.
Common stock to be outstanding after this offering	13,584,884 shares (or 13,819,664 shares if the underwriters exercise their over-allotment option in full).
Over-allotment option	We have granted the underwriters a 45-day option to purchase up to an additional 234,780 shares of our common stock at the initial public offering price to cover over-allotments, if any.
Use of proceeds	We intend to use the net proceeds of this offering primarily to fund clinical trials of our lead product candidate BIV201 and for working capital and other general corporate purposes.
Concentration of ownership	Upon completion of this offering, our executive officers and directors will beneficially own, in the aggregate, approximately 83.1% of the outstanding shares of our common stock.
NASDAQ Capital Market symbol	"BIVI"
Risk Factors	Investing in our securities involves a high degree of risk. See "Risk Factors" beginning on page 5 and the other information in this prospectus for a discussion of the factors you should consider carefully before you decide to invest in our securities.
Lock-Up	We, each of our officers, directors, and all of our 5% or greater stockholders have agreed, subject to certain exceptions, not to sell, offer, agree to sell, contract to sell, hypothecate, pledge, grant any option to purchase, make any short sale of, or otherwise dispose of or hedge, directly or indirectly, any shares of our capital stock or any securities convertible into or exercisable or exchangeable for shares of capital stock, for a period of (i) six (6) months after the date of this prospectus in the case of our directors and officers and (ii) three (3) months after the date of this prospectus in the case of the Company and any other 5% or greater holder of our outstanding securities, without the prior written consent of the Representatives. See "Underwriting" for additional information.

All information in this prospectus assumes that the underwriters do not exercise their over-allotment option and that our controlling stockholder, Acuitas Group Holdings, LLC ("Acuitas"), receives an aggregate of 6,813,082 shares of common stock upon the closing of this offering pursuant to the automatic exercise of warrants issued in connection with a bridge financing (the "Bridge Financing") and the committed exercise of its existing purchase option, in each case as described elsewhere herein. The total number of shares of our common stock outstanding as of September 15, 2020 was 5,206,602 and excludes 1,635,116 shares of common stock reserved for issuance pursuant to currently outstanding options and warrants.

SUMMARY FINANCIAL INFORMATION

The following tables present our summary consolidated financial and other data as of and for the periods indicated. The summary consolidated statements of operations data for the fiscal years ended June 30, 2020 and June 30, 2019 are derived from our audited financial statements included elsewhere in this prospectus.

The summarized financial information presented below is derived from and should be read in conjunction with our audited consolidated financial statements including the notes to those financial statements, which are included elsewhere in this prospectus along with the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations." Our historical results are not necessarily indicative of our future results.

	For the fiscal year ended June 30:	
	2020	2019
CONSOLIDATED STATEMENTS OF OPERATIONS DATA:		
Revenue	\$ —	\$ —
Operating expenses	2,692,888	2,496,573
Loss from operations	(2,692,888)	(2,496,573)
Total other expense (income), net	13,983,881	(52,286)
Net loss	<u>\$ (16,676,768)</u>	<u>\$ (2,444,287)</u>
Deemed dividend	17,099,058	(48,659)
Net loss attributable to Company stockholders	<u>\$ (33,775,826)</u>	<u>\$ (2,492,946)</u>
Net loss per common share, basic and diluted	<u>\$ (6.85)</u>	<u>\$ (0.98)</u>
Weighted average shares outstanding, basic and diluted	<u>4,929,497</u>	<u>2,539,611</u>

	As of June 30, 2020		
	Actual	Pro Forma	Pro Forma As Adjusted
CONSOLIDATED BALANCE SHEET DATA:			
Cash	\$ 37,195	37,195	\$ 12,176,309
Total current assets	412,980	412,980	12,552,094
Total assets	2,083,917	2,083,917	14,223,031
Total current liabilities	23,520,053	1,259,206	1,259,206
Total liabilities	23,582,553	23,582,553	1,321,706
Total stockholders' (deficit) equity	(21,498,636)	(21,498,636)	12,901,325

The preceding table presents a summary of our unaudited balance sheet data as of June 30, 2020:

- on an actual basis;
- on pro-forma basis to give effect to the following transactions with our controlling stockholder Acuitas (i) the issuance of an aggregate of 1,453,250 shares of common stock upon the automatic exercise of warrants issued in the Bridge Financing (the "Bridge Financing Warrants") and (ii) the issuance of an aggregate of 5,359,832 shares of common stock pursuant to a committed exercise by Acuitas of its purchase option granted in connection with its initial investment in the Company, in each case upon the closing of this offering; and
- on pro-forma as adjusted basis to give effect to the pro-forma adjustment above, as well as the receipt of the estimated net proceeds from the sale of 1,565,200 shares in this offering at the public offering price of \$10.00 per share, after deducting the underwriting discounts and commissions and estimated expenses payable by us, and the application of a portion of such net proceeds to satisfy all amounts due with respect to the 10% OID Convertible Delayed Draw Debenture issued in the Bridge Financing (the "Debenture") as of the closing date of this offering.

RISK FACTORS

Any investment in our securities involves a high degree of risk. You should carefully consider the risks described below, which we believe represent certain of the material risks to our business, together with the information contained elsewhere in this prospectus, before you make a decision to invest in our securities. Please note that the risks highlighted here are not the only ones that we may face. For example, additional risks presently unknown to us or that we currently consider immaterial or unlikely to occur could also impair our operations. If any of the following events occur or any additional risks presently unknown to us actually occur, our business, financial condition and operating results may be materially adversely affected. In that event, the trading price of our securities could decline and you could lose all or part of your investment.

Risks Relating to Our Business and Industry

We have no products approved for commercial sale, have never generated any revenues and may never achieve revenues or profitability, which could cause us to cease operations.

We have no products approved for commercial sale and, to date, we have not generated any revenues. Our ability to generate revenue depends heavily on (a) successful development program and thereafter demonstration in human clinical trials that BIV201, our product candidate, is safe and effective; (b) our ability to seek and obtain regulatory approvals, including, without limitation, with respect to the indications we are seeking; (c) successful commercialization of our product candidates; and (d) market acceptance of our products. There are no assurances that we will achieve any of the forgoing objectives. Furthermore, our product candidate is in the development stage, and we have not evaluated it in full human clinical trials. If we do not successfully develop and commercialize our product candidate we will not achieve revenues or profitability in the foreseeable future, if at all. If we are unable to generate revenues or achieve profitability, we may be unable to continue our operations.

We are a development stage company with a limited operating history, making it difficult for you to evaluate our business and your investment.

BioVie Inc. was incorporated on April 10, 2013. We are a development stage biopharmaceutical company with a potential therapy that has not been fully evaluated in clinical trials, and our operations are subject to all of the risks inherent in the establishment of a new business enterprise, including but not limited to the absence of an operating history, the lack of commercialized products, insufficient capital, expected substantial and continual losses for the foreseeable future, limited experience in dealing with regulatory issues, the lack of manufacturing experience and limited marketing experience, possible reliance on third parties for the development and commercialization of our proposed products, a competitive environment characterized by numerous, well-established and well capitalized competitors and reliance on key personnel.

Since inception, we have not established any revenues or operations that shall provide financial stability in the long term, and there can be no assurance that we will realize our plans on our projected timetable in order to reach sustainable or profitable operations.

Investors are subject to all the risks incident to the creation and development of a new business and each Investor should be prepared to withstand a complete loss of his, her or its investment. Furthermore, the accompanying financial statements have been prepared assuming that we will continue as a going concern. We have not emerged from the development stage, and may be unable to raise further equity. These factors raise substantial doubt about its ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Because we are subject to these risks, you may have a difficult time evaluating our business and your investment in our Company. Our ability to become profitable depends primarily on our ability to develop drugs, to obtain approval for such drugs, and if approved, to successfully commercialize our drugs, our research and development ("R&D") efforts, including the timing and cost of clinical trials; and our ability to enter into favorable alliances with third-parties who can provide substantial capabilities in clinical development, regulatory affairs, sales, marketing and distribution.

Even if we successfully develop and market BIV201, we may not generate sufficient or sustainable revenue to achieve or sustain profitability, which could cause us to cease operations and cause you to lose all of your investment.

If the FDA or comparable foreign regulatory authorities approve generic versions of any of our products that receive marketing approval, or such authorities do not grant our products appropriate periods of exclusivity before approving generic versions of our products, the sales of our products could be adversely affected.

Once a new drug application (“NDA”) is approved, the product covered thereby becomes a “reference listed drug” in the FDA’s publication, “Approved Drug Products with Therapeutic Equivalence Evaluations,” commonly known as the Orange Book. Manufacturers may seek approval of generic versions of reference listed drugs through submission of abbreviated new drug applications (“ANDAs”) in the United States. In support of an ANDA, a generic manufacturer need not conduct clinical trials. Rather, the applicant generally must show that its product has the same active ingredient(s), dosage form, strength, route of administration and conditions of use or labeling as the reference listed drug and that the generic version is bioequivalent to the reference listed drug, meaning it is absorbed in the body at the same rate and to the same extent. Generic products may be significantly less costly to bring to market than the reference listed drug and companies that produce generic products are generally able to offer them at lower prices. Thus, following the introduction of a generic drug, a significant percentage of the sales of any branded product or reference listed drug is typically lost to the generic product.

The FDA may not approve an ANDA for a generic product until any applicable period of non-patent exclusivity for the reference listed drug has expired. The United States Federal Food, Drug, and Cosmetic Act (“FDCA”) provides a period of five years of non-patent exclusivity for a new drug containing a new chemical entity (“NCE”). Specifically, in cases where such exclusivity has been granted, an ANDA may not be submitted to the FDA until the expiration of five years unless the submission is accompanied by a Paragraph IV certification that a patent covering the reference listed drug is either invalid or will not be infringed by the generic product, in which case the applicant may submit its application four years following approval of the reference listed drug.

While we believe that BIV201 contains active ingredients that would be treated as NCEs by the FDA and, therefore, if approved, should be afforded five years of data exclusivity, the FDA may disagree with that conclusion and may approve generic products after a period that is less than five years. If the FDA were to award NCE exclusivity to someone other than us, we believe that we would still be awarded three year “Other” exclusivity protection from generic competition, which is awarded when an application or supplement contains reports of new clinical investigations (not bioavailability studies) conducted or sponsored by an applicant and essential for approval. Manufacturers may seek to launch these generic products following the expiration of the applicable marketing exclusivity period, even if we still have patent protection for our product. If we do not maintain patent protection and data exclusivity for our product candidates, our business may be materially harmed.

Competition that our products may face from generic versions of our products could materially and adversely impact our future revenue, profitability and cash flows and substantially limit our ability to obtain a return on the investments we have made in those product candidates.

If we fail to obtain or maintain Orphan Drug exclusivity for BIV201, we will have to rely on our data and marketing exclusivity, if any, and on our intellectual property rights, which may reduce the length of time that we can prevent competitors from selling generic versions of BIV201.

We have obtained Orphan Drug designation for BIV201 in the U.S. for the treatment of hepatorenal syndrome (received November 21, 2018) and treatment of ascites due to all etiologies except cancer (received September 8, 2016). Under the Orphan Drug Act, the FDA may designate a product as an Orphan Drug if it is a drug intended to treat a rare disease or condition, defined, in part, as a patient population of fewer than 200,000 in the U.S. In the EU, Orphan Drug designation may be granted to drugs intended to treat, diagnose or prevent a life-threatening or chronically debilitating disease having a prevalence of no more than five in 10,000 people in the EU. The company that first obtains FDA approval for a designated Orphan Drug for the associated rare disease receives marketing exclusivity for use of that drug for the stated condition for a period of seven years. Orphan Drug exclusive marketing rights may be lost under several circumstances, including a later determination by the FDA that the request for designation was materially defective or if the manufacturer is unable to assure sufficient quantity of the drug. Similar regulations are available in the EU with a ten-year period of market exclusivity.

Even though BioVie has obtained Orphan Drug designation for its lead product candidate, and intends to seek other Orphan Drug designations for BIV201, and Orphan Drug designation for other product candidates, there is no assurance that BioVie will be the first to obtain marketing approval for any particular rare indication. Further, even though BioVie has obtained Orphan Drug designation for its lead product candidate, or even if BioVie obtains Orphan Drug designation for other potential product candidates, such designation may not effectively protect BioVie from competition because different drugs can be approved for the same condition and the same drug can be approved for different conditions and potentially used off-label in the Orphan indication. Even after an Orphan Drug is approved, the FDA can subsequently approve the same drug for the same condition for several reasons, including, if the FDA concludes that the later drug is safer or more effective or makes a major contribution to patient care. Orphan Drug designation neither shortens the development time or regulatory review time of a drug, nor gives the drug any advantage in the regulatory review or approval process.

In addition, other companies have received Orphan Drug designations for terlipressin. Mallinckrodt Hospital Products IP Limited received Orphan Drug designation in 2004 for terlipressin for the treatment of Hepatorenal Syndrome and Ferring Pharmaceuticals Inc. received Orphan Drug designation in 1986 for terlipressin for the treatment of bleeding esophageal varices. If Mallinckrodt Hospital Products IP Limited receives FDA approval for terlipressin for the treatment of Hepatorenal Syndrome before we do, they may obtain a competitive advantage associated with being the first to market. Further, in connection with obtaining marketing approval for terlipressin for the treatment of Hepatorenal Syndrome, Mallinckrodt Hospital Products IP Limited would also obtain Orphan Drug exclusivity for terlipressin, that could prevent our approval for the same indication for seven years, although we could continue to pursue other indications for the drug.

If Ferring Pharmaceuticals Inc. receives FDA approval for terlipressin for the treatment of bleeding esophageal varices, they would also obtain a competitive advantage associated with being the first to market. In connection with obtaining marketing approval for terlipressin for the treatment of bleeding esophageal varices, Ferring Pharmaceuticals Inc. would also obtain Orphan Drug exclusivity for terlipressin, but we do not believe that Orphan Drug exclusivity for Ferring Pharmaceuticals Inc.'s terlipressin product would have an adverse effect on our ability to market BIV201, as the same drug would be approved for different indications under FDA rules, and we can maintain Orphan Drug exclusivity for BIV201 for the different indication.

We will need to raise substantial additional capital in the future to fund our operations and we may be unable to raise such funds when needed and on acceptable terms, which could have a materially adverse effect on our business.

Developing biopharmaceutical products, including conducting pre-clinical studies and clinical trials and establishing manufacturing capabilities, requires substantial funding. As of June 30, 2020, we had cash and cash equivalents of approximately \$37,195. Although we entered into a Securities Purchase Agreement on September 24, 2019 with our controlling stockholder regarding a bridge financing in the form of up to \$2.0 million in convertible debt and warrants, of which \$1.6 million has been drawn as of August 31, 2020, additional financing will be required to fund the research and development of our product candidates. We have not generated any product revenues, and do not expect to generate any revenues until, and only if, we develop, and receive approval to sell our product candidates from the FDA and other regulatory authorities for our product candidates.

We may not have the resources to complete the development and commercialization of any of our proposed product candidates. We will require additional financing to further the clinical development of our product candidates. In the event that we cannot obtain the required financing, we will be unable to complete the development necessary to file an NDA with the FDA for BIV201. This will delay research and development programs, preclinical studies and clinical trials, material characterization studies, regulatory processes, the establishment of our own laboratory or a search for third party marketing partners to market our products for us, which could have a materially adverse effect on our business.

The amount of capital we may need will depend on many factors, including the progress, timing and scope of our research and development programs, the progress, timing and scope of our preclinical studies and clinical trials, the time and cost necessary to obtain regulatory approvals, the time and cost necessary to establish our own marketing capabilities or to seek marketing partners, the time and cost necessary to respond to technological and market developments, changes made or new developments in our existing collaborative, licensing and other commercial relationships, and new collaborative, licensing and other commercial relationships that we may establish.

Until we can generate a sufficient amount of product revenue, if ever, we expect to finance future cash needs, through public or private equity offerings, debt financings, or corporate collaboration and licensing arrangements. Additional funds may not be available when we need them on terms that are acceptable to us, or at all. If adequate funds are not available, we may be required to delay, reduce the scope of, or eliminate one or more of our research or development programs or our commercialization efforts. In addition, we could be forced to discontinue product development and reduce or forego attractive business opportunities. To the extent that we raise additional funds by issuing equity securities, our stockholders may experience additional significant dilution, and debt financing, if available, may involve restrictive covenants. To the extent that we raise additional funds through collaboration and licensing arrangements, it may be necessary to relinquish some rights to our technologies or our product candidates, or grant licenses on terms that may not be favorable to us. We may seek to access the public or private capital markets whenever conditions are favorable, even if we do not have an immediate need for additional capital at that time.

Our fixed expenses, such as rent and other contractual commitments, will likely increase in the future, as we may enter into leases for new facilities and capital equipment and/or enter into additional licenses and collaborative agreements. Therefore, if we fail to raise substantial additional capital to fund these expenses, we could be forced to cease operations, which could cause you to lose all of your investment.

We have limited experience in drug development and may not be able to successfully develop any drugs, which would cause us to cease operations.

We have never successfully developed a new drug and brought it to market. Our management and clinical teams have experience in drug development but they may not be able to successfully develop any drugs. Our ability to achieve revenues and profitability in our business will depend on, among other things, our ability to develop products internally or to obtain rights to them from others on favorable terms; complete laboratory testing and human studies; obtain and maintain necessary intellectual property rights to our products; successfully complete regulatory review to obtain requisite governmental agency approvals; enter into arrangements with third parties to manufacture our products on our behalf; and enter into arrangements with third parties to provide sales and marketing functions. If we are unable to achieve these objectives we will be forced to cease operations and you will lose all of your investment.

Development of pharmaceutical products is a time-consuming process, subject to a number of factors, many of which are outside of our control. Consequently, if we are unsuccessful or fail to timely develop new drugs, we could be forced to discontinue our operations.

Our lead product candidate, BIV201, has been cleared by the FDA to undergo testing in a mid-stage (Phase 2) clinical trial. On June 18, 2019, we met with representatives of the FDA for Type C Guidance Meeting to plan our next clinical study following the recently completed Phase 2a clinical trial. We discussed our clinical development program with the FDA and proposed safety and efficacy endpoints required for future marketing approval. In September, the FDA granted our Type B meeting request and committed to providing feedback in early 2020 for our proposed clinical trial design. We subsequently submitted a proposed clinical trial protocol to the FDA supported by a detailed meeting information package. In April 2020, we received the FDA's written response to our Type B meeting questions which required changes to our clinical trial design. We then submitted a revised Phase 2 trial design and follow-up questions. In June, we announced the receipt of further guidance from the FDA regarding the clinical trial design. Based on this guidance, the Company plans to commence a randomized 24-patient Phase 2 study in 2020, to be followed by a larger pivotal Phase 3 clinical trial targeted to begin in 2021.

Further development and extensive testing will be required to determine its technical feasibility and commercial viability. Our success will depend on our ability to achieve scientific and technological advances and to translate such advances into reliable, commercially competitive drugs on a timely basis. Drugs that we may develop are not likely to be commercially available, at a minimum, for a few years, if ever. The proposed development schedules for our product candidates may be affected by a variety of factors, including technological difficulties, proprietary technology of others, and changes in government regulation, many of which will not be within our control. Any delay in the development, introduction or marketing of our product candidates could result either in such drugs being marketed at a time when their cost and performance characteristics would not be competitive in the marketplace or in the shortening of their commercial lives. In light of the long-term nature of our projects and other risk factors described elsewhere in this document, we may not be able to successfully complete the development or marketing of any drugs which could cause us to cease operations.

We may fail to successfully develop and commercialize our product candidate(s) if it is found to be unsafe or ineffective in clinical trials; does not receive necessary approval from the FDA or foreign regulatory agencies; fails to conform to a changing standard of care for the disease it seeks to treat; or is less effective or more expensive than current or alternative treatment methods.

Drug development failure can occur at any stage of clinical trials and as a result of many factors, there can be no assurance that we or our collaborators will reach our anticipated clinical targets. Even if we or our collaborators complete our clinical trials, we do not know what the long-term effects of exposure to our product candidates will be. Furthermore, our product candidates may be used in combination with other treatments and there can be no assurance that such use will not lead to unique safety issues. Failure to complete clinical trials or to prove that our product candidates are safe and effective would have a material adverse effect on our ability to generate revenue and could require us to reduce the scope of or discontinue our operations, which could cause you to lose all of your investment.

We face business disruption and related risks resulting from the recent outbreak of the novel coronavirus 2019 (COVID-19), which could have a material adverse effect on our business plan.

The development of our product candidates could be disrupted and materially adversely affected by the recent outbreak of COVID-19. As a result of measures imposed by the governments in affected regions, businesses and schools have been suspended due to quarantines intended to contain this outbreak. The spread of COVID-19 from China to other countries has resulted in the Director General of the World Health Organization declaring the outbreak of COVID-19 as a Public Health Emergency of International Concern (PHEIC), based on the advice of the Emergency Committee under the International Health Regulations (2005), and the Centers for Disease Control and Prevention in the U.S. issued a warning on February 25, 2020 regarding the likely spread of COVID-19 to the U.S. While the COVID-19 outbreak is still believed to be in early stages, international stock markets have experienced significant swings due to the uncertainty associated with the slow-down in the global economy and the reduced levels of international travel and commerce experienced since the beginning of January. We are still assessing our business plans and the impact COVID-19 may have on our ability to recruit candidates for clinical trials or to raise financing to support the development of our product candidates, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular.

We have no manufacturing experience, and the failure to comply with all applicable manufacturing regulations and requirements could have a material adverse effect on our business.

We have never manufactured products in the highly regulated environment of pharmaceutical manufacturing, and our team has limited experience in the manufacture of drug therapies. There are numerous regulations and requirements that must be maintained to obtain licensure and permitting required prior to the commencement of manufacturing, as well as additional requirements to continue manufacturing pharmaceutical products. We currently do not own or lease facilities that could be used to manufacture any products that might be developed by us, and have contracted with an experienced Contract Manufacturing Organization (“CMO”) to perform the manufacturing of our new product candidate BIV201. In addition, we do not have the resources at this time to acquire or lease suitable facilities. If we or our CMO fail to comply with regulations, to obtain the necessary licenses and knowhow or to obtain the requisite financing in order to comply with all applicable regulations and to own or lease the required facilities in order to manufacture our products, we could be forced to cease operations, which would cause you to lose all of your investment.

In addition, the FDA and other regulatory authorities require that product candidates and drug products be manufactured according to current good manufacturing practices (“cGMP”). Any failure by our third-party manufacturers to comply with cGMP could lead to a shortage of BIV201. In addition, such failure could be the basis for action by the FDA to withdraw approval, if granted to us, and for other regulatory action, including seizure, injunction or other civil or criminal penalties.

BIV201 and any other product candidate that we develop may compete with other products and product candidates for access to manufacturing facilities. There are a limited number of manufacturers that operate under cGMP regulations and that are both capable of manufacturing for us and willing to do so. If we need to find another source of drug substance or drug product for BIV201, we may not be able to identify, or reach agreement with, commercial-scale manufacturers on commercially reasonable terms, or at all. If we are unable to do so, we will need to develop our own commercial-scale manufacturing capabilities, which would: impact commercialization of BIV201 in the U.S. and other countries where it may be approved; require a capital investment by us that could be quite costly; and increase our operating expenses.

If our existing third-party manufacturers, or the third parties that we engage in the future to manufacture a product for commercial sale or for our clinical trials, should cease to continue to do so for any reason, we likely would experience significant delays in obtaining sufficient quantities of product for us to meet commercial demand or to advance our clinical trials while we identify and qualify replacement suppliers. If for any reason we are unable to obtain adequate supplies of BIV201 or any other product candidate that we develop, or the drug substances used to manufacture it, it will be more difficult for us to compete effectively, generate revenue, and further develop our products. In addition, if we are unable to assure a sufficient quantity of the drug for patients with rare diseases or conditions, we may lose any Orphan Drug exclusivity to which the product otherwise would be entitled.

We do not currently have the sales and marketing personnel necessary to sell products, and the failure to hire and retain such staff could have a material adverse effect on our business.

We are an early stage development company with limited resources. Even if we had products available for sale, which we currently do not, we have not secured sales and marketing staff at this early stage of operations to sell products. We cannot generate sales without sales or marketing staff and must rely on officers to provide any sales or marketing services until such personnel are secured, if ever. If we fail to hire and retain the requisite expertise in order to market and sell our products or fail to raise sufficient capital in order to afford to pay such sales or marketing staff, then we could be forced to cease operations and you could lose all of your investment.

Even if we were to successfully develop approvable drugs, we will not be able to sell these drugs if we or our third-party manufacturers fail to comply with manufacturing regulations, which could have a materially adverse effect on our business.

If we were to successfully develop approvable drugs, before we can begin selling these drugs, we must obtain regulatory approval of our manufacturing facility and process or the manufacturing facility and process of the third party or parties with whom we may outsource our manufacturing activities. In addition, the manufacture of our products must comply with the FDA's current Good Manufacturing Practices regulations, commonly known as GMP regulations. The GMP regulations govern quality control and documentation policies and procedures. Our manufacturing facilities, if any in the future, and the manufacturing facilities of our third-party manufacturers will be continually subject to inspection by the FDA and other state, local and foreign regulatory authorities, before and after product approval. We cannot guarantee that we, or any potential third-party manufacturer of our products, will be able to comply with the GMP regulations or other applicable manufacturing regulations. The failure to comply with all necessary regulations would have a materially adverse effect on our business and could force us to cease operations and you could lose all of your investment.

We must comply with significant and complex government regulations, compliance with which may delay or prevent the commercialization of our product candidates, which could have a materially adverse effect on our business.

The R&D, manufacture and marketing of product candidates are subject to regulation, primarily by the FDA in the United States and by comparable authorities in other countries. These national agencies and other federal, state, local and foreign entities regulate, among other things, R&D activities (including testing in animals and in humans) and the testing, manufacturing, handling, labeling, storage, record keeping, approval, advertising and promotion of the product that we are developing. Noncompliance with applicable requirements can result in various adverse consequences, including approval delays or refusals to approve drug licenses or other applications, suspension or termination of clinical investigations, revocation of approvals previously granted, fines, criminal prosecution, recalls or seizures of products, injunctions against shipping drugs and total or partial suspension of production and/or refusal to allow a company to enter into governmental supply contracts.

The process of obtaining FDA approval has historically been costly and time consuming. Current FDA requirements for a new human drug or biological product to be marketed in the United States include: (a) the successful conclusion of pre-clinical laboratory and animal tests, if appropriate, to gain preliminary information on the product's safety; (b) filing with the FDA of an IND application to conduct human clinical trials for drugs or biologics; (c) the successful completion of adequate and well-controlled human clinical investigations to establish the safety and efficacy of the product for its recommended use; and (d) filing by a company and acceptance and approval by the FDA of a NDA for a drug product or a biological license application (BLA) for a biological product to allow commercial distribution of the drug or biologic. A delay in one or more of the procedural steps outlined above could be harmful to us in terms of getting our product candidates through clinical testing and to market, which could have a materially adverse effect on our business.

The FDA reviews the results of the clinical trials and may order the temporary or permanent discontinuation of clinical trials at any time if it believes the product candidate exposes clinical subjects to an unacceptable health risk. Investigational drugs used in clinical studies must be produced in compliance with cGMP rules pursuant to FDA regulations.

Sales outside the United States of products that we develop will also be subject to regulatory requirements governing human clinical trials and marketing for drugs and biological products and devices. The requirements vary widely from country to country, but typically the registration and approval process takes several years and requires significant resources.

If we experience delays or discontinuations of our clinical trials by the FDA or comparable authorities in other countries, or if we fail to obtain registration or other approvals of our products or devices then we could be forced to cease our operations and you will lose all of your investment.

Even if we are successful in developing BIV201, our product candidate, we have limited experience in conducting or supervising clinical trials that must be performed to obtain data to submit in concert with applications for approval by the FDA. The regulatory process to obtain approval for drugs for commercial sale involves numerous steps. Drugs are subjected to clinical trials that allow development of case studies to examine safety, efficacy, and other issues to ensure that sale of drugs meets the requirements set forth by various governmental agencies, including the FDA. In the event that our protocols do not meet standards set forth by the FDA, or that our data is not sufficient to allow such trials to validate our drugs in the face of such examination, we might not be able to meet the requirements that allow our drugs to be approved for sale which could have a materially adverse effect on our business.

We can provide no assurance that our product candidate will obtain regulatory approval or that the results of clinical studies will be favorable.

The business plan we have developed for the next twenty-four months is to complete the Phase 2 clinical development program for our lead new product candidate BIV201, commence a pivotal Phase 3 trial required for new drug approval, and to pursue other key milestones such as additional patent issuances. Due to our financial constraints, we may not have the resources necessary to complete our application. In light of the recent FDA guidance, we plan to commence Phase 2 and potentially Phase 3 clinical trials upon receipt of the net proceeds of this offering. There is no guarantee the FDA will approve a Phase 3 trial, and even if they do our financial constraints may prevent us from undertaking clinical trials.

Confidentiality agreements with employees and others may not adequately prevent disclosure of trade secrets and other proprietary information and disclosure of our trade secrets or proprietary information could compromise any competitive advantage that we have, which could have a materially adverse effect on our business.

Our success depends, in part, on our ability to protect our proprietary rights to the technologies used in our products. We depend heavily upon confidentiality agreements with our officers, employees, consultants and subcontractors to maintain the proprietary nature of our technology. These measures may not afford us complete or even sufficient protection, and may not afford an adequate remedy in the event of an unauthorized disclosure of confidential information. If we fail to protect and/or maintain our intellectual property, third parties may be able to compete more effectively against us, we may lose our technological or competitive advantage, and/or we may incur substantial litigation costs in our attempts to recover or restrict use of our intellectual property. In addition, others may independently develop technology similar to ours, otherwise avoiding the confidentiality agreements, or produce patents that would materially and adversely affect our business, prospects, financial condition and results of operations, in which event you could lose all of your investment.

We may be unable to obtain or protect intellectual property rights relating to our products, and we may be liable for infringing upon the intellectual property rights of others, which could have a materially adverse effect on our business.

Our ability to compete effectively will depend on our ability to maintain the proprietary nature of our technologies. We cannot assure investors that we will continue to innovate and file new patent applications, or that if filed any future patent applications will result in granted patents with respect to the technology owned by us or licensed to us. Further, we cannot predict how long it will take for such patents to issue, if at all. The patent position of pharmaceutical or biotechnology companies, including ours, is generally uncertain and involves complex legal and factual considerations and, therefore, validity and enforceability cannot be predicted with certainty. Patents may be challenged, deemed unenforceable, invalidated or circumvented. For example, on November 13, 2019, the Patent Trial and Appeal Board of the United States Patent and Trademark Office (the "PTAB") issued a written decision in the *inter partes* review action that was brought by Mallinckrodt Pharmaceuticals Ireland Limited ("Mallinckrodt") against us. In that action, Mallinckrodt sought to invalidate our previously-issued patent (U.S. Pat. No. 9,655,945, "Treatment of Ascites") (the "'945 Patent"). In its decision, the PTAB determined that all claims of the '945 Patent were not patentable because they were either anticipated or obvious in light of prior art. The PTAB also denied our Motion to Amend the claims on similar grounds. The result of the PTAB's decision is that the '945 patent is no longer valid or enforceable.

In April 2020, we filed an election to restrict the claims of the Angeli et al. '945 patent application (a "continuation-in-part" filing) to those that we believe are defensible in light of the IPR challenge. BioVie has also filed a US Provisional patent application and a PCT ("Patent Cooperation Treaty") application in Europe covering our novel liquid formulations of terlipressin. We intend to seek global patent protection for one or more of these new product candidates. We will be able to protect our proprietary rights from unauthorized use by third parties only to the extent that our proprietary technologies, product candidates and any future products are covered by valid and enforceable patents or are effectively maintained as trade secrets.

Any patents we do obtain may be challenged by re-examination or otherwise invalidated or eventually found unenforceable. Both the patent application process and the process of managing patent disputes can be time consuming and expensive. If we were to initiate legal proceedings against a third party to enforce a patent related to one of our products or services, the defendant in such litigation could counterclaim that our patent is invalid and/or unenforceable. In patent litigation in the U.S., defendant counterclaims alleging invalidity and/or unenforceability are commonplace, as are validity challenges by the defendant against the subject patent or other patents before the USPTO. Grounds for a validity challenge could be an alleged failure to meet any of several statutory requirements, including lack of novelty, obviousness or non-enablement, failure to meet the written description requirement, indefiniteness, and/or failure to claim patent eligible subject matter. Grounds for an unenforceability assertion could be an allegation that someone connected with prosecution of the patent intentionally withheld material information from the USPTO, or made a misleading statement, during prosecution. Additional grounds for an unenforceability assertion include an allegation of misuse or anticompetitive use of patent rights, and an allegation of incorrect inventorship with deceptive intent. Third parties may also raise similar claims before the USPTO even outside the context of litigation. The outcome is unpredictable following legal assertions of invalidity and unenforceability. With respect to the validity question, for example, we cannot be certain that no invalidating prior art existed of which we and the patent examiner were unaware during prosecution. These assertions may also be based on information known to us or the Patent Office. If a defendant or third party were to prevail on a legal assertion of invalidity and/or unenforceability, we would lose at least part, and perhaps all, of the claims of the challenged patent. Such a loss of patent protection would or could have a material adverse impact on our business.

The standards that the United States Patent and Trademark Office (and foreign countries) use to grant patents are not always applied predictably or uniformly and can change. There is also no uniform, worldwide policy regarding the subject matter and scope of claims granted or allowable in pharmaceutical or biotechnology patents. Accordingly, we do not know the degree of future protection for our proprietary rights or the breadth of claims that will be allowed in any patents issued to us or to others.

Further, we rely on a combination of trade secrets, know-how, technology and nondisclosure, and other contractual agreements and technical measures to protect our rights in the technology. If any trade secret, know-how or other technology not protected by a patent were to be disclosed to or independently developed by a competitor, our business and financial condition could be materially adversely affected. The laws of some foreign countries do not protect our proprietary rights to the same extent as the laws of the U.S., and we may encounter significant problems in protecting our proprietary rights in these countries.

We do not believe that BIV201, the product candidate we are currently developing, infringes upon the rights of any third parties nor are they infringed upon by third parties. However, there can be no assurance that our technology will not be found in the future to infringe upon the rights of others or be infringed upon by others. Moreover, patent applications are in some cases maintained in secrecy until patents are issued. The publication of discoveries in the scientific or patent literature frequently occurs substantially later than the date on which the underlying discoveries were made and patent applications were filed. Because patents can take many years to issue, there may be currently pending applications of which we are unaware that may later result in issued patents that our products or product candidates infringe. For example, pending applications may exist that provide support or can be amended to provide support for a claim that results in an issued patent that our product infringes. In such a case, others may assert infringement claims against us, and should we be found to infringe upon their patents, or otherwise impermissibly utilize their intellectual property, we might be forced to pay damages, potentially including treble damages, if we are found to have willfully infringed on such parties' patent rights. In addition to any damages we might have to pay, we may be required to obtain licenses from the holders of this intellectual property. We may fail to obtain any of these licenses or intellectual property rights on commercially reasonable terms. Even if we are able to obtain a license, it may be non-exclusive, thereby giving our competitors access to the same technologies licensed to us. In that event, we may be required to expend significant time and resources to develop or license replacement technology. If we are unable to do so, we may be unable to develop or commercialize the affected products, which could materially harm our business and the third parties owning such intellectual property rights could seek either an injunction prohibiting our sales, or, with respect to our sales, an obligation on our part to pay royalties and/or other forms of compensation. Conversely, we may not always be able to successfully pursue our claims against others that infringe upon our technology. Thus, the proprietary nature of our technology or technology licensed by us may not provide adequate protection against competitors.

The pharmaceutical industry is characterized by extensive litigation regarding patents and other intellectual property rights. Moreover, the cost to us of any litigation or other proceeding relating to our patents and other intellectual property rights, even if resolved in our favor, could be substantial, and the litigation would divert our management's efforts. We may not have sufficient resources to bring any such action to a successful conclusion. Uncertainties resulting from the initiation and continuation of any litigation could limit our ability to continue our operations and you could lose all of your investment.

We depend upon our management and their loss or unavailability could put us at a competitive disadvantage which could have a material adverse effect on our business.

We currently depend upon the efforts and abilities of our executive management team of Terren Peizer, our Chief Executive Officer, Jonathan Adams, our President and Chief Operating Officer, and Wendy Kim, our Chief Financial Officer and Corporate Secretary. Mr. Adams serves the Company full-time and Ms. Kim serves the Company part-time. The loss or unavailability of the services of either of these individuals for any significant period of time could have a material adverse effect on our business, prospects, financial condition and results of operations which may cause you to lose all of your investment. We have not obtained, do not own, nor are we the beneficiary of key-person life insurance.

We may not be able to attract and retain highly skilled personnel, which could have a materially adverse effect on our business.

Our ability to attract and retain highly skilled personnel is critical to our operations and expansion. We face competition for these types of personnel from other pharmaceutical companies and more established organizations, many of which have significantly larger operations and greater financial, technical, human and other resources than us. We may not be successful in attracting and retaining qualified personnel on a timely basis, on competitive terms, or at all. If we are not successful in attracting and retaining these personnel, our business, prospects, financial condition and results of operations will be materially and adversely affected.

The biotechnology and biopharmaceutical industries are characterized by rapid technological developments and a high degree of competition. We may be unable to compete with enterprises equipped with more substantial resources than us, which could cause us to curtail or cease operations.

The biotechnology and biopharmaceutical industries are characterized by rapid technological developments and a high degree of competition based primarily on scientific and technological factors. These factors include the availability of patent and other protection for technology and products, the ability to commercialize technological developments and the ability to obtain government approval for testing, manufacturing and marketing.

We compete with biopharmaceutical firms in the United States, Europe and elsewhere, as well as a growing number of large pharmaceutical companies that are applying biotechnology to their operations. Many biopharmaceutical companies have focused their development efforts in the human therapeutics area. Many major pharmaceutical companies have developed or acquired internal biotechnology capabilities or made commercial arrangements with other biopharmaceutical companies. These companies, as well as academic institutions, government agencies and private research organizations, also compete with us in recruiting and retaining highly qualified scientific personnel and consultants. Our ability to compete successfully with other companies in the pharmaceutical field will also depend to a considerable degree on the continuing availability of capital to us.

Although there are not currently any therapies approved by the FDA specifically for the treatment of ascites due to liver cirrhosis, we still face significant competitive and market risk. Other companies, such as Mallinckrodt Inc., are developing therapies for severe complications of advanced liver cirrhosis, which may in the future be developed for the treatment of ascites, and these therapies could compete indirectly or directly with our product candidate. There may be other competitive development programs of which we are unaware. Even if our product candidate is ultimately approved by the FDA, there is no guarantee that once it is on the market doctors will adopt it in favor of current ascites treatment procedures such as diuretics and paracentesis. These competitive and market risks could have a material adverse effect on our business, prospects, financial condition and results of operations which may cause you to lose all of your investment.

Our competition will be determined in part by the potential indications for which drugs are developed and ultimately approved by regulatory authorities. Additionally, the timing of the market introduction of some of our potential product candidate or of competitors' products may be an important competitive factor. Accordingly, the relative speed with which we can develop drugs, complete pre-clinical testing, clinical trials, approval processes and supply commercial quantities to market are important competitive factors. We expect that competition among drugs approved for sale will be based on various factors, including product efficacy, safety, reliability, availability, price and patent protection.

The successful development of biopharmaceuticals is highly uncertain. A variety of factors including, pre-clinical study results or regulatory approvals, could cause us to abandon the development of our product candidates.

Successful development of biopharmaceuticals is highly uncertain and is dependent on numerous factors, many of which are beyond our control.

Products that appear promising in the early phases of development may fail to reach the market for several reasons. Pre-clinical study results may show the product to be less effective than desired (e.g., the study failed to meet its primary objectives) or to have harmful or problematic side effects. Products may fail to receive the necessary regulatory approvals or may be delayed in receiving such approvals. Among other things, such delays may be caused by slow enrollment in clinical studies, length of time to achieve study endpoints, additional time requirements for data analysis or a IND and later NDA, preparation, discussions with the FDA, an FDA request for additional pre-clinical or clinical data or unexpected safety or manufacturing issues; manufacturing costs, pricing or reimbursement issues, or other factors that make the product not economical. Proprietary rights of others and their competing products and technologies may also prevent the product from being commercialized.

Success in pre-clinical and early clinical studies does not ensure that large-scale clinical studies will be successful. Clinical results are frequently susceptible to varying interpretations that may delay, limit or prevent regulatory approvals. The length of time necessary to complete clinical studies and to submit an application for marketing approval for a final decision by a regulatory authority varies significantly from one product to the next, and may be difficult to predict. There can be no assurance that any of our products will develop successfully, and the failure to develop our products will have a materially adverse effect on our business and will cause you to lose all of your investment.

There may be conflicts of interest among our officers, directors and stockholders.

Certain of our executive officers and directors and their affiliates are engaged in other activities and have interests in other entities on their own behalf or on behalf of other persons. Neither we nor any of our shareholders will have any rights in these ventures or their income or profits. In particular, our executive officers or directors or their affiliates may have an economic interest in or other business relationship with partner companies that invest in us or are engaged in competing drug development. Our executive officers or directors may have conflicting fiduciary duties to us and third parties. The terms of transactions with third parties may not be subject to arm's length negotiations and therefore may be on terms less favorable to us than those that could be procured through arm's length negotiations. Although we have established an audit committee comprised solely of independent directors to oversee transactions between us and our insiders, we do not have any formal policies in place to deal with such conflicting fiduciary duties should such a conflict arise.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or detect fraud. Consequently, investors could lose confidence in our financial reporting and this may decrease the trading price of our common stock.

We must maintain effective internal controls to provide reliable financial reports and detect fraud. We have concluded that our disclosure controls and procedures internal controls, as well as internal controls over financial reporting, are effective. Failure to implement changes to our internal controls or any others that we identify as necessary to establish an effective system of internal controls could harm our operating results and cause investors to lose confidence in our reported financial information. Any such loss of confidence would have a negative effect on the trading price of our common stock.

We may enter into employment agreements with our executive officers and compensation payable thereunder may not be based on arms-length negotiations.

Certain of our current executive officers also serve as directors of our Board of Directors, and we have not yet formed an independent compensation committee to determine compensation and to approve employment agreements. Therefore, compensation which may be paid by us to our management under current arrangements may not have been determined based on arms-length negotiations. We may grant stock options and other equity incentives to our executive officers and directors that are consistent with the nature of the pharmaceutical industry. Although we have established a compensation committee in connection with this offering comprised of only independent directors, there can be no assurance made that the consideration which may be payable to management will reflect the true market value of services provided to us.

RISKS RELATING TO OUR COMMON STOCK

There is a risk of dilution of your percentage ownership of common stock in the Company.

We have the right to raise additional capital or incur borrowings from third parties to finance its business. We may also implement public or private mergers, business combinations, business acquisitions and similar transactions pursuant to which it would issue substantial additional capital stock to outside parties, causing substantial dilution in the ownership of the Company by our existing stockholders. Our Board of Directors has the authority, without the consent of any of the stockholders, to cause us to issue more shares of common stock and/or preferred stock at such price and on such terms and conditions as are determined by the Board of Directors in its sole discretion. As of September 15, 2020, there were warrants outstanding to purchase an aggregate of 124,667 shares of common stock at exercise prices ranging from \$1.88 to \$75.00 per share, excluding the Bridge Financing Warrants that will be exercised automatically upon the closing of this offering at an exercise price equal to the par value of the common stock. The issuance of additional shares of capital stock by us will dilute your ownership percentage in the Company and could impair our ability to raise capital in the future through the sale of equity securities.

Certain stockholders who are also officers and directors of the Company may have significant control over our management.

Our directors and executive officers currently own an aggregate 4,477,488 shares of our common stock, which currently constitutes 86% of our issued and outstanding common stock. As a result, directors and executive officers may have a significant influence on our affairs and management, as well as on all matters requiring member approval, including electing and removing members of our Board of Directors, causing us to engage in transactions with affiliated entities, causing or restricting our sale or merger, and certain other matters. Our Chairman and Chief Executive Officer, Mr. Terren Peizer, may be deemed to beneficially own the shares held by Acuitas. Such concentration of ownership and control could have the effect of delaying, deferring or preventing a change in control of us even when such a change of control would be in the best interests of our stockholders.

There is not now, and there may never be, an active, liquid and orderly trading market for our common stock, which may make it difficult for you to sell your shares of our common stock.

There is not now, nor has there been since our inception, any significant volume of trading activity in our common stock or an active market for shares of our common stock. An active trading market for our securities may never develop or be sustained after this offering. As a result, investors in our common stock must bear the economic risk of holding those securities for an indefinite period of time. Although our common stock is quoted on the OTCQB Marketplace, or OTCQB, over-the-counter quotation system, trading of our common stock on such system has only recently commenced and continues to be extremely limited and sporadic and at very low volumes. Although our common stock has been approved for listing on Nasdaq, an active trading market for our securities may never develop or be sustained. If an active market for our securities does not develop, it may be difficult for you to sell the securities you purchase in this offering without depressing the market price for such securities or at all. Further, an unestablished trading market for our securities may also impair our ability to raise capital by selling additional equity in the future, and may impair our ability to enter into strategic partnerships or acquire companies or products by using shares of our common stock as consideration.

We may, in the future, issue additional common stock, which would reduce investors' percent of ownership and may dilute our share value.

As of September 15, 2020, our Articles of Incorporation authorize the issuance of 800,000,000 shares of common stock. As of September 15, 2020 we had 5,206,602 shares of common stock outstanding. Accordingly, we may issue up to an additional 793,158,282 shares of common stock. The future issuance of common stock may result in substantial dilution in the percentage of our common stock held by our then existing shareholders. We may value any common stock in the future on an arbitrary basis. The issuance of common stock for future services or acquisitions or other corporate actions may have the effect of diluting the value of the shares held by our investors, might have an adverse effect on any trading market for our common stock and could impair our ability to raise capital in the future through the sale of equity securities.

We have a large number of restricted shares outstanding, a portion of which may be sold under Rule 144 which may reduce the market price of our shares.

Of the 5,206,602 shares of common stock issued and outstanding as of September 15, 2020, 729,114 shares are held by non-affiliates and 4,477,488 are owned by affiliates of the Company, consisting of our officers and directors or entities controlled by them. The majority of our common stock, including all of the affiliates' securities are deemed "restricted securities" within the meaning of Rule 144 as promulgated under the Securities Act.

It is anticipated that all of the “restricted securities” will be eligible for resale under Rule 144. In general, under Rule 144, subject to the satisfaction of certain other conditions, a person, who is not an affiliate (and who has not been an affiliate for a period of at least three months immediately preceding the sale) and who has beneficially owned restricted shares of our common stock for at least six months is permitted to sell such shares without restriction, provided that there is sufficient public information about us as contemplated by Rule 144. An affiliate who has beneficially owned restricted shares of our common stock for a period of at least one year may sell a number of shares equal to one percent of our issued and outstanding common stock approximately every three months.

The respective holding periods for certain shares issued to affiliates and non-affiliates holding restricted securities commenced and were issued between May 17, 2013 and June 30, 2013. The possibility that substantial amounts of our common stock may be sold under Rule 144 into the public market may adversely affect prevailing market prices for the common stock and could impair our ability to raise capital in the future through the sale of equity securities.

Any failure to maintain effective internal control over financial reporting could harm us.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”). Under standards established by the Public Company Accounting Oversight Board (“PCAOB”), a deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or personnel, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. The PCAOB defines a material weakness as a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of annual or interim financial statements will not be prevented, or detected and corrected, on a timely basis.

If we are unable to assert that our internal control over financial reporting is effective, or when required in the future, if our independent registered public accounting firm is unable to express an unqualified opinion as to the effectiveness of our internal control over financial reporting, investors may lose confidence in the accuracy and completeness of our financial reports, the market price of our common stock could be adversely affected and we could become subject to litigation or investigations by the stock exchange on which our securities are listed, the SEC or other regulatory authorities, which could require additional financial and management resources.

The lack of public company experience of our management team could adversely impact our ability to comply with the reporting requirements of U.S. securities laws, which could have a materially adverse effect on our business.

Our officers have limited public company experience, which could impair our ability to comply with legal and regulatory requirements such as those imposed by Sarbanes-Oxley Act of 2002. Such responsibilities include complying with federal securities laws and making required disclosures on a timely basis. Any such deficiencies, weaknesses or lack of compliance could have a materially adverse effect on our ability to comply with the reporting requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which is necessary to maintain our public company status. If we were to fail to fulfill those obligations, our ability to continue as a U.S. public company would be in jeopardy in which event you could lose your entire investment in our Company.

We are considered a smaller reporting company and is exempt from certain disclosure requirements, which could make our stock less attractive to potential investors.

Rule 12b-2 of the Exchange Act defines a “smaller reporting company” as an issuer that is not an investment company, an asset-backed issuer, or a majority-owned subsidiary of a parent that is not a smaller reporting company and that:

- Had a public float of less than \$250 million as of the last business day of its most recently completed fiscal quarter, computed by multiplying the aggregate number of worldwide number of shares of its voting and non-voting common equity held by non-affiliates by the price at which the common equity was last sold, or the average of the bid and asked prices of common equity, in the principle market for the common equity; or
- In the case of an initial registration statement under the Securities Act or the Exchange Act for shares of its common equity, had a public float of less than \$250 million as of a date within 30 days of the date of the filing of the registration statement, computed by multiplying the aggregate worldwide number of such shares held by non-affiliates before the registration plus, in the case of a Securities Act registration statement, the number of such shares included in the registration statement by the estimated public offering price of the shares; or

- In the case of an issuer who had annual revenue of less than \$100 million during the most recently completed fiscal year for which audit financial statements are available, had a public float as calculated under paragraph (1) or (2) of this definition that was either zero or less than \$700 million.

As a “smaller reporting company” we are not required and may not include a Compensation Discussion and Analysis (“CD&A”) section in our proxy statements; we provide only 3 years of business development information; provide fewer years of selected data; and have other “scaled” disclosure requirements that are less comprehensive than issuers that are not “smaller reporting companies” which could make our stock less attractive to potential investors, which could make it more difficult for you to sell your shares.

We have not held regular annual meetings of stockholders in the past, and if we are required by the Nevada District Court to hold an annual meeting pursuant to Nevada Revised Statutes §78.345(1), it could result in the unanticipated expenditure of funds, time and other Company resources.

Section 1 of Article II of our bylaws provides that an annual meeting of stockholders shall be held each year on a date and at a time designated by our Board of Directors. Section 78.345(1) of the Nevada Revised Statutes provides that if there is a failure to hold the annual meeting for a period of 18 months after the last election of directors, stockholders owning at least 15% of the voting power of the outstanding common stock may apply to the Nevada district court to order the election of directors.

We have not held regular annual meetings of stockholders in the past because a substantial majority of our stock is owned by a small number of stockholders, making it easy to obtain written consent in lieu of a meeting when necessary. In light of our historical liquidity constraints, handling matters by written consent has allowed us to save on financial and administrative resources required to prepare for and hold such annual meetings. Additionally, our common stock and warrants have been approved for listing on Nasdaq upon the completion of this offering. Pursuant to Nasdaq’s corporate governance requirements, we will be obligated to hold regular annual meetings of stockholders in the future, and it is currently contemplated that we will hold such meetings beginning in 2021.

To our knowledge, no stockholder or director has requested our management to hold such an annual meeting and no stockholder or director has applied to the Nevada district court seeking an order directing us to hold a meeting of stockholders. However, if one or more stockholders or directors were to apply to the Nevada district court seeking such an order, and if the Nevada district court were to order an annual meeting before we were prepared to hold one, the preparation for the annual meeting of stockholders and the meeting itself could result in the unanticipated expenditure of funds, time, and other Company resources.

We are subject to the periodic reporting requirements of the Exchange Act, which require us to incur audit fees and legal fees in connection with the preparation of such reports. These additional costs will negatively affect our ability to earn a profit.

We are required to file periodic reports with the SEC pursuant to the Exchange Act and the rules and regulations thereunder. In order to comply with such requirements, our independent registered auditors have to review our financial statements on a quarterly basis and audit our financial statements on an annual basis. Moreover, our legal counsel has to review and assist in the preparation of such reports. Factors such as the number and type of transactions that we engage in and the complexity of our reports cannot accurately be determined at this time and may have a major negative effect on the cost and amount of time to be spent by our auditors and attorneys. However, the incurrence of such costs is an expense to our operations and thus has a negative effect on our ability to meet our overhead requirements and earn a profit.

Because we do not intend to pay any cash dividends on our common stock, our stockholders will not be able to receive a return on their shares unless they sell them.

We intend to retain any future earnings to finance the development and expansion of our business. We do not anticipate paying any cash dividends on our common stock in the foreseeable future. Unless we pay dividends, our stockholders will not be able to receive a return on their shares unless they sell them. There is no assurance that stockholders will be able to sell shares when desired.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains “forward-looking statements” within the meaning of the federal securities laws, and that involve significant risks and uncertainties. We intend the forward-looking statements to be covered by the safe harbor for forward-looking statements in these sections. Words such as “may,” “should,” “could,” “would,” “predicts,” “potential,” “continue,” “expects,” “anticipates,” “future,” “intends,” “plans,” “believes,” “estimates,” and similar expressions, as well as statements in future tense, identify forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results and may not be accurate indications of when such performance or results will be achieved. Forward-looking statements are based on information we have when those statements are made or management’s good faith belief as of that time with respect to future events, and are subject to significant risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

- our limited operating history and experience in developing and manufacturing drugs;
- none of our products are approved for commercial sale;
- our substantial capital needs;
- product development risks;
- we do not have sales and marketing personnel;
- regulatory, competitive and contractual risks;
- risks related to our intellectual property rights;
- the absence of liquidity in our common stock;
- the risk of substantial dilution from future issuances of our equity securities; and
- the other risks set forth herein under the caption “Risk Factors.”

The foregoing does not represent an exhaustive list of matters that may be covered by the forward-looking statements contained herein or risk factors that we are faced with. Forward-looking statements necessarily involve risks and uncertainties, and our actual results could differ materially from those anticipated in the forward-looking statements due to a number of factors, including those set forth above under “Risk Factors” and elsewhere in this prospectus. The factors set forth above under “Risk Factors” and other cautionary statements made in this prospectus should be read and understood as being applicable to all related forward-looking statements wherever they appear in this prospectus. The forward-looking statements contained in this prospectus represent our judgment as of the date of this prospectus. We caution readers not to place undue reliance on such statements. Except as required by law, we undertake no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements contained above and throughout this prospectus.

USE OF PROCEEDS

We estimate that the net net proceeds from the sale of the securities we are offering will be approximately \$13.4 million. If the underwriters fully exercise the over-allotment option, the net proceeds of the securities we sell will be approximately \$15.6 million. "Net proceeds" is what we expect to receive after deducting the underwriting discount and commission and estimated offering expenses payable by us.

We intend to use the net proceeds of this offering primarily to fund clinical trials of BIV201 and for working capital and other general corporate purposes, including the mandatory repayment of all accrued principal and interest under the Debenture upon the closing of this offering, estimated to be approximately \$1.8 million. The amounts that we actually spend for any specific purpose may vary significantly, and will depend on a number of factors including, but not limited to, the pace of progress of our research and development, market conditions, and our ability to qualify vendors. In addition, we may use a portion of any net proceeds to acquire complementary compounds; however, we do not have plans for any acquisitions at this time. We will have significant discretion in the use of any net proceeds. Investors will be relying on the judgment of our management regarding the application of the proceeds of any sale of the units.

DIVIDEND POLICY

We have never declared or paid any cash dividends on our common stock and we do not anticipate paying any cash dividends in the foreseeable future. The payment of dividends, if any, in the future is within the discretion of our Board of Directors and will depend on our earnings, capital requirements and financial condition and other relevant facts. We currently intend to retain all future earnings, if any, to finance the development and growth of our business.

CAPITALIZATION

The following table sets forth our cash and capitalization as of June 30, 2020:

- on an actual basis;
- on a pro-forma basis to give effect to the following transactions with our controlling stockholder Acuitas: (i) the automatic exercise of the Bridge Financing Warrants upon the closing of this offering and (ii) the issuance of an aggregate of 5,359,832 shares of common stock upon the closing of this offering pursuant to a committed exercise by Acuitas of its purchase option granted in connection with its initial investment in the Company; and
- on a pro forma as adjusted basis to give effect to the pro-forma adjustment above, as well as the sale of securities in this offering, at the initial public offering price of \$10.00 per share, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us, and the application of a portion of such net proceeds to satisfy all amounts due with respect to the Debenture as of the closing date of this offering.

You should read the information in this table together with our financial statements and accompanying notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing elsewhere in this prospectus.

	As of June 30, 2020		
	Actual	Pro Forma	Pro Forma As Adjusted
Cash	\$ 37,195	\$ 37,195	\$ 12,176,309
Stockholders' (deficit) equity			
Common stock, \$0.0001 par value per share, 800,000,000 shares authorized; 5,204,392, and 12,019,684 and 13,584,884 shares issued and outstanding actual, pro forma and pro forma as adjusted, respectively	520	1,201	1,358
Additional paid in capital	19,538,742	19,538,061	54,400,730
Accumulated deficit	<u>(41,037,898)</u>	<u>(41,037,898)</u>	<u>(41,500,762)</u>
Total stockholders' (deficit) equity	<u>\$ (21,498,636)</u>	<u>(21,498,636)</u>	<u>\$ 12,901,325</u>

DILUTION

If you purchase securities in this offering, your interest will be diluted immediately to the extent of the difference between the public offering price of \$10.00 per share and the pro forma as adjusted net tangible book value per share of our common stock immediately upon the consummation of this offering.

The pro forma net tangible book deficit of our common stock as of June 30, 2020 was \$(846,226), or \$(0.07) per share. Pro forma net tangible book deficit per share of our common stock represents our total tangible assets (total assets less intangible assets) less total liabilities divided by the number of shares of common stock outstanding as of that date, after giving pro-forma effect to the automatic exercise of the Bridge Financing Warrants and the committed exercise of Acuitas' purchase option upon the closing of this offering.

Net tangible book value dilution per share to new investors represents the difference between the amount per share paid by purchasers in this offering and the pro forma as adjusted net tangible book value per share of common stock immediately after completion of this offering. After giving effect to our sale of 1,565,200 shares of common stock in this offering at the public offering price of \$10.00 per share, and after deducting underwriters' commissions and estimated offering expenses, our pro forma as adjusted net tangible book value as of June 30, 2020 would have been \$11.2 million, or \$0.83 per share. This represents an immediate increase in net tangible book value of \$0.90 per share to existing stockholders and an immediate dilution in net tangible book value of \$9.17 per share to purchasers of securities in this offering, as illustrated in the following table:

Public offering price per share		\$ 10.00
Pro forma net tangible book deficit per share as of June 30, 2020	\$ (0.07)	
Increase in net tangible book value per share attributable to new investors	\$12,076,614	
Pro forma adjusted net tangible book value per share as of June 30, 2020, after giving effect to the offering	\$11,230,388	
Dilution per share to new investors in the offering		\$ 9.17

If the underwriters exercise their option in full to purchase 234,780 additional shares of common stock in this offering at the assumed offering price of \$10.00 per unit, the pro forma net tangible book value per share after this offering would be \$0.99 per share, the increase in the pro forma net tangible book value per share to existing stockholders would be \$0.90 per share and the dilution to new investors purchasing securities in this offering would be \$9.17 per share.

The pro forma number of shares of common stock to be outstanding after this offering is based on 5,204,392 shares of common stock outstanding as of June 30, 2020 and giving pro-forma effect to the automatic exercise of the Bridge Financing Warrants and the issuance of an aggregate of 5,359,832 shares of common stock pursuant to the committed exercise of Acuitas' purchase option upon the closing of this offering, which does not include:

- 57,200 shares of common stock issuable upon the exercise of outstanding stock options as of September 15, 2020, at a weighted average exercise price of \$11.41 per share; and
- 124,667 shares of common stock issuable upon the exercise of outstanding and exercisable warrants as of September 15, 2020 (other than the Bridge Financing Warrants), at a weighted average exercise price of \$9.70 per share.

To the extent that outstanding exercisable options or warrants are exercised, you may experience further dilution.

In addition, we may choose to raise additional capital due to market conditions or strategic considerations, even if we believe we have sufficient funds for our current or future operating plans. To the extent that we raise additional capital by issuing equity securities or convertible debt, your ownership will be further diluted.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the Company's financial condition and the results of operations should be read in conjunction with the Financial Statements and Notes thereto appearing elsewhere in this registration statement.

Overview

We are a clinical stage biotechnology company engaged in the discovery, development and commercialization of therapies targeting life-threatening complications of liver cirrhosis. Our initial disease target is ascites, a serious medical condition affecting about 100,000 Americans and many times more worldwide. Our therapeutic product candidate BIV201 is based on a drug that is approved in about 40 countries to treat related complications of liver cirrhosis (part of the same disease pathway as ascites), but not yet available in the US. The active agent in BIV201, terlipressin, is a potent vasoconstrictor which is in use for various medical conditions around the world. The goal is for BIV201 to interrupt the ascites disease pathway, thereby halting the cycle of accelerating fluid generation in ascites patients.

BioVie accomplished the following key milestones in 2019:

- In April, we announced top-line results for the Phase 2a clinical trial of BIV201 in six patients.
- In June, we met with representatives of the U.S. Food & Drug Administration ("FDA") for a Type C Guidance Meeting to plan our next clinical study. We discussed our clinical development program with the FDA and proposed clinical trial endpoints.
- In August, we invented a proprietary novel liquid formulation of terlipressin that is intended to improve convenience for outpatient administration and avoid potential formulation errors when pharmacists reconstitute the powder version.
- In October, we submitted our proposed Phase 2b/3 randomized, controlled clinical trial protocol to the FDA.
- In November, we announced that the first batch of pre-filled syringes containing our novel BIV201 liquid formulation was manufactured and had cleared quality control testing.

BioVie accomplished the following key milestones in 2020:

- In February, we submitted a detailed meeting information package to the FDA supporting our proposed trial design.
- In March, we requested feedback from the FDA's CMC division regarding the novel BIV201 prefilled terlipressin syringe and subsequently submitted a detailed information package.
- In early April, we received the FDA's written response to our Type B meeting questions, requiring changes to the clinical trial design. In mid-April we submitted a revised Phase 2 trial design and follow-up questions for clarification.
- In April, we submitted a continuation-in-part amendment to the Angeli et al. '945 patent application to the US Patent & Trademark Office seeking restricted claims covering the use of BIV201 to treat ascites.
- In May, we received CMC division feedback regarding the new BIV201 prefilled terlipressin syringe. We may use it in the upcoming Phase 2 trial subject to conducting certain additional standard analytical testing expected to take approximately two weeks.
- In May, we filed a PCT ("Patent Cooperation Treaty") application for our novel liquid terlipressin formulations as we pursue global patent coverage.
- In June, we announced that room temperature stability of the prefilled syringe had been confirmed at 6 months, with the potential for 12 months or up to two years of stability (yet to be confirmed). Room temperature storage presents a key product differentiation versus terlipressin products in countries where the drug is approved. To the best of the Company's knowledge, all other terlipressin products sold globally must be stored under refrigeration and there is no prefilled syringe format of terlipressin available for treating patients in these countries.
- In June, we also announced further guidance from the FDA regarding clinical trial design in response to the follow-up questions submitted in April. The Company plans to commence a randomized 24-patient Phase 2 study in 2020, to be followed by a larger pivotal Phase 3 clinical trial targeted to begin in 2021. The FDA communicated that pending positive Phase 2 study results, a sufficiently large and well-controlled Phase 3 trial, with supportive data from the Phase 2 (statistical significance not required), could potentially yield the clinical data needed to apply for BIV201 marketing approval.

Results of Operations

Comparison of the Year Ended June 30, 2020 to the Year Ended June 30, 2019

Net loss

The net loss for the year ended June 30, 2020 was approximately \$16.7 million as compared to a net loss of approximately \$2.4 million for the year ended June 30, 2019. The increase in net loss of approximately \$14.3 million was primarily due to change in the fair value of derivative liabilities by \$9.2 million which was primarily driven by the increase in the Company's stock price at June 30, 2020 and increase in interest expense of approximately \$4.8 million related to the embedded conversion derivative liability from warrants associated with the draws on the convertible debenture.

Total operating expenses for the year ended June 30, 2020 of approximately \$2.7 million was comparable to \$2.5 million for year ended June 30, 2019.

Research and Development Expenses

Research and development expenses were approximately \$1.2 million for year ended June 30, 2020 comparable with the prior year's expense of \$1 million for the year ended June 30, 2019, resulting in a net increase of approximately \$142,000. The net increase represents an increase of approximately \$513,000 primarily attributed to readying for the next Phase 2 and Phase 3 clinical phase trials, including preparing the protocols and manufacturing of the prefilled syringe which may be used in the next phase of trials subject to FDA clearance, and development of PRO scales, and investing in the Company's drug supply offset by a decrease in salaries of approximately \$16,000 due to reduction of one employee and decline in trial expenses of approximately \$355,000 from the prior year as the Phase 2a clinical trial completed earlier in the current fiscal year.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were approximately \$1.3 million for the year ended June 30, 2020 and June 30, 2019. The net fluctuations was attributed to a decrease in legal and professional fees of \$367,000 offset by an increase of approximately \$135,000 in insurance premiums for increased coverage, an increase in payroll and benefits of approximately \$56,000 due to the hiring of a half time chief financial officer that joined in October 2018 and increase in other expenses of approximately \$231,000 representing legal and professional fees and other activities related to the Company's capital raise.

Capital Resources and Liquidity

At June 30, 2020 the Company had approximately \$37,000 in cash and continues to focus on obtaining financing and raise capital. On September 24, 2019, the Company entered into a Securities Purchase Agreement with its controlling stockholder regarding bridge financing (the "Bridge Financing") in the form of up to \$2.0 million in convertible debt and warrants, of which \$1.3 million has been drawn and reflected in the amount of \$848,543, net of unearned discount of \$462,864 as Convertible debenture - related party. Amounts borrowed under the Bridge Financing must be repaid with the proceeds of our potential public offering of equity securities referred to below. The availability of additional draws under the Bridge Financing is under further discussion with the controlling stockholder in light of delays in the timing of the potential public offering. As further discussed below, the Company is pursuing various options to raise further financing to continue the testing and development of its product. If the Company is not successful in raising additional funds it may reduce its monthly spend and potentially delay the implementation of the larger scale Phase 2 and Phase 3 clinical trials until sufficient funding is secured.

As of June 30, 2020, the Company had an accumulated deficit of approximately \$41.0 million and as a development stage enterprise, the Company expects substantial losses in future periods. The accompanying interim financial statements were prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company's future operations are dependent on the success of the Company's ongoing development and commercialization effort, as well as continuing to secure additional financing.

We cannot assure you that our drug candidate will be developed, work, or receive regulatory approval; that we will ever earn revenues sufficient to support our operations or that we will ever be profitable. Furthermore, since we have no committed source of sufficient financing, we cannot assure you that we will be able to raise money as and when we need it to continue our operations. If we cannot raise funds as and when we need them, we may be required to severely curtail, or even to cease, our operations.

On November 22, 2019, the Company effected the reverse stock split of 125 common stock for every 1 common stock. All share amounts have been updated to reflect the reverse stock split. The stock split was related to the Company's planned up listing to NASDAQ Stock Market and potential future issuance and sales of our equity securities for ordinary corporate finance and general corporate purposes.

Management intends to attempt to secure additional required funding primarily through additional equity or debt financings. We may also seek to secure required funding through sales or out-licensing of intellectual property assets, seeking partnerships with other pharmaceutical companies or third parties to co-develop and fund research and development efforts, or similar transactions. However, there can be no assurance that we will be able to obtain required funding. If we are unsuccessful in securing funding from any of these sources, we will defer, reduce or eliminate certain planned expenditures in our research protocols. If we do not have sufficient funds to continue operations, we could be required to seek bankruptcy protection or other alternatives that could result in our stockholders losing some or all of their investment in us.

The emergence of widespread health emergencies or pandemics such as coronavirus ("COVID-19"), may lead to continued regional quarantines, business shutdowns, labor shortages, disruptions to supply chains, and overall economic instability, including the duration and spread of the outbreak and restrictions and the impact of COVID-19 on the financial markets and the overall economy, all of which are highly uncertain and cannot be predicted. If the financial markets and/or the overall economy are impacted for an extended period, the Company's ability to raise funds may be materially adversely affected.

These circumstances raise substantial doubt on our ability to continue as a going concern. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or amounts and classification of liabilities that might result from this uncertainty.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect or change on the Company's financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. The term "off-balance sheet arrangement" generally means any transaction, agreement or other contractual arrangement to which an entity unconsolidated with the Company is a party, under which the Company has (i) any obligation arising under a guarantee contract, derivative instrument or variable interest; or (ii) a retained or contingent interest in assets transferred to such entity or similar arrangement that serves as credit, liquidity or market risk support for such assets.

Critical Accounting Policies and Estimates

Accounting for Stock-based Compensation

The Company follows the provision of ASC 718- Stock Compensation, which requires the measurement of compensation expense for all shared – based payment awards made to employees and non-employee director, including employee stock options. Share-based compensation expense is based on the grant date fair value estimated in accordance with the provisions of ASC 718 and is generally recognized as an expense over the requisite service period, net of forfeitures.

Goodwill

Goodwill represents costs in excess of fair values assigned to the underlying net assets of acquired businesses. We test goodwill annually, or when a triggering event occurs between annual impairment tests, to determine if impairment exists and if the use of indefinite life is currently applicable. The Company did not recognize any goodwill impairments for the years ended June 30, 2020 and, 2019, respectively.

Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets to the future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets and would be charged to earnings.

Recent accounting pronouncements

The Company considers the applicability and impact of all Accounting Standard Updates (“ASU’s”). ASU’s not discussed below were assessed and determined to be either not applicable or expected to have minimal impact on our balance sheets or statement of operations.

In June 2018, the FASB issued ASU 2018-07, “Compensation – Stock Compensation (Topic 718): Improvements to Non-employee Share-Based Accounting”. This guidance aligns the accounting for share-based payment transactions with non-employees to accounting for share-based payment transactions with employees. Companies are required to record a cumulative-effect adjustment (net of tax) to retained earnings as of the beginning of the fiscal year of the adoption. Upon transition, non-employee awards are required to be measured at fair value as of the adoption date. This standard will be effective for fiscal years beginning December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The Company’s adoption of this ASU as of July 1, 2019 had no impact on the financial statements.

In August 2018, the FASB issued ASU 2018-13, “Fair value measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement”. The new guidance modifies the disclosure requirements on fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019. Early adoption is permitted. The Company does not expect ASU 2018-13 to have a significant impact to its financial statements and related disclosures.

BUSINESS

We are a clinical-stage company pursuing the discovery, development, and commercialization of innovative drug therapies. We are currently focused on developing and commercializing BIV201 (continuous infusion terlipressin), a novel approach to the treatment of ascites due to chronic liver cirrhosis. BIV201 is based on a drug that is approved in about 40 countries to treat related complications of liver cirrhosis (part of the same disease pathway as ascites), but not yet available in the United States. The active agent in BIV201, terlipressin, is a potent vasoconstrictor and has shown efficacy for reducing portal hypertension in studies around the world. The goal of BIV201 therapy is to interrupt the ascites disease pathway, thereby halting the cycle of accelerating fluid generation in ascites patients.

In 2017, we began administering BIV201 to patients at the McGuire Research Institute Inc. in Richmond, VA. In April 2019, we announced top-line results for our Phase 2a clinical trial of BIV201 (continuous infusion terlipressin) in six patients with refractory ascites due to advanced liver cirrhosis. The following results were observed:

- Continuous infusion of terlipressin via portable infusion pump was maintained for 28 days in three patients with refractory ascites, and all patients remained hemodynamically stable during treatment.
- The steady state plasma concentration data characterized terlipressin pharmacokinetics (PK) within the predicted PK model concentrations.
- Four of the six patients treated with BIV201 experienced an increase in the number of days between paracenteses ranging from 71% to 414% compared to prior to initiating therapy.

In June 2019, we met with representatives of the U.S. Food & Drug Administration ("FDA") for a Type C Guidance Meeting to plan our next clinical study. We discussed our clinical development program with the FDA and proposed safety and efficacy endpoints required for future marketing approval. In September, the FDA granted our Type B meeting request and committed to providing feedback in early 2020 for our proposed clinical trial design. We subsequently submitted a proposed clinical trial protocol to the FDA supported by a detailed meeting information package. In April 2020, we received the FDA's written response to our Type B meeting questions which required changes to our clinical trial design. We then submitted a revised Phase 2 trial design and in June 2020 we announced the receipt of further guidance from the FDA. Based on this guidance, the Company plans to commence a randomized 24-patient Phase 2 study in 2020, to be followed by a larger pivotal Phase 3 clinical trial targeted to begin in 2021. The FDA communicated that pending positive Phase 2 study results, a sufficiently large and well-controlled Phase 3 trial, with supportive data from the Phase 2 (statistical significance not required), could potentially yield the clinical data needed to apply for BIV201 marketing approval. The Phase 2 clinical trial protocol is summarized on www.clinicaltrials.gov, trial identifier NCT04112199.

In August 2019, we invented a proprietary novel liquid formulation of terlipressin that is intended to improve convenience for outpatient administration and avoid potential formulation errors when pharmacists reconstitute the powder version. In November 2019, we announced the completion of quality control testing and released the batch for use in our next clinical trial pending FDA clearance. In March 2020, we submitted a detailed information package to the FDA's CMC division. In May 2020, we received CMC division feedback regarding the new BIV201 prefilled terlipressin syringe. We may use it in the upcoming Phase 2 trial subject to conducting certain additional standard analytical testing. In June 2020, we announced that room temperature stability of the prefilled syringe had been confirmed at 6 months, with the potential for 12 months or up to two years of stability (yet to be confirmed). Room temperature storage presents a key product differentiation versus terlipressin products in countries where the drug is approved. To the best of the Company's knowledge, all other terlipressin products sold globally must be stored under refrigeration and there is no prefilled syringe format of terlipressin available for treating patients in these countries. BioVie has filed a US Provisional patent application and a PCT ("Patent Cooperation Treaty") application in Europe. We intend to seek global patent protection for our novel liquid terlipressin formulations.

BIV201 (continuous infusion terlipressin) has the potential to improve the health of thousands of patients suffering from life-threatening complications of liver cirrhosis due to hepatitis, NASH, and alcoholism. The FDA has granted Fast-Track status and Orphan Drug designation for the most common of these complications, ascites, which represents a significant unmet medical need. Patients with cirrhosis and ascites account for an estimated 116,000 U.S. hospital discharges annually, with frequent early readmissions. Those requiring paracentesis (removal of ascites fluid) experience an average hospital stay lasting 8 days incurring over \$86,000 in medical costs (HCUP Nationwide Readmissions Database 2016). This translates into a total addressable ascites market size for BIV201 therapy exceeding \$650 million based on Company estimates. The FDA has never approved any drug specifically for treating ascites. For patients with refractory ascites the mean one-year survival rate is only 50% (Bureau et al. 2017). BIV201 has also received Orphan Drug designation for hepatorenal syndrome ("HRS"). Patients with refractory ascites often progress to HRS which is the onset of kidney failure and requires emergency hospitalization. About one-half of these patients typically succumb within only 2 to 4 weeks and no drug therapies have been FDA approved specifically to treat HRS.

The BIV201 development program began at LAT Pharma LLC. On April 11, 2016, we acquired LAT Pharma LLC and the rights to its BIV201 development program and currently own all development and marketing rights to the product candidate. We and PharmaIN, LAT Pharma's former partner focused on the development of new modified product candidates in the same therapeutic field but not including BIV201, have agreed to pay royalties equal to less than 1% of future net sales of each company's ascites drug development programs, or if such program is licensed to a third party, less than 5% of each company's net license revenues. On December 24, 2018, we returned our partial ownership rights to the PharmaIN modified terlipressin development program and simultaneously paid the remaining balance due on a related debt. PharmaIN's rights to our program remain unchanged. We have a U.S. continuation-in-part patent application for the use of BIV201 for the treatment of patients diagnosed with ascites due to liver cirrhosis in the outpatient setting using ambulatory pump infusion, and have corresponding patent applications pending in Japan, Europe, China and Hong Kong.

About Ascites and Liver Cirrhosis

About 600,000 Americans and millions worldwide suffer from liver cirrhosis. Cirrhosis is the 11th leading cause of death due to disease in the US, killing nearly 42,000 people each year. The condition results primarily from hepatitis, alcoholism, and fatty liver disease linked to obesity. Ascites is a common complication of advanced liver cirrhosis, involving kidney dysfunction and the accumulation of large amounts of fluid in the abdominal cavity.

The Need for an Ascites Therapy

With no medications approved by the FDA specifically for treating ascites, an estimated 50% of refractory ascites patients die within one year of diagnosis. Certain drugs approved for other uses such as diuretics may provide initial relief, but patients may fail to respond to treatment as ascites worsens. This represents a critical unmet medical need. U.S. treatment costs for patients with liver cirrhosis, and ascites, are estimated at \$5 billion annually.

The Ascites Development Pathway

* RAAS stands for the renin-angiotensin-aldosterone system which regulates fluid balance

Most experts agree that ascites develops through a sequence of events illustrated by the above diagram. High blood pressure in the vein that supplies blood to the liver, called “portal hypertension,” occurs as increasing liver damage (fibrosis) impedes blood flow through the liver. This causes vasodilation and blood pooling in the central or “splanchnic” region of the body and low blood volume in the arteries. The decrease in effective blood volume activates a signaling pathway (“neurohormonal systems”) which tells the kidneys to retain large amounts of salt and water in an effort to increase blood volume. Ultimately the retention of excess sodium and water leads to the formation of ascites as these substances “weep” from the liver and lymph system and collect in the patient’s abdomen.

The BIV201 Mechanism of Action

BIV201 is being developed by BioVie with the goal of alleviating the portal hypertension and correcting splanchnic vasodilation, thereby increasing effective blood volume and reducing the signals to the kidneys to retain excess salt and water. If successful, BIV201 could halt the cycle of accelerating fluid generation in ascites patients and reduce the need for the frequent and painful paracentesis procedures many of these patients currently require.

Future Possible BIV201 Indications

Based on investigative studies around the world of the active agent in BIV201, terlipressin, our new product candidate may have potential future applications in other life-threatening conditions due to liver cirrhosis, such as those listed below. Securing marketing approvals for any of these new uses will require well-controlled clinical trials to satisfy the FDA and/or other countries’ regulatory requirements, none of which have commenced at this time. We may be unable to, or chose not to, pursue the development BIV201 for these indications.

- Bleeding Esophageal Varices (BEV): The bursting of blood vessels lining the esophagus due to high blood pressure (“portal hypertension”) in the vein which supplies blood to the liver resulting as a result of advanced liver cirrhosis. This situation requires emergency treatment to avoid blood loss and death.
- Hepatorenal syndrome (HRS): As their disease progresses liver cirrhosis patients’ kidneys may begin to fail, and this deadly condition may set in. It often occurs once a patient no longer responds to (off-label) drugs used to control ascites. The second stage is called “type 1 HRS” and requires hospitalization as multiple organ failure and death may occur. We obtained Orphan Drug designation for BIV201 in the U.S. for the treatment of HRS on November 21, 2018.

Efflux Pump Antibiotics Program

Prior to the Merger of Lat Pharma LLC and NanoAntibiotics Inc. in April 2016, we were exclusively developing novel nanotechnology anti-infective drugs to combat multi-drug resistant bacteria. We are at an early stage of discovery and development of broad spectrum antibiotics for gram-negative and gram-positive bacterial infections. Developing this technology in-house is resource-intensive with respect to time, personnel and capital necessary for scientific discovery. For further development of our nanoantibiotic technology we will need to find and license additional nanotechnology to complete our planned products. Presently this program is inactive as we are focusing our efforts on BIV201.

Intellectual Property

BioVie relies on a combination of patent, trade secret, other intellectual property laws (such as FDA data exclusivity), nondisclosure agreements, and other measures to protect our proposed products. We require our employees, consultants, and advisors to execute confidentiality agreements and to agree to disclose and assign to us all inventions conceived during the workday, using our property, or which relate to our business. Despite any measures taken to protect our intellectual property, unauthorized parties may attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. We have applied for patent coverage for BIV201 in the treatment of ascites in the US, Japan, Europe, China and Hong Kong. BioVie has also filed a US Provisional patent application and a PCT (“Patent Cooperation Treaty”) application in Europe covering our novel liquid formulations of terlipressin and we intend to seek global patent protection for one or more of these new product candidates. BioVie has secured Orphan Drug designations in the U.S. for the treatment of hepatorenal syndrome (received November 21, 2018) and treatment of ascites due to all etiologies except cancer (received September 8, 2016).

Government Regulation

Government authorities in the United States, at the federal, state and local level, and in other countries extensively regulate, among other things, the research, development, testing, manufacture, quality control, approval, labeling, packaging, storage, record-keeping, promotion, advertising, distribution, post-approval monitoring and reporting, marketing and export and import of products such as those we are developing. Any pharmaceutical candidate that we develop must be approved by the FDA before it may be legally marketed in the United States and by the appropriate foreign regulatory agency before it may be legally marketed in foreign countries.

United States Drug Development Process

In the United States, the FDA regulates drugs under the Federal Food, Drug and Cosmetic Act, or FDCA, and implementing regulations. Drugs are also subject to other federal, state and local statutes and regulations. Biologics are subject to regulation by the FDA under the FDCA, the Public Health Service Act, or the PHSA, and related regulations, and other federal, state and local statutes and regulations. Biological products include, among other things, viruses, therapeutic serums, vaccines and most protein products. The process of obtaining regulatory approvals and the subsequent compliance with appropriate federal, state, local and foreign statutes and regulations require the expenditure of substantial time and financial resources. Failure to comply with the applicable United States requirements at any time during the product development process, approval process or after approval, may subject an applicant to administrative or judicial sanctions. FDA sanctions could include refusal to approve pending applications, withdrawal of an approval, a clinical hold, warning letters, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, refusals of government contracts, restitution, disgorgement or civil or criminal penalties. Any agency or judicial enforcement action could have a material adverse effect on us.

The process required by the FDA before a drug or biological product may be marketed in the United States generally involves the following:

- Completion of preclinical laboratory tests, animal studies and formulation studies according to Good Laboratory Practices or other applicable regulations;
- Submission to the FDA of an Investigational New Drug Application, or an IND, which must become effective before human clinical trials may begin;
- Performance of adequate and well-controlled human clinical trials according to the FDA's current good clinical practices, or GCPs, to establish the safety and efficacy of the proposed drug or biologic for its intended use;
- Submission to the FDA of a New Drug Application, or an NDA, for a new drug product, or a Biologics License Application, or a BLA, for a new biological product;
- Satisfactory completion of an FDA inspection of the manufacturing facility or facilities where the drug or biologic is to be produced to assess compliance with the FDA's current good manufacturing practice standards, or cGMP, to assure that the facilities, methods and controls are adequate to preserve the drug's or biologic's identity, strength, quality and purity;
- Potential FDA audit of the nonclinical and clinical trial sites that generated the data in support of the NDA or BLA; and
- FDA review and approval of the NDA or BLA.

The lengthy process of seeking required approvals and the continuing need for compliance with applicable statutes and regulations require the expenditure of substantial resources. There can be no certainty that approvals will be granted.

Clinical trials involve the administration of the drug or biological candidate to healthy volunteers or patients having the disease being studied under the supervision of qualified investigators, generally physicians not employed by or under the trial sponsor's control. Clinical trials are conducted under protocols detailing, among other things, the objectives of the clinical trial, dosing procedures, subject selection and exclusion criteria, and the parameters to be used to monitor subject safety. Each protocol must be submitted to the FDA as part of the IND. Clinical trials must be conducted in accordance with the FDA's good clinical practices requirements. Further, each clinical trial must be reviewed and approved by an independent institutional review board, or IRB, at or servicing each institution at which the clinical trial will be conducted. An IRB is charged with protecting the welfare and rights of trial participants and considers such items as whether the risks to individuals participating in the clinical trials are minimized and are reasonable in relation to anticipated benefits. The IRB also approves the informed consent form that must be provided to each clinical trial subject or his or her legal representative and must monitor the clinical trial until it is completed.

Human clinical trials prior to approval are typically conducted in three sequential Phases that may overlap or be combined:

- *Phase 1.* The drug or biologic is initially introduced into healthy human subjects and tested for safety, dosage tolerance, absorption, metabolism, distribution and excretion. In the case of some products for severe or life-threatening diseases, especially when the product may be too inherently toxic to ethically administer to healthy volunteers, the initial human testing is often conducted in patients having the specific disease.
- *Phase 2.* The drug or biologic is evaluated in a limited patient population to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the product for specific targeted diseases and to determine dosage tolerance, optimal dosage and dosing schedule for patients having the specific disease.
- *Phase 3.* Clinical trials are undertaken to further evaluate dosage, clinical efficacy and safety in an expanded patient population at geographically dispersed clinical trial sites. These clinical trials, which usually involve more subjects than earlier trials, are intended to establish the overall risk/benefit ratio of the product and provide an adequate basis for product labeling. Generally, at least two adequate and well-controlled Phase 3 clinical trials are required by the FDA for approval of an NDA or BLA.

Post-approval studies, or Phase 4 clinical trials, may be conducted after initial marketing approval. These studies are used to gain additional experience from the treatment of patients in the intended therapeutic indication and may be required by the FDA as part of the approval process.

Progress reports detailing the results of the clinical trials must be submitted at least annually to the FDA and written IND safety reports must be submitted to the FDA by the investigators for serious and unexpected adverse events or any finding from tests in laboratory animals that suggests a significant risk for human subjects. Phase 1, Phase 2 and Phase 3 clinical trials may not be completed successfully within any specified period, if at all. The FDA or the sponsor or its data safety monitoring board may suspend a clinical trial at any time on various grounds, including a finding that the research subjects or patients are being exposed to an unacceptable health risk. Similarly, an IRB can suspend or terminate approval of a clinical trial at its institution if the clinical trial is not being conducted in accordance with the IRB's requirements or if the drug or biologic has been associated with unexpected serious harm to patients.

Concurrent with clinical trials, companies usually complete additional animal studies and develop additional information about the chemistry and physical characteristics of the drug or biologic as well as finalize a process for manufacturing the product in commercial quantities in accordance with cGMP requirements. The manufacturing process must be capable of consistently producing quality batches of the drug or biological candidate and, among other things, must include methods for testing the identity, strength, quality and purity of the final drug or biologic. Additionally, appropriate packaging must be selected and tested and stability studies must be conducted to demonstrate that the drug or biological candidate does not undergo unacceptable deterioration over its shelf life.

U.S. Review and Approval Processes

The results of product development, preclinical studies and clinical trials, along with descriptions of the manufacturing process, analytical tests conducted on the chemistry of the drug or biologic, proposed labeling and other relevant information are submitted to the FDA as part of an NDA or BLA requesting approval to market the product. The submission of an NDA or BLA is subject to the payment of substantial user fees; a waiver of such fees may be obtained under certain limited circumstances.

The FDA reviews all NDAs and BLAs submitted before it accepts them for filing and may request additional information rather than accepting an NDA or BLA for filing. Once the submission is accepted for filing, the FDA begins an in-depth review of the NDA or BLA.

After the NDA or BLA submission is accepted for filing, the FDA reviews the NDA to determine, among other things, whether the proposed product is safe and effective for its intended use, and whether the product is being manufactured in accordance with cGMP to assure and preserve the product's identity, strength, quality and purity. The FDA reviews a BLA to determine, among other things, whether the product is safe, pure and potent and the facility in which it is manufactured, processed, packaged or held meets standards designed to assure the product's continued safety, purity and potency. In addition to its own review, the FDA may refer applications for novel drug or biological products or drug or biological products which present difficult questions of safety or efficacy to an advisory committee, typically a panel that includes clinicians and other experts, for review, evaluation and a recommendation as to whether the application should be approved and under what conditions. The FDA is not bound by the recommendations of an advisory committee, but it considers such recommendations carefully when making decisions. During the approval process, the FDA also will determine whether a risk evaluation and mitigation strategy, or REMS, is necessary to assure the safe use of the drug or biologic. If the FDA concludes that a REMS is needed, the sponsor of the NDA or BLA must submit a proposed REMS; the FDA will not approve the NDA or BLA without a REMS, if required.

Before approving an NDA or BLA, the FDA will inspect the facilities at which the product is to be manufactured. The FDA will not approve the product unless it determines that the manufacturing processes and facilities are in compliance with cGMP requirements and adequate to assure consistent production of the product within required specifications. Additionally, before approving an NDA or BLA, the FDA will typically inspect one or more clinical sites to assure compliance with cGMP. If the FDA determines the application, manufacturing process or manufacturing facilities are not acceptable it will outline the deficiencies in the submission and often will request additional testing or information.

The NDA or BLA review and approval process is lengthy and difficult and the FDA may refuse to approve an NDA or BLA if the applicable regulatory criteria are not satisfied or may require additional clinical data or other data and information. Even if such data and information is submitted, the FDA may ultimately decide that the NDA or BLA does not satisfy the criteria for approval. Data obtained from clinical trials are not always conclusive and may be susceptible to varying interpretations, which could delay, limit or prevent regulatory approval. The FDA will issue a "complete response" letter if the agency decides not to approve the NDA or BLA. The complete response letter usually describes all of the specific deficiencies in the NDA or BLA identified by the FDA. The deficiencies identified may be minor, for example, requiring labeling changes, or major, for example, requiring additional clinical trials. Additionally, the complete response letter may include recommended actions that the applicant might take to place the application in a condition for approval. If a complete response letter is issued, the applicant may either resubmit the NDA or BLA, addressing all of the deficiencies identified in the letter, or withdraw the application.

If a product receives regulatory approval, the approval may be limited to specific diseases and dosages or the indications for use may otherwise be limited, which could restrict the commercial value of the product. Further, the FDA may require that certain contraindications, warnings or precautions be included in the product labeling. In addition, the FDA may require Phase 4 testing which involves clinical trials designed to further assess a product's safety and effectiveness and may require testing and surveillance programs to monitor the safety of approved products that have been commercialized.

Orphan Drug Designation

Under the Orphan Drug Act, the FDA may grant orphan designation to a drug or biological product intended to treat a rare disease or condition, which is generally a disease or condition that affects fewer than 200,000 individuals in the United States, or more than 200,000 individuals in the United States and for which there is no reasonable expectation that the cost of developing and making a drug or biological product available in the United States for this type of disease or condition will be recovered from sales of the product. Orphan product designation must be requested before submitting an NDA or BLA. After the FDA grants orphan product designation, the identity of the therapeutic agent and its potential orphan use are disclosed publicly by the FDA. Orphan product designation does not convey any advantage in or shorten the duration of the regulatory review and approval process.

If a product that has Orphan designation subsequently receives the first FDA approval for the disease or condition for which it has such designation, the product is entitled to orphan product exclusivity, which means that the FDA may not approve any other applications to market the same drug or biological product for the same indication for seven years, except in limited circumstances, such as a showing of clinical superiority to the product with orphan exclusivity. Competitors, however, may receive approval of different products for the indication for which the Orphan product has exclusivity or obtain approval for the same product but for a different indication for which the Orphan product has exclusivity. Orphan product exclusivity also could block the approval of one of our products for seven years if a competitor obtains approval of the same drug or biological product as defined by the FDA or if our drug or biological candidate is determined to be contained within the competitor's product for the same indication or disease. If a drug or biological product designated as an orphan product receives marketing approval for an indication broader than what is designated, it may not be entitled to orphan product exclusivity. Orphan Drug status in the European Union has similar but not identical benefits in the European Union.

Expedited Development and Review Programs

The FDA has a Fast Track program that is intended to expedite or facilitate the process for reviewing new drug and biological products that meet certain criteria. Specifically, new drug and biological products are eligible for Fast Track designation if they are intended to treat a serious or life-threatening condition and demonstrate the potential to address unmet medical needs for the condition. Fast Track designation applies to the combination of the product and the specific indication for which it is being studied. Unique to a Fast Track product, the FDA may consider for review sections of the NDA or BLA on a rolling basis before the complete application is submitted, if (i) the sponsor provides a schedule for the submission of the sections of the NDA or BLA, (ii) the FDA agrees to accept sections of the NDA or BLA and determines that the schedule is acceptable, and (iii) the sponsor pays any required user fees upon submission of the first section of the NDA or BLA.

Any product submitted to the FDA for marketing approval, including those submitted to a Fast Track program, may also be eligible for other types of FDA programs intended to expedite development and review, such as priority review and accelerated approval. Any product is eligible for priority review if it has the potential to provide safe and effective therapy where no satisfactory alternative therapy exists or a significant improvement in the treatment, diagnosis or prevention of a disease compared with marketed products. The FDA will attempt to direct additional resources to the evaluation of an application for a new drug or biological product designated for priority review in an effort to facilitate the review. Additionally, a product may be eligible for accelerated approval. Drug or biological products studied for their safety and effectiveness in treating serious or life-threatening illnesses and that provide meaningful therapeutic benefit over existing treatments may receive accelerated approval, which means that they may be approved on the basis of adequate and well-controlled clinical studies establishing that the product has an effect on a surrogate endpoint that is reasonably likely to predict a clinical benefit, or on the basis of an effect on a clinical endpoint other than survival or irreversible morbidity. As a condition of approval, the FDA generally requires that a sponsor of a drug or biological product receiving accelerated approval perform adequate and well-controlled post-marketing clinical studies to establish safety and efficacy for the approved indication. Failure to conduct such studies or conducting such studies that do not establish the required safety and efficacy may result in revocation of the original approval. In addition, the FDA currently requires as a condition for accelerated approval pre-approval of promotional materials, which could adversely impact the timing of the commercial launch or subsequent marketing of the product. Fast Track designation, priority review and accelerated approval do not change the standards for approval but may expedite the development or approval process.

Post-Approval Requirements

Any drug or biological products for which we receive FDA approvals are subject to continuing regulation by the FDA, including, among other things, record-keeping requirements, reporting of adverse experiences with the product, providing the FDA with updated safety and efficacy information on an annual basis or as required more frequently for specific events, product sampling and distribution requirements, complying with certain electronic records and signature requirements and complying with FDA promotion and advertising requirements, which include, among others, standards for direct-to-consumer advertising, prohibitions against promoting drugs and biologics for uses or in patient populations that are not described in the drug's or biologic's approved labeling (known as "off-label use"), rules for conducting industry-sponsored scientific and educational activities, and promotional activities involving the internet. Failure to comply with FDA requirements can have negative consequences, including the immediate discontinuation of noncomplying materials, adverse publicity, enforcement letters from the FDA, mandated corrective advertising or communications with doctors, and civil or criminal penalties. Although physicians may prescribe legally available drugs and biologics for off-label uses, manufacturers may not market or promote such off-label uses.

We will need to rely on third parties for the production of our product candidates. Manufacturers of our product candidates are required to comply with applicable FDA manufacturing requirements contained in the FDA's cGMP regulations. cGMP regulations require among other things, quality control and quality assurance as well as the corresponding maintenance of comprehensive records and documentation. Drug and biologic manufacturers and other entities involved in the manufacture and distribution of approved drugs and biologics are also required to register their establishments and list any products made there with the FDA and comply with related requirements in certain states, and are subject to periodic unannounced inspections by the FDA and certain state agencies for compliance with cGMP and other laws. Accordingly, manufacturers must continue to expend time, money and effort in the area of production and quality control to maintain cGMP compliance. Discovery of problems with a product after approval may result in serious and extensive restrictions on a product, manufacturer, or holder of an approved NDA or BLA, including suspension of a product until the FDA is assured that quality standards can be met, continuing oversight of manufacturing by the FDA under a "consent decree," which frequently includes the imposition of costs and continuing inspections over a period of many years, and possible withdrawal of the product from the market. In addition, changes to the manufacturing process generally require prior FDA approval before being implemented and other types of changes to the approved product, such as adding new indications and additional labeling claims, are also subject to further FDA review and approval.

The FDA also may require post-marketing testing, known as Phase 4 testing, risk minimization action plans and surveillance to monitor the effects of an approved product or place conditions on an approval that could otherwise restrict the distribution or use of the product.

Employees

Our business is managed by our officers. Our Chairman and Chief Executive Officer, Terren Peizer began devoting part-time efforts to the Company's activities in July 2018. Our President and Chief Operating Officer, Jonathan Adams, began devoting full-time efforts to the Company on July 1, 2017. Our Chief Financial Officer and Corporate Secretary, Wendy Kim, devotes part-time efforts to the Company's activities. Our Chief Scientific Officer began devoting full-time efforts to the Company in November 2018 and previously was a consultant to the Company. We also rely on a team of highly experienced scientific, medical, and regulatory consultants to conduct its product development activities.

MANAGEMENT**Directors and Officers**

The following table sets forth certain information regarding our Board of Directors, our executive officers, and some of our key employees, as of the date of this prospectus.

Name	Age	Director Since	Position
Terren Peizer	61	2018	Chairman of the Board & Chief Executive Officer
Jonathan Adams	57	--	President & Chief Operating Officer
Joanne Wendy Kim	65	--	Chief Financial Officer and Corporate Secretary
Penelope Markham, PhD	54	--	Chief Scientific Officer
Jim Lang	55	2016	Independent Director
Cuong Do	54	2016	Independent Director
Michael Sherman	61	2017	Independent Director
Richard J. Berman	76	2019	Independent Director
Steve Gorlin	83	2020	Independent Director
Robert Hariri, MD, PhD	61	2020	Independent Director
Sigmund Rogich	71	2020	Independent Director

According to our Bylaws, the directors shall be elected at the annual meeting of the stockholders and each director shall be elected to serve until his successor shall be elected and shall qualify. A director need not be a stockholder. Directors shall not receive any stated salary for their services as directors or as members of committees, but by resolution of the Board of Directors a fixed fee and expenses of attendance may be allowed for attendance at each meeting. The Bylaws shall not be construed to preclude any director from serving the Company in any other capacity as an officer, agent or otherwise, and receiving compensation therefor.

There are no familial relationships among any of our directors or officers. Mr. Terren Peizer, Chairman of the Board of Directors and Chief Executive Officer, is also the founder of Ontrak, Inc. a U.S. reporting company listed on Nasdaq on whose board Mr. Sherman also serves. Additionally, Jim Lang currently serves as a director at OptimizeRX, a U.S. reporting company that is listed on the Nasdaq stock exchange. None of our directors or officers has been affiliated with any Company that has filed for bankruptcy within the last five years. We are not aware of any proceedings to which any of our officers or directors, or any associate of any such officer or director, is a party that are adverse to the Company. We are also not aware of any material interest of any of our officers or directors that is adverse to our own interests.

Information

Mr. Terren Peizer, Chairman of the Board of Directors and Chief Executive Officer, is an entrepreneur, investor, and financier with a particular interest in healthcare, having founded and successfully commercialized several healthcare companies. Mr. Peizer is the founder of Ontrak, Inc., a leader in behavioral and mental health management services, having served as the Chairman of the Board of Directors and CEO of Ontrak, Inc. since inception in 2004. Mr. Peizer also is the Founder, Chairman and CEO and majority shareholder of NeurMedix, Inc., a biotechnology Company with a focus on inflammatory, neurological and neuro-degenerative diseases. Mr. Peizer is Chairman of Acuitas Group Holdings, LLC, his personal holding company that owns his portfolio Company interests. Through Acuitas, he owns Crede Capital Group, LLC, an industry leader in investing in micro and small capitalization public equities, having invested over \$1.2 billion directly into portfolio companies. Previously he was Chairman of Cray, Inc., the leading supercomputing Company, and held senior executive positions at various publicly-traded growth companies and with the investment banking firms Goldman Sachs, First Boston, and Drexel Burnham Lambert. He received his B.S.E. in finance from The Wharton School of Finance and Commerce.

Mr. Jonathan Adams has served as the Company's Chief Executive Officer and Chief Financial Officer from the time acquired LAT Pharma LLC on April 11, 2016 until July 2018. In July 2018, he began serving as the Company's President and Chief Operating Officer. He founded LAT Pharma LLC and served as its Chief Executive Officer prior to its acquisition. Mr. Adams is a co-inventor of the Company's pending continuation-in-part patent application for the use of terlipressin to treat ascites patients and is a co-inventor of the pending US provisional and PCT filings for our novel liquid terlipressin formulations. He has over 30 years of biopharmaceutical industry experience, including corporate finance, company acquisitions and licensing deals, marketing and sales support. At Searle Pharmaceuticals he was a member of the global launch team for Celebrex, and he has worked on launching numerous new drugs and medical devices. Mr. Adams earned a BS at Cornell University and an MBA at the Tuck School at Dartmouth.

Joanne Wendy Kim has served as the Company's Chief Financial Officer since October 2018. Ms. Kim previously served as CFO for several companies throughout her career, most recently with Landmark Education Enterprises, and she has provided interim CFO services to various organizations through Group JWK from 2016 to 2018. In her various roles, Ms. Kim oversaw corporate finance and operational groups, closed eight acquisitions, secured bank financings, developed and implemented new business strategies, managed risk and implemented new financial policies and procedures. As a CPA, Ms. Kim provided accounting, SEC filing review and other business consultative services to clients serving as a Director at BDO USA, LLP's National Office SEC Department in 2008-2016 and as a Senior Manager at KPMG in earlier part of her career. She brings more than 30 years of accounting experience to this position. Ms. Kim earned her BBA in accounting and finance at California State University, Long Beach.

Dr. Markham has served as the Company's Chief Scientific Officer since November 2018. She was previously our Chief Scientist. Dr. Markham served as a Technical Consultant at LAT Pharma for 7 years prior to our acquisition of LAT Pharma. She has spent 15 years in immunology, infectious disease, bacteriology and drug discovery research. Dr. Markham was a co-founder and Research Director for Influx, Inc. involved in antibiotic drug discovery. She has been a member of NIH grant review panels and consulted for several pharmaceutical companies in a variety of therapeutic areas including Orphan Drug development. Dr. Markham has more than 20 publications in peer-reviewed journals and three patents. She holds a BS in Biochemistry from the University College Cork, Ireland, a Masters from Strathclyde University, Scotland, and a PhD from Rush University, Chicago.

Mr. Cuong Do has been President, Global Strategy Group, at Samsung since February 2015. Mr. Do helps to set the strategic direction for Samsung Group's diverse business portfolio. He was previously the Chief Strategy Officer for Merck from October 2011 to March 2014, Tyco Electronics, and Lenovo. Mr. Do is a former senior partner at McKinsey & Company, where he spent 17 years and helped build the healthcare, high tech and corporate finance practices. He holds a BA from Dartmouth College, and an MBA from the Tuck School of Business at Dartmouth.

Mr. Jim Lang is currently CEO of Water Street Capital's and JLL Partner's Global Life Sciences Services Platform. He formerly served as the CEO of Decision Resources Group (DRG), which he transformed into a leading healthcare data and analytics firm. Prior to that, Jim was CEO of IHS Cambridge Energy Research Associates (IHS CERA), a recognized leader in energy industry subscription information products, and formerly the President of Strategic Decisions Group (SDG), a leading global strategy consultancy. Mr. Lang holds a BS summa cum laude in electrical and computer engineering from the University of New Hampshire and an MBA with Distinction from the Tuck School of Business. Jim Lang currently also serves as a Director at OptimizeRX, a Nasdaq listed Company.

Richard J. Berman was Chairman of National Investment Managers, a company with \$12 billion pension administration assets from 2006-2011. Mr. Berman is a director of four other public healthcare companies: Ontrak, Inc., Advaxis, Inc., Cryoport Inc. and Immuron Ltd. and a public fintech company, Cuentas, Inc. From 1998-2000, he was employed by Internet Commerce Corporation (now Easylink Services) as Chairman and CEO, and was a director from 1998-2012. Previously, Mr. Berman was Senior Vice President of Bankers Trust Company, where he started the M&A and Leveraged Buyout Departments; created the largest battery company in the world in the 1980's by merging Prestolite, General Battery and Exide and advised on over \$4 billion of M&A transactions (completed over 300 deals). He is a past Director of the Stern School of Business of NYU where he obtained his BS and MBA. He also has US and foreign law degrees from Boston College and The Hague Academy of International Law, respectively.

Michael Sherman JD retired from his position as a Managing Director at Barclays Plc in 2018, where he had worked since 2008. Previously he was a Managing Director at Lehman Brothers, Inc. He has worked in investment banking for 30 years. Mr. Sherman has significant experience in healthcare finance, most recently assisting on a \$450 million convertible transaction for Neurocrine Biosciences. He has worked on successful financial transactions for Teva Pharmaceutical Industries, Amgen Inc., Cubist Pharmaceuticals, Merck & Co., and Cardinal Health, among other companies. After graduating from the University of Pennsylvania, Michael Sherman received his JD, cum laude, from the Harvard Law School.

Steven Gorlin founded many biopharma companies including Hycor Biomedical, Theragenics, Medicis Pharmaceutical, EntreMed, MRI Interventions, DARA BioSciences, MiMedx, Medivation (sold to Pfizer for \$14 billion) and NantKwest. Mr. Gorlin served for many years on the Business Advisory Council to the Johns Hopkins School of Medicine and on The Johns Hopkins BioMedical Engineering Advisory Board. He is currently a member of the Research Institute Advisory Committee (RIAC) of Massachusetts General Hospital. He started The Touch Foundation, a nonprofit organization for the blind, and was a principal contributor to Camp Kudzu for diabetic children.

Robert Hariri MD, PhD, Chairman, founder, and CEO of Celularity, Inc., a leading cellular therapeutics company. He was the founder and CEO of Anthrogenesis Corporation, and after its acquisition served as CEO of Celgene Cellular Therapeutics. Dr. Hariri co-founded the genomic health intelligence company, Human Longevity, Inc. Dr. Hariri pioneered the use of stem cells to treat a range of life-threatening human diseases. He is widely acknowledged for his discovery of pluripotent stem cells and for assisting with discovering the physiological activities of tumor necrosis factor (TNF). He holds over 170 issued and pending patents and has authored over 150 publications.

Sigmund Rogich CEO of President of The Rogich Communications Group and serves on the Board of Keep Memory Alive, a philanthropic organization which raises awareness about brain disorders and Alzheimer's disease. Keep Memory Alive funds clinical trials to advance new treatments for patients with Alzheimer's, Huntington's and Parkinson's disease, as well as multiple sclerosis. Mr. Rogich was formerly the US Ambassador to Iceland. He has served as a senior consultant to Presidents Ronald Reagan and George H.W. Bush. Mr. Rogich serves on multiple boards of directors for charitable causes.

Terren Peizer's qualifications to serve on our Board of Directors are primarily based on his experience as an entrepreneur, investor, and financier with a particular interest in healthcare, having founded and successfully commercialized several healthcare companies. Mr. Peizer is the founder of Ontrak, Inc., a leader in behavioral and mental health management services, having served as the Chairman of the Board of Directors and CEO of Ontrak, Inc. since inception in 2004. Mr. Peizer also is the Founder, Chairman and CEO and majority shareholder of NeurMedix, Inc., a biotechnology Company with a focus on inflammatory, neurological and neuro-degenerative diseases. Mr. Peizer is Chairman of Acuitas Group Holdings, LLC, his personal holding Company that owns his portfolio Company interests. Through Acuitas, he owns Crede Capital Group, LLC, an industry leader in investing in micro and small capitalization public equities, having invested over \$1.2 billion directly into portfolio companies.

Jonathan Adams's qualifications to serve as our President and Chief Operating Officer are primarily based on his founding of LAT Pharma LLC and his over 26 years of biopharmaceutical industry experience. As Chief Executive of LAT Pharma LLC, Mr. Adams was a key contributor to inventing the BIV201 product candidate. He also helped to secure an Orphan Drug designation for a terlipressin analogue (a prior product candidate which is no longer in development). Mr. Adams's biopharmaceutical experience includes work in corporate finance, company acquisitions and licensing deals, marketing and sales support.

Wendy Kim's qualifications to serve as our Chief Financial Officer are primarily based on her 35 years of accounting experience and having served as CFO for several companies and the provision of interim CFO services, accounting and business consultative services to various organizations through Group JWK, BDO USA, LLP and KPMG.

Dr. Markham's qualifications to serve as our Scientific Officer are primarily based on her years of experience with LAT Pharma, as well as having been a member of NIH grant review panels and consulted for several pharmaceutical companies in a variety of therapeutic areas including Orphan Drug development.

Cuong Do's qualifications to serve on our Board of Directors are primarily based on his decades of experience as an executive in the pharma, biotech, and other high technology industries. He was previously the Chief Strategy Officer for Merck, a leading U.S. pharmaceuticals Company, Tyco Electronics, and Lenovo. Mr. Do is a former senior partner at McKinsey & Company, where he spent 17 years and helped build the healthcare, high tech and corporate finance practices.

Jim Lang's qualifications to serve on our Board of Directors are primarily based on his decades of experience as a strategy consultant, broad industry expertise, and senior-level management experience running several healthcare and information technology companies. This includes his experience as CEO of Decision Resources Group, CEO of IHS Cambridge Energy Research Associates (IHS CERA), and President of Strategic Decisions Group (SDG), a leading global strategy consultancy.

Richard J. Berman's qualifications to serve on our board of directors include his experience in the healthcare industry, and his current and past experience in numerous private and publicly traded companies.

Michael Sherman's qualifications to serve on our Board of Directors are primarily based on his decades of finance industry experience including as a Managing Director at Barclays Plc and as a Managing Director at Lehman Brothers, Inc. He has worked in investment banking for 30 years. Mr. Sherman has significant experience in healthcare finance including having worked on successful financial transactions for several pharmaceutical and healthcare focused companies.

Steve Gorlin's qualifications to serve on our Board of Directors are primarily based on his over 45 years of experience in founding and investing in several biopharma companies, leading multiple NASDAQ AND NYSE companies to their success.

Robert (Bob) Hariri's qualifications to serve on our Board of Directors are primarily based on his decades of founding and leading several companies in the cellular therapeutic space, as well as pioneering in the use of stem cells to treat a range of life-threatening human diseases and discoveries in the physiological activities of tumor necrosis factor. He has authored over 150 publications and garnered numerous awards for contributions to the fields of biomedicine and aviation.

Sigmund (Sig) Rogich's qualifications to serve on our Board of Directors are based on his experience in the Communications sector and philanthropic organization raising awareness about brain disorders. Mr. Rogic was formerly the US Ambassador to Iceland. He has served as a senior consultant to candidates for the highest office, including Presidents Ronald Reagan and George H.W. Bush. Mr. Rogich serves on the Board of Directors for many charitable causes.

COMMITTEES OF THE BOARD OF DIRECTORS

Upon the effective date of the registration statement of which this prospectus forms a part, our Board of Directors will have three standing committees: an audit committee, a compensation committee and a nominating and corporate governance committee. Both our audit committee and our compensation committee will be composed solely of independent directors. Subject to phase-in rules, the rules of Nasdaq and Rule 10A-3 of the Exchange Act require that the audit committee of a listed company be comprised solely of independent directors, and the rules of Nasdaq require that the compensation committee and the nominating and corporate governance committee of a listed company be comprised solely of independent directors. Each committee operates under a charter approved by our Board of Directors and will have the composition and responsibilities described below. The charter of each committee will be available on our website following the closing of this offering.

AUDIT COMMITTEE

We have established an audit committee of the Board of Directors. The members of our audit committee are Michael Sherman, Jim Lang and Richard J. Berman, each of which is an independent director within the meaning of the Nasdaq rules. Mr. Sherman serves as chairman of the audit committee.

We have adopted an audit committee charter, detailing the principal functions of the audit committee, including:

- assisting board oversight of (1) the integrity of our financial statements, (2) our compliance with legal and regulatory requirements, (3) our independent auditor's qualifications and independence, and (4) the performance of our internal audit function and independent auditors; the appointment, compensation, retention, replacement, and oversight of the work of the independent auditors and any other independent registered public accounting firm engaged by us;
- pre-approving all audit and non-audit services to be provided by the independent auditors or any other registered public accounting firm engaged by us, and establishing pre-approval policies and procedures; reviewing and discussing with the independent auditors all relationships the auditors have with us in order to evaluate their continued independence;

- setting clear policies for audit partner rotation in compliance with applicable laws and regulations;
- obtaining and reviewing a report, at least annually, from the independent auditors describing (1) the independent auditor's internal quality-control procedures and (2) any material issues raised by the most recent internal quality-control review, or peer review, of the audit firm, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years respecting one or more independent audits carried out by the firm and any steps taken to deal with such issues;
- meeting to review and discuss our annual audited financial statements and quarterly financial statements with management and the independent auditor, including reviewing our specific disclosures under "Management's Discussion and Analysis of Financial Condition and Results of Operations"; reviewing and approving any related party transaction required to be disclosed pursuant to Item 404 of Regulation S-K promulgated by the SEC prior to us entering into such transaction; and
- reviewing with management, the independent auditors, and our legal advisors, as appropriate, any legal, regulatory or compliance matters, including any correspondence with regulators or government agencies and any employee complaints or published reports that raise material issues regarding our financial statements or accounting policies and any significant changes in accounting standards or rules promulgated by the Financial Accounting Standards Board, the SEC or other regulatory authorities.

COMPENSATION COMMITTEE

We have established a compensation committee of the Board of Directors. The members of our Compensation Committee are Mr. Berman, Mr. Sherman and Mr. Gorlin. Mr. Berman serves as chairman of the compensation committee.

We have adopted a compensation committee charter, which details the principal functions of the compensation committee, including:

- reviewing and approving on an annual basis the corporate goals and objectives relevant to our Chief Executive Officer's compensation, evaluating our Chief Executive Officer's performance in light of such goals and objectives and determining and approving the remuneration (if any) of our Chief Executive Officer based on such evaluation;
- reviewing and making recommendations to our Board of Directors with respect to the compensation, and any incentive-compensation and equity-based plans that are subject to board approval of all of our other officers;
- reviewing our executive compensation policies and plans;
- implementing and administering our incentive compensation equity-based remuneration plans; assisting management in complying with our proxy statement and annual report disclosure requirements;
- approving all special perquisites, special cash payments and other special compensation and benefit arrangements for our officers and employees;
- producing a report on executive compensation to be included in our annual proxy statement; and reviewing, evaluating and recommending changes, if appropriate, to the remuneration for directors.

The charter also provides that the compensation committee may, in its sole discretion, retain or obtain the advice of a compensation consultant, independent legal counsel or other adviser and will be directly responsible for the appointment, compensation and oversight of the work of any such adviser. However, before engaging or receiving advice from a compensation consultant, external legal counsel or any other adviser, the compensation committee will consider the independence of each such adviser, including the factors required by Nasdaq and the SEC.

NOMINATING AND CORPORATE GOVERNANCE COMMITTEE

We have established a nominating and corporate governance committee of the Board of Directors. The members of our nominating and corporate governance committee are Mr. Do, Mr. Lang and Dr. Hariri. Mr. Do serves as chair of the nominating and corporate governance committee.

We have adopted a nominating and corporate governance committee charter, which details the purpose and responsibilities of the nominating and corporate governance committee, including:

- identifying, screening and reviewing individuals qualified to serve as directors, consistent with criteria approved by the Board of Directors, and recommending to the Board of Directors candidates for nomination for election at the annual meeting of stockholders or to fill vacancies on the Board of Directors;
- developing and recommending to the Board of Directors and overseeing implementation of our corporate governance guidelines;
- coordinating and overseeing the annual self-evaluation of the Board of Directors, its committees, individual directors and management in the governance of the company; and
- reviewing on a regular basis our overall corporate governance and recommending improvements as and when necessary.

The charter also provides that the nominating and corporate governance committee may, in its sole discretion, retain or obtain the advice of, and terminate, any search firm to be used to identify director candidates, and will be directly responsible for approving the search firm's fees and other retention terms.

We have not formally established any specific, minimum qualifications that must be met or skills that are necessary for directors to possess. In general, in identifying and evaluating nominees for director, the Board of Directors considers educational background, diversity of professional experience, knowledge of our business, integrity, professional reputation, independence, wisdom, and the ability to represent the best interests of our stockholders. Prior to our initial business combination, holders of our public shares will not have the right to recommend director candidates for nomination to our Board of Directors.

Compensation Committee Interlocks and Insider Participation

None of our officers currently serves, or in the past year has served, as a member of the compensation committee of any entity that has one or more officers serving on our Board of Directors.

CODE OF ETHICS

We have adopted a code of conduct and ethics meeting the requirements of Section 406 of the Sarbanes-Oxley Act of 2002. We believe our code of conduct and ethics is reasonably designed to deter wrongdoing and promote honest and ethical conduct; provide full, fair, accurate, timely and understandable disclosure in public reports; comply with applicable laws; ensure prompt internal reporting of violations; and provide accountability for adherence to the provisions of the code of ethic. Our code of conduct and ethics is available on our website.

EXECUTIVE COMPENSATION

We did not pay any compensation to any of our executive officers prior to the start of our fiscal year ending June 30, 2019; however, we did accrue salary for Mr. Adams in accordance with his related employment agreements for all periods subsequent to their effective dates.

Summary Compensation Table

Name and Principal Position	Year	Annual Compensation					Total
		Salary	Bonus	Stock Awards	Option Awards(1)	All Other Compensation	
Terren Peizer	2020	\$ —	\$ —	\$ 5,600	\$ —	\$ —	\$ 5,600
Chief Executive Officer and Chairman(2)	2019	\$ —	\$ —	\$ 7,000	\$ —	\$ —	\$ 7,000
Jonathan Adams	2020	\$250,000	\$ —	\$ 5,600	\$ 1,368	\$ —	\$256,968
President and Chief Operating Officer(2)	2019	\$250,000	\$ —	\$ 7,000	\$ 11,789	\$ —	\$268,789
	2018	\$250,000	\$ —	\$ —	\$ 30,978	\$ —	\$280,978

(1) The aggregate grant date fair value of such awards were computed in accordance with Financial Accounting Standards Board ASC Topic 718, Stock Compensation (ASC Topic 718), and do not take into account estimated forfeitures related to service-based vesting conditions, if any. The valuation assumptions used in calculating these values are discussed in Note 8 of the Notes to Consolidated Financial Statements appearing elsewhere herein. These amounts do not represent actual amounts paid or to be realized. Amounts shown are not necessarily indicative of values to be achieved, which may be more or less than the amounts shown as awards may subject to time-based vesting.

(2) Mr. Peizer became our Chief Executive Officer and Chairman in July 2018 at which time Mr. Adams became President and Chief Operating Officer, having previously served as our Chief Executive Officer and Chief Financial Officer, Treasurer and Corporate Secretary. The stock awards received by Mr. Peizer and Mr. Adams represented 1,600 shares of common stock and vested in full upon grant.

Employment Agreement

On April 11, 2016, we entered into an employment agreement with Mr. Adams, pursuant to which Mr. Adams was entitled to receive \$250,000 as annual salary. The agreement was effective beginning April 11, 2016 and expired on July 2, 2019.

On July 9, 2018, Mr. Adams, our President and Chief Operating Officer, entered into an Accord and Debt Satisfaction Agreement with us, pursuant to which he agreed to release us from all liabilities (including the original contract dated March 23, 2017 to defer payment of his accrued salary, the promissory note issued by us to defer payment of accrued salary and subsequent unpaid salary), for an aggregate amount of \$534,722, and received a cash payment of \$25,694 in satisfaction. The gain of \$509,028 on the settlement of debt was reflected as additional paid in capital.

Option/SAR Grants

In connection with his employment agreement, on April 11, 2016 Mr. Adams received options to acquire 24,000 shares exercisable at \$7.50 per share, the closing price on that date. These options vested and became exercisable as follows: (i) 8,000 shares on April 11, 2017, (ii) 8,000 shares on April 11, 2018, and (iii) 8,000 shares on April 11, 2019.

Between November 16, 2016 and May 19, 2017, we issued options to acquire 8,000 shares exercisable at an average price of \$30.00 per share to consultants and members of our Board of Directors for services provided to us.

Long-Term Incentive Plans and Awards

Other than the options granted as described above and our recently adopted 2019 Omnibus Equity Incentive Plan (the "2019 Plan"), we do not currently have any long-term incentive plans that provide compensation intended to serve as incentive for performance. Since prior to such grants, no individual grants or agreements regarding future payouts under non-stock price-based plans had been made to any executive officer or any director or any employee or consultant since our inception, no future payouts under non-stock price-based plans or agreements had been granted or entered into or exercised by our officer or director or employees or consultants.

2019 Omnibus Equity Incentive Plan

On April 30, 2019, our Board of Directors and our stockholders approved and adopted the 2019 Plan, subject to complying with the notification requirements of Regulation 14C of the Exchange Act which were complied with effective May 29, 2019. The 2019 Plan allows us, under the direction of our Board of Directors or a committee thereof, to make grants of stock options, restricted and unrestricted stock and other stock-based awards to employees, including our executive officers, consultants and directors. The 2019 Plan allows for the issuance of up to 253,163 shares of common stock pursuant to new awards granted under the 2019 Plan. This description is qualified in its entirety by reference to the actual terms of the 2019 Plan, a copy of which is attached as Appendix D to our Definitive Information Statement on Schedule 14C, filed with the SEC on May 8, 2019.

Compensation of Directors

There are no arrangements pursuant to which our directors are or will be compensated in the future for any services provided to the Company, except that each director shall receive stock options and common share grants as remuneration for their service in lieu of cash compensation. For the fiscal year ended June 30, 2020, each director received 800 stock options on the one-year anniversary of his or her service to the Company with an exercise price equal to the closing stock price on the day of the option grant. The total value of the options granted to directors for the fiscal year ended June 30, 2020 was \$15,171 based on the Black-Scholes option value method. Each director also receives a stock grant of 1,600 common shares for every year of service. On January 2, 2019, our directors received a combined grant of 11,200 shares of common stock with a face value of \$49,000 based on the closing stock price of \$4.38 on the grant date. On January 19, 2020, our directors received a combined grant of options to purchase 7,200 shares of common stock with a face value of \$2.80 based on the closing stock price on the grant date.

PRINCIPAL STOCKHOLDERS

Based solely upon information made available to us, the following table sets forth information as of September 15, 2020 regarding the beneficial ownership of our common stock by:

- each person known by us to be the beneficial owner of more than 5% of our outstanding shares of common stock;
- each of our named executive officers and directors; and
- all our executive officers and directors as a group.

The percentage ownership information shown in the table is based upon 5,206,602 shares of common stock outstanding as of September 15, 2020.

Beneficial ownership is determined in accordance with the rules of the SEC and includes voting or investment power with respect to the securities. Except as otherwise indicated, each person or entity named in the table has sole voting and investment power with respect to all shares of our capital shown as beneficially owned, subject to applicable community property laws.

In computing the number and percentage of shares beneficially owned by a person as of a particular date, shares that may be acquired by such person (for example, upon the exercise of options or warrants) within 60 days of such date are counted as outstanding, while these shares are not counted as outstanding for computing the percentage ownership of any other person.

The address of each holder listed below, except as otherwise indicated, is c/o BioVie Inc., 2120 Colorado Avenue, #230, Santa Monica, California 90404.

Name and Address of Beneficial Owner	Number of Common Shares of Beneficial Ownership (1)	Percentage of Beneficial Ownership
Terren Peizer(2)	5,712,206	85.8%
Jonathan Adams(3)	97,037	1.9%
Joanne Wendy Kim(4)	1,600	*
Robert Hariri, MD, PhD		*
Penelope Markham, PhD(5)	13,893	*
Cuong Do(6)	170,707	3.2
James Lang(7)	47,032	1.0
Steve Gorlin		*
Michael Sherman(8)	36,685	*
Richard J. Berman (9)	2,400	*
Sigmund Rogich		*
All directors and executive officers as a group (eight persons):	6,081,561	93.9

*Less than 1%

- (1) Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to securities. In accordance with SEC rules, shares of common stock issuable upon the exercise of options or warrants which are currently exercisable or which become exercisable within 60 days following the date of the information in this table are deemed to be beneficially owned by, and outstanding with respect to, the holder of such option or warrant, however none of the persons listed hereinabove has the right to acquire beneficial ownership in any other shares of the Company. Subject to community property laws where applicable, to our knowledge, each person listed is believed to have sole voting and investment power with respect to all shares of common stock owned by such person.
- (2) All shares and warrants are held of record by Acuitas Group Holdings, LLC, a limited liability company 100% owned by Terren S. Peizer, and as to which, Mr. Peizer may be deemed to beneficially own or control. Mr. Peizer disclaims beneficial ownership of any such securities. Excludes shares issuable upon conversion of the Debenture, which is expected to be repaid in cash with the net proceeds of this offering, and includes an aggregate of 6,813,082 shares expected to be issued to Acuitas upon completion of this offering in connection with the automatic exercise of the Bridge Financing Warrants and the committed exercise of its purchase option granted in connection with its initial investment in the Company. After giving effect to such issuance and the completion of this offering, Acuitas is expected to beneficially own 11,072,038 shares in total, or 82% of the outstanding shares of common stock.

- (3) Includes warrants to purchase 8,564 shares of common stock and options to purchase 24,800 shares of common stock, all of which are exercisable within the next 60 days. Common stock beneficially owned by Mr. Adams includes 1,120 and 1,200 shares of common stock held of record by Mr. Adams, as custodian for Elliott P. Adams and Jeremy P. Adams, respectively; and 2,924 shares of common stock held of record by Elliott P. Adams. Each of Elliott P. Adams and Jeremy P. Adams are family members of Mr. Adams and, as a result, Mr. Adams may be deemed to beneficially own shares held by (or for the benefit of) such family members.
- (4) Represents options to purchase 1,600 shares of common stock exercisable in the next 60 days.
- (5) Includes options to purchase 3,200 shares of common stock exercisable in the next 60 days.
- (6) Includes warrants to purchase 70,667 shares of common stock and options to purchase 3,200 shares of common stock, all of which are exercisable within the next 60 days. All shares of common stock, warrants and options are held of record by Do & Rickles Investments, LLC, a limited liability company 100% owned by Cuong Do and his wife, and as such, Mr. Do may be deemed to beneficially own or control.
- (7) Includes warrants to purchase 18,788 shares of common stock and options to purchase 3,200 shares of common stock, all of which are exercisable in the next 60 days.
- (8) Includes warrants to purchase 13,606 shares of common stock and options to purchase 2,400 shares of common stock, all of which are exercisable within the next 60 days. Common stock held by Michael Sherman includes 13,333 shares of the common stock held of record by Sherman Children's Trust Brian Krisber, Trustee. All shares of common stock, warrants and options are deemed to be beneficially owned or controlled by Michael Sherman.
- (9) Includes options to purchase 800 shares of common stock, which are exercisable within the next 60 days

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

During the period commencing July 1, 2017 and through the date of this prospectus, we have not engaged in any transactions with any officer, director or holder of more than 5% of our common stock, except as follows:

Purchase of Preferred Stock

On July 3, 2018, we entered into a Securities Purchase Agreement (the "Purchase Agreement") with Acuitas Group Holdings, LLC ("Acuitas") and certain other purchasers identified in the Purchase Agreement (together with Acuitas, the "Purchasers") pursuant to which (i) the Purchasers agreed to purchase an aggregate of 2,133,332 shares of our Series A Convertible Preferred Stock (the "Preferred Stock") at a price per share of \$1.50 per share of Preferred Stock (the "Initial Sale") and (ii) we agreed to issue warrants (the "Warrants") to purchase 1,706,666 shares of common stock, each subject to the terms and conditions set forth in the Purchase Agreement, for an aggregate consideration of \$3.2 million. We received \$160,000 of the \$3.2 million in April and May 2018 as prepaid equity. Acuitas also received an additional 6,667 Warrants in connection with the payoff of a note issued by us in favor of Acuitas. The Initial Sale and issuance of the Warrants occurred on July 3, 2018. In addition, Acuitas had the option to purchase up to an additional 1,600,000 shares of common stock at a price per share of \$1.88, and warrants on the same terms as the Warrants, within two weeks following the one year anniversary of the closing of the Initial Sale (the "Subsequent Sale") in the event that we did not obtain \$3,000,000 of funding through various non-dilutive grants prior to the one year anniversary of the closing of the Initial Sale, less any federal or FDA grant funding received by the Company. Acuitas is controlled by our Chairman and Chief Executive Officer, Terren Peizer and the Purchasers included Jonathan Adams, James Lang, Cuang Do and Michael Sherman, who are members of our Board of Directors.

The Purchase Agreement contained customary representations and warranties. In connection with the disclosure schedule associated with the representations and warranties, we also disclosed customary information, including the following: (i) the existence of the Mallinckrodt petition before the PTAB, (ii) our capitalization, (iii) our obligation to pay a low single digit royalty on the net sales of BIV201 (continuous infusion terlipressin) to be shared among LAT Pharma LLC members, PharmaIN Corporation and The Barrett Edge, Inc. pursuant to the Agreement and Plan of Merger, dated April 11, 2016, by and between LAT Pharma LLC and us, (iv) our obligation to pay a low single digit royalty on net sales of all terlipressin products covered by specified patents up to a maximum of \$200,000 per year pursuant to the Technology Transfer Agreement, dated July 25, 2016, by and between us and the University of Padova (Italy), and (v) certain recent issuances of common stock by us.

Each share of Preferred Stock automatically converted into 1 shares of common stock upon the filing with the Secretary of State of the State of Nevada of a Certificate of Amendment to our Articles of Incorporation (the "Amendment") on August 13, 2018 that increased the number of authorized shares of common stock to 800,000,000. The Amendment was approved by the written consent of the holders of more than a majority of our issued and outstanding common stock on July 3, 2018 and was filed with the Secretary of State of the State of Nevada 20 calendar days following the distribution of our Definitive Information Statement on Schedule 14 that was filed with the SEC on July 13, 2018.

Pursuant to a letter agreement dated June 24, 2019, Acuitas agreed to modify its existing rights under the Purchase Agreement so that:

- Acuitas agreed to immediately exchange its existing Warrants for common stock such that it will have effectively exercised its Warrants in full pursuant to a cashless exercise thereof at an assumed current market price of \$45.00 per share and, as a result received an aggregate of 95% of the shares covered thereby, or 1,526,094 shares of common stock;
- Acuitas agreed to (i) waive its rights to a 50% adjustment of the purchase price of the Preferred Stock in the Initial Sale, the exercise price of the Warrants and the price per share in the Subsequent Sale in the event of certain reductions in the useful life of our current intellectual property rights, and (ii) effectively exercise its rights to purchase securities in a Subsequent Sale pursuant to a "cashless purchase" at an assumed current market price of approximately \$11.25 per share, conditioned in each case on the listing of our common stock on Nasdaq or the raising of \$2.0 million in additional funds in the form of another securities offering, in either case not later than November 30, 2019, which will result Acuitas having irrevocably waived its rights to an adjustment in the purchase price of the Preferred Stock in the Initial Sale and the exercise price of the Warrants and the purchase price of per share in the Subsequent Sale upon the issuance by us of an aggregate of 1,339,958 shares of common stock (the "Subsequent Sale Shares") to Acuitas, which is expected to occur concurrently with the closing of this offering;
- Acuitas shall in exchange for the foregoing agreements and waivers have the option to purchase additional shares of common stock and warrants to purchase one share of common stock for each share of common stock purchased during the period from September 1, 2019 to November 30, 2019 at the then-effective purchase price of the Preferred Stock in the Initial Sale (the "Funding Option"), provided that any shares issued pursuant to any exercise of the Funding Option will reduce share-for-share the amount of shares issued pursuant to the deemed exercise of its rights to purchase securities in a Subsequent Sale mentioned above.

On September 24, 2019, the Company, entered into a Securities Purchase Agreement (the "2019 Purchase Agreement") with Acuitas pursuant to which (i) Acuitas agreed to purchase a 10% OID Convertible Delayed Draw Debenture (the "Debenture") due September 24, 2020 for an aggregate commitment amount of up to \$2.0 million, and (ii) the Company issued 1,125,000 shares (the "Commitment Shares") of the Company's common stock and warrants (the "Commitment Warrants") to purchase an equal number of shares, each subject to the terms and conditions set forth in the 2019 Purchase Agreement. The Debenture accrues additional principal at the rate of 6% per annum and interest at the rate of 10% per annum, is convertible into shares of common stock at \$4.00 per share prior to the completion of this offering or, subsequent to the closing of this offering, the lower of \$4.00 or 80% of the offering price per unit to the public in this offering and are mandatorily redeemable upon such closing at 100% of the accrued principal amount and unpaid interest to the date of redemption. The Commitment Warrants are five year warrants, exercisable at an amount equal to the lower of \$4.00 or 80% of the offering price per unit to the public in this offering. Upon entering into the 2019 Purchase Agreement, the Company drew an initial \$500,000 under the Debenture and in accordance with the 2019 Purchase Agreement, Acuitas received an additional 125,000 warrants (the "Bridge Warrants") having the same terms as the Commitment Warrants. Any future draws under the Debenture, which may be made from and after October 15, 2019, November 15, 2019 and December 15, 2019 in equal tranches of \$500,000 each, will entitle Acuitas to receive additional Bridge Warrants in equal amount upon such funding. In addition, the 2019 Purchase Agreement provides that, should the underwriters in this offering exercise their option to purchase additional securities during the 45 days following closing and the issuance of such securities would result in Acuitas' beneficial ownership (on a fully diluted basis) of shares of common stock being below 60%, Acuitas shall be issued a number of additional shares of common stock and warrants having the same terms as the Commitment Warrants to result in its beneficial ownership (on a fully diluted basis) of shares of common stock equaling 60%.

The issuance of 1,125,000 shares of the Company's common stock and warrants to purchase an equal amount number of shares, to its controlling stockholder for the Bridge Financing was accounted for as a deemed dividend due to its related party nature and \$17.1 million representing the excess of the fair value of the consideration given for the financing, net of debt discount; was recorded in accumulated deficit for the year ended June 30, 2020, accordingly. (See accompanying Statements of Changes in Stockholders' (Deficit) Equity). A debt discount of \$500,000 against the debenture was recorded which will be amortized over the term of the debenture using the effective interest method. The Company recognized amortization of the discount for the year ended June 30, 2020 of \$37,126.

The Company received draws under the Debenture that totaled \$1.3 million during the year ended June 30, 2020. The total interest expense related to the draws under the Debenture was approximately \$99,000 for the year ended June 30, 2020. On April 1, 2020 the Company entered into an amendment to modify the payment of accrued interest amounts under the original terms of the Debenture to capitalize all such amounts as would otherwise accrue on the Debenture. On January 4, 2020, payment of \$13,487 accrued interest due was paid through the issuance of 4,422 shares of the Company's common stock. Acuitas and the Company continue to discuss the need and timing for some or all the remaining draws under the Debenture Agreement. Subsequent to the initial \$500,000 draw on September 24, 2019, the Company received draws that totaled \$813,000 as July 13, 2020, and accordingly; the Company issued additional Bridge Warrants to purchase 203,250 shares of common stock to its controlling stockholder under the terms of the Bridge Financing.

On July 14, 2020, the Company, entered into a further extension of its letter agreements dated April 8, 2020, that furthered extended its letter agreement dated February 10, 2020 with Acuitas regarding Acuitas' previous agreement to modify its existing rights under the Purchase Agreement dated July 3, 2018 with the Company so that its June 2019 waiver of its rights to a 50% adjustment of the purchase price applicable to its initial investment in the Company and the exercise price of the warrants received in such transaction and the price per share should it exercise certain rights to purchase additional securities in the event of certain reductions in the useful life of the Company's intellectual property rights and commitment to purchase such securities upon the closing of the Company's planned public offering of shares of Class A common stock (the "Common Stock") as described in its Registration Statement on Form S-1 (File No. 333-231136) and commitment to purchase such additional securities would remain effective until October 31, 2020, and accordingly Acuitas shall be entitled to receive an aggregate of 5,359,832 shares of Common Stock at such closing. In addition, the parties agreed that certain draws under the Company's current bridge financing with Acuitas were to be made based with respect to the Company's ongoing capital requirements and current market conditions, notwithstanding certain scheduled availability dates set forth in the 10% OID Convertible Delayed Draw Debenture issued in connection therewith. The letter agreement of July 14, 2020 also confirmed the understanding between the Company and Acuitas regarding certain amounts funded to BioVie that were intended as "partial draws" of credit available under the Debenture which, as of the date hereof aggregated \$813,000 in aggregate principal amount in addition to amounts initial funded under the Debenture. Accordingly, such "partial draws" shall accrue additional principal as amounts otherwise funded pursuant to the original schedule of draws included in the Debenture (as modified by the letter agreement between BioVie and Acuitas dated April 1, 2020 regarding the capitalization of interest otherwise payable) and shall entitle Acuitas to receive a pro rata amount of Bridge Warrants. Subsequent to June 30, 2020, the company received additional draws totaling \$170,000 under the Debenture. The total amount of draws outstanding at August 3, 2020 was \$1,433,000. See Note 11 Subsequent Event to the accompanying annual financial statements.)

Pursuant to the 2019 Purchase Agreement, Acuitas has agreed to further modify its existing rights under the Purchase Agreement dated July 3, 2018 with the Company so that Acuitas' previous agreement in June 2019 to waive its rights to a 50% adjustment of the purchase price of the Preferred Stock in the July 2018 transaction, the exercise price of the warrants in such transaction and the price per share in a Subsequent Sale in the event of certain reductions in the useful life of our current intellectual property rights, and effectively exercise its rights to purchase securities in a Subsequent Sale pursuant to a "cashless purchase" at an assumed current market price of approximately \$11.25 per share, conditioned in each case on the listing of the Company's common stock on Nasdaq or the raising of \$2.0 million in additional funds in the form of another securities offering, in either case not later than November 30, 2019, such that Acuitas will have irrevocably waived its rights to an adjustment in the purchase price of the Preferred Stock in the Initial Sale and the exercise price of the Warrants and the purchase price of per share in the Subsequent Sale upon the issuance by us of an aggregate of 2,679,916 shares of common stock and 2,679,916 warrants having the same terms as the Commitment Warrants to Acuitas, which is currently expected with the closing of this offering.

Pursuant to an amendment to the 2019 Purchase Agreement dated October 9, 2019, Acuitas agreed to modify its existing rights under the 2019 Purchase Agreement so that:

- The Commitment Warrants (and related warrants issued upon the first draw under the Debenture) were replaced with warrants having similar terms, but which are automatically exercised upon the closing of this offering at an exercise price equal to the par value of the common stock;
- Acuitas' existing rights under the Purchase Agreement dated July 3, 2018 with the Company were further amended so that the number of Subsequent Sale Shares would be multiplied by four (in lieu of the changes to the Purchase Agreement originally provided for in the 2019 Purchase Agreement); and
- The provisions of the 2019 Purchase Agreement providing that, should the underwriters in this offering exercise their option to purchase additional securities during the 45 days following closing and the issuance of such securities would result in Acuitas' beneficial ownership (on a fully diluted basis) of shares of common stock being below 60%, Acuitas will be issued a number of additional shares of common stock and warrants having the same terms as the Commitment Warrants to result in its beneficial ownership (on a fully diluted basis) of shares of common stock equaling 60% have been modified such that, upon the exercise of such option by the underwriters, the Company will issue to Acuitas a number of securities that will result in Acuitas' fully diluted beneficial ownership after the exercise of such option being the same as prior thereto.

Issuance of Shares in Settlement of Debt

During the fiscal year ended June 30, 2019, we settled \$1,475,765 of debt including \$1,313,765 owed to related parties, by issuing 7,803 shares of common stock with a fair value of \$1,150,135. See Notes 5 and 6 to the financial statements for the fiscal years ended June 30, 2019 and 2018, appearing elsewhere in this prospectus.

DESCRIPTION OF CAPITAL STOCK

The following description of our capital stock and provisions of our Articles of Incorporation, bylaws and the Nevada corporations law are summaries and are qualified in their entirety by reference to our Articles of Incorporation and our bylaws. We have filed copies of these documents with the SEC as exhibits to the Registration Statement of which this prospectus forms a part. Pursuant to our Articles of Incorporation, as amended, our authorized capital stock consists of 800,000,000 shares of Class A common stock, par value of \$0.0001 per share (which we refer to as our common stock), and 10,000,000 shares of preferred stock, par value \$0.001 per share, to be designated from time to time by our Board of Directors.

Common Stock

We are authorized to issue up to 800,000,000 shares of Class A common stock, par value \$0.0001 per share. Each outstanding share of common stock entitles the holder thereof to one vote per share on all matters. Our bylaws provide that elections for directors shall be by a plurality of votes. Stockholders do not have preemptive rights to purchase shares in any future issuance of our common stock. Upon our liquidation, dissolution or winding up, and after payment of creditors and preferred stockholders, if any, our assets will be divided pro-rata on a share-for-share basis among the holders of the shares of common stock.

The holders of shares of our common stock are entitled to dividends out of funds legally available when and as declared by our Board of Directors. Our Board of Directors has never declared a dividend and does not anticipate declaring a dividend in the foreseeable future.

All of the issued and outstanding shares of our common stock are duly authorized, validly issued, fully paid and non-assessable. To the extent that additional shares of our common stock are issued, the relative interests of existing stockholders will be diluted.

As of September 15, 2020, there were 5,206,602 shares of our common stock outstanding.

Preferred Stock

We are authorized to issue up to 10,000,000 shares of preferred stock, par value \$0.001 per share, in one or more classes or series within a class as may be determined by our Board of Directors, who may establish, from time to time, the number of shares to be included in each class or series, may fix the designation, powers, preferences and rights of the shares of each such class or series and any qualifications, limitations or restrictions thereof. Any preferred stock so issued by the Board of Directors may rank senior to the common stock with respect to the payment of dividends or amounts upon liquidation, dissolution or winding up of us, or both. Moreover, under certain circumstances, the issuance of preferred stock or the existence of the unissued preferred stock might tend to discourage or render more difficult a merger or other change of control.

As of September 15, 2020, there were no shares of our preferred stock outstanding.

Anti-Takeover Effects of Our Articles of Incorporation and Bylaws

Our Articles of Incorporation and bylaws contain certain provisions that may have anti-takeover effects, making it more difficult for or preventing a third party from acquiring control of us or changing our Board of Directors and management. According to our Articles of Incorporation and bylaws, neither the holders of our common stock nor the holders of any preferred stock we may issue in the future have cumulative voting rights in the election of our directors. The combination of the present ownership by a few stockholders of a significant portion of our issued and outstanding common stock and lack of cumulative voting makes it more difficult for other stockholders to replace our Board of Directors or for a third party to obtain control of us by replacing our Board of Directors.

Anti-Takeover Effects of Nevada Law

Business Combinations

The “business combination” provisions of Sections 78.411 to 78.444, inclusive, of the Nevada Revised Statutes, or NRS, generally prohibit a Nevada corporation with at least 200 stockholders from engaging in various “combination” transactions with any interested stockholder for a period of two years after the date of the transaction in which the person became an interested stockholder, unless the transaction is approved by the board of directors prior to the date the interested stockholder obtained such status or the combination is approved by the board of directors and thereafter is approved at a meeting of the stockholders by the affirmative vote of stockholders representing at least 60% of the outstanding voting power held by disinterested stockholders, and extends beyond the expiration of the two-year period, unless:

- the combination was approved by the board of directors prior to the person becoming an interested stockholder or the transaction by which the person first became an interested stockholder was approved by the board of directors before the person became an interested stockholder or the combination is later approved by a majority of the voting power held by disinterested stockholders; or
- if the consideration to be paid by the interested stockholder is at least equal to the highest of: (a) the highest price per share paid by the interested stockholder within the two years immediately preceding the date of the announcement of the combination or in the transaction in which it became an interested stockholder, whichever is higher, (b) the market value per share of common stock on the date of announcement of the combination and the date the interested stockholder acquired the shares, whichever is higher, or (c) for holders of preferred stock, the highest liquidation value of the preferred stock, if it is higher.

A “combination” is generally defined to include mergers or consolidations or any sale, lease exchange, mortgage, pledge, transfer, or other disposition, in one transaction or a series of transactions, with an “interested stockholder” having: (a) an aggregate market value equal to 5% or more of the aggregate market value of the assets of the corporation, (b) an aggregate market value equal to 5% or more of the aggregate market value of all outstanding shares of the corporation, (c) 10% or more of the earning power or net income of the corporation, and (d) certain other transactions with an interested stockholder or an affiliate or associate of an interested stockholder.

In general, an “interested stockholder” is a person who, together with affiliates and associates, owns (or within two years, did own) 10% or more of a corporation’s voting stock. The statute could prohibit or delay mergers or other takeover or change in control attempts and, accordingly, may discourage attempts to acquire our Company even though such a transaction may offer our stockholders the opportunity to sell their stock at a price above the prevailing market price.

Control Share Acquisitions

The “control share” provisions of Sections 78.378 to 78.3793, inclusive, of the NRS apply to “issuing corporations” that are Nevada corporations with at least 200 stockholders, including at least 100 stockholders of record who are Nevada residents, and that conduct business directly or indirectly in Nevada. The control share statute prohibits an acquirer, under certain circumstances, from voting its shares of a target corporation’s stock after crossing certain ownership threshold percentages, unless the acquirer obtains approval of the target corporation’s disinterested stockholders. The statute specifies three thresholds: one-fifth or more but less than one-third, one-third but less than a majority, and a majority or more, of the outstanding voting power. Generally, once an acquirer crosses one of the above thresholds, those shares in an offer or acquisition and acquired within 90 days thereof become “control shares” and such control shares are deprived of the right to vote until disinterested stockholders restore the right. These provisions also provide that if control shares are accorded full voting rights and the acquiring person has acquired a majority or more of all voting power, all other stockholders who do not vote in favor of authorizing voting rights to the control shares are entitled to demand payment for the fair value of their shares in accordance with statutory procedures established for dissenters’ rights.

A corporation may elect to not be governed by, or “opt out” of, the control share provisions by making an election in its articles of incorporation or bylaws, provided that the opt-out election must be in place on the 10th day following the date an acquiring person has acquired a controlling interest, that is, crossing any of the three thresholds described above. We have not opted out of the control share statutes, and will be subject to these statutes if we are an “issuing corporation” as defined in such statutes.

The effect of the Nevada control share statutes is that the acquiring person, and those acting in association with the acquiring person, will obtain only such voting rights in the control shares as are conferred by a resolution of the stockholders at an annual or special meeting. The Nevada control share law, if applicable, could have the effect of discouraging takeovers of our Company.

Trading Market

Prior to this offering, there has been a limited public market for our common stock on the OTCQB Marketplace under the ticker “BIVI.” Our common stock has been approved for listing on Nasdaq upon the completion of this offering under the symbol “BIVI”.

Transfer Agent and Registrar

Our independent stock transfer agent is West Coast Stock Transfer, Inc., located at 721 N. Vulcan Ave., Suite 106, Encinitas, California 92024. Their phone number is (619) 664-4780.

Disclosure of Commission Position on Indemnification for Securities Act Liabilities

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers and controlling persons pursuant to the foregoing provisions, we have been informed that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

UNDERWRITING

We have entered into an underwriting agreement with ThinkEquity, a division of Fordham Financial Management, Inc. and Kingswood Capital Markets, a division of Benchmark Investments, Inc. (the "Representatives"), collectively as representatives of the underwriters named below, with respect to the offering of shares of our common stock. Representatives are the sole book running manager for the offering. Subject to the terms and conditions of an underwriting agreement between us and the Representatives, we have agreed to sell to the underwriters, and the underwriters have agreed to purchase, at the public offering price less the underwriting discounts set forth on the cover page of this prospectus, the number of shares of common stock listed next to its name in the following table:

Name of Underwriter	Number of Shares
ThinkEquity, a division of Fordham Financial Management, Inc.	782,600
Kingswood Capital Markets, division of Benchmark Investments, Inc.	782,600
Total	1,565,200

The underwriters are committed to purchase all the securities offered by this prospectus. The underwriters are not obligated to purchase the shares covered by the underwriter's over-allotment option described below. The underwriters are offering the shares of our common stock, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, and other conditions contained in the underwriting agreement, such as the receipt by the underwriters of customary officer's certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

Over-Allotment Option

We have to the underwriters an option, exercisable no later than 45 calendar days after the date of the underwriting agreement, to purchase up to 234,780 additional shares of common stock at the public offering price listed on the cover page of this prospectus, less underwriting discounts and commissions. The underwriters may exercise this option only to cover over-allotments, if any, made in connection with this offering. To the extent the option is exercised and the conditions of the underwriting agreement are satisfied, we will be obligated to sell to the underwriters, and the underwriters will be obligated to purchase, these additional securities.

Representatives' Warrants

We have agreed to grant to Representatives warrants to purchase a number of shares equal to five percent (5%) of the total number of shares of common stock sold in this offering at an exercise price equal to 125% of the price per share sold in this offering. The warrants (the "Representative's Warrants") will contain a cashless exercise feature. Each Representatives' Warrant is exercisable for one share of common stock on a cash or cashless basis at an exercise price of \$12.50 per share (or 125% of the price of each share of common stock sold in the offering). The Representatives' Warrants will be non-exercisable for one hundred eighty (180) days after the closing of this offering, and will expire five (5) years after the effective date of the registration statement for this offering (the "Effective Date"). The Representatives' Warrants may not be sold, transferred, assigned, pledged, or hypothecated or be the subject of any hedging, short sale, derivative, put or call transaction that would result in the effective economic disposition of such securities for a period for 180 days after the Effective Date except as permitted by FINRA Rule 5110(g)(2). The Representatives' Warrants provide for cashless exercise and will contain provisions for one-time demand and unlimited "piggyback" registration rights for a period of five (5) years after the effective date of the Registration Statement at our expense.

The number of Representatives' Warrants outstanding, and the exercise price of those securities, will be adjusted proportionately, as permitted by FINRA Rule 5110(f)(2)(G).

Discounts and Commissions

We have agreed to (i) pay the underwriters a cash fee equal to seven percent (7%) of the aggregate gross proceeds raised in this offering plus a one percent (1%) nonaccountable expense; and (ii) grant the Representatives warrants to purchase that number of shares of our common stock equal to an aggregate of up to five percent (5%) of the shares of common stock sold in the offering (or 89,999 shares, assuming the over-allotment option is fully exercised). Such Representatives' warrants shall have an exercise price equal to \$12.50 per share, which is 125% of the public offering price, and terminate five years after the Effective Date. The representatives' warrants will not be subject to redemption by the Company. Such Representatives' warrants will be subject to FINRA Rule 5110(g)(1) in that, except as otherwise permitted by FINRA rules, for a period of 180 days following the Effective Date, the representatives' warrants shall not be sold, transferred, assigned, pledged, or hypothecated, or the subject of any hedging, short sale, derivative, put, or call transaction that would result in the effective economic disposition of the securities by any person.

The underwriters have advised us that they propose to offer the shares of common stock directly to the public at the public offering price set forth on the cover of this prospectus. In addition, the underwriters may offer some of the shares to other securities dealers at such price less a concession of up to \$0.40 per share of which \$0.00 may be reallocated to other dealers. After the offering to the public, the offering price and other selling terms may be changed by the underwriters without changing the Company's proceeds from the underwriter's purchase of the securities.

The following table summarizes the public offering price, underwriting commissions and proceeds before expenses to us assuming both no exercise and full exercise of the underwriters' option to purchase additional shares of common stock. The underwriting commissions are equal to the public offering price per share less the amount per share the underwriter pays us for the shares.

	<u>Per Share⁽¹⁾</u>	<u>Total Without Over Allotment</u>	<u>Total With Over Allotment</u>
Public offering price	\$ 10.00	\$ 15,652,000	\$ 17,999,800
Underwriting discounts and commissions	\$ 0.70	\$ 1,095,640	\$ 1,259,986
Proceeds, before expenses, to us	\$ 9.30	\$ 14,556,360	\$ 16,739,814

(1) The fees shown do not include the warrants to purchase shares of common stock issuable to the Representatives at closing.

We estimate that the total expenses of the offering, including registration, filing and listing fees, printing fees and legal and accounting expenses, but excluding underwriting discounts and commissions, will be approximately \$1,056,520, all of which are payable by us. This figure includes expense reimbursements we have agreed to pay the Representatives for reimbursement of their expenses related to the offering, up to a maximum of \$150,000. The Company has paid a \$50,000 advance to Kingswood Capital Markets for out-of-pocket expenses, which will be applied against the accountable expense allowance and will be returned to the extent not actually incurred.

Right of First Refusal

The Company will grant to Representatives an irrevocable right of first refusal for any common equity financing of \$50 million or less to act as sole investment banker, sole book-runner and/or sole placement agent, at Representatives' sole discretion, for each and every future public and private equity and debt offering, including all equity linked financings, during such twelve (12) month period for the Company, or any successor to or any subsidiary of the Company, on terms customary to Representatives. Representatives shall have the sole right to determine whether or not any other broker dealer shall have the right to participate in any such offering and the economic terms of any such participation. For any deal greater than \$50 million for which the Representatives are not the lead manager, the company will designate the Representatives as a co-manager with a total economics of 30%.

Lock-Up Agreements

We, each of officers, directors, and all of our 5% or greater stockholders have agreed, subject to certain exceptions, not to sell, offer, agree to sell, contract to sell, hypothecate, pledge, grant any option to purchase, make any short sale of, or otherwise dispose of or hedge, directly or indirectly, any shares of our capital stock or any securities convertible into or exercisable or exchangeable for shares of capital stock, for a period of (i) six (6) months after the date of this prospectus in the case of our directors and officers and (ii) three (3) months after the date of this prospectus in the case of the Company and any other 5% or greater holder of our outstanding securities, without the prior written consent of the Representatives.

The Representatives have no present intention to waive or shorten the lock-up period; however, the terms of the lock-up agreements may be waived at its discretion. In determining whether to waive the terms of the lockup agreements, the Representatives may base their decision on its assessment of the relative strengths of the securities markets and companies similar to ours in general, and the trading pattern of, and demand for, our securities in general.

Indemnification

We have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act, and to contribute to payments that the underwriters may be required to make for these liabilities.

Price Stabilization, Short Positions, and Penalty Bids

In connection with this offering, each underwriter may engage in transactions that stabilize, maintain or otherwise affect the price of our securities. Specifically, such underwriter may over-allot in connection with this offering by selling more securities than are set forth on the cover page of this prospectus. This creates a short position in our securities for such underwriter's own accounts. The short position may be either a covered short position or a naked short position. In a covered short position, the number of securities over-allotted by such underwriter is not greater than the number of securities that it may purchase in the over-allotment option. In a naked short position, the number of securities involved is greater than the number of securities in the over-allotment option. To close out a short position, such underwriter may elect to exercise all or part of the over-allotment option. Such underwriter may also elect to stabilize the price of our securities or reduce any short position by bidding for, and purchasing, securities in the open market.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter or dealer repays selling concessions allowed to it for distributing a security in this offering because the underwriter repurchases that security in stabilizing or short covering transactions.

Finally, each underwriter may bid for, and purchase, shares of our securities in market-making transactions, including "passive" market-making transactions as described below.

These activities may stabilize or maintain the market price of our securities at a price that is higher than the price that might otherwise exist in the absence of these activities. The underwriters are not required to engage in these activities, and may discontinue any of these activities at any time without notice. These transactions may be effected on NASDAQ, in the over-the-counter market, or otherwise.

In connection with this offering, the underwriters and selling group members, if any, or their affiliates may engage in passive market-making transactions in our common stock immediately prior to the commencement of sales in this offering, in accordance with Rule 103 of Regulation M under the Exchange Act. Rule 103 generally provides that:

- a passive market maker may not effect transactions or display bids for our securities in excess of the highest independent bid price by persons who are not passive market makers;
- net purchases by a passive market maker on each day are generally limited to 30% of the passive market maker's average daily trading volume in our common stock during a specified two-month prior period or 200 shares, whichever is greater, and must be discontinued when that limit is reached; and
- passive market-making bids must be identified as such.

Electronic Distribution

This prospectus in electronic format may be made available on websites or through other online services maintained by the underwriters, or by their affiliates. Other than this prospectus in electronic format, the information on the underwriters' websites and any information contained in any other websites maintained by an underwriter is not part of this prospectus or the registration statement of which this prospectus forms a part, has not been approved and/or endorsed by us or the underwriters in their capacity as underwriter, and should not be relied upon by investors.

Other than the prospectus in electronic or printed format, the information on the underwriters' website and any information contained in any other website maintained by an underwriter is not part of the prospectus or the registration statement of which this prospectus forms a part, has not been approved and/or endorsed by us or the underwriters in their capacity as underwriters and should not be relied upon by investors.

Certain Relationships

The underwriters and their affiliates may provide, from time to time, investment banking and financial advisory services to us in the ordinary course of business, for which it may receive customary fees and commissions.

Offers Outside the United States

Other than in the United States, no action has been taken by us or the underwriters that would permit a public offering of the securities offered by this prospectus in any jurisdiction where action for that purpose is required. The securities offered by this prospectus may not be offered or sold, directly or indirectly, nor may this prospectus or any other offering material or advertisements in connection with the offer and sale of any such securities be distributed or published in any jurisdiction, except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus comes are advised to inform themselves about and to observe any restrictions relating to the offering and the distribution of this prospectus. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy any securities offered by this prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

EXPERTS

The balance sheets of BioVie Inc. as of June 30, 2020 and 2019, and the related statements of operations, changes in stockholders' equity (deficit), and cash flows for the years then ended., have been audited by EisnerAmper LLP, independent registered public accounting firm, as stated in their report which is incorporated herein, which report includes an explanatory paragraph about the existence of substantial doubt concerning the Company's ability to continue as a going concern. Such financial statements have been incorporated herein in reliance on the report of such firm given upon their authority as experts in accounting and auditing.

LEGAL MATTERS

Loeb & Loeb LLP, Los Angeles, California will pass upon the validity of the securities offered hereby. Certain matters are being passed on for the underwriters by Jolie Kahn, Esq., New York, New York.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the securities offered by this prospectus. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement, some of which is contained in exhibits to the registration statement as permitted by the rules and regulations of the SEC. For further information with respect to us and our securities, we refer you to the registration statement, including the exhibits filed as a part of the registration statement. Statements contained in this prospectus concerning the contents of any contract or any other document is not necessarily complete. If a contract or document has been filed as an exhibit to the registration statement, please see the copy of the contract or document that has been filed. Each statement in this prospectus relating to a contract or document filed as an exhibit is qualified in all respects by the filed exhibit. The SEC maintains an Internet website that contains reports, proxy statements and other information about issuers, like us, that file electronically with the SEC. The address of that website is www.sec.gov.

We are subject to the information and reporting requirements of the Securities Exchange Act of 1934, as amended, and, in accordance with this law, file periodic reports, proxy statements and other information with the SEC. These periodic reports, proxy statements and other information are available on the website of the SEC referred to above.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
BioVie, Inc.

Opinion on the Financial Statements

We have audited the accompanying balance sheets of BioVie, Inc. (the "Company") as of June 30, 2020 and 2019 and the related statements of operations, changes in stockholders' equity (deficit), and cash flows for the years then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of June 30, 2020 and 2019, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company's recurring losses from operations and negative cash flows from operating activities raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audit, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ EisnerAmper LLP

We have served as the Company's auditor since 2019.

The accompanying notes are an integral part of the financial statements.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

1. Background Information

BioVie Inc. (the "Company") is a clinical-stage company pursuing the discovery, development, and commercialization of innovative drug therapies. We are currently focused on developing and commercializing BIV201 (continuous infusion terlipressin), a novel approach to the treatment of ascites due to chronic liver cirrhosis. Our therapy BIV201 is based on a drug that is approved in about 40 countries to treat related complications of liver cirrhosis (part of the same disease pathway as ascites), but not yet available in the United States. BIV201's active agent is a potent vasoconstrictor and has shown efficacy for reducing portal hypertension in studies around the world. The goal is for BIV201 to interrupt the ascites disease pathway, thereby halting the cycle of accelerating fluid generation in ascites patients.

BioVie began administering BIV201 to patients in a Phase 2a clinical trial in patients with refractory ascites due to advanced liver cirrhosis at the McGuire Research Institute Inc. in Richmond, VA in September 2017. In April 2019, we announced top-line results and in June met with representatives of the FDA for a Type C Guidance Meeting to discuss the study results and plan our next clinical study. In July 2019, the FDA provided meeting minutes for the Company's proposed randomized and controlled study design. In September we requested a Type B Meeting and subsequently submitted an extensive pre-meeting information package. In April 2020, the FDA provided a written response that provided new guidance regarding primary and secondary endpoints, BIV201 dosing levels, quality of life measures and other key aspects of the clinical trial design. In May 2020 they answered certain follow-up questions enabling the Company to complete the Phase 2 clinical trial protocol which will be finalized soon. The Phase 2 study will be used to guide the design of a pivotal Phase 3 clinical trial. We are developing a patent-pending novel liquid formulation of terlipressin for use in this study that is intended to improve convenience for outpatient administration and avoid potential formulation errors that may occur when pharmacists reconstitute the powder version.

BIV201 has the potential to improve the health of thousands of patients suffering from life-threatening complications of liver cirrhosis due to hepatitis, nonalcoholic steatohepatitis (NASH), and alcoholism. It has FDA Fast-Track status and Orphan Drug designation for the most common of these complications, ascites, which represents a significant unmet medical need. An Orphan drug that is first-to-market typically receives 7 years of market exclusivity in the United States for the designated use(s). The FDA has never approved any drug specifically for treating ascites. In addition, the Company has a pending patent application directed to proprietary liquid formulations of terlipressin for use in its planned Phase 2 and Phase 3 clinical trials, subject to FDA clearance, which could eventually provide up to 20 years of patent coverage in each country in which the Company seeks patent protection, such as the United States, if a patent issues according to the patent laws of the issuing country.

The BIV201 development program began at LAT Pharma LLC. On April 11, 2016, the Company acquired LAT Pharma LLC and the rights to its BIV201 development program. The Company currently owns all development and marketing rights to its drug candidate. The Company and PharmaIN, Corp. ("PharmaIN"), LAT Pharma's former partner focused on the development of new modified drug candidates in the same therapeutic field but not including BIV201, had agreed to pay royalties equal to less than 1% of future net sales of each company's ascites drug development programs, or if such program is licensed to a third party, less than 5% of each company's net license revenues. On December 24, 2018, the Company returned its partial ownership rights to the PharmaIN modified terlipressin development program and simultaneously paid the remaining balance due on a related debt. PharmaIN, Corp.'s rights to our program remain unchanged.

The Company's activities are subject to significant risks and uncertainties including failure to secure additional funding to properly execute the Company's business plan.

On November 22, 2019, the Company effected the reverse stock split of 125 common stock for every 1 common stock. All share amounts have been updated to reflect the reverse stock split. The stock split was related to the Company's planned up listing to NASDAQ Stock Market and potential future issuance and sales of our equity securities for ordinary corporate finance and general corporate purposes.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

2. Liquidity and Going Concern

The Company's operations are subject to a number of factors that can affect its operating results and financial conditions. Such factors include, but are not limited to: the results of clinical testing and trial activities of the Company's products, the Company's ability to obtain regulatory approval to market its products, competition from products manufactured and sold or being developed by other companies, the price of, and demand for, Company products, the Company's ability to negotiate favorable licensing or other manufacturing and marketing agreements for its products, and the Company's ability to raise capital. The Company's financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. As of June 30, 2020, the Company had an accumulated deficit of approximately \$41 million. In addition, the Company has not generated any revenues and no revenues are expected in the foreseeable future. The Company's future operations are dependent on the success of the Company's ongoing development and commercialization effort, as well as continuing to secure additional financing.

On September 24, 2019, the Company entered into a Securities Purchase Agreement with its controlling stockholder regarding bridge financing (the "Bridge Financing") in the form of up to \$2.0 million in convertible debt and warrants, of which approximately \$1.3 million has been drawn and reflected in the amount of \$848,543, net of unearned discount of \$462,864 as Convertible debenture - related party in the accompanying balance sheet at June 30, 2020. Amounts borrowed under the Bridge Financing must be repaid with the proceeds of our potential public offering of equity securities referred to below. The availability of additional draws under the Bridge Financing is under further discussion with the controlling stockholder in light of delays in the timing of the potential public offering. As further discussed below, the Company is pursuing various options to raise further financing to continue the testing and development of its product. If the Company is not successful in raising additional funds it may reduce its monthly spend and potentially delay the implementation of the larger scale Phase 2 and Phase 3 clinical trials until sufficient funding is secured.

The future viability of the Company is largely dependent upon its ability to raise additional capital to finance its operations. Management expects that future sources of funding may include sales of equity, obtaining loans, or other strategic transactions. The emergence of widespread health emergencies or pandemics, such as coronavirus ("COVID-19"), may lead to continued regional quarantines, business shutdowns, labor shortages, disruptions to supply chains, and overall economic instability, including the duration and spread of the outbreak and restrictions and the impact of COVID-19 on the financial markets and the overall economy, all of which are highly uncertain and cannot be predicted. If the financial markets and/or the overall economy continue to be impacted for an extended period, the Company's ability to raise funds may be materially adversely affected.

Although management continues to pursue these plans, there is no assurance that the Company will be successful in obtaining sufficient financing on terms acceptable to the Company, if at all, to fund continuing operations. These circumstances raise substantial doubt on the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

3. Significant Accounting Policies

Basis of Presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") and include all adjustments necessary for the fair presentation of the Company's financial position for the periods presented.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The Company bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances. The amounts of assets and liabilities reported in the Company's balance sheet and the amounts of expenses reported for each of the periods presented are affected by estimates and assumptions, which are used for, but not limited to, accounting for share-based compensation, accounting for derivatives and accounting for income taxes. Actual results could differ from those estimates.

Cash

The Company considers all highly liquid instruments with original maturities of three months or less to be cash equivalents. Cash is maintained at one financial institution and, at times, balances may exceed federally insured limits. The Company has never experienced any losses related to these balances.

Other Assets

Other assets consists of direct costs related to capital raise and filing of the registration statement legal fees and investment banking fees incurred to raise capital. The costs will be offset against proceeds received once the Company raises the capital.

Fair Value of Financial Instruments

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value for applicable assets and liabilities, we consider the principal or most advantageous market in which we would transact and we consider assumptions market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance. This guidance also establishes a fair value hierarchy to prioritize inputs used in measuring fair value as follows:

- Level 1: Observable inputs such as quoted prices in active markets;
- Level 2: Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

3. Significant Accounting Policies (continued)

The Company's financial instruments include cash, accounts payable, related party loans and a demand promissory note. The carrying amounts of cash and accounts payable approximate their fair value, due to the short-term nature of these items.

Loan Pursuant to Paycheck Protection Program

The Company received \$62,500 in loan proceeds pursuant to the Paycheck Protection Program ("PPP"), under the Coronavirus Aid Relief and Economic Security (CARES) Act. The PPP Loan is evidenced by a loan application and payment agreement by and between the Company and Lender. The Company applied for the loan in May 2020 and received funding for its maximum amount of \$62,500 on May 21, 2020. The term of the loan is for 60 months and matures on the fifth year anniversary from the date of funding. It bears interest at an annual rate of 1%. The PPP is subject to 100% forgiveness. Currently, the application process to apply forgiveness occurs 24 weeks after the funding date. The Company intends to file the application for forgiveness, accordingly, unless the pending outcome of a new ruling is approved that forgives all the PPP loans under \$160,000. There can be no assurance that such forgiveness will occur. The Company is accounting for the loan as debt and if forgiveness is granted the Company will recognize a gain on extinguishment.

Research and Development

Research and development expenses consist primarily of costs associated with the preclinical and/ or clinical trials of drug candidates, compensation and other expenses for research and development, personnel, supplies and development materials, costs for consultants and related contract research and facility costs. Expenditures relating to research and development are expensed as incurred.

Income Taxes

The Company uses the asset and liability method of accounting for deferred income taxes. Deferred income taxes are measured by applying enacted statutory rates to net operating loss carryforwards and to the differences between the financial reporting and tax bases of assets and liabilities. Deferred tax assets are reduced, if necessary, by a valuation allowance if it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The Company recognizes uncertainty in income taxes in the financial statements using a recognition threshold and measurement attribute of a tax position taken or expected to be taken in a tax return. The Company applies the "more-likely-than-not" recognition threshold to all tax positions, commencing at the adoption date of the applicable accounting guidance, which resulted in no unrecognized tax benefits as of such date. Additionally, there have been no unrecognized tax benefits subsequent to adoption. The Company has opted to classify interest and penalties that would accrue, if any, according to the provisions of relevant tax law as general and administrative expenses, in the statements of operations. For the years ended June 30, 2020 and 2019 there was no such interest or penalty.

Net Loss per Common Share

Basic net loss per common share is computed by dividing the net loss before deemed dividend by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding and potentially outstanding shares of common stock during the period to reflect the potential dilution that could occur from common shares issuable through stock options, warrants, convertible preferred stock and convertible debentures. Due to the net loss for the period, such amounts were excluded from the diluted loss since their effect was considered anti-dilutive.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

3. Significant Accounting Policies (continued)

The table below shows the number of outstanding stock options and warrants as of June 30, 2020 and June 30, 2019:

	June 30, 2020	June 30, 2019
	Number of Shares	Number of Shares
Stock Options	60,400	58,000
Warrants	1,374,667	124,667
Total	1,435,067	182,667

Stock-based Compensation

The Company has accounted for stock-based compensation under the provisions of FASB ASC 718 – “Stock Compensation” which requires the use of the fair-value based method to determine compensation for all arrangements under which employees and others receive shares of stock or equity instruments (stock options and common stock purchase warrants). For employee awards, the fair value of each stock option award is estimated on the date of grant using the Black-Scholes valuation model that uses assumptions for expected volatility, expected dividends, expected term, and the risk-free interest rate. For non-employees, the fair value of each stock option award is estimated on the measurement date using the Black-Scholes valuation model that uses assumptions for expected volatility, expected dividends, expected term, and the risk-free interest rate. For non-employees, the Company utilizes the graded vesting attribution method under which the entity treats each separately vesting portion (tranche) as a separate award and recognizes compensation cost for each tranche over its separate vesting schedule. Expected volatilities are based on historical volatility of peer companies and other factors estimated over the expected term of the stock options. For employee awards, the expected term of options granted is derived using the “simplified method” which computes expected term as the average of the sum of the vesting term plus the contract term. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for the period of the expected term. We recognize forfeitures as they occur.

Goodwill

Goodwill is recorded when the purchase price paid for an acquisition exceeds the fair value of net identified tangible and intangible assets acquired. The Company performs an annual impairment test of goodwill and further periodic tests to the extent indicators of impairment develop between annual impairment tests. The Company’s impairment review process compares the fair value of the reporting unit to its carrying value, including the goodwill related to the reporting unit. To determine the fair value of the reporting unit, the Company may use various approaches including an asset or cost approach, market approach or income approach or any combination thereof. These approaches may require the Company to make certain estimates and assumptions including future cash flows, revenue and expenses. These estimates and assumptions are reviewed each time the Company tests goodwill for impairment and are typically developed as part of the Company’s routine business planning and forecasting process. While the Company believes its estimates and assumptions are reasonable, variations from those estimates could produce materially different results. The Company did not recognize any goodwill impairments for the years ended June 30, 2020 and 2019.

BioVie Inc.
Notes to Financial Statements

3. Significant Accounting Policies (continued)

Impairment of Long-Lived Assets

Long-lived assets, including intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset.

If the carrying amount of an asset exceeds its undiscounted estimated future cash flows, an impairment review is performed. An impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. Generally, fair value is determined using valuation techniques such as expected discounted cash flows or appraisals, as appropriate. Assets to be disposed of would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated or amortized. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet.

Reclassifications

Certain prior year amounts have been reclassified for consistency with current year presentation. These reclassifications had no effect on the reported results of operations.

Recent accounting pronouncements

The Company considers the applicability and impact of all Accounting Standard Updates ("ASU's"). ASU's not discussed below were assessed and determined to be either not applicable or expected to have minimal impact on our balance sheets or statement of operations.

In June 2018, the FASB issued ASU 2018-07, "Compensation – Stock Compensation (Topic 718): Improvements to Non-employee Share-Based Accounting". This guidance aligns the accounting for share-based payment transactions with non-employees to accounting for share-based payment transactions with employees. Companies are required to record a cumulative-effect adjustment (net of tax) to retained earnings as of the beginning of the fiscal year of the adoption. Upon transition, non-employee awards are required to be measured at fair value as of the adoption date. This standard will be effective for fiscal years beginning December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. The Company's adoption of this ASU as of July 1, 2019 had no impact on the financial statements.

In August 2018, the FASB issued ASU 2018-13, "Fair value measurement (Topic 820): Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement". The new guidance modifies the disclosure requirements on fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019. Early adoption is permitted. The Company does not expect ASU 2018-13 to have a significant impact to its financial statements and related disclosures.

4. Intangible Assets

The Company's intangible assets consist of intellectual property acquired from LAT Pharma, Inc. and are amortized over their estimated useful lives. The following is a summary of the intangible assets as of June 30, 2020 and 2019:

	<u>June 30, 2020</u>	<u>June 30, 2019</u>
Intellectual Property	\$ 2,293,770	\$ 2,293,770
Less Accumulated Amortization	(968,544)	(739,167)
Intellectual Property, Net	<u>\$ 1,325,226</u>	<u>\$ 1,554,603</u>

Amortization expense amounted to \$229,377 for each of the years ended June 30, 2020 and 2019, respectively. The Company amortizes intellectual property over the expected original useful lives of 10 years.

Estimated future amortization expense is as follows:

Year ending June 30,	
2021	229,377
2022	229,377
2023	229,377
2024	229,377
2025	229,377
Thereafter	178,341
	<u>\$ 1,325,226</u>

5. Renegotiated Debt

On July 19, 2018, Geis-Hides Consulting LLC entered into an Accord and Debt Satisfaction Agreement with the Company in which the consulting firm agreed to release the Company from all liabilities arising from the Original Contract and Debt Repayment Plan dated December 15, 2013 totaling \$132,000 and received cash of \$65,000 and 2,080 common shares in satisfaction. The common shares were valued at the market price on the date of settlement at \$7.50 per common share. The gain of \$51,400 on the settlement of debt was reflected on the Statements of Operations as "other income" for the year ended June 30, 2019.

6. Related Party Transactions

On March 23, 2017, Barrett Ehrlich agreed to defer the payment of his consulting fee debt of \$173,333 until December 31, 2019, through the issuance of a Promissory note. The promissory note does not carry any interest charge as long as the amount is paid in full before December 31, 2019. The consulting fee debt was reclassified from a current liability to a long-term liability on the balance sheet. Any portion of the balance due under the note that remains unpaid after December 31, 2019 will accrue interest at a rate of 5% per annum until paid in full.

On August 8, 2018, Barrett Ehrlich (Independent contractor, related party to Elliot Ehrlich and shareholder) on behalf of The Barrett Edge Inc. ("Barrett") entered into an Accord and Debt Satisfaction Agreement with the Company in which Barrett agreed to release the Company from all liabilities including the original contract to defer payment of accrued consulting fees dated March 23, 2017, the promissory note issued by the Company to defer payment of accrued consulting fees; loan to the Company for \$14,000, and subsequent unpaid consulting fees, totaling \$543,014, and received cash of \$131,333 and 3,947 common shares in satisfaction. The common shares were valued at the market price on the date of settlement at \$16.25 per common share. The gain of \$361,548 on the settlement of debt was reflected in the additional paid in capital for the year ended June 30, 2019.

On March 23, 2017, Elliot Ehrlich agreed to forgive 50% of his salary debt of \$444,056. The adjusted salary debt is \$222,028. Elliot Ehrlich also agreed to defer the payment of his salary debt of \$222,028 until December 31, 2019, through the issuance of a Promissory note. The promissory note does not carry any interest charge as long as the amount is paid in full before December 31, 2019. The salary debt was reclassified from a current liability to a long-term liability on the balance sheet and the salary debt forgiven had been reflected on the income statement as other income. Any portion of the balance due under the note that remains unpaid after December 31, 2019 will accrue interest at a rate of 5% per annum until paid in full.

On July 9, 2018, Elliot Ehrlich (former CEO and shareholder) entered into an Accord and Debt Satisfaction Agreement with the Company in which he agreed to release the Company from all liabilities including the original contract to defer payment of accrued salary dated March 23, 2017, totaling the amount of \$222,028 the promissory note issued by the Company to defer payment of accrued salary; and received cash of \$22,273 and 1,777 common shares in satisfaction. The common shares were valued at the market price on the date of settlement at \$7.50 per common share. The gain of \$186,503 on the settlement of debt was reflected in the additional paid in capital for the year ended June 30, 2019.

On March 23, 2017, Jonathan Adams agreed to defer the payment of his salary debt of \$180,555 until December 31, 2019, through the issuance of a Promissory note. The promissory note does not carry any interest charge as long as the amount is paid in full before December 31, 2019. The salary debt was reclassified from a current liability to a long-term liability on the balance sheet. Any portion of the balance due under the note that remains unpaid after December 31, 2019 will accrue interest at a rate of 5% per annum until paid in full.

On July 9, 2018, Jonathan Adams (COO) entered into an Accord and Debt Satisfaction Agreement with the Company in which he agreed to release the Company from all liabilities including the original contract to defer payment of his accrued salary dated March 23, 2017, the promissory note issued by the Company to defer payment of accrued salary; and subsequent unpaid salary, totaling the amount of \$534,722, and received cash of \$25,694 in satisfaction. The gain of \$509,028 on the settlement of debt was reflected in the additional paid in capital for the year ended June 30, 2019.

The outstanding balance of the long-term note payable at June 30, 2019 was \$0.

Equity Transactions with Acuitas

On July 3, 2018, we entered into a Securities Purchase Agreement (the "Purchase Agreement") with Acuitas Group Holding, LLC ("Acuitas") and certain other purchasers identified in the Purchase Agreement (together with Acuitas, the "Purchasers") pursuant to which (i) the Purchasers agreed to purchase an aggregate of 2,133,332 shares of our Series A Convertible Preferred Stock (the "Preferred Stock") at a price per share of \$1.50 per share of Preferred Stock (the "Initial Sale") and (ii) we agreed to issue warrants (the "Warrants") to purchase 1,706,666 shares of common stock, each subject to the terms and conditions set forth in the Purchase Agreement, for an aggregate consideration of \$3.2 million. We received \$160,000 of the \$3.2 million in April and May 2018 as prepaid equity. Acuitas also received an additional 6,667 Warrants in connection with the payoff of a note issued by us in favor of Acuitas. The Initial Sale and issuance of the Warrants occurred on July 3, 2018. In addition, Acuitas had the option to purchase up to an additional 1,600,000 shares of common stock at a price per share of \$1.88, and warrants on the same terms as the Warrants, within two weeks following the one year anniversary of the closing of the Initial Sale (the "Subsequent Sale") in the event that we did not obtain \$3,000,000 of funding through various non-dilutive grants prior to the one year anniversary of the closing of the Initial Sale, less any federal or FDA grant funding received by the Company. Acuitas is controlled by our Chairman and Chief Executive Officer, Terren Peizer and the Purchasers included Jonathan Adams, James Lang, Cuong Do and Michael Sherman, who are members of our Board.

The Purchase Agreement contained customary representations and warranties. In connection with the disclosure schedule associated with the representations and warranties, we also disclosed customary information, including the following: (i) the existence of the Mallinckrodt petition before the U.S. Patent Trial and Appeal Board, (ii) our capitalization, (iii) our obligation to pay a low single digit royalty on the net sales of BIV201 (continuous infusion terlipressin) to be shared among LAT Pharma LLC members, PharmaIN Corporation and The Barrett Edge, Inc. pursuant to the Agreement and Plan of Merger, dated April 11, 2016, by and between LAT Pharma LLC and us, (iv) our obligation to pay a low single digit royalty on net sales of all terlipressin products covered by specified patents up to a maximum of \$200,000 per year pursuant to the Technology Transfer Agreement, dated July 25, 2016, by and between us and the University of Padova (Italy), and (v) certain recent issuances of common stock by us.

Each share of Preferred Stock automatically converted into 1 share of common stock upon the filing with the Secretary of State of the State of Nevada of a Certificate of Amendment to our Articles of Incorporation (the "Amendment") on August 13, 2018 that increased the number of authorized shares of common stock to 800,000,000. The Amendment was approved by the written consent of the holders of more than a majority of our issued and outstanding common stock on July 3, 2018 and was filed with the Secretary of State of the State of Nevada 20 calendar days following the distribution of our Definitive Information Statement on Schedule 14 that was filed with the SEC on July 13, 2018.

6. Related Party Transactions (continued)

Pursuant to a letter agreement dated June 24, 2019, Acuitas agreed to modify its existing rights under the Purchase Agreement so that:

- Acuitas agreed to immediately exchange its existing 1,606,667 Warrants for common stock such that it will have effectively exercised its Warrants in full pursuant to a cashless exercise thereof at an assumed current market price of \$45.00 per share and, as a result received an aggregate of 95% of the shares covered thereby, or 1,526,094 shares of common stock;
- Acuitas agreed to (i) waive its rights to a 50% adjustment of the purchase price of the Preferred Stock in the Initial Sale, the exercise price of the Warrants and the price per share in the Subsequent Sale in the event of certain reductions in the useful life of our current intellectual property rights, and (ii) effectively exercise its rights to purchase securities in a Subsequent Sale pursuant to a “cashless purchase” at an assumed current market price of approximately \$11.25 per share, conditioned in each case on the listing of our common stock on Nasdaq or the raising of \$2.0 million in additional funds in the form of another securities offering, in either case not later than November 30, 2019, which will result Acuitas having irrevocably waived its rights to an adjustment in the purchase price of the Preferred Stock in the Initial Sale and the exercise price of the Warrants and the purchase price of per share in the Subsequent Sale upon the issuance by us of an aggregate of 1,339,958 shares of common stock (the “Subsequent Sale Shares”) to Acuitas, which is expected to occur concurrently with the closing of our potential public offering and listing on Nasdaq;
- Acuitas shall in exchange for the foregoing agreements and waivers have the option to purchase additional shares of common stock and warrants to purchase one share of common stock for each share of common stock purchased during the period from September 1, 2019 to November 30, 2019 at the then-effective purchase price of the Preferred Stock in the Initial Sale (the “Funding Option”), provided that any shares issued pursuant to any exercise of the Funding Option will reduce share-for-share the amount of shares issued pursuant to the deemed exercise of its rights to purchase securities in a Subsequent Sale mentioned above.

Convertible Debenture Transaction with Acuitas

On September 24, 2019, the Company entered into a Securities Purchase Agreement (the “2019 Purchase Agreement”) with Acuitas pursuant to which (i) Acuitas agreed to purchase a 10% OID Convertible Delayed Draw Debenture (the “Debenture”) due September 24, 2020 for an aggregate commitment amount of up to \$2.0 million, and (ii) the Company issued 1,125,000 shares (the “Commitment Shares”) of the Company’s common stock and warrants (the “Commitment Warrants”) to purchase an equal number of shares, each subject to the terms and conditions set forth in the 2019 Purchase Agreement. The Debenture accrues additional principal at the rate of 6% per annum and interest at the rate of 10% per annum, is convertible into shares of common stock at \$4.00 per share prior to the completion of the company’s planned public offering of units (the “Public Offering”) or, subsequent to the closing of the Public Offering, the lower of \$4.00 or 80% of the offering price per unit to the public in the Public Offering and are mandatorily redeemable upon such closing at 100% of the accrued principal amount and unpaid interest to the date of redemption. The Commitment Warrants are five-year warrants, exercisable upon the earlier of the effectiveness of the Company’s current reverse stock split or December 1, 2019, at an amount equal to the lower of \$4.00 or 80% of the offering price per unit to the public in the Public Offering. Upon entering into the 2019 Purchase Agreement, the Company drew an initial \$500,000 under the Debenture and in accordance with the 2019 Purchase Agreement, Acuitas received an additional 125,000 warrants (the “Bridge Warrants”) having the same terms as the Commitment Warrants.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

6. Related Party Transactions (continued)

Any future draws under the Debenture, which may be made from and after October 15, 2019, November 15, 2019 and December 15, 2019 in equal tranches of \$500,000 each, will entitle Acuitas to receive additional Bridge Warrants in equal amount upon such funding. In addition, the 2019 Purchase Agreement provides that, should the underwriters in the Public Offering exercise their option to purchase additional securities during the 45 days following closing and the issuance of such securities would result in Acuitas' beneficial ownership (on a fully diluted basis) of shares of common stock being below 60%, Acuitas shall be issued a number of additional shares of common stock and warrants having the same terms as the Commitment Warrants to result in its beneficial ownership (on a fully diluted basis) of shares of common stock equaling 60%.

The issuance of 1,125,000 shares of the Company's common stock and warrants to purchase an equal amount number of shares, to its controlling stockholder for the Bridge Financing was accounted for as a deemed dividend due to its related party nature and \$17.1 million representing the excess of the fair value of the consideration given for the financing, net of debt discount; was recorded in accumulated deficit for the year ended June 30, 2020, accordingly. A debt discount of \$500,000 against the debenture was recorded which will be amortized over the term of the debenture using the effective interest method. The Company recognized amortization of the discount for the year ended June 30, 2020 of \$37,136.

The Company received draws under the Debenture that totaled approximately \$1.3 million during the year ended June 30, 2020. The total interest expense related to the draws under the Debenture was approximately \$99,000 for the year ended June 30, 2020. On April 1, 2020 the Company entered into an amendment to modify the payment of accrued interest amounts under the original terms of the Debenture to capitalize all such amounts as would otherwise accrue on the Debenture. On January 4, 2020, payment of \$13,487 accrued interest due was paid through the issuance of 4,422 shares of the Company's common stock. Acuitas and the Company continue to discuss the need and timing for some or all the remaining draws under the Debenture Agreement. Subsequent to the initial \$500,000 draw on September 24, 2019, the Company received draws that totaled \$813,000 as July 13, 2020, and accordingly; the Company issued additional Bridge Warrants to purchase 203,250 shares of common stock to its controlling stockholder under the terms of the Bridge Financing. Accordingly, on April 16, 2020, the Company recorded the warrants to purchase 125,000 common stock related to the second \$500,000 draw under the debenture as a derivative warrant liability as of June 30, 2020. The Company recorded the warrants related to the draws totaling \$313,000 to purchase 78,250 common shares as derivative liabilities. The draws under the Debenture received subsequent to September 24, 2019 were previously reflected as note payable – related party in the previous filed 10-Q for the fiscal year ended June 30, 2020. During the fourth quarter the note payable -related party, were reclassified as the Debenture in the accompanying balance sheet at June 30, 2020, in accordance with the letter agreement of July 14, 2020 which re-confirmed the understanding between the Company and Acuitas regarding the certain amounts funded to BioVie that were intended as "partial draws". See below for discussion regarding the letter agreement of July 14, 2020.

Pursuant to the 2019 Purchase Agreement, Acuitas has agreed to further modify its existing rights under the Purchase Agreement dated July 3, 2018 with the Company so that Acuitas' previous agreement in June 2019 to waive its rights to a 50% adjustment of the purchase price of the Preferred Stock in the July 2018 transaction, the exercise price of the warrants in such transaction and the price per share in a Subsequent Sale in the event of certain reductions in the useful life of our current intellectual property rights, and effectively exercise its rights to purchase securities in a Subsequent Sale pursuant to a "cashless purchase" at an assumed current market price of approximately \$11.25 per share, conditioned in each case on the listing of the Company's common stock on Nasdaq or the raising of \$2.0 million in additional funds in the form of another securities offering, in either case not later than November 30, 2019, such that Acuitas will have irrevocably waived its rights to an adjustment in the purchase price of the Preferred Stock in the Initial Sale and the exercise price of the Warrants and the purchase price of per share in the Subsequent Sale upon the issuance by us of an aggregate of 2,679,916 shares of common stock and 2,679,916 warrants having the same terms as the Commitment Warrants to Acuitas, upon the closing of the Public Offering.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

6. Related Party Transactions (continued)

Pursuant to an amendment to the 2019 Purchase Agreement dated October 9, 2019, Acuitas agreed to modify its existing rights under the 2019 Purchase Agreement so that:

- The Commitment Warrants (and related warrants issued upon the first draw under the Debenture) were replaced with warrants having similar terms, but which are automatically exercised upon the closing of the offering at an exercise price equal to the par value of the common stock;
- Acuitas' existing rights under the Purchase Agreement dated July 3, 2018 with the Company were further amended so that the number of Subsequent Sale Shares would be multiplied by four (in lieu of the changes to the Purchase Agreement originally provided for in the 2019 Purchase Agreement); and
- The provisions of the 2019 Purchase Agreement providing that, should the underwriters in the offering exercise their option to purchase additional securities during the 45 days following closing and the issuance of such securities would result in Acuitas' beneficial ownership (on a fully diluted basis) of shares of common stock being below 60%, Acuitas will be issued a number of additional shares of common stock and warrants having the same terms as the Commitment Warrants to result in its beneficial ownership (on a fully diluted basis) of shares of common stock equaling 60% have been modified such that, upon the exercise of such option by the underwriters, the Company will issue to Acuitas a number of securities that will result in Acuitas' fully diluted beneficial ownership after the exercise of such option being the same as prior thereto.

On July 14, 2020, the Company, entered into a further extension of its letter agreements dated April 8, 2020, that further extended its letter agreement dated February 10, 2020 with Acuitas regarding Acuitas' previous agreement to modify its existing rights under the Purchase Agreement dated July 3, 2018 with the Company so that its June 2019 waiver of its rights to a 50% adjustment of the purchase price applicable to its initial investment in the Company and the exercise price of the warrants received in such transaction and the price per share should it exercise certain rights to purchase additional securities in the event of certain reductions in the useful life of the Company's intellectual property rights and commitment to purchase such securities upon the closing of the Company's planned public offering of shares of Class A common stock (the "Common Stock") as described in its Registration Statement on Form S-1 (File No. 333-231136) and commitment to purchase such additional securities would remain effective until October 31, 2020, and accordingly Acuitas shall be entitled to receive an aggregate of 5,359,832 shares of Common Stock at such closing. In addition, the parties agreed that certain draws under the Company's current bridge financing with Acuitas were to be made based with respect to the Company's ongoing capital requirements and current market conditions, notwithstanding certain scheduled availability dates set forth in the 10% OID Convertible Delayed Draw Debenture issued in connection therewith. The letter agreement of July 14, 2020 also confirmed the understanding between the Company and Acuitas regarding certain amounts funded to BioVie that were intended as "partial draws" of credit available under the Debenture which, as of the date hereof aggregated \$813,000 in aggregate principal amount in addition to amounts initial funded under the Debenture. Accordingly, such "partial draws" shall accrue additional principal as amounts otherwise funded pursuant to the original schedule of draws included in the Debenture (as modified by the letter agreement between BioVie and Acuitas dated April 1, 2020 regarding the capitalization of interest otherwise payable) and shall entitle Acuitas to receive a pro rata amount of Bridge Warrants.

BioVie Inc.

7. Commitments and Contingencies

Office Lease

On July 1, 2019, the Company's office moved with Acuitas' new offices to 2120 Colorado Avenue Ste 230, Santa Monica, CA 90404. There is no lease agreement for the new premises and the Company continues to accrue monthly lease payments of \$1,000 for the new office under the terms of the previous month-to-month lease for the previous premises which may be cancelled upon 30 days' written notice.

Challenge to US Patent

On April 30, 2018, we received notice that Mallinckrodt had petitioned the U.S. Patent and Trademark Office ("USPTO") to institute an Inter Partes Review of our U.S. Patent No. 9,655,945 titled "Treatment of Ascites" (the "'945 patent"). Inter Partes Review is a trial proceeding conducted with the USPTO Patent Trial and Appeal Board (PTAB) to review the patentability of one or more claims of a patent. Such review is limited to grounds of novelty and obviousness on the basis of prior art consisting of patents and printed publications.

On November 13, 2019, the Patent Trial and Appeal Board of the United States Patent and Trademark Office (the "Board") issued a written decision in the *inter partes* review ("IPR") action that was brought by Mallinckrodt Pharmaceuticals Ireland Limited ("Mallinckrodt") against BioVie Inc. ("BioVie" or "Company"). In that action, Mallinckrodt sought to invalidate BioVie's patent (U.S. Pat. No. 9,655,945, "Treatment of Ascites") (the "'945 Patent"). In its decision, the Board determined that all claims of the '945 Patent were not patentable because they were either anticipated or obvious in light of prior art. The Board also denied BioVie's Motion to Amend the claims on similar grounds. The result of the Board's decision is that the '945 patent is no longer valid or enforceable. Acuitas Group Holdings, LLC was aware of this patent challenge when it purchased a majority ownership interest in the company in July 2018.

This ruling is unrelated to the Company's Orphan drug designations for ascites and hepatorenal syndrome ("HRS"), which remain unchanged. An Orphan drug that is first-to-market typically receives 7 years of market exclusivity in the United States for the designated use(s). In addition, the ruling does not affect the Company's rights in its pending patent application directed to proprietary liquid formulations of terlipressin for use in its planned Phase 2 and Phase 3 trials, subject to FDA clearance, which could eventually provide up to 20 years of patent coverage in each country in which the Company seeks patent protection, such as the United States, if a patent issues from a patent application according to the patent laws of each issuing country.

Royalty Agreements

Pursuant to the Agreement and Plan of Merger entered into on April 11, 2016 between our predecessor entities, LAT Pharma LLC and NanoAntibiotics, Inc., BioVie is obligated to pay a low single digit royalty on net sales of BIV201 (continuous infusion terlipressin) to be shared among LAT Pharma Members, PharmaIn Corporation, and The Barrett Edge, Inc.

The Company and PharmaIn Corporation, LAT Pharma's former partner focused on the development of new modified drug candidates in the same therapeutic field but not including BIV201, had agreed to pay royalties equal to less than 1% of future net sales of each company's ascites drug development programs, or if such program is licensed to a third party, less than 5% of each company's net license revenues. On December 24, 2018, the Company returned its partial ownership rights to the PharmaIn modified terlipressin development program and simultaneously paid the remaining balance due on a related debt. PharmaIn, Corp. rights to our program remain unchanged. Additionally the Company obligation to pay a low single digit royalty on the net sales of BIV201 (continuous infusion terlipressin) to be shared among LAT Pharma LLC members, and The Barrett Edge, Inc. pursuant to the Agreement and Plan of Merger, dated April 11, 2016, by and between LAT Pharma LLC. The Company has an obligation to pay a low single digit royalty on net sales of all terlipressin products covered by specified patents up to a maximum of \$200,000 per year pursuant to the Technology Transfer Agreement, dated July 25, 2016, by and between us and the University of Padova (Italy).

Pursuant to the Technology Transfer Agreement entered into on July 25, 2016 between BioVie and the University of Padova (Italy), BioVie is obligated to pay a low single digit royalty on net sales of all terlipressin products covered by US patent no. 9,655,645 and any future foreign issuances capped at a maximum of \$200,000 per year.

8. Fair Value Measurements

At June 30, 2020, the estimated fair value of derivative liabilities measured on a recurring basis are as follows:

	Fair Value Measurements at June 30, 2020			
	Level 1	Level 2	Level 3	Total
Derivative liability - Warrants	\$ —	\$ —	\$ 16,411,504	\$ 16,411,504
Derivative liability - Conversion option on convertible debenture	—	—	5,000,800	5,000,800
Total derivatives	\$ —	\$ —	\$ 21,412,304	\$ 21,412,304

The following table presents the activity for liabilities measured at fair value using unobservable inputs for the year ended June 30, 2020:

	Derivative liabilities - Warrants	Derivative liability - Conversion Option on Convertible Debenture
Beginning balance at July 1, 2019	\$ —	\$ —
Additions to level 3 liabilities	9,561,652	2,638,966
Change in in fair value of level 3 liability	6,849,852	2,361,834
Transfer in and/or out of Level 3	—	—
Balance at June 30, 2020	\$ 16,411,504	\$ 5,000,800

Derivative liability – Warrants

The Company accounts for stock purchase warrants as either equity instruments or derivative liabilities depending on the specific terms of the warrant agreements. Under applicable accounting guidance, stock warrants that are precluded from being indexed to the Company's own stock because of full-ratchet anti-dilution provisions or the adjustments to the strike price due to an occurrence of a future event; are accounted for as derivative financial instruments. The stock warrants issued September 24, 2019 were not considered indexed to the Company's own stock because of the adjustment to strike price, an occurrence of a future event such as the Company's pending capital raise.

For the Years Ended June 30, 2020 and 2019

8. Fair Value Measurements (continued)

The warrants associated with the level 3 liability were issued on September 24, 2019 and were valued using the Black-Scholes-Merton model with the following assumptions: stock price of \$8.95, exercise price of \$4.00, term of 5 years expiring September 2024, volatility of 71.44%, dividend yield of 0%, and risk-free interest rate of 1.52%. The valuation at June 30, 2020 used the following assumptions: stock price of \$14, exercise price of \$4.00, term of 4.25 year expiring September 2024, volatility of 78.12%, dividend yield of 0%, and risk-free interest rate of 0.24%. (See note 6 "Related Party Transactions – Convertible debenture transactions")

The warrants associated with the level 3 liability issued on April 16th, 2020 and were valued using the Black-Scholes-Merton model with the following assumptions: stock price of \$3.95, exercise price of \$4.00, term of 5 years expiring April 2025, volatility of 76.19%, dividend yield of 0%, and risk-free interest rate of 0.35%. The valuation at June 30, 2020 used the following assumptions: stock price of \$14, exercise price of \$4.00, term of 5 year expiring April 2025, volatility of 76.61%, dividend yield of 0%, and risk-free interest rate of 0.29%. (See note 6 "Related Party Transactions – Convertible debenture transactions")

The warrants associated with the level 3 liability issued on June 30th, 2020 and were valued using the Black-Scholes-Merton model with the following assumptions: stock price of \$14, exercise price of \$4.00, term of 5 years expiring June 2025, volatility of 76.61%, dividend yield of 0%, and risk-free interest rate of 0.29%. (See note 6 "Related Party Transactions – Convertible debenture transactions")

Derivative liability – Conversion option in convertible debenture

The Company valued the conversion option of the \$2 million 10% OID Convertible Delayed Draw Debenture which may be convertible into shares of common stock at \$4.00 per share prior to the completion of an offering or, subsequent to the closing of the offering, the lower of \$4.00 or 80% of the offering price per unit to the public in such offering and are mandatorily redeemable upon such closing at 100% of the accrued principal amount and unpaid interest to the date of redemption. (See note 6 "Related Party Transactions – *Convertible debenture transactions with Acuitas*" as of September 24, 2019). The conversion option was valued on September 24, 2019 using the Black Scholes-Mertons model with the following assumptions: stock price of \$8.95, conversion price of \$4.00, term of 1 year expiring September 2020, volatility of 75.48%, dividend yield of 0%, and risk-free interest rate of 1.78%. The valuation at June 30, 2020 used the following assumptions: stock price of \$14, conversion price of \$4.00, term of 0.25 year expiring September 2020, volatility of 62.47%, dividend yield of 0%, and risk-free interest rate of 0.16%.

Stock Options

The following table summarizes the activity relating to the Company's stock options for the years ended June 30, 2020 and 2019:

	Options	Weighted- Average Exercise Price	Weighted Remaining Average Contractual Term	Aggregate Intrinsic Value
Outstanding at June 30, 2018	41,200	\$ 15.00	5.8	\$ 142,000
Granted	16,800	5.00	4.5	131,000
Options Exercised or Forfeited	—	—	—	—
Outstanding at June 30, 2019	58,000	12.50	5.2	273,000
Granted	10,400	3.88	4.5	105,200
Options Exercised or Forfeited	(8,000)	—	—	—
Outstanding at June 30, 2020	60,400	\$ 11.06	4.2	\$ 352,600
Exercisable at June 30, 2020	60,400	\$ 11.06	4.2	\$ 352,600

The fair value of each option grant on the date of grant is estimated using the Black-Scholes Option – Pricing model reflecting the following weighted-average assumptions:

	June 30 2020	June 30 2019
Expected life of options (In years)	5	5
Expected volatility	73.74%	69.77%
Risk free interest rate	1.63%	2.60%
Dividend Yield	0%	0%

Expected volatility is based on the historical volatilities of three comparable companies of the daily closing price of their respective common stock and the expected life of options is based on historical data with respect to employee exercise periods. The Company accounts for forfeitures as they are incurred.

The Company recorded stock-based compensation expense of \$24,846 and \$64,860 for the years ended June 30, 2020 and 2019, respectively.

\$ 27.50	800	1.7	800
\$ 28.75	1,600	2.1	1,600
\$ 31.25	4,000	1.4	4,000
Total	<u>60,400</u>		<u>60,400</u>

Issuance of Shares for Cash

On July 3, 2018, we entered into a Securities Purchase Agreement (the "Purchase Agreement") with Acuitas Group Holdings, LLC ("Acuitas") and certain other purchasers identified in the Purchase Agreement (together with Acuitas, the "Purchasers") pursuant to which (i) the Purchasers agreed to purchase an aggregate of 2,133,332 shares of our Series A Convertible Preferred Stock (the "Preferred Stock") at a price per share of \$1.50 per share of Preferred Stock (the "Initial Sale") and (ii) we agreed to issue warrants (the "Warrants") to purchase 1,706,666 shares of common stock, each subject to the terms and conditions set forth in the Purchase Agreement, for an aggregate consideration of \$3.2 million. We received \$160,000 of the \$3.2 million in April and May 2018 as prepaid equity. Acuitas also received an additional 6,667 Warrants in connection with the payoff of a note issued by us in favor of Acuitas. The Initial Sale and issuance of the Warrants occurred on July 3, 2018. In addition, Acuitas had the option to purchase up to an additional 1,600,000 shares of common stock at a price per share of \$1.88, and warrants on the same terms as the Warrants, within two weeks following the one year anniversary of the closing of the Initial Sale (the "Subsequent Sale") in the event that we did not obtain \$3,000,000 of funding through various non-dilutive grants prior to the one year anniversary of the closing of the Initial Sale, less any federal or FDA grant funding received by the Company.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

9. Equity Transactions (continued)

Acuitas is controlled by our Chairman and Chief Executive Officer, Terren Peizer and the Purchasers included Jonathan Adams, James Lang, Cuang Do and Michael Sherman, who are members of our Board of Directors.

The Purchase Agreement contained customary representations and warranties. In connection with the disclosure schedule associated with the representations and warranties, we also disclosed customary information, including the following: (i) the existence of the Mallinckrodt petition before the U.S. Patent Trial and Appeal Board, (ii) our capitalization, (iii) our obligation to pay a low single digit royalty on the net sales of BIV201 (continuous infusion terlipressin) to be shared among LAT Pharma LLC members, PharmaIN Corporation and The Barrett Edge, Inc. pursuant to the Agreement and Plan of Merger, dated April 11, 2016, by and between LAT Pharma LLC and us, (iv) our obligation to pay a low single digit royalty on net sales of all terlipressin products covered by specified patents up to a maximum of \$200,000 per year pursuant to the Technology Transfer Agreement, dated July 25, 2016, by and between us and the University of Padova (Italy), and (v) certain recent issuances of common stock by us.

Each share of Preferred Stock automatically converted into 1 shares of common stock upon the filing with the Secretary of State of the State of Nevada of a Certificate of Amendment to our Articles of Incorporation (the "Amendment") on August 13, 2018 that increased the number of authorized shares of common stock to 800,000,000. The Amendment was approved by the written consent of the holders of more than a majority of our issued and outstanding common stock on July 3, 2018 and was filed with the Secretary of State of the State of Nevada 20 calendar days following the distribution of our Definitive Information Statement on Schedule 14 that was filed with the SEC on July 13, 2018.

Pursuant to the Purchase Agreement, Terren Peizer, the Chairman of Acuitas, was appointed as a member of the Company's Board of Directors (the "Board") and as the Chief Executive Officer of the Company, effective July 3, 2018. The issuance of the Preferred Stock, the Warrants and the underlying common stock under the Purchase Agreement is exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"), pursuant to the exemption for transactions by an issuer not involving any public offering under Section 4(a)(2) of the Securities Act.

Pursuant to a letter agreement dated June 24, 2019, Acuitas has agreed to modify its existing rights under the Purchase Agreement so that:

- Acuitas agreed to immediately exchange its existing 1,606,667 Warrants for common stock such that it will have effectively exercised its Warrants in full pursuant to a cashless exercise thereof at an assumed current market price of \$45.00 per share and, as a result received an aggregate of 95% of the shares covered thereby, or 1,526,094 shares of common stock;
- Acuitas agreed to (i) waive its rights to a 50% adjustment of the purchase price of the Preferred Stock in the Initial Sale, the exercise price of the Warrants and the price per share in the Subsequent Sale in the event of certain reductions in the useful life of our current intellectual property rights, and (ii) effectively exercise its rights to purchase securities in a Subsequent Sale pursuant to a "cashless purchase" at an assumed current market price of approximately \$11.25 per share, conditioned in each case on the listing of our common stock on NASDAQ or the raising of \$2.0 million in additional funds in the form of another securities offering, in either case not later than November 30, 2019, which will result Acuitas having irrevocably waived its rights to an adjustment in the purchase price of the Preferred Stock in the Initial Sale and the exercise price of the Warrants and the purchase price of per share in the Subsequent Sale upon the issuance by us of an aggregate of 1,339,958 shares of common stock (the "Subsequent Sale Shares") to Acuitas.

9. Equity Transactions (continued)

On November 10, 2018, the Company issued stock options to purchase 800 shares of common stock as part of their annual board of director compensation. The stock options are exercisable at an exercise price of \$6.25 at any time from date of issuance and expire in 5 years from the date of issuance.

On January 19, 2019, the Company issued stock options to purchase 800 shares of common stock to each of five key employees or consultants and two company directors as part of his or her annual compensation, for an aggregate total of 5,600 stock options. The stock options are exercisable at an exercise price of \$3.13 at any time from date of issuance until 5 years from the date of issuance.

On March 11, 2019, the Company issued stock options to purchase 8,000 shares of common stock to an investor relations (IR) consultant. The stock options were issued and are exercisable at \$6.25 at any time from date of issuance and expire in 5 years from the date of issuance.

On October 1, 2019, the Company issued stock options to purchase 800 shares of common stock to the Chief Financial Officer as part of her compensation. The stock options were issued and are exercisable at an exercise price of \$8.75 at any time from date of issuance and expire in 5 years from the date of issuance.

On October 13, 2019, the Company issued stock options to purchase 800 shares of common stock as part of their annual board of director compensation. The stock options were issued and are exercisable at \$7.50 at any time from date of issuance and expire in 5 years from the date of issuance.

On November 10, 2019, the Company issued stock options to purchase 800 shares of common stock as part of their annual board of director compensation. The stock options were issued and are exercisable at \$6.25 at any time from date of issuance and expire in 5 years from the date of issuance.

On January 19, 2020, the Company issued stock options to purchase 8,000 shares of common stock as part of their annual board of director compensation. The stock options were issued and are exercisable at \$2.80 at any time from date of issuance and expire in 5 years from the date of issuance.

On June 26, 2020, the Company issued 5,046 shares of common stock pursuant to a cashless exercise of stock options to purchase 8,000 shares at an exercise price of \$6.25 per share.

Warrant Price Adjustment

In December 2017, the Company issued warrants to purchase 20,000 shares of common stock in a private placement transaction for aggregate gross proceeds of \$100,000. The warrants were exercisable at an exercise price of \$25.00 at any time from date of issuance until 7 years from the date of issuance. The warrants have a down round feature that reduces the exercise price if the Company sells stock for a lower price.

In January 2018, the Company sold shares at \$18.75, which therefore triggered the reduction in the strike price. The Company calculated the difference in fair value of the warrants between the stated exercise price and the reduced exercise price and recorded \$20,995 as a deemed dividend.

In July 2018, the Company sold shares at \$1.88, which therefore triggered the reduction in the strike price. The Company calculated the difference in fair value of the warrants between the stated exercise price and the reduced exercise price and recorded \$44,889 as a deemed dividend. The fair value of the warrants granted was estimated using the Black Scholes Method.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

9. Equity Transactions (continued)

In January and February 2018, the Company issued warrants to purchase 1,680 shares of common stock in exchange for banking services which was recognized at fair value. The warrants were exercisable at an exercise price of \$18.75 at any time from date of issuance until 7 years from the date of issuance. The warrants have a down round feature that reduces the exercise price if the Company sells stock for a lower price. In July 2018, the Company sold shares at \$1.88, which therefore triggered the reduction in the strike price. The Company calculated the difference in fair value of the warrants between the stated exercise price and the reduced exercise price and recorded \$3,770 as a deemed dividend. The fair value of the warrants granted was estimated using the Black Scholes Method.

The following table summarizes the warrants that have been issued:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Life (Years)	Aggregate Intrinsic Value
Outstanding and exercisable at June 30, 2018	38,193	\$ 36.25	5.5	\$ —
Granted	1,713,333	\$ 45.00	5.6	\$ 1,159,988
Expired	—	\$ —	—	\$ —
Exercised	1,626,859	\$ 45.00	—	\$ —
Outstanding and exercisable at June 30, 2019	124,667	\$ 45.00	5.6	\$ 1,202,678
Granted	1,250,000	\$ 4.00	4.7	\$ —
Expired	—	\$ —	—	\$ —
Outstanding and exercisable at June 30, 2020	1,374,667	\$ 7.72	4.2	\$ 13,799,331

Of the above warrants, 9,391 expire in fiscal year ending June 30, 2022, 4,455 expire in fiscal year ending June 30, 2023, and 1,360,821 expire in fiscal year ending June 30, 2025.

BioVie Inc.
Notes to Financial Statements
For the Years Ended June 30, 2020 and 2019

10. Income Taxes

Significant components of the Company's deferred tax assets are as follows:

	<u>June 30, 2020</u>	<u>June 30, 2019</u>
Deferred tax assets:		
Tax loss carryforward	\$ 2,100,816	\$ 1,424,714
Intangible assets	(371,063)	(450,835)
Stock based compensation	7,453	18,809
Valuation Allowance	(1,737,206)	(992,688)
Net deferred tax assets	<u>\$ —</u>	<u>\$ —</u>

At June 30, 2020 and 2019, the Company has recorded a full valuation against its net deferred tax assets of \$1,737,206 and \$992,688, respectively, since in the judgement of management, these assets are not more than likely than not to be realized. The change in the valuation allowance during the year ended June 30, 2020 was \$744,518.

At June 30, 2020, the Company had a Net Operating Loss ("NOL") carryforward of approximately \$5,100,000. NOL's generated prior to 2018 will expire during the years ranging from 2032 to 2037.

The Company has no current tax expense due to its losses.

Reconciliation of the differences between income tax benefit computed at the federal and state statutory tax rates and the provision for income tax benefit for the years ended June 30, 2020 and 2019 is as follows:

	<u>2020</u>	<u>2019</u>
Income tax expense at federal statutory rate	21%	21%
State taxes, net of federal benefit	7%	8%
Change in valuation allowance	-28%	-29%
Effective tax rate	<u>—</u>	<u>—</u>

11. Subsequent Events

Subsequent to June 30, 2020, the company received additional draws totaling \$170,000 under the Debenture. The total amount of draws outstanding at August 3, 2020 was \$1,433,000.
