DENVER, CO – April 12, 2018 – ENSERVCO Corporation (NYSE American: ENSV), a diversified national provider of specialized well-site services to the domestic onshore conventional and unconventional oil and gas industries, today announced it expects first quarter revenue to increase approximately 53% year over year to approximately \$21.1 million versus \$13.8 million in the same quarter last year. The Company also expects first quarter net income and adjusted EBITDA to show considerable growth year over year.

“Consistent with our previously announced intentions to provide investors with more transparency into our financial results and operating highlights, we are pleased to report that steadily increasing activity levels by our E&P customers and increased market share are driving strong growth across all of our service offerings,” said Ian Dickinson, President and CEO. “We are particularly pleased with a solid performance by our new water transfer business, which is gaining traction with new and existing customers and has the potential to be a very meaningful contributor to revenue in 2018 and beyond. We remain focused on our key objectives of driving greater utilization across our entire fleet and de-levering our business to create value for our shareholders.”
