

SECURITIES & EXCHANGE COMMISSION EDGAR FILING

VIDLER WATER RESOURCES, INC.

Form: 10-K

Date Filed: 2021-03-15

Corporate Issuer CIK: 830122

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
FOR THE FISCAL YEAR ENDED DECEMBER 31, 2020

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 033-36383

VIDLER WATER RESOURCES, INC.

(Exact Name of Registrant as Specified in Its Charter)

Delaware
(State or other Jurisdiction of Incorporation or Organization)

94-2723335
(IRS Employer Identification No.)

3480 GS Richards Blvd., Suite 101, Carson City, Nevada 89703

(Address of Principal Executive Offices, including Zip Code)

Registrant's Telephone Number, Including Area Code
(775) 885-5000

Securities Registered Pursuant to Section 12(b) of the Act:

Title of each class
Common Stock, par Value \$0.001

Trading Symbol(s)
VWTR

Name of each exchange on which registered
Nasdaq Stock Market, LLC

Securities Registered Pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined by Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definition of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12-b of the Act). Yes No

At June 30, 2020, the aggregate market value of shares of the registrant's common stock held by non-affiliates of the registrant (based upon the closing sale price of such shares on the Nasdaq Global Select Market on June 30, 2020) was \$139.6 million, which excludes shares of common stock held in treasury and shares held by executive officers, directors, and stockholders whose ownership exceeds 10% of the registrant's common stock outstanding at June 30, 2020. This calculation does not reflect a determination that such persons are deemed to be affiliates for any other purposes.

On March 8, 2021, the registrant had 18,524,730 shares of common stock, \$0.001 par value, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Definitive Proxy Statement to be filed with the United States Securities and Exchange Commission pursuant to Regulation 14A in connection with the registrant's 2021 Annual Meeting of Shareholders, to be filed subsequent to the date hereof, are incorporated by reference into Part III of this Annual Report on Form 10-K.

Note About “Forward-Looking Statements”

This Annual Report on Form 10-K (including “Management’s Discussion and Analysis of Financial Condition and Results of Operations”) contains “forward-looking statements,” as defined in the Private Securities Litigation Reform Act of 1995, regarding our business, financial condition, results of operations, and prospects, including, without limitation, statements about our expectations, beliefs, intentions, anticipated developments, and other information concerning future matters. Words such as “may”, “will”, “could”, “expects”, “anticipates”, “intends”, “plans”, “believes”, “seeks”, “estimates”, and similar expressions or variations of such words are intended to identify forward-looking statements, but are not the exclusive means of identifying forward-looking statements in this Annual Report on Form 10-K.

Although forward-looking statements in this Annual Report on Form 10-K reflect the good faith judgment of our management, such statements are based on current expectations and assumptions and are not guarantees of future performance. Consequently, forward-looking statements are inherently subject to risk and uncertainties, and our actual results and outcomes could differ materially from future results and outcomes expressed or implied by any forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, without limitation, those discussed under Part I, Item 1A “Risk Factors”, as well as those discussed elsewhere in this Annual Report on Form 10-K and in other filings we may make from time to time with the United States Securities and Exchange Commission (“SEC”) after this report. Readers are urged not to place undue reliance on forward-looking statements, which speak only as of the date of this Annual Report on Form 10-K. We undertake no obligation (and we expressly disclaim any obligation) to revise or update any forward-looking statements, whether as a result of new information, subsequent events, or otherwise, in order to reflect any event or circumstance that may arise after the date of this Annual Report on Form 10-K, unless otherwise required by law. Readers are urged to carefully review and consider the various disclosures made in this Annual Report on Form 10-K, and the other filings we may make from time to time with the SEC after the date of this report, which attempt to advise interested parties of the risks and uncertainties that may affect our business, financial condition, results of operations, and prospects.

ITEM 1. BUSINESS

Introduction

Vidler Water Resources, Inc. is a holding company incorporated in 1981. Until March 8, 2021 the Company’s name was PICO Holdings, Inc. In this Annual Report on Form 10-K, Vidler Water Resources, Inc. and its subsidiaries are collectively referred to as “Vidler,” the “Company,” or by words such as “we,” “us,” and “our.” Our business is primarily operated through our wholly owned subsidiary, Vidler Water Company, Inc. (“Vidler Water”).

Our business is to provide sustainable potable water resources to fast-growing communities throughout the Southwest U.S. that lack, or are running short of, available water resources.

We conduct our business by working closely with many constituents in these communities: regulators, water utilities, Native North American tribes, community leaders, residential and commercial developers and alternative energy companies. We ensure the water resources we develop and sell are sustainable and benefit the citizens of the communities and regions we serve.

Our objective is to maximize long-term shareholder value. Currently, we believe the highest potential return to our shareholders is from a return of capital. As we monetize our water and real estate assets, rather than reinvest the proceeds, we intend to return capital back to shareholders through a stock repurchase program or by other means such as special dividends. Nonetheless, we may, from time to time, reinvest a portion of proceeds from asset monetizations in further development of existing assets, if we believe the returns on such reinvestment outweigh the benefits of a return of capital.

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and, if applicable, amendments to those reports, are available free of charge on our web site (www.vidlerwater.com) as soon as reasonably practicable after the reports are electronically filed with or furnished to the SEC. Our website also contains other material about our Company. Information on our website is not incorporated by reference into this Annual Report on Form 10-K. Our corporate office is located at 3480 GS Richards Blvd., Suite 101, Carson City, Nevada 89703, and our telephone number is (775) 885-5000.

The following discussion should be read in conjunction with the Consolidated Financial Statements and Notes thereto included elsewhere in this Annual Report on Form 10-K. Additional information regarding the performance of and recent developments in our operating segments is included in *Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Our Business

We are primarily focused on monetizing, and further developing as necessary, our existing water rights, storage credits, and alternative energy sites that we own in Arizona, Colorado, Nevada and New Mexico. The long-term future demand for our existing water assets is driven by population and economic growth relative to currently available water supplies in the southwestern United States. We have developed sustainable sources of water for municipal and industrial use, either from existing supplies of water, such as water used for agricultural purposes, acquired unappropriated (previously unused) water, or discovered new sustainable water sources based on science and targeted exploration. Our alternative energy sites are in key locations that are adjacent to natural gas, fiber optic, power transmission and transportation corridors. We are not a water utility, and do not currently intend to enter into regulated utility activities.

A water right is the legal right to divert water and put it to beneficial use. Water rights are real property rights which can be bought and sold and are commonly measured in acre-feet ("AF"), which is a measure of the volume of water required to cover an area of one acre to a depth of one foot and is equal to 325,850 gallons. Almost all of our inventory of water rights are groundwater rights (water pumped from underground aquifers or basins) located in and governed by the state of Nevada.

Nevada water law has a long history and has a few core principles governing the granting and use of water rights that emphasizes sustainability and the overall benefit of the water resource to the citizens of Nevada. First and foremost, owners of water rights must put the water granted to beneficial use or risk losing the water rights owned ("use it or lose it"). Second, the annual volume of water rights granted and able to be put to beneficial use is limited to an estimate of the perennial yield of the basin from which the water right is pumped. The perennial yield is limited to the amount of natural discharge (represented by groundwater outflow from the basin or through evapotranspiration from plants) that can be pumped for beneficial use. The perennial yield can also be determined by an annual estimate of the volume of recharge (for example from rainfall or snow melt) that infiltrates into the basin from which water is pumped. In theory, groundwater basins in Nevada should never be depleted or overdrawn on a permanent basis based on this perennial yield doctrine.

The value of a water right depends on a number of factors, which may include location, the seniority of the right, whether the right is transferable, or if the water can be moved from one location to another. We believe we have purchased water rights at prices consistent with their then current use, which was typically agricultural in nature, with the expectation that the value would increase as we converted the water rights through the development process to a higher use, such as municipal and industrial use. We acquired and developed sustainable water resources with the expectation that they would be the most, or one of the most, competitive sources of water (the most economical source of water supply) to support new growth in municipalities or new commercial and industrial projects.

The population growth of the states where we own water rights and storage credits continues to exceed the national growth rate, collectively and individually, with the exception of New Mexico. According to the Census Bureau's estimate of state population changes for the period April 1, 2010, to July 1, 2020, Nevada's growth rate was 16.2%, Arizona was 16.1%, Colorado was 15.5%, and New Mexico was 2.3%. These population growth statistics compare to the national total growth rate of 6.7% over the same period.

Due to the COVID-19 pandemic in 2020, certain jobs have become less tied to a physical office as "Work From Home" has become the norm. As a result, this may have temporarily or permanently changed the appeal or necessity of working in offices in large metropolitan areas in the future as people look for more affordable and spacious homes in less populated areas without the need for significant commutes to offices in larger metro areas. If this trend continues, we believe our assets are well located in the southwest to benefit from this transition.

Historically, a significant portion of the Southwest's water supplies have come from the Colorado River. The balance is provided by other surface rights, such as rivers and lakes, groundwater (water pumped from underground aquifers), and water previously stored in reservoirs or aquifers. Prolonged droughts (decreased snow pack runoff and the related decreased surface water) together with rapid population growth in the past twenty years have reduced sustainable water supplies and exacerbated the region's general water scarcity.

In December 2012, the U.S. Department of the Interior released a report titled: *The Colorado River Basin Water Supply and Demand Study*, examining the future water demands on the Colorado River Basin. The report projects water supply and demand imbalances throughout the Colorado River Basin and adjacent areas over the next 50 years. The average imbalance in future supply and demand is projected to be greater than 3.2 million acre-feet per year by 2060. The study projects that the largest increase in demand will come from municipal and industrial users as a result of population growth. The Colorado River Basin currently provides water to approximately 40 million people, and the study estimates that this population could nearly double to approximately 76.5 million people by 2060, under a rapid growth scenario.

In an effort to stave off severe shortages on the Colorado River system, the seven basin states established the Drought Contingency Plan (DCP). DCP was agreed to in the spring of 2019 and set a new lake level at which drought would be declared. In 2020 this level was reached and caused the implementation of delivery reductions to Arizona and Nevada. It is highly probable that the next level of delivery reductions will be declared for calendar year 2022. We expect this situation to make our Arizona Long-Term Storage Credits more valuable - both in the Harquahala Valley and in the Phoenix Active Management Area (AMA) - as our Long - Term Storage Credits can be used as an assured water supply.

There is a need for new water supplies in central Arizona, specifically in the Pinal AMA. The Pinal AMA is a largely agricultural area located between the metropolitan areas of Phoenix and Tucson. The Pinal AMA is experiencing a high rate of growth combined with a reduction in water supplies. According to the Arizona Department of Water Resources there is "...insufficient groundwater in the Pinal AMA to support all existing users and issued assured water supply determinations." Our banked water in Harquahala Valley can be used as a new water supply to satisfy a portion of this unmet need.

Certain areas of the Southwest confronting long-term growth have insufficient known supplies of water to support their future economic and population growth. The inefficient allocation of available water between agricultural users and municipal or industrial users, the lack of available known water supplies in a particular location, or inadequate infrastructure to fully utilize or store existing and new water supplies provide opportunities for us to apply our water resource development expertise.

The development of our water assets requires significant capital and expertise. A complete project, from acquisition, through development, permitting, and sale is typically a long-term endeavor. In the regions in which we operate, new housing and commercial and industrial developments require an assured, or sustainable, water supply (for example, in Arizona, access to water supplies for at least 100 years is required) before a permit for the development will be issued.

We have acquired or developed water rights and water related assets in Arizona, California, Idaho, Nevada, Colorado, and New Mexico. We also developed and operate our own water storage facility near Phoenix, Arizona, utilize water storage capacity operated by third parties in Arizona, and "bank," or store water for future growth with municipalities in Nevada and New Mexico.

We have also entered into "teaming" and joint resource development arrangements with third parties who have water assets but lack the capital or expertise to commercially develop these assets. The first of these arrangements was a water delivery teaming agreement in southern Nevada with the Lincoln County Water District ("Lincoln/Vidler"), which is developing sustainable water resources in Lincoln County, Nevada under the federal Lincoln County Land Act. In northwestern Nevada, we have also entered into a joint development agreement with Carson City and Lyon County, Nevada to develop and provide sustainable water resources in Lyon County as well as a water banking agreement with Truckee Meadows Water Authority ("TMWA") in Reno, Nevada.

We generate revenues by:

- selling our developed water rights to real estate developers, alternative energy facilities or other commercial and industrial users who must secure rights to an assured, or sustainable, supply of water in order to receive permits for their development projects;
- selling our developed sustainable water rights to water utilities, municipalities, or other government agencies for their specific needs, including to support population and economic growth;
- selling our stored water to state agencies, commercial developers, or municipalities that have either exhausted their existing water supplies or require reserves for future water obligations, or, in instances where our water represents the most economical source of water, for their commercial projects or communities; and
- entitling, leasing, and selling of our water and land.

Our revenue and cash generation from the sale of our water resource and real estate assets can vary significantly from quarter to quarter and largely depends on when actual sale transactions close. We are unable to predict with any certainty the impact on the timing of any future asset sales and revenue and cash generation due to the economic contraction in the U.S. as a result of the COVID-19 pandemic. However, we believe if an economic contraction in the U.S. persists for several quarters, it is likely that future asset sales will be delayed, which could adversely affect our liquidity.

We owned the following significant water resources and water storage assets at December 31, 2020:

Fish Springs Ranch

We own a 51% membership interest in, and are the managing partner of, Fish Springs Ranch, LLC ("FSR"), which owns the Fish Springs Ranch and other properties totaling approximately 7,310 acres in Honey Lake Valley in Washoe County, Nevada approximately 40 miles north of Reno, Nevada. FSR also owns approximately 12,696 acre-feet of permitted water rights related to the properties of which 7,696 acre-feet are designated as water credits, available within the TMWA service area (such as Reno and Sparks) to support community development. The additional 5,000 acre-feet have been approved and permitted by the Nevada State Engineer. We are currently working on updating the existing federal rights of way through our existing Rights-of-Way grant for the project with the Bureau of Land Management before the water may be used in the TMWA service area. To date, we have funded all of the operational expenses, development, and construction costs incurred in this partnership. Certain of the development and construction costs are treated as preferred capital under the operating agreement which, among other things, entitles us to receive interest on the initial balance of the preferred capital and the accumulated interest at the London Inter-Bank Offered Rate ("LIBOR") plus 450 basis points. As the publication of LIBOR will cease as of December 31, 2021, the Company is in the process of evaluating the alternatives to the LIBOR rate for the purposes of the interest calculation. The preferred capital and accumulated interest are first in line to be paid out as the partnership generates sufficient revenue. At December 31, 2020, the balance in the preferred capital account, including \$100.9 million of accrued interest, was \$195.5 million and the associated interest rate was 4.74%.

In July 2008, we completed construction of and dedicated our pipeline and associated infrastructure to Washoe County, Nevada under the terms of an Infrastructure Dedication Agreement ("IDA") between Washoe County and FSR. Under the provisions of the IDA, Washoe County is responsible for the operation and maintenance of the pipeline, and we own the exclusive right to the capacity of the pipeline to allow for the sale of water for future economic development in the north valleys area of Reno. As of December 31, 2020, our remaining first phase 7,696 acre-feet of water that has full regulatory approval to be imported to the north valleys of Reno is available for sale under a Water Banking Trust Agreement entered into between FSR and Washoe County. Under the Water Banking Trust Agreement, Washoe County (now TMWA) holds our water rights in trust. We can sell our water credits to developers, who must then dedicate the water to the local water utility for service. In December 2014, Washoe County Water Utilities merged with TMWA, consolidating the water supply service in Washoe County. Also effective at the end of 2014, FSR, Washoe County, and TMWA consented to the assignment of the Water Banking Trust Agreement and the IDA to TMWA. Through this project we continue to work on the sustainability of water supplies for the North Valleys of Reno, and one that also provides a reliable resource in times of drought.

The FSR property is a working ranch and is comprised of 7,310 acres of our privately owned land and approximately 180,000 acres of a Bureau of Land Management grazing allotment. The land and allotment are currently leased to a cattle company for grazing. The ranch also grows alfalfa hay and grass hay that is sold to cattle operators, dairies and feed stores. In addition, we have entered into an option agreement with a solar company to lease up to 2,600 acres for solar panels and battery storage at \$400 per acre, escalated at 2% per annum over a 26-year term with two additional 5-year extensions. As of December 31, 2020, the solar company has exercised on 727.8 acres and paid the first lease payment of \$291,000. The solar company has elected to continue to option approximately 1,365 acres in preparation for future alternative energy projects.

Carson/Lyon

The capital of Nevada, Carson City, and Lyon County are located in the northwestern part of the state, close to Lake Tahoe and the border with California. While Carson City's housing growth has been and is expected to be modest due to land constraints, there is planned growth for the Dayton corridor, directly east of Carson City. The planned growth in this area is anticipated to be driven by the employment growth at the Tahoe Reno Industrial Center ("TRIC") and the completion of the extension of the USA Parkway which connects Interstate route 80 to TRIC and to U.S. route 50 near Silver Springs, Lyon County, Nevada. There are currently few existing sustainable water sources to support future growth and development in the Dayton corridor area. We continue to work with Carson City and Lyon County on ways to deliver a sustainable water supply to support this expected economic expansion.

We have development and improvement agreements with both Carson City and Lyon County to provide water resources for planned future growth in Lyon County and to connect, or “intertie,” the municipal water systems of Carson City and Lyon County. The agreements allow for certain river water rights owned or controlled by us to be conveyed for use in Lyon County. The agreements also allow us to bank water with Lyon County and authorize us to build the infrastructure to upgrade and inter-connect the Carson City and Lyon County water systems.

We own or control, by means of option agreements, water rights consisting of both Carson River agriculture designated surface water rights and certain municipal and industrial designated groundwater rights. We anticipate that we will have up to approximately 4,192 acre-feet available (through owned and optioned water rights) for municipal/industrial use in Lyon County for future development, as demand occurs, principally by means of delivery through the infrastructure we constructed.

To assist in regional solutions, Vidler is providing “in-kind” labor and expertise to obtain Right-of-Way from the Bureau of Land Management and Nevada Department of Transportation for Water, Sewer, Reclaimed Water utilities along the Highway 50 corridor between Dayton and Silver Springs. While there are no plans for construction at this time, this is a project to further our ability to market and sell our water rights to potential residential and commercial developments in and around the Stagecoach, Lyon County area in the Highway 50 corridor. We believe there are several development projects in process in this region that do not appear to have a sustainable water supply to allow these potential projects to progress. We believe that, if we are able to deliver our water through infrastructure to the Stagecoach area, there will be significant demand for our water rights due to the lack of alternative water supplies.

Vidler Arizona Recharge Facility

We built and received the necessary permits to operate a full-scale water “recharge” facility that allowed us to bank water underground in the Harquahala Valley, Arizona. “Recharge” is the process of placing water into storage underground for future use. When needed, the water will be “recovered,” or removed from storage, through groundwater wells. Under Arizona Law this stored water creates a long-term storage credit (“LTSC”). The Arizona Department of Water Resources tracks and documents the LTSCs stored throughout Arizona.

At this facility, we recharged Colorado River water, which is a primary source of water for the Lower Basin States of Arizona, California, and Nevada. The water storage facility is strategically located adjacent to the Central Arizona Project (“CAP”) aqueduct, a conveyance canal running from Lake Havasu to Phoenix and Tucson. Our recharged water was purchased from surplus flows of CAP water. Proximity to the CAP aqueduct provides a competitive advantage as it minimizes the cost of water conveyance of our LTSCs.

Potential users include industrial companies, alternative energy (solar and green hydrogen) companies, developers, and local governmental political subdivisions in Arizona, including municipalities and incorporated areas. The Arizona Water Banking Authority (“AWBA”) has the responsibility for intrastate and interstate storage of water for governmental entities. To date, we have not stored water at the facility for any specific third party and there is no longer excess water which can be banked.

While Arizona was the only southwestern state with surplus flows of Colorado River water available for storage, there are currently no surplus flows available to us as drought conditions have reduced the flow of the Colorado River and other water users have fully utilized their water allocations. In the future, we do not anticipate purchasing and storing surplus flows of Colorado River water, and we have discontinued using the recharge element of the storage site. At December 31, 2020, we had approximately 250,682 acre-feet of LTSCs stored at our facility.

Phoenix AMA Water Storage

As of December 31, 2020, we owned approximately 28,147 acre-feet of LTSCs stored in the Phoenix Active Management Area (“AMA”). We have approximately 200 acre-feet left to be purchased on a seven-year contract that expires in November 2021. Water stored in the AMA may be recovered and used anywhere in the AMA and could have a variety of uses for residential and commercial developments within the Phoenix metropolitan area such as the sale we consummated in 2019 with the City of El Mirage for 25,000 acre-feet of LTSCs. All of the storage sites we utilize within the AMA are operated by third parties.

Harquahala Valley Ground Water Basin

As of December 31, 2020, we owned 1,926 acres of land associated with the Vidler Recharge Facility and surrounding areas. Currently, there is interest from solar development companies in this property and associated banked water. We believe this land has more potential for solar development than any residential developments and therefore we will likely not renew our Analysis of Adequate Water Supply on our land by December 2021.

Lincoln County, Nevada Water Delivery and Teaming Agreement

Lincoln County, Nevada ("Lincoln") and Vidler entered into a water delivery teaming agreement to locate and develop water resources in Lincoln County, Nevada for planned projects pursuant to the Lincoln County master plan. Under the agreement, proceeds from sales of water will be shared equally after Vidler is reimbursed for the expenses incurred in developing water resources in Lincoln County. Lincoln/Vidler has filed applications within Lincoln County for more than 100,000 acre-feet of water rights, with the intention of supplying water for residential, commercial, and industrial use, as contemplated by the county's approved master plan. We believe that this is the only known new source of water for Lincoln County. Although it is uncertain, Vidler currently anticipates that over the long-term, up to 40,000 acre-feet of water rights will ultimately be permitted from these applications, and put to use for planned projects in Lincoln County.

Tule Desert Groundwater Basin

Lincoln/Vidler jointly filed permit applications in 1998 for approximately 14,000 acre-feet of water rights for industrial use from the Tule Desert Groundwater Basin in Lincoln County, Nevada. In November 2002, the Nevada State Engineer awarded Lincoln/Vidler a permit for 2,100 acre-feet of water rights, which Lincoln/Vidler subsequently sold in 2005; the State Engineer ruled that an additional 7,240 acre-feet could be granted pending additional studies by Lincoln/Vidler (the "2002 Ruling"). Subsequent to the 2002 Ruling and consistent with the Nevada State Engineer's conditions, we completed these additional engineering and scientific studies and provided this information to the State of Nevada and other regulatory bodies.

On April 15, 2010, Lincoln/Vidler and the Nevada State Engineer announced a Settlement Agreement with respect to litigation between the parties regarding the amount of water to be permitted in the Tule Desert Groundwater Basin. The Settlement Agreement resulted in the granting to Lincoln/Vidler of the original application of 7,240 acre-feet of water rights with an initial 2,900 acre-feet of water rights available for sale or lease by Lincoln/Vidler. The balance of the water rights (4,340 acre-feet) is the subject of staged pumping and development over the next several years to further refine the modeling of the basin and potential impacts, if any, from deep aquifer pumping in the remote, unpopulated desert valley in Lincoln County, Nevada.

The Tule Desert Groundwater Basin water resources were developed by Lincoln/Vidler to sustainably support the Lincoln County Recreation, Conservation and Development Act of 2004 (the "Land Act"). The water permitted under the Settlement Agreement is anticipated to provide sufficient and sustainable water resources for a portion of the Land Act properties.

Kane Springs

In 2005, Lincoln/Vidler agreed to sell water to a developer of Coyote Springs, a new planned residential and commercial development 60 miles north of Las Vegas, as and when supplies were permitted from Lincoln/Vidler's existing applications in Kane Springs, Nevada. Lincoln/Vidler currently has priority applications for approximately 17,375 acre-feet of water in Kane Springs for which the Nevada State Engineer has requested additional data, before making a determination on the applications from this groundwater basin. The actual permits received may be for a lesser quantity, which cannot be accurately predicted.

Lincoln/Vidler entered into an agreement to sell water to Coyote Springs Investments ("CSI"); CSI is the developer of Coyote Springs, a new planned residential and commercial development 60 miles north of Las Vegas. Of the permitted water rights in Kane Springs Valley, Vidler agreed to sell to CSI 500 acre-feet of those permitted water rights pursuant to a purchase option agreement.

Following hearings conducted by the Nevada State Engineer in late September early-October of 2019 to determine the boundaries of the Lower White River Flow System ("LWRFS") in Southern Nevada, the Nevada State Engineer, on June 20, 2020, issued Order No.1309, finding that Kane Springs Valley was now to be included as part of the LWRFS. This Order results in subordinating Lincoln/Vidler's senior priority water right date of their current permitted water rights in Kane Springs Valley to the respective priority dates in relation to all other water rights in the new multi-basin area "Super Basin." If the Order stands, it will likely impede Lincoln/Vidler from pursuing its existing permitted water rights and applications in the Kane Springs Valley Basin and will adversely affect its contracts with CSI.

Lincoln/Vidler believes that the Kane Springs Valley Basin is not a part of the LWRFS and presented evidence to this effect at the State Engineer's hearings. Lincoln/Vidler believes there is no legal authority in existing Nevada water law statutes that allows the State Engineer to create a "Super Basin" and disregard long-standing existing individual basin boundaries and water right priorities within those individual basin boundaries.

Lincoln/Vidler have filed a Petition for Judicial review appealing Order No. 1309, as well as a 'takings' claim against the State of Nevada for the subordination of Lincoln/Vidler's water right priority. CSI, as well as others, have also appealed this Order, and Lincoln/Vidler anticipates supporting CSI in its appeal. Given the number of participants in the appeal, a lengthy period may pass before the matter is resolved. Our appeal and takings claim is in the early stages of the legal process and, as such, it is difficult to evaluate the ultimate outcome of our appeal of the Order. An adverse ruling would materially and adversely affect Lincoln/Vidler's investment in the Kane Springs Valley Basin and its contracts with CSI. If there is an adverse ruling on the appeal, the current option agreement with CSI could result in forgone revenue of up to \$3.5 million.

The following table summarizes our other water rights and real estate assets at December 31, 2020:

Name and location of asset	Brief description	Present commercial use
Nevada:		
Dry Lake	Vidler owns 600 acres of agricultural and ranch land in Dry Lake Valley North, which is alternative energy ready and the location of a programmatic Environmental Impact Study ("EIS") renewable energy site. Lincoln/Vidler owns the 1,009 acre-feet of permitted agricultural groundwater rights associated with the land.	Water rights and land are available to support alternative energy development through sale, lease, or partnering arrangements.
Muddy River	Located in Lincoln County. 267 acre-feet of water rights.	Currently leased to Southern Nevada Water Authority which water rights contribute to the sustainability of Lake Mead during drought conditions.
Dodge Flat	Located 35 miles east of Las Vegas. 295.9 acre-feet of permitted municipal and industrial use water rights.	The remaining 295.9 acre-feet of water rights that were under contract, were sold on March 10, 2021 for \$2.1 million.
Colorado:		
Tunnel	Located in Washoe County, east of Reno. Approximately 124.8 acre-feet of water rights.	31 acre-feet of water leased under long term leases. 93.9 acre-feet are available for sale or lease.
New Mexico:		
Campbell Ranch	Application for a new appropriation of 350 acre-feet of ground water. Vidler is in partnership with the land owner. The water rights would be used for a new residential and commercial development. Located 25 miles east of Albuquerque.	In November 2014, our application was denied by the New Mexico State Engineer causing us to record an impairment loss of \$3.5 million which reduced the capitalized costs and other assets of this project to zero. We appealed this decision on November 19, 2014. The appeal was denied in February 2019. We are withdrawing our appeal of the de-novo trial but will continue to appeal the costs.
Lower Rio Grande Basin	Approximately 1,209 acre-feet of agricultural water rights. Located in Dona Ana and Sierra Counties.	Water is available for sale, lease or other partnering opportunities. We entered into a long-term lease for a portion of these water rights for farming operations.
Middle Rio Grande Basin	Approximately 19.6 acre-feet of water rights permitted for municipal use. Located in Santa Fe and Bernalillo Counties.	The remaining 19.6 acre-feet of water rights that were under contract, were sold on February 26, 2021 for \$530,000.

Employees

At December 31, 2020, we had 14 full - time employees.

Executive Officers

The executive officers of Vidler Water Resources, Inc. are:

Name	Age	Position
Dorothy A. Timian - Palmer	63	President and Chief Executive Officer
Maxim C. W. Webb	59	Executive Chairman and Chief Financial Officer

Ms. Timian - Palmer has served as our President and Chief Executive Officer since August 2018. Ms. Timian-Palmer has been Chief Executive Officer of Vidler Water Company, Inc. since October 2016, and President of Vidler Water Company, Inc. since October 2008.

Mr. Webb has served as our Executive Chairman since August 2018, and as our Chief Financial Officer since May 2019. Prior to his appointment as Executive Chairman, Mr. Webb was our President and Chief Executive Officer, and a member of our Board of Directors since October 2016, and served as Chairman of the Board of Directors since December 2016. Mr. Webb has been an officer of Vidler Water Company, Inc., since 2001. He has served in various capacities since joining our company in 1998, including Chief Financial Officer, Treasurer, Executive Vice President and Secretary.

ITEM 1A: RISK FACTORS

The following information sets out factors that could cause our actual results to differ materially from those contained in forward-looking statements we have made in this Annual Report on Form 10-K and those we may make from time to time. Investors should carefully consider the following risks, together with other matters described in this Annual Report on Form 10-K or incorporated herein by reference in evaluating our business and prospects. If any of the following risks occur, our business, financial condition, or operating results could be harmed. In such case, the trading price of our securities could decline, in some cases significantly.

1. Asset and Market Concentration Risk

Our water resource and water storage operations are concentrated in a limited number of assets and markets, making the success of our operations highly dependent on the conditions and fluctuations of the local economies where those operations and assets are located.

We anticipate that a significant amount of our water resource and water storage revenue, results of operations, and cash flows will result from a limited number of assets that primarily consist of our water rights in Nevada and our water storage operations in Arizona. Our two most significant assets are our water credits to serve the North Valleys area of Reno, Nevada, and our water storage operations in Arizona. As a result of this geographic concentration, we expect the ultimate return on our invested capital, results of operations, and cash flows will be closely associated with the conditions and fluctuations of the local economies, including any changes in local and regional government land use, zoning, permitting approvals, and other regulatory actions in these regions. Any economic downturn, or additional permitting, zoning or planning regulatory requirements in these markets, would adversely impact our results of operations, cash flows, and our financial condition. Any prolonged weak demand or lack of permitting approvals for new homes and residential and commercial development would adversely affect our assets in Nevada and Arizona and would have a material adverse effect on our future revenues, results of operations, cash flows, and the return on our investment from those assets.

Our Fish Springs Ranch project to sell water credits to the North Valleys area of Reno, Nevada could adversely affect our results of operations, if we are unable to sell water credits.

We constructed a pipeline approximately 35 miles long to deliver water from Fish Springs Ranch to the North Valleys area of Reno, Nevada. As of December 31, 2020, the total cost of the pipeline project, including our water credits (net of impairment losses incurred to date), carried on our balance sheet was approximately \$81.6 million. To date, we have sold only a small amount of the water credits, and we cannot provide any assurance that the sales prices we may obtain in the future will provide an adequate economic return, if at all. Demand for these water credits is anticipated to come primarily from both local and national developers planning to construct new projects in the North Valleys area of Reno, Nevada. The success of these projects is dependent on numerous factors beyond our control, including local government approvals, employment growth in the greater Reno area, and the ability of the developers to finance these projects.

Our inability to sell all or part of our Arizona Long-Term Storage Credits could adversely affect our profitability.

Our Arizona Recharge Facility is one of the few private sector water storage sites in Arizona. At December 31, 2020, we had approximately 250,682 acre-feet of Long Term Storage Credits stored at the facility. In addition, at December 31, 2020, we had approximately 28,147 acre-feet of Long Term Storage Credits stored in the Phoenix Active Management Area. We have not stored any water on behalf of any customers and, as of December 31, 2020, had not generated any material revenue from the Arizona Recharge Facility. We cannot be certain that we will ultimately be able to sell all of the stored water at a price sufficient to provide an adequate economic return, if at all.

The fair values of our water assets are linked to the rate of growth in the local markets in which our assets are concentrated; we may be unable to realize the value of our water assets in our projected time frame, and the value of those assets may be affected by broader economic issues.

Both the demand for, and fair value of, our water assets are significantly affected by the growth in population and the general state of the local economies where our real estate and water assets are located. The local economies where our real estate and water assets are located, primarily in Arizona and northern Nevada, but also in southern Nevada, Colorado, and New

Mexico. One or more of these economies may be adversely affected by factors such as the local level of employment, the availability and cost of financing for real estate development, and the affordability of housing. The unemployment rate in these states, as well as credit market conditions, may result in a slowdown of the local economies where our real estate and water assets are located. These developments, if they occur, could materially and adversely affect the demand for, and the fair value of, our real estate and water assets and, consequently, adversely affect our growth and revenues, results of operations, cash flows, and the return on our investment from these assets.

2. Business, Operational and Financial Risks

Our future revenue is uncertain and depends on a number of factors that may make our revenue, profitability, cash flows, and the fair value of our assets volatile.

Our future revenue and profitability of our water resource and water storage operations will primarily depend on our ability to develop and sell or lease our water assets. Because our water resource and water storage operations represent almost the entirety of our business at present, our long-term profitability and the fair value of the assets related to our water resource and water storage operations could be adversely affected by various factors that may affect our assets, including drought in the southwest, regulatory approvals and permits associated with those assets, transportation arrangements, and changing technology. We may also encounter unforeseen technical or other difficulties which could result in cost increases for our water resource and water storage development projects. Moreover, our profitability, and the fair value of our water resource assets and water storage operations, are significantly affected by changes in the market price of water. Future sales and prices of water may fluctuate widely, as demand is affected by climatic, economic, demographic, and technological factors, as well as the relative strength of the residential, commercial, financial, and industrial real estate markets in the areas where our water assets are located. Additionally, to the extent that we hold junior or conditional water rights, during extreme climatic conditions, such as periods of low river flow or drought, our water rights could be subordinated to superior water rights holders. The factors described above are not within our control. One or more of the above factors could negatively affect our revenue and profitability, our financial condition and cash flows, cause our results of operations to be volatile, and could adversely affect our rate of return on our water assets and cause us to divest such assets for less than our intended return on our investment.

The novel coronavirus, or COVID-19, pandemic, or an outbreak of another highly infectious or contagious disease, could adversely affect our business, financial condition, results of operations, and cash flow.

We believe that the economic downturn resulting from the COVID-19 pandemic has adversely affected employment, which could negatively affect the pace of residential and commercial real estate development in the regions in which our assets are located. Any downturn in residential and commercial real estate development in our markets is likely to adversely affect the demand for, and value of, our water resources and real estate assets, and our ability to sell these assets. The length and effect of any economic downturn is uncertain, but a prolonged downturn could adversely affect our liquidity, and could limit or entirely curtail the repurchase of our stock. We have observed that governmental precautions taken in response to the COVID-19 pandemic have delayed the permitting process for real estate development and housing permits, potentially delaying our ability to monetize our water assets, particularly in the Reno, Nevada, area. A prolonged recession or market correction resulting from the COVID-19 pandemic could materially and adversely affect our business and value of our common stock. We do not yet know the full extent of potential delays or impacts on our business or the global economy that may result from the COVID-19 pandemic, but we intend to continue to monitor the situation as more information becomes available.

The fair values of our water assets may decrease, which could adversely affect our results of operations with losses from asset impairments. The timing and amount of our water asset sales will affect the value and return we are able to attain on our assets.

The fair value of our water resource and water storage assets depends on market conditions. We have acquired water resources and land for expansion into new markets and for replacement of inventory and expansion within our current markets. The valuation of real estate and water assets is inherently subjective, based on the individual characteristics of each asset and the demand for that asset. Factors such as changes in regulatory requirements and applicable laws, political conditions, the condition of financial markets, local and national economic conditions, change in efficiencies of water use, the financial condition of customers, potentially adverse tax consequences, and interest and inflation rate fluctuations subject our asset valuations to uncertainties. In addition, our valuations are made on the basis of assumptions that may not prove to reflect economic or demographic reality. If population growth and, as a result, water and/or housing demand in our markets, fails to meet our expectations when we acquired our real estate and water assets, our profitability may be adversely affected, and we may be unable to recover our costs when we sell our real estate and water assets. We regularly review the value of our water

assets. These reviews have resulted in recording significant impairment losses in prior years to our water resource assets. Such impairments have adversely affected our results of operations and our financial condition in those years.

If future market conditions, including, without limitation, delays or slowdowns resulting from the COVID-19 pandemic, adversely affect the anticipated timing and the volume of sales of our water assets, we may be required to record further significant impairments to the carrying value of our water assets, which would adversely affect our results of operations and our financial condition.

If our assets decline in value, our financial condition and the return on our investment could suffer and our ability to make future dispositions of assets may be limited.

Historically, we have acquired and invested in businesses and assets that we believed were undervalued or that would benefit from additional capital, restructuring of operations, strategic initiatives, or operational efficiencies. If any previously acquired business, investment or asset fails or its fair value declines, we could experience a material adverse effect on our business, financial condition, the results of operations, and cash flows. If we are not successful in managing our previous acquisitions and investments, our business, financial condition, results of operations and cash flows could be materially affected. Such business failures, declines in the fair value of our assets, and/or failure to manage acquisitions or investments, could result in a negative return on equity. We could also lose part or all of our capital in these businesses and experience reductions in our net income, cash flows, assets and equity.

Future dispositions of our businesses, assets, operations, and investments, if unsuccessful, could reduce the value of our common stock. Any future asset dispositions may result in significant changes in the composition of our assets and liabilities. Consequently, our financial condition, results of operations and the trading price of our common stock may be affected by factors different from those historically affecting our financial condition, results of operations, and trading price at the present time.

Our plan to monetize assets and return capital to our shareholders may lead to a permanent reduction in our market capitalization and adversely affect the trading volume and liquidity for our stock and our representation in the Russell 2000 index.

Our current business plan is to monetize our assets and return capital to our shareholders through a stock repurchase program or by other means such as special dividends. Currently we have a stock repurchase program in place and as of December 31, 2020, we had used \$48.7 million to repurchase approximately 4.6 million of our common shares. As we continue to monetize assets and use the associated sale proceeds for share repurchases or special dividends, it is possible that our market capitalization will permanently decline, which could adversely affect the trading volume and liquidity for our stock. In addition, we are currently a constituent member of the Russell 2000 index, along with other indexes and other indexed products. If we ceased to be represented in the Russell 2000 index, or other indexes or indexed products, as a result of our market capitalization falling below the threshold for inclusion in the index, whether due to a decline in our stock price or a reduction in the number of shares outstanding, or for any other reason, certain institutional shareholders may, due to their internal policies and investment guidelines, be required to sell their shareholdings. Such sales may result in further negative pressure on our stock price and, when combined with reduced trading volume and liquidity, could adversely affect the value of your investment and your ability to sell your shares.

We may need additional capital in the future to fund our business and financing may not be available on favorable terms, if at all, or without dilution to our shareholders.

We currently anticipate that our available capital resources and operating cash flows will be sufficient to meet our expected working capital and capital expenditure requirements for at least the next 12 months. However, we provide no assurances that our resources will be sufficient to fund our business over longer periods. We may be required to raise additional funds through public or private debt, equity, warrants or hybrid securities financings, including, without limitation, the issuance of securities.

We may experience difficulty in raising necessary capital in view of the recent volatility in the capital markets and increases in the cost of finance, especially for a small capitalization company like ours. Increasingly stringent rating standards could make it more difficult for us to obtain financing. If we raise additional funds through the issuance of equity, warrants or convertible or other debt securities, the ownership of our shareholders could be significantly diluted, and these newly issued securities may have rights, preferences or privileges senior to those of existing shareholders. Indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. The additional financing we may need may not be available to us, or available on favorable terms. If adequate funds are not available or are not available on acceptable terms, if and when needed, our ability to fund our operations or otherwise execute

our business and operating plan would be significantly limited. In any such case, our business, operating results, or financial condition could be materially adversely affected.

Purchasers of our real estate and water assets may default on their obligations to us and adversely affect our results of operations and cash flow.

In certain circumstances, we finance our sales of real estate and water assets, and we secure that financing through deeds of trust on the property, that are only released when we have been fully paid. Purchasers of our real estate and water assets may default on their financing obligations. Any defaults may result in enforcement expense and have an adverse effect on our business, financial condition, and the results of operations and cash flows.

3. Legal and Regulatory Risks

We may not receive all of the permitted water rights we expect from the water rights applications we have filed in Nevada.

We have filed water rights applications in Nevada. The filings are primarily as part of the water teaming agreement with Lincoln County. We deploy the capital required to enable the filed applications to be converted into permitted water rights over time as and when we deem appropriate, or as otherwise required. We expend capital in those areas where our initial investigations lead us to believe that we can obtain a sufficient volume of water to provide an adequate economic return on the capital invested in the project. These capital expenditures largely consist of drilling and engineering costs for water production, costs of monitoring wells, legal and consulting costs for hearings with the relevant State Engineer, and other compliance costs. Until the Nevada State Engineer, or other authority in the relevant state, permits the water rights we are applying for, we cannot provide any assurance that we will be awarded all of the water that we expect based on the results of our drilling and our legal position and it may be a considerable period of time before we are able to ascertain the final volume of water rights, if any, that will be permitted by the Nevada State Engineer. Any significant reduction in the volume of water awarded to us from our original base expectation of the amount of water that could be permitted may result in the write down of capitalized costs that could adversely affect the return on our investment from those assets, our revenues, results of operations, and cash flows.

Variances in physical availability of water, along with environmental and legal restrictions and legal impediments, could adversely affect profitability.

We value our water assets, in part, based upon the volume (as measured in acre-feet) of water we anticipate from water rights applications and our permitted water rights. Our water and water rights and the transferability of these rights to other uses, persons, and places of use are governed by the laws concerning water rights in the states of Arizona, Colorado, Nevada, and New Mexico. The volumes of water actually derived from the water rights applications or permitted rights may vary considerably based upon physical availability and may be further limited by applicable legal restrictions, including, with limitation, restrictions on transfer of water rights.

As a result, the volume of water anticipated from the water rights applications or permitted rights may not in every case represent a reliable, firm annual yield of water, but in some cases describe the face amount of the water right claims or management's best estimate of such entitlement. Additionally, we may face legal restrictions on the sale or transfer of some of our water assets, which may adversely affect their commercial value. If the volume of water yielded from our water rights applications is less than our expectations, or we are unable to transfer or sell our water assets, we may be unable to achieve some or all of our anticipated returns, which may adversely affect our revenues, profitability, and cash flows.

Our sale of water assets may be subject to environmental regulations which would impact our revenues, profitability, and cash flows.

The quality of the water assets we lease or sell may be subject to regulation by the United States Environmental Protection Agency, acting pursuant to the United States Safe Drinking Water Act, and with other federal, state and local regulations. While environmental regulations may not directly affect us, regulations regarding the quality of water distributed affect our intended customers and may, therefore, depending on the quality of our water, affect the price and terms upon which we may in the future sell our water assets. If we need to reduce the price of our water assets in order to make sales to our intended customers, our balance sheet, return on investment, results of operations, and financial condition could suffer.

Our water assets may be adversely affected by legal and political opposition in certain locations.

The water assets we hold, and the transferability of these assets and rights to other uses, persons, or places of use, are governed by the laws and regulations concerning water rights in the states of Arizona, Nevada, Colorado and New Mexico, and may be directly or indirectly affected by other federal, state and local laws and regulations related to water and land use. Our development and sale of water assets is subject to the risks of delay associated with receiving all necessary regulatory approvals and permits, or the refusal to issue regulatory approvals or permits, and possible litigation. Additionally, the transfer of water resources from one use to another may affect the economic base or impact other community issues, including development, and will, in some instances, be met with local opposition. Moreover, municipalities who may regulate the use of water we sell to them in order to manage growth could also impose additional requirements that we must satisfy to sell our water assets.

If we are unable to effectively transfer, sell, and convey water resources, our ability to monetize those assets will suffer and our return on investment, revenues and financial condition would decline.

Our water rights are subject to challenge in judicial and administrative proceedings. Adverse outcomes may change our water rights priorities or require that we impair the value of our assets.

In all of the states in which we have operations, water rights are subject to a high degree of regulation. As a result, water rights that we have may be subject to challenge in judicial or administrative proceedings, or we may be required to bring such proceedings to protect our rights. These proceedings can adversely affect the priority of our water rights claims or the right to sell or transfer those rights, among many other things. Legal and administrative challenges to our water rights claims, or our initiation of proceeding to defend our claims, may be expensive, and adverse determinations may impair the value of our investment and adversely affect our ability to monetize our investment.

Our ability to utilize net operating loss carryforwards and certain other tax attributes may be limited.

Under Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"), if we undergo an "ownership change" (generally defined as a greater than fifty-percent (50%) change in the percentage of stock owned by one or more five percent (5%) or more shareholders (measured by the relative fair market value of that shareholder's stock compared to the total value of all outstanding stock, excluding changes in ownership attributable to fluctuations in value between different classes of stock)) as of the testing date, measured over a three year period, or a period beginning with any previous testing date, whichever is shorter, the ability to use our pre-change net operating loss carryforwards ("NOLs") and other pre-change tax attributes to offset our post-change income may be limited. The Company's previous plan to protect NOLs from loss due to ownership changes expired on July 24, 2020. Our Board of Directors adopted a new tax benefit preservation plan dated July 24, 2020, which we will ask our shareholders to ratify at our 2021 annual meeting. If the new Plan is not ratified by shareholders, it will expire. Notwithstanding the adoption of the new tax benefit preservation plan, it is possible that shareholders might not ratify the new plan or that we could experience ownership changes in the future as a result of shifts in our stock ownership. If the new tax benefit preservation plan were triggered by a change in ownership, acquiring shareholders and certain other shareholders could experience substantial dilution. Furthermore, Section 382 (and other tax code and regulatory provisions) relating to NOLs have recently been subject to proposed regulations by the Treasury Department and Internal Revenue Service which, if finalized in their current form, may have the effect of further reducing the value of NOLs, in certain circumstances, of a corporation that undergoes an ownership change. As of December 31, 2020, we had federal and state net operating loss carryforwards of approximately \$155.3 million and \$129.1 million, respectively, which, depending on ownership changes, could be limited by Section 382 of the Code.

4. General Economic Risks

General economic conditions could have a material adverse effect on our financial results, financial condition, and the demand for and the fair value of our assets.

Our operations are sensitive to the general economic conditions in the local markets in which our assets are located. International, national, and regional economic conditions may also affect our markets. General weak economic conditions and either slow or nonexistent rates of growth in the markets in which we operate could have a material adverse effect on the demand for and value of our water assets. Weak economic conditions include higher unemployment, inflation, deflation, decreases in consumer demand, changes in buying patterns, a weakened dollar, higher consumer debt levels, higher interest rates, especially higher mortgage rates, higher tax rates, and other changes in tax laws or other economic factors that may affect commercial and residential real estate development.

The performance of real estate markets in the short and long-term and the state of the economy, nationally and locally where our assets are concentrated, could affect the value of our existing water assets; a decline in the market could adversely affect the value of our water assets or cause us to retain these assets longer than we initially expected, which would negatively affect our rate of return on our water assets, cause us to divest such assets for less than our targeted return on investment, or cause us to impair the book values of such assets to estimated fair value.

A downturn in the homebuilding and land development sectors in our markets would materially adversely affect our business, results of operations, and the demand for and the fair value of our assets.

The homebuilding industry experienced a significant and sustained downturn in past years, resulting from factors that include, but are not limited to, weak general economic and employment growth, limited access to capital, a lack of consumer confidence, large supplies of resale and foreclosed homes, a significant number of homeowners whose mortgage loan balances exceeded the market value of their homes, and tight lending standards for mortgage loans that limited consumers' ability to qualify for mortgage financing to purchase a home. These factors resulted in an industry-wide weakness in demand for new homes and caused a material adverse effect on the growth of the local economies and the homebuilding industry in the southwestern United States ("U.S.") markets, where all of our water assets are located, including the states of Nevada, Arizona, Colorado, and New Mexico.

The continued the improvement in residential and commercial real estate development activity is essential to our ability to generate revenue and operating income in our water resource and water storage business. We are unable to predict whether and to what extent this improvement will continue. Any future slow-down in real estate and homebuilding activity could adversely affect development projects within the markets in which our water assets are located, and could adversely affect the demand for and the fair value of our assets and our ability to monetize them. Declines and weak conditions in the U.S. housing market in prior years have reduced our revenues and created losses in our water resource and water storage, and land development and homebuilding businesses and could do so in the future. Additionally, the recent tax law changes limiting, among other things, deductibility of mortgage interest and of state and local income taxes may have a negative effect on the national housing market and in the markets in which we operate, although the Nevada market may be less impacted due to the lack of a state income tax.

5. Other General Risks

Our business could be negatively impacted by cyber security threats.

In the ordinary course of our business, we use our data centers and our networks to store and access our proprietary business information. We face various cyber security threats, including without limitation, cyber security attacks to our information technology infrastructure and attempts by others to gain access to our proprietary or sensitive information. The procedures and controls we use to monitor these threats and mitigate our exposure may not be sufficient to prevent cyber security incidents. The result of these incidents could include disrupted operations, lost opportunities, misstated financial data, liability for stolen assets or information, increased costs arising from the implementation of additional security protective measures, litigation and reputational damage. Any remedial costs or other liabilities related to cyber security incidents may not be fully insured or indemnified by other means.

Fluctuations in the market price of our common stock may affect your ability to sell your shares.

The trading price of our common stock has historically been, and we expect will continue to be, subject to fluctuations. The market price of our common stock may be significantly affected by:

- a deletion from the the Russell 2000 index;
- quarterly variations in financial performance and condition of our business;
- shortfalls in revenue or earnings from estimates forecast by securities analysts or others;
- changes in estimates by such analysts;
- the ability to monetize our water assets for an adequate economic return, including the length of time any such monetization may take;
- our competitors' announcements of extraordinary events such as acquisitions;
- litigation;
- general economic conditions and other matters described herein;
- the number of analysts who follow our stock and their understanding of our business; and
- the volume of trading in our stock.

Our results of operations have been subject to significant fluctuations, particularly on a quarterly basis, and our future results of operations could fluctuate significantly from quarter to quarter and from year to year. Causes of such fluctuations may include one time transactions and impairment losses. Statements or changes in opinions, ratings, or earnings estimates made by brokerage firms or industry analysts relating to the markets in which we do business or relating to us specifically could result in an immediate and adverse effect on the market price of our common stock. Such fluctuations in the market price of our common stock could affect the value of your investment and your ability to sell your shares.

Litigation may harm our business or otherwise distract our management.

Substantial, complex or extended litigation could cause us to incur large expenditures and distract our management. For example, lawsuits by employees, shareholders or customers could be very costly and substantially disrupt our business. Additionally, from time to time we or our subsidiaries will have disputes with companies, governmental and tribal entities, special interest groups, or individuals which may result in litigation that could necessitate our management's attention and require us to expend our resources. We may be unable to accurately assess our level of exposure to specific litigation, and we cannot provide any assurance that we will always be able to resolve such disputes out of court or on terms favorable to us. We may be forced to resolve litigation in a manner not favorable to us, and such resolution could have a material adverse impact on our consolidated financial condition or results of operations.

We may not be able to retain key management personnel we need to succeed, which could adversely affect our ability to successfully operate our businesses.

To run our day-to-day operations and to successfully manage our businesses we must, among other things, continue to retain key management. We rely on the services of a small team of key executive officers. If any key executive departs, it could have a significant adverse effect upon our business. Also, increased competition for skilled management and staff employees in our businesses could cause us to experience significant increases in operating costs and reduced profitability.

We may suffer uninsured losses or suffer material losses in excess of insurance limits.

We could suffer physical damage to our assets and the losses resulting from any damage may not be fully recoverable by insurance. In addition, certain types of risks, such as personal injury claims or other tortious conduct, may be, or may become in the future, either uninsurable or uneconomical to insure, or may not be currently, or in the future, covered by our insurance or subject to significant deductibles or limits. If an uninsured loss, or a loss in excess of insured limits, occurs or is subject to a large deductible, we could sustain financial loss or lose capital invested in the affected asset(s), as well as anticipated future income from that asset. In addition, we could be liable to repair damage or meet liabilities caused by risks that are uninsured or subject to deductibles.

We have been the subject of shareholder activism efforts that could cause a material disruption to our business.

In the past, certain investors took steps to involve themselves in the governance and strategic direction of our Company due to governance and strategic-related disagreements with us. While we have formally settled with certain of those activists, other investors could take steps to involve themselves in the governance and strategic direction of our Company. Such shareholder activism efforts could result in substantial costs and diversion of management's attention and resources, harming our business and adversely affecting the market price of our common stock.

Anti-takeover provisions in our charter documents and under Delaware law may make an acquisition of us more complicated and the removal and replacement of our directors and management more difficult.

Provisions of our certificate of incorporation and bylaws, as well as provisions of Delaware law, could make it more difficult for a third party to acquire us, even if doing so would benefit our stockholders. These provisions may also make it difficult for stockholders to remove and replace our board of directors and management. For example, these provisions limit who may call a special meeting of stockholders and establish advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon at stockholder meetings. In addition, on July 24, 2020, our board of directors adopted a tax benefits preservation plan designed to preserve our ability to utilize our NOLs as a result of certain stock ownership changes, which may have the effect of discouraging transactions involving an actual or potential change in our ownership.

Analysts and investors may not be able to evaluate us adequately, which may negatively influence the price of our stock.

We own assets that are unique, complex in nature, and difficult to understand. In particular, our water resource business is a developing industry in the United States with very little historical and comparable data, complex valuation issues, and a limited following of analysts. Because our assets are unique, analysts and investors may be unable to adequately evaluate our operations and enterprise as a going concern. This could cause analysts and investors to make inaccurate evaluations of our stock, or to overlook the Company in general. As a result, the trading volume and price of our stock could suffer and may be subject to excessive volatility.

If equity analysts do not publish research or reports about our business, or if they issue unfavorable commentary or downgrade our common stock, the price of our common stock could decline.

The market for our common stock will in part be affected by the research and reports that equity research analysts publish about us and our business. We do not control these analysts. The price of our stock could decline if one or more equity analysts downgrade our stock, issue other unfavorable commentary, or cease publishing reports about us.

THE FOREGOING FACTORS, INDIVIDUALLY OR IN AGGREGATE, COULD MATERIALLY ADVERSELY AFFECT OUR OPERATING RESULTS, CASH FLOWS, AND FINANCIAL CONDITION AND COULD MAKE COMPARISON OF HISTORICAL FINANCIAL STATEMENTS, INCLUDING RESULTS OF OPERATIONS, CASH FLOWS, AND BALANCES, DIFFICULT OR NOT MEANINGFUL.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We lease office space in Carson City, Nevada, where our principal executive office is located. We continually evaluate our current and future space capacity in relation to our business needs. We believe that our existing office space is adequate to meet our current business requirements and that suitable replacement and additional space will be available in the future on commercially reasonable terms, should we need it.

We have significant holdings of real estate and water assets in the southwestern United States as described in *"Item 1 - Business."*

ITEM 3. LEGAL PROCEEDINGS

Except as described in ITEM 1. BUSINESS, (Kane Springs), and in ITEM 7, MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, LIQUIDITY AND CAPITAL RESOURCES (LEGAL DEVELOPMENTS), neither we nor our subsidiaries are parties to any potentially material pending legal proceedings.

We are subject to various litigation matters that arise in the ordinary course of our business. Based upon information presently available, management is of the opinion that resolution of such litigation will not likely have a material effect on our consolidated financial position, results of operations, or cash flows. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about future events. When evaluating contingencies, we may be unable to provide a meaningful estimate due to a number of factors, including the procedural status of the matter in question, the presence of complex or novel legal theories, and/or the ongoing discovery and development of information important to the matters. In addition, damage amounts claimed in litigation against us may be unsupported, exaggerated or unrelated to possible outcomes, and as such are not meaningful indicators of our potential liability. We regularly review contingencies to determine the adequacy of our accruals and related disclosures. The amount of ultimate loss may differ from these estimates, and it is possible that cash flows or results of operations could be materially affected in any particular period by the unfavorable resolution of one or more of these contingencies. Whether any losses finally determined in any claim, action, investigation or proceeding could reasonably have a material effect on our business, financial condition, results of operations or cash flows will depend on a number of variables, including: the timing and amount of such losses; the structure and type of any remedies; the significance of the impact any such losses, damages or remedies may have on our consolidated financial statements; and the unique facts and circumstances of the particular matter that may give rise to additional factors.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the NASDAQ Global Select Market under the symbol "VWTR", prior to March 9, 2021 our common stock traded under the symbol "PICO". The following table sets out the quarterly high and low sales prices for the past two years as reported on the NASDAQ Global Select Market. These reported prices reflect inter-dealer prices, without adjustments for retail markups, markdowns, or commissions.

	2020		2019	
	High	Low	High	Low
First Quarter	\$ 11.18	\$ 6.41	\$ 11.04	\$ 8.97
Second Quarter	\$ 9.22	\$ 6.59	\$ 11.82	\$ 9.91
Third Quarter	\$ 9.86	\$ 7.55	\$ 11.70	\$ 9.37
Fourth Quarter	\$ 9.58	\$ 8.20	\$ 11.41	\$ 9.63

Any future decision to pay dividends on our common stock will be at the discretion of our board of directors and will depend upon, among other factors, our ability to monetize assets, our results of operations, financial condition, capital requirements, and other factors our board of directors may deem relevant.

On March 8, 2021, the closing sale price of our common stock was \$9.89 and there were approximately 273 holders of record.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total number of shares of common stock purchased	Average price paid per share of common stock (including commissions)	Total number of shares of common stock repurchased as part of publicly announced plans or programs	Maximum dollar value of shares of common stock that may yet be repurchased under the plans or programs (in thousands) ⁽¹⁾
10/1/2020 - 10/31/20	73,955	\$ 8.92	4,514,046	\$ 52,442
11/1/2020 - 11/30/20	61,996	\$ 8.80	4,576,042	\$ 51,897
12/1/2020 - 12/31/20	69,704	\$ 8.89	4,645,746	\$ 51,277
Total	<u>205,655</u>			

⁽¹⁾ Our stock repurchase program authorization was amended on February 1, 2020. Our Board of Directors authorized an aggregate of \$100 million (from an aggregate of \$50 million previously authorized) to be used for the stock repurchase program, and there is no set expiration date.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

INTRODUCTION

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand our Company. The MD&A should be read in conjunction with our consolidated financial statements and the accompanying notes, presented later in this Annual Report on Form 10-K. The MD&A includes the following sections:

- *Company Summary, Recent Developments, and Future Outlook* — a brief description of our operations, the critical factors affecting them, and their future prospects;
- *Critical Accounting Policies, Estimates, and Judgments* — a discussion of accounting policies which require critical judgments and estimates. Our significant accounting policies, including the critical accounting policies discussed in this section, are summarized in the notes to the consolidated financial statements;
- *Results of Operations* — an analysis of our consolidated results of operations for the past two years, presented in our consolidated financial statements; and
- *Liquidity and Capital Resources* — an analysis of cash flows, sources and uses of cash, contractual obligations and a discussion of factors affecting our future cash flow.

COMPANY SUMMARY, RECENT DEVELOPMENTS, AND FUTURE OUTLOOK

Recent Developments:

Northern Nevada

The majority of our water resource assets are located in northern Nevada at FSR and our Carson / Lyon project. FSR's water credits are able to provide a sustainable water supply in the North Valleys region of Reno, Washoe County, Nevada, and the Carson / Lyon water rights are able to provide a sustainable water supply in Lyon County, Nevada. As a result, we are dependent on new residential or commercial development occurring in these regions in order for us to monetize our water resources in northern Nevada. In turn, new development in these regions is highly dependent on the continued robust economic and job growth that is occurring in northern Nevada.

The economic development in the greater Reno region has been concentrated in the Tahoe Reno Industrial Center business park ("TRIC") which is a 107,000 acre industrial park proximate to Interstate 80 and 15 miles east of Reno, Nevada. Tesla Motors, Inc. ("Tesla") built its Gigafactory facility in this business park. Many other technology companies have also moved to the area including Apple, Google, Jet.com, Battery Systems Inc., Tire Rack, U.S. Ordinance, Zulily, Switch and Blockchains LLC.

Overall in the U.S. Reno, Nevada was rated fourth for Best-Performing Large Cities in 2020 - based on the region's strong job growth that is fueling the area's economic growth - as determined in a report released in September, 2020, from the Milken Institute titled: BEST-PERFORMING CITIES 2020 Where America's Jobs Are Created and Sustained. This puts Reno behind only San Francisco, CA, Provo-Orem, UT, and Austin, TX as a regional economic engine. In this report, the researchers rated Reno, Nevada as second overall in High-tech Gross Domestic Product ("GDP") growth and fourth in Wage growth. This can be attributed to the diverse industrial mix of the region's economy. According to the Milken Report "...Reno's one-year job growth and short-term job-growth top all large metros in our rankings." The Reno region's job diversification has led to less volatility in the employment base: At the end of 2020, unemployment rate in the US was 6.7%, in southern Nevada 11.5%, but only 5.7% in northern Nevada.

The economic growth in the region has led to strong demand for housing. According to the Reno/Sparks Association of REALTORS in its December 2020 Existing Home Sales Report, the median sales price for an existing single-family residence was \$500,000, an increase of 23.5% from 2019 and a 4.2% increase from the previous month and the existing condominium/townhome median sales price in December 2020 was \$290,000, an increase of 22.4% from 2019. In the North Valleys region, where our Fish Springs Ranch water rights are utilized, there was a 38% increase in fourth quarter sales in 2020 compared to 2019.

The Economic Development Authority of Western Nevada ("EDAWN"), comprised of Reno, Sparks, and Tahoe areas, released an update (RCG Economics, Technical Memorandum dated January 29, 2019) to its previous forecasts that includes the latest historical data and a new five-year forecast from 2019 through 2023. This five-year forecast project a cumulative addition of 51,585 new jobs in the region which represents a 12.7% increase in employment. This job growth leads to population growth. The report also projects the region's population to grow to 686,737 residents by the end of 2023, an increase of 54,470 residents (8.6%) in that five-year period. We believe that this increased employment and population growth will create demand for new residential, commercial and industrial development in the greater Reno area and in Lyon County.

Thirty new companies relocated to the Reno MSA in 2020, bringing over 2,200 new jobs, with an average wage greater than \$58,000, including eleven corporate headquarters. These new businesses were largely manufacturing and technology, along with additional logistics, distribution, and E-commerce companies. As the Reno/Sparks business sector has grown, so have actual wages to an average of \$73,000 to date in 2021.

Current economic conditions have fostered new business openings, lower apartment vacancies, and the greater absorption of existing housing inventory. This activity has resulted in multiple new housing projects entering the approval process with local governments in Reno, Sparks, Carson City, Lyon County and Fernley. Residential housing projects have to demonstrate sustainable water supply to obtain final map approval, and many projects in the North Valleys of Nevada are currently in the process of seeking or have obtained master plan amendment/zone change approvals. The next step for these developers is to obtain tentative map and then final map approvals. Within the Reno-Sparks and Washoe County area of Nevada, according to EDAWN, in 2019 there were 3,807 new housing permits pulled. EDAWN's goal is for at least 6,000 new housing permits to meet the projected demand for housing. In 2019, total new permits in Reno/Sparks/Washoe County decreased approximately 17% over the total number of new building permits for single-family and multi-family homes, combined, of 4,595 in 2018. However, during 2020 housing permits declined to the lowest number in over 5 years. As of November, 2020, 2,690 new housing permits had been issued, a fraction of the community goal of 4,500. We believe the reduction in the issuance of building permits is due to an interruption of the permitting process due to the effects of the COVID-19 pandemic. We expect the building permit activity to increase in 2021, once the permit process is initiated on newly approved subdivisions. We believe this increase in activity will lead to demand for our water resources, as developers pursue their projects to provide housing for the population growth in the region. However, the increased activity has strained governmental agencies and has caused delays in processing permits as well as new projects' planning approval process. The timing of future monetization of our water resources in northern Nevada is directly correlated to the time it takes residential developers to pursue their projects in the areas where our FSR and Carson/Lyon assets are located, and the time it takes for those developers to get the requisite planning approvals prior to obtaining final map approval or, in the case of commercial development projects, final regulatory approvals.

Southern Nevada

In 1998, Lincoln County and Vidler Water Company filed applications with the Nevada State Engineer seeking to extract approximately 14,480 acre-feet per year from the Tule Desert Hydrographic Basin. The Nevada State Engineer initially awarded Lincoln/Vidler 2,100 acre-feet per year of groundwater, holding 7,240 acre-feet of groundwater in abeyance until additional studies were performed. Following an extensive exploratory drilling program and numerous scientific study Lincoln/Vidler was awarded an additional 7,240 acre-feet for a total of 9,340 acre-feet in 2010. The Nevada State Engineer conditioned the additional water rights on the staged pumping of the granted water rights allowing 5,000 acre-feet per year to be pumped initially. After groundwater has been pumped for eight consecutive years additional water can be released to Lincoln/Vidler to develop.

Lincoln/Vidler received a Record of Decision for the Lincoln County Land Act Groundwater Development and Utility Right-of-Way grant from the BLM in 2010 for the Tule Desert. The BLM grant allows Lincoln/Vidler to construct up to 16 production wells and necessary infrastructure to develop groundwater from the Tule Desert to the Lincoln County Land Act area located north of the City of Mesquite, NV.

The City of Mesquite is one of the fastest growing cities in Nevada. Mesquite is a large retirement community; with nearly 40% of the population comprised of retired individuals. Virgin Valley Water District is the water service provider for the City of Mesquite and its neighboring community of Buckerville. From July 1, 2019, to June 30, 2020, the City of Mesquite issued 303 single family residential building permits. From July 1, 2020, to January 31, 2021, the City of Mesquite issued 212 single family residential building permits. According to Virginia Valley Water Districts Master Plan both communities have had average combined growth rate of 5.4% from 2000 to 2018, with a combined population in 2020 of approximately 21,242. As the City of Mesquite nears build out current developers are looking to expand their projects into the Lincoln County Land Act area.

A developer in the City of Mesquite that also owns a majority of the property in the Lincoln County Land Act is nearing build out and is looking to expand its production into their Lincoln County Land Act holdings. The developer has been working with Lincoln/Vidler to explore funding options for a pipeline and infrastructure to deliver groundwater from Tule Desert to the Lincoln County Land Act area. Lincoln/Vidler have been approached by Virgin Valley Water District, the local water utility in Mesquite, with an interest in purchasing our water and assisting in funding the pipeline infrastructure.

In 2019 Lincoln/Vidler submitted a Plan of Development to the BLM. The Plan of Development, which has yet to be approved, is necessary to gain the approval to begin construction of the infrastructure needed to deliver groundwater from the Tule Desert to the Lincoln County Land Act.

Arizona

Several market catalysts continue to emerge with respect to our LTSCs, including the recent drought in the western United States, continued structural deficits on the Colorado River system, Indian Firming and Settlement obligations by the state of Arizona, increased water demand from overall growth in Arizona, especially in the Pinal AMA, and the Lower Basin Drought Contingency Planning ("DCP") effort by Arizona.

Arizona has an obligation to "firm" Indian water supplies as negotiated through various Indian Water Settlement Agreements. Section 105 of the Settlements Act (S. 437) titled "Firming of Central Arizona Project Indian Water," authorizes the Secretary of Interior and the State of Arizona to develop a firming program to ensure that of a total 197,500 acre-feet of non-Indian agricultural water reallocated to the Arizona Indian Tribes, 60,648 acre-feet must be delivered in the same manner as water with a municipal and industrial priority during water shortages, over a 100 year period. It is estimated that over the 100-year period, the total shortfall of the Indian Firming obligation is approximately 550,000 acre-feet. To date approximately 140,000 acre-feet has been secured by Arizona for the firming obligations shortfall. The US Bureau of Reclamation also has an Indian firming obligation for existing and future Arizona Indian settlements of approximately 950,000 acre-feet. We believe our LTSCs can be used to help Arizona and the US Bureau of Reclamation meet these obligations.

A shortage on the Colorado River system will be declared by the Secretary of the Interior when on January 1, of any year, Lake Mead's surface water elevation is at or below 1,075 ft. This determination is made in August of the previous year based on a rigorous modeling evaluation of the hydrologic system of the Upper Colorado Basin by the U.S. Bureau of Reclamation. Under the Drought Contingency Plan (DCP), a new tier, "Tier 0", applies when Lake Mead is at an elevation between 1,075 ft. and 1,090 ft. and a shortage declaration has been made which went into effect January 1, 2021. This requires Arizona to cut-back its allocations by 192,000 acre-feet, and Nevada by 9,000 acre-feet. When Lake Mead is at an elevation between 1,050 ft. and 1,075 ft., Nevada's share of the shortage is 13,000 acre-feet and Arizona's cut-back to its allocation is 320,000 acre-feet. In contrast, California suffers no loss to its allocation from the Colorado River (2007 Shortage Sharing Guidelines).

It is probable that the next level of delivery reductions, which would make the total reductions to Arizona 512,000 acre-feet, will be declared for calendar year 2022. This is likely due to the low levels of inflow to Lake Powell that would cause reductions to inflows to Lake Mead, and thus affect critical lake level triggers.

It has been determined that the Colorado River system suffers from a structural deficit of 1.2 million acre-feet annually. This means that on an average annual water year, Lake Mead will lose 1.2 million acre-feet to the system, due to evaporation, treaty obligations with Mexico, and allocations of water to Arizona, Nevada and California that exceed what the system yields. We continue to believe that Vidler's LTSCs are well positioned to buffer Arizona through times of water shortage and our LTSCs could be purchased by state entities and/or municipalities located in the Phoenix AMA to be used directly or to help sustain levels in Lake Mead.

Currently the Pinal AMA, a largely agricultural area located in between the Phoenix and Tucson AMAs, is experiencing a physical shortage of water supplies for new developments within this AMA. This area, like the Phoenix metropolitan area, is increasingly under pressure to grow from new residential, commercial, and industrial users; however, according to the Arizona Department of Water Resources analyses, there is "...insufficient, groundwater in the Pinal Active Management Area to support all existing uses and issued assured water supply determinations." Proposed projects have been denied until new assured water supply sources can be found to sustain this new development. The use of our banked water in Harquahala could be used to help satisfy this need.

CRITICAL ACCOUNTING POLICIES, ESTIMATES, AND JUDGEMENTS

This section describes the most important accounting policies affecting our assets and liabilities, and the results of our operations. Since the estimates, assumptions, and judgments involved in the accounting policies described below have the greatest potential impact on our financial statements, we consider these to be our critical accounting policies:

- how we determine the fair value and carrying value of our tangible and intangible water assets, and real estate;
- how and when we recognize revenue when we sell water assets and real estate; and
- how we determine our income tax provision, deferred tax assets and liabilities, and reserves for unrecognized tax benefits, as well as the need for valuation allowances on our deferred tax assets.

We believe that an understanding of these accounting policies will help the reader to analyze and interpret our financial statements.

Our consolidated financial statements, and the accompanying notes, are prepared in accordance with GAAP, which requires us to make estimates, using available data and our judgment, for things such as valuing assets, accruing liabilities, recognizing revenues, and estimating expenses. Due to the uncertainty inherent in these matters, actual results could differ from the estimates we use in applying the critical accounting policies. We base our estimates on historical experience, and various other assumptions, which we believe to be reasonable under the circumstances.

The following are the significant subjective estimates used in preparing our financial statements:

1. Fair value and carrying value of our tangible and intangible water assets and real estate

Our primary long-lived assets include tangible and intangible water assets and real estate. At December 31, 2020, the total carrying value of such assets was \$159.8 million, or approximately 89% of our total assets. These assets are carried at cost, less any recorded impairments and depreciation.

Tangible water assets and real estate

We review our long-lived tangible water assets and real estate as facts and circumstances change, or if there are indications of impairment present, to ensure that the estimated undiscounted future cash flows, excluding interest charges, from the use and eventual disposition of these assets will at least recover their carrying value. Cash flow forecasts are prepared for each discrete asset. We engage in a rigorous process to prepare and review the cash flow models which utilize the most recent information available to us. However, the process inevitably involves the use of significant estimates and assumptions, especially the estimated current and future demand for these assets, the estimated future market values of our assets, the timing of the disposition of these assets, the ongoing cost of maintenance and improvement of the assets, and the current and projected income earned and other uncertain future events. As a result, our estimates are likely to change from period to period. In addition, our estimates may change as unanticipated events transpire which would cause us to reconsider the current and future use of the assets. If we use different assumptions, if our plans change, or if the conditions in future periods differ from our forecasts, our financial condition and results of operations could be materially impacted.

There were no material impairment losses recorded on our tangible water assets or real estate during the years ended December 31, 2020, and 2019.

Intangible water assets

Our intangible water assets are accounted for as indefinite-lived intangible assets. Accordingly, until an asset is sold, it is not amortized, that is, its value is not charged as an expense in our consolidated statement of operations over time, but the asset is carried at cost and reviewed for impairment, at least annually during the fourth quarter, and more frequently if a specific event occurs or there are changes in circumstances which suggest that the asset may be impaired. Such events or changes may include lawsuits, court decisions, regulatory mandates, and economic conditions, including interest rates, demand for residential and commercial real estate, changes in population, and increases or decreases in prices of similar assets. If the carrying value exceeds the fair value, an impairment loss is recognized equal to the difference. Once an asset is sold, the value is charged to cost of real estate and water assets sold in our consolidated statement of operations and comprehensive income or loss.

We calculate the fair value of intangible water assets, using a discounted cash flow model, under which the future net cash flows from the asset are forecasted and then discounted back to their present value, using a weighted average cost of capital approach to determine the appropriate discount rate. Preparing these cash flow models requires us to make significant assumptions about revenues and expenses as well as the specific risks inherent in the assets. We conduct extensive reviews utilizing the most recent information available to us; however, the review process inevitably involves the use of significant estimates and assumptions, especially the estimated current asset pricing, potential price escalation, income tax rates, discount rates, absorption rates and timing, and demand for these assets. These models are sensitive to minor changes in any of the input variables.

In summary, the cash flow models used for our most significant indefinite-lived intangible assets forecast initial sales to begin within approximately one year, and then increase until the assets are mostly sold over the next four decades. We have assumed sale proceeds for the assets that are based on our estimates of the likely future sales price per acre-foot. These per-unit sale prices are estimated based on the demand and supply fundamentals in the markets which these assets serve. If we use different assumptions, if our plans change, or if the conditions in future periods differ from our forecasts, our financial condition and results of operations could be materially impacted.

There were no material impairment losses recorded on our intangible water assets during the years ended December 31, 2020 and 2019.

2. Revenue recognition

Sale of real estate and water assets

We recognize revenue when there is a legally binding sale contract, the profit is determinable (the collectability of the sales price is reasonably assured, or any amount that will not be collectible can be estimated), the earnings process is virtually complete (we are not obliged to perform significant activities after the sale to earn the profit, meaning we have transferred all risks and rewards to the buyer), and the buyer's initial and continuing investment is adequate to demonstrate a commitment to pay for the property.

Unless all of these conditions are met, we use the deposit method of accounting. Under the deposit method of accounting, until the conditions to fully recognize a sale are met, payments received from the buyer are recorded as a liability on our balance sheet, and no gain is recognized.

3. Income taxes

Our income tax expense, deferred tax assets and liabilities, and reserves for unrecognized tax benefits reflect our best assessment of estimated future taxes to be paid. We are subject to federal and various state income taxes. We have multiple state filing groups with different income tax generating abilities. Significant judgments and estimates are required in determining the consolidated income tax expense.

We recognize deferred income taxes for tax attributes and for differences between the financial statement and tax basis of assets and liabilities at enacted statutory tax rates in effect for the years in which the deferred tax liability or asset is expected to be settled or realized. A valuation allowance is provided to offset deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Future realization of deferred tax assets depends on the existence of sufficient taxable income of the appropriate character. Sources of taxable income considered in the evaluation of deferred tax asset realization include future reversals of deferred tax assets and liabilities, expected future taxable income, taxable income in prior carryback years if permitted under the tax law, and tax planning strategies. We have recorded valuation allowances for those deferred tax assets not expected to be realized. As we have achieved a sufficient history of sustained profitability, including taxable income in appropriate jurisdictions, a portion of the valuation allowance was reduced by \$9.3 million during the year ended December 31, 2020. We have determined that it is more likely than not that sufficient taxable income will be generated in the future to realize certain of our deferred tax assets. We maintain valuation allowances of \$58.1 million as of December 31, 2020 for deferred tax assets not expected to be realized in the future.

The calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax laws and regulations in a multitude of jurisdictions.

The accounting guidance for income taxes provides that a tax benefit from an uncertain tax position may be recognized when it is more likely than not that the position will be sustained upon examination, including resolution of any related appeals or litigation, based on the technical merits. The guidance also provides information on measurement, de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

We recognize tax liabilities in accordance with accounting guidance on income taxes, and we adjust these liabilities when our judgment changes as a result of the evaluation of new information not previously available. Due to the complexity of some of these uncertainties, the ultimate resolution may result in a payment that is materially different from our current estimate of the tax liabilities. These differences will be reflected as increases or decreases to income tax expense in the period in which they are determined. Currently, we have no material unrecognized tax benefits on any open tax years.

RESULTS OF OPERATIONS -- YEARS ENDED DECEMBER 31, 2020 AND 2019

Overview of Economic Conditions and Impact on Results of Operations

We believe that current trends in housing inventory, home prices, and low interest rates, in the markets in which our major water assets are located and serve, primarily northern Nevada and Arizona, will have a positive impact on our operating performance. Individual markets continue to experience varying results, as local home inventories, affordability, and employment factors strongly influence each local market. A change or deterioration in economic conditions in the markets where we operate, whether due to the impact of the COVID-19 pandemic or other factors that cause the growth in our markets to slow or decline, impairs our ability to generate revenue, cause our expenses to exceed projections, or results in operating losses; could result in impairment losses of our water assets and adversely affect our liquidity.

Our revenues and results of operations fluctuate from period to period. For example, we recognize revenue from the sale of water assets when specific transactions close; as a result, sales of water assets for any individual period are not necessarily indicative of revenues for future periods or the full financial year.

Vidler Water Resources, Inc. Shareholders' Equity (in thousands):

	December 31,		Change
	2020	2019	
Shareholders' equity	\$ 178,270	\$ 178,255	\$ 15
Shareholders' equity per share	\$ 9.59	\$ 9.01	\$ 0.58

The increase in shareholders' equity during 2020 of \$15,000 was due primarily to a combination of monetization of water and real estate assets generating a gross margin of \$7.1 million, \$6.4 million of net operating and sales costs, the recording of a deferred tax asset on our balance sheet of \$9.3 million and the purchase of 1,199,357 shares of our common stock for \$10.4 million.

Total Assets and Liabilities (in thousands):

	December 31,		Change
	2020	2019	
Total assets	\$ 180,446	\$ 181,089	\$ (643)
Total liabilities	\$ 2,176	\$ 2,834	\$ (658)

Total assets decreased during the year ended December 31, 2020, primarily due to the combination of cash applied to repurchases of common stock in 2020 and operating costs, which was partially offset by cash received from sales of assets and operating income, and the recording of a deferred tax asset of \$9.3 million at December 31, 2020.

Results of Operations (in thousands):

	Year Ended December 31,		
	2020	2019	Change
Total revenue and other income (loss)	\$ 9,612	\$ 29,398	\$ (19,786)
Total costs and expenses	\$ 8,944	\$ 17,872	\$ (8,928)

Revenue and other income (loss)

The majority of our revenue recorded for the year ended December 31, 2020 was from the sale of 612 acre-feet of water rights at Dodge Flat, Nevada, for total proceeds of \$4.1 million and the sale of 77 acre-feet of water rights from our Fish Springs Ranch inventory for \$3.1 million.

The majority of our revenue recorded for the year ended December 31, 2019 was from the sale of 25,000 long-term storage credits in the Phoenix Active Management Area for \$8.7 million (\$347.50 per credit), the sale of land and water rights at Dodge Flat, Nevada, for total proceeds of \$12.0 million and the sale of 134 acre-feet of water rights from our Fish Springs Ranch inventory for \$4.7 million.

Costs and Expenses

Cost of water assets and real estate sold:

During the year ended December 31, 2020, we recorded a total of \$1.9 million in cost of real estate and water assets of which \$950,000 related to our sale of 65 acre-feet of our water rights from the Middle Rio Grande Basin in New Mexico as well as the cost of water assets sold of \$115,000 and \$788,000 related to our Dodge Flat and Fish Springs Ranch sales, respectively.

During the year ended December 31, 2019 we recorded a total of \$8.5 million in cost of real estate and water assets, of which \$3.1 million relates to sales of 25,260 long-term storage credits in the Phoenix Active Management Area as well as cost of real estate and water assets sold of \$1.7 million and \$1.4 million related to our Dodge Flat and Fish Springs Ranch sales, respectively.

General, Administrative and Other Costs:

During the years ended December 31, 2020, and 2019, we recorded general and administrative and project costs of \$6.7 million and \$9.0 million, respectively. The decrease in these costs was primarily due to a year over year decrease of \$1.5 million in total compensation due to reduced bonus accruals in 2020 as a result of the reduced level of assets sales in 2020 compared to the sales recorded in 2019 and no severance payments were made or accrued in 2020. In addition, due to the reduced level of sales in 2020, there was a reduction in selling costs of \$342,000 in 2020 compared to 2019.

Stock-Based Compensation Expense

Stock-based compensation expense is calculated based on the fair value of the award on the grant date and is recognized over the vesting period of the awards. As of December 31, 2020, there was no unrecognized stock-based compensation expense related to restricted stock units ("RSU"). Substantially all of value of the stock-based compensation grant to management in 2020 was accrued at December 31, 2019 comprising a portion of the total management bonus for 2019 performance.

The stock-based compensation expense consisted primarily of the following awards (in thousands):

	Year Ended December 31,	
	2020	2019
RSU - Directors	87	87
RSU - Management	453	—
Total stock-based compensation expense	\$ 540	\$ 87

Income Taxes

Based on the analysis conducted at December 31, 2020 we reversed a portion of the valuation allowance on our net deferred tax assets of \$9.3 million. We recorded a deferred tax benefit of \$9.3 million and \$0 during the years ended December 31, 2020, and 2019, respectively, resulting in an effective tax rate of 0% for the years ended December 31, 2020, and 2019. The effective tax rate differed from our federal corporate income tax rate of 21% due primarily to the valuation allowance changes recorded on our net deferred tax assets in 2020 and 2019.

LIQUIDITY AND CAPITAL RESOURCES -- YEARS ENDED DECEMBER 31, 2020 and 2019

A substantial portion of our historical revenue and cash flow has, and is expected in the future, to come from one-time sales of our assets which are primarily long-term water resource development projects that we expect to support economic growth in the local markets where the assets are located. The timing and amount of sales and cash flows depend on a number of factors which are difficult to predict and cannot be directly compared from one period to another. However, given our cash balances at December 31, 2020, we currently believe that we have sufficient resources to cover our expenses for at least the next 12 months. In the long-term, we estimate that cash from operations will provide us with adequate funding for future operations. However, if additional funding is needed, we could defer significant expenditures, including our share repurchase program, obtain a line of credit, or complete a debt or equity offering. Any additional equity offerings may be dilutive to our shareholders and any additional debt offerings may include operating covenants that could restrict our business. We are not currently subject to any debt covenants which might limit our ability to obtain additional financing through debt or equity offerings. We classify the sale of and costs incurred to acquire and develop our water assets as operating activities in our consolidated statement of cash flows.

Our Operations

The majority of our cash inflows for the year ended December 31, 2020, was from \$9.6 million in sales of various water rights assets and other income received. This was offset by \$7.8 million of cash used for overhead and various project expenses. Additionally we used \$10.4 million in cash to repurchase shares of our common stock during the year ended December 31, 2020.

The majority of our cash inflows for the year ended December 31, 2019, was from \$28.6 million in sales of various real estate and water rights assets. This was offset by \$13.8 million of cash used for overhead, various project expenses, and acquisition of groundwater rights in Lyon County, Nevada. Additionally, we used \$10.0 million in cash to repurchase shares of our common stock during the year ended December 31, 2019.

Consolidated Cash and Securities

We have adequate working capital reserves. At December 31, 2020 and 2019, we had unrestricted and available cash and securities of \$9.4 million and \$18.2 million, respectively, which could be used for general corporate purposes and the exercise of options held by us for the acquisition of groundwater rights in Lyon County, Nevada.

Cash Flow

Our cash flows from operating, investing, and financing activities were as follows (in thousands):

	Year Ended December 31,	
	2020	2019
Cash provided by (used in):		
Operating activities	\$ 1,785	\$ 15,613
Total operating activities	1,785	15,613
Investing activities	(40)	(12)
Total investing activities	(40)	(12)
Financing activities	(10,526)	(9,982)
Total financing activities	\$ (10,526)	\$ (9,982)
Increase (decrease) in cash and cash equivalents	\$ (8,781)	\$ 5,619

Cash Flows From Operating Activities

During 2020, we generated cash of \$1.8 million from our operations. This was primarily derived from \$9.0 million in cash receipts from sales of various real estate and water rights assets and \$583,000 of lease and other revenue. This was offset by approximately \$7.8 million of cash used for overhead and various project expenses.

During 2019, we generated cash of \$15.6 million in our continuing operations which was derived primarily from \$28.6 million in cash receipts from the sale of various real estate and water assets and \$786,000 of lease and other revenue. This was offset by approximately \$9.6 million of cash used for overhead and various project expenses, and \$4.2 million used for the acquisition of groundwater rights in Lyon County, Nevada.

Cash Flows From Investing Activities

We had no material cash flows from investing activities during the years ended December 31, 2020 and 2019.

Cash Flows From Financing Activities

During the years ended December 31, 2020 and 2019, we used \$10.4 million and \$10.0 million in cash, respectively, to repurchase shares of our common stock. We had no other significant financing activities during the years.

Off-Balance Sheet Arrangements

As of December 31, 2020, we had no off-balance sheet arrangements, other than those discussed throughout this document, that have, or are reasonably likely to have, a material current or future effect on our consolidated financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Legal Developments

The Company, in the normal course of its business, frequently encounters government or private challenges to its water rights. As previously disclosed, the Company, through its subsidiary, Vidler, has invested substantial sums to develop water resources in the Kane Springs Valley Basin, located in Lincoln County, Nevada. Vidler, together with the Lincoln County Water District ("Lincoln/Vidler") in 2005, received a permit from the Nevada State Engineer to appropriate 1,000 acre feet of water in the Kane Springs Valley Basin. Lincoln/Vidler have several other applications pending to appropriate additional groundwater in the Kane Springs Valley Basin, although the quantity of water that may be appropriated under these applications cannot be accurately predicted. This permitted water and the pending applications have next in priority in the Kane Springs Valley Basin.

Lincoln/Vidler entered into an agreement to sell water to Coyote Springs Investments ("CSI"); CSI is the developer of Coyote Springs, a new planned residential and commercial development 60 miles north of Las Vegas. Of the permitted water rights in Kane Springs Valley, Vidler agreed to sell to CSI 500 acre-feet of those permitted water rights pursuant to a purchase option agreement.

Following hearings conducted by the Nevada State Engineer in late-September early-October of 2019 to determine the boundaries of the Lower White River Flow System (LWRFS) in Southern Nevada, the Nevada State Engineer, on June 20, 2020, issued Order No.1309, finding for the first time that Kane Springs Valley was included as part of the LWRFS. This Order results in subordinating Lincoln/Vidler's senior priority water right date of their current permitted water rights in Kane Springs Valley to the respective priority dates in relation to all other water rights in the new multi-basin area "Super Basin." If the Order stands, it will likely impede Vidler from pursuing its existing permitted water rights and applications in the Kane Springs Valley Basin and will adversely affect its contracts with CSI.

Vidler believes that the Kane Springs Valley Basin is not a part of the LWRFS and presented evidence to this effect at the State Engineer's hearings. Vidler believes there is no legal authority in existing Nevada water law statutes that allows the State Engineer to create a "Super Basin" and to disregard existing individual basin boundaries and water right priorities within those individual basin boundaries.

Lincoln/Vidler have filed a Petition for Judicial review appealing Order No. 1309, as well as a 'takings' claim against the State of Nevada for the subordination of Vidler's water right priority. CSI, as well as others, have also appealed this Order, and Vidler anticipates supporting CSI in its appeal. Given the number of participants in the appeal, a lengthy period may pass before the matter is resolved. Our appeal and takings claim is in the early stages of the legal process and, as such, it is difficult to

evaluate the ultimate outcome of our appeal of the Order. An adverse ruling would materially and adversely affect Vidler's investment in the Kane Springs Valley Basin and its contracts with CSI. If there is an adverse ruling on the appeal, the current option agreement with CSI could result in forgone revenue of up to \$3.5 million.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Vidler Water Resources, Inc.
Carson City, Nevada

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Vidler Water Resources, Inc. (formerly PICO Holdings, Inc.) and subsidiaries (the "Company") as of December 31, 2020 and 2019, the related consolidated statements of operations and comprehensive income, shareholders' equity, and cash flows, for each of the two years in the period ended December 31, 2020, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2020, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing a separate opinion on the critical audit matters or on the accounts or disclosures to which they relate.

Intangible Water Assets — Impairment — Refer to Note 3 to the financial statements

Critical Audit Matter Description

The Company's intangible water assets are accounted for as indefinite-lived intangible assets. Accordingly, until an asset is sold, it is not amortized, that is, its value is not charged as an expense in the consolidated statement of operations over time, but the asset is carried at cost and reviewed for impairment, at least annually during the fourth quarter, and more frequently if a specific event occurs or there are changes in circumstances which suggest that the asset may be impaired. Such events or changes may include lawsuits, court decisions, regulatory mandates, and economic conditions, including interest rates, demand for residential and commercial real estate, changes in population, and increases or decreases in prices of similar assets. If the carrying value exceeds the fair value, an impairment loss is recognized equal to the difference. Once an asset is sold, the value is charged to cost of real estate and water assets sold in the Company's consolidated statement of operations.

When the Company calculates the fair value of intangible water assets, they use a discounted cash flow model, under which the future net cash flows from the asset are forecasted and then discounted back to their present value, using a weighted average cost of capital approach to determine the appropriate discount rate. Preparing these cash flow models requires the Company to make significant assumptions about revenues and expenses as well as the specific risks inherent in the assets. The Company conducts extensive reviews utilizing the most recent information available; however, the review process inevitably involves the use of significant estimates and assumptions, especially the estimated current asset pricing, potential price escalation, income tax rates, discount rates, absorption rates and timing, and demand for these assets. These models are sensitive to minor changes in any of the input variables.

There were no material impairment losses recorded on intangible water assets during the year ended December 31, 2020. Total intangible water assets balance was \$120.4 million as of December 31, 2020, of which \$107.2 million is located within the region of northern Nevada.

We identified the estimated discount rate and absorption rate assumptions within the Company's discounted cash flow model utilized to determine impairment of intangible water assets located within the region of northern Nevada as a critical audit matter because of the significant estimates and assumptions management makes to evaluate the recoverability of those intangible water assets. This required a high degree of auditor judgment and an increased extent of effort, including the need to involve our fair value specialists, when performing audit procedures to evaluate the reasonableness of management's discounted future cash flows analysis.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the discounted future cash flows analysis included the following, among others:

- With the assistance of our fair value specialists, we evaluated the discounted future cash flows analysis, including estimates of discount rates and absorption rates by (1) evaluating the appropriateness of the valuation methodology, (2) assessing the reasonableness of the discount rate and absorption rate assumptions used by management and (3) testing the mathematical accuracy of the discounted future cash flows analysis.
- We evaluated the reasonableness of management's discounted future cash flows analysis by comparing management's projections to the Company's historical results and external market sources.

Income Taxes — Realizability of Deferred Tax Assets — Refer to Note 7 to the financial statements

Critical Audit Matter Description

The Company recognizes deferred income taxes for tax attributes and for differences between the financial statement and tax basis of assets and liabilities at enacted statutory tax rates in effect for the years in which the deferred tax liability or asset is expected to be settled or realized. A valuation allowance is provided to offset deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. Future realization of deferred tax assets depends on the existence of sufficient taxable income of the appropriate character. Sources of taxable income considered in the evaluation of deferred tax asset realization include future reversals of deferred tax assets and liabilities, expected future taxable income, taxable income in prior carryback years if permitted under the tax law, and tax planning strategies. Management has recorded valuation allowances for those deferred tax assets not expected to be realized. As the Company has achieved a sufficient history of sustained profitability, including taxable income in appropriate jurisdictions, a portion of the valuation allowance was reduced by \$9.3 million during the year ended December 31, 2020. Management has determined that it is more likely than not that sufficient taxable income will be generated in the future to realize certain of its deferred tax assets. The Company maintains valuation allowances of \$58.1 million as of December 31, 2020 for deferred tax assets not expected to be realized in the future.

We identified management's determination that it is more likely than not that sufficient taxable income will be generated in the future to realize deferred tax assets as a critical audit matter because of the significant judgments and estimates management makes related to taxable income across multiple jurisdictions. This required a high degree of auditor judgment and an increased extent of effort, including the need to involve our income tax specialists, when performing audit procedures to evaluate the reasonableness of management's estimates of taxable income.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the determination that it is more likely than not that certain of the Company's deferred tax assets will be realized included the following, among others:

- We evaluated the reasonableness of the methods, assumptions, and judgments used by management to determine whether a deferred tax asset would be realized in the future.
- With the assistance of our income tax specialists, we evaluated whether the sources of management's estimated taxable income were of the appropriate character and sufficient to utilize the deferred tax assets under the relevant tax law.
- We evaluated management's ability to accurately estimate taxable income by comparing actual results to management's historical estimates and evaluating whether there have been any changes that would affect management's ability to accurately estimate taxable income.
- We tested the reasonableness of management's estimates of taxable income by comparing the estimates to:
 - Expiration dates or carryforward periods of tax attributes.
 - Available and intended tax planning strategies.
 - Internal budgets.
 - Historical taxable income, as adjusted for nonrecurring items.
 - Internal communications to management and the Board of Directors.
 - Forecasted information included in Company press releases.
 - Management's history of carrying out its stated plans and its ability to carry out its plans considering contractual commitments or available financing.
- We evaluated whether the estimates of future taxable income were consistent with evidence obtained in other areas of the audit.

/s/ DELOITTE & TOUCHE LLP

Las Vegas, Nevada
March 12, 2021

We have served as the Company's auditors since 1997.

1. NATURE OF OPERATIONS AND SIGNIFICANT ACCOUNTING POLICIES

Organization and Operations:

Vidler Water Resources, Inc., together with its subsidiaries (collectively, "Vidler" or the "Company"), is a holding company. As of December 31, 2020, the Company has presented its consolidated financial statements and the accompanying notes to the consolidated financial statements using the guidelines prescribed for real estate companies, as the majority of the Company's assets and operations are primarily engaged in real estate and related activities.

The Company's most significant operating subsidiary as of December 31, 2020 was Vidler Water Company, Inc. ("Vidler Water"), a Nevada corporation. Vidler owns water resources and water storage in the southwestern United States, with assets and operations in Nevada, Arizona, Colorado, and New Mexico. Currently, Vidler is primarily focused on selling its existing water rights and storage credits.

Smaller Reporting Company:

The Company qualifies as a Smaller Reporting Company ("SRC") under the Securities and Exchange Commission ("SEC") definition and therefore certain disclosures that are no longer required have been removed in accordance with the SEC's disclosure requirements for SRCs.

Principles of Consolidation:

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned, majority-owned and controlled subsidiaries, and have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). Intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates in Preparation of Financial Statements:

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses for each reporting period. The significant estimates made in the preparation of the Company's consolidated financial statements relate to intangibles, real estate and water assets, deferred income taxes, stock-based compensation, and contingent liabilities. While management believes that the carrying value of such assets and liabilities were appropriate as of December 31, 2020 and December 31, 2019, it is reasonably possible that actual results could differ from the estimates upon which the carrying values were based.

Tangible Water Assets and Real Estate:

Tangible water assets and real estate include the cost of certain tangible water assets, water storage credits and related storage facilities, real estate, including raw land and improvements. The Company capitalizes pre-acquisition costs, the purchase price of real estate, development costs and other allocated costs, including any interest, during development and construction. Pre-acquisition costs, including non-refundable land deposits, are expensed to cost of sales when the Company determines continuation of the related project is not probable.

Additional costs to develop or otherwise get tangible water and real estate assets ready for their intended use are capitalized. These costs typically include direct construction costs, legal fees, engineering, consulting, direct cost of drilling wells or related construction, and any interest costs capitalized on qualifying assets during the development period. The Company expenses all maintenance and repair costs. The types of costs capitalized are consistent across periods presented. Tangible water assets consist of various water interests in development or awaiting permitting. Amortization of real estate improvements is computed on the straight-line method over the estimated useful lives of the improvements ranging from 5 to 15 years.

Intangible Water Assets:

Intangible water assets include the costs of indefinite-lived intangible assets and is comprised of water rights and the exclusive right to use two water transportation pipelines. The Company capitalizes development and entitlement costs and other allocated costs, including any interest, during the development period of the assets to tangible water assets and transfers the costs to intangible water assets when water rights are permitted. Water rights consist of various water interests acquired or developed independently or in conjunction with the acquisition of real estate. When the Company purchases intangible water assets that are attached to real estate, an allocation of the total purchase price, including any direct costs of the acquisition, is made at the date of acquisition based on the estimated relative fair values of the water rights and the real estate.

Intangible assets with indefinite useful lives are not amortized but are tested for impairment at least annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset may be impaired, by comparing the fair value of the assets to their carrying amounts. The fair value of the intangible assets is calculated using discounted cash flow models that incorporate a wide range of assumptions including current asset pricing, price escalation, discount rates, absorption rates, timing of sales, and costs. These models are sensitive to minor changes in any of the input variables.

Impairment of Long-Lived Assets:

The Company records an impairment loss when the condition exists where the carrying amount of a long-lived asset or asset group is not recoverable. Impairment of long-lived assets is triggered when the estimated future undiscounted cash flows, excluding interest charges, for the lowest level for which there is identifiable cash flows that are independent of the cash flows of other groups of assets do not exceed the carrying amount. The Company prepares and analyzes cash flows at appropriate levels of grouped assets. If the events or circumstances indicate that the remaining balance may be impaired, such impairment will be measured based upon the difference between the carrying amount and the fair value of such assets determined using the estimated future discounted cash flows, excluding interest charges, generated from the use and ultimate disposition of the respective long-lived asset.

Noncontrolling Interests:

The Company reports the share of the results of operations that are attributable to other owners of its consolidated subsidiaries that are less than wholly-owned as noncontrolling interest in the accompanying consolidated financial statements. In the consolidated statement of operations and comprehensive income, the income attributable to the noncontrolling interest is reported separately and the accumulated income or loss attributable to the noncontrolling interest, along with any changes in ownership of the subsidiary, is reported within shareholders' equity.

Cash and Cash Equivalents:

Cash and cash equivalents include short-term, highly liquid instruments, purchased with original maturities of three months or less.

Other Assets:

Other assets include the following significant account balances:

Property, Plant and Equipment, Net:

Property, plant and equipment are carried at cost, net of accumulated depreciation. Depreciation is computed on the straight-line method over the estimated lives of the assets. Buildings and leasehold improvements are depreciated over the shorter of the useful life or lease term and range from 15 to 30 years, office furniture and fixtures are generally depreciated over seven years, and computer equipment is depreciated over three years. Maintenance and repairs are charged to expense as incurred, while significant improvements are capitalized. Gains or losses on the sale of property, plant and equipment are included in other income.

Accounts payable and accrued expenses:

Accounts payable and accrued expenses includes trade payables and accrued construction payables.

Other Liabilities:

Other liabilities primarily includes employee benefits, unearned revenues, option payments and deposits received.

Revenue Recognition:

Sale of Real Estate and Water Assets:

Revenue recognition on the sale of real estate and water assets conforms with accounting literature related to the sale of real estate, and is recognized in full when there is a legally binding sale contract, the profit is determinable (the collectability of the sales price is reasonably assured, or any amount that will not be collectible can be estimated), the earnings process is virtually complete (the Company is not obligated to perform significant activities after the sale to earn the profit, meaning the Company has transferred all risks and rewards to the buyer). If these conditions are not met, the Company records the cash received as deferred revenue until the conditions to recognize full profit are met.

Other Income, Net:

Included in other income are various transactional results including realized gains and losses from the sale of investments and property, plant and equipment, interest income, sales of oil and gas, and other sources not considered to be the core focus of the existing operating entities within the group.

Cost of Sales:

Cost of Real Estate and Water Assets:

Cost of real estate and water assets sold includes direct costs of the acquisition of the asset less any impairment losses previously recorded against the asset, development costs incurred to get the asset ready for use, and any capitalized interest costs incurred during the development period.

General, Administrative, and Other:

General, administrative, and other costs include salaries and benefits, stock-based compensation, consulting, audit, tax, legal, insurance, property taxes, rent and utilities, selling costs, and other general operating expenses.

Stock-Based Compensation:

Stock-based compensation expense is measured at the grant date based on the fair values of the awards, calculated using the closing stock price on the date of grant, and is recognized as expense over the period in which the share-based compensation vests using the straight-line method. When an employee restricted stock unit ("RSU") vests, the recipient receives a new share of Vidler common stock for each RSU, less the number of shares of common stock equal in value to applicable withholding taxes. When an RSU is forfeited, all previously recognized expense is reversed during the respective forfeiture year and the remaining unamortized expense is canceled.

Accounting for Income Taxes:

The Company's provision for income tax expense includes federal and state income taxes currently payable and those deferred because of temporary differences between the income tax and financial reporting bases of the assets and liabilities. The asset and liability method of accounting for income taxes also requires the Company to reflect the effect of a tax rate change on accumulated deferred income taxes in income in the period in which the change is enacted.

In assessing the realization of deferred income taxes, management considers whether it is more likely than not that any deferred income tax assets will be realized. The ultimate realization of deferred income tax assets is dependent upon the generation of future taxable income during the period in which temporary differences become deductible. If it is more likely than not that some or all of the deferred income tax assets will not be realized a valuation allowance is recorded. At December 31, 2020, the Company concluded that it is more likely than not that some of its deferred tax assets will be realized, and accordingly, the valuation allowance was recorded only against the deferred tax assets that are not more likely than not to be realized.

The Company recognizes any uncertain income tax positions on income tax returns at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized unless it has a greater than a 50% likelihood of being sustained. The Company recognizes any interest and penalties related to uncertain tax positions in income tax expense.

Earnings per Share:

Basic earnings or loss per share was computed by dividing net earnings by the weighted average number of shares outstanding during the period. Diluted earnings or loss per share was computed similarly to basic earnings or loss per share except the weighted average shares outstanding are increased to include additional shares from the assumed exercise of any common stock equivalents using the treasury method, if dilutive. The Company's performance-based price-contingent stock options ("PBO"), and RSU are considered common stock equivalents for this purpose. The number of additional shares related to these common stock equivalents is calculated using the treasury stock method.

For the years ended December 31, 2020 and December 31, 2019 there was no anti-dilution.

Recently Issued Accounting Pronouncements:

In March 2020, the Financial Accounting Standards Board ("FASB") issued guidance in response to concerns about the structural risks of interbank offered rates, and particularly the risk of cessation of the London Interbank Offered Rate (LIBOR). The cessation of the publication of LIBOR is expected to occur on December 31, 2021. The Company has an operating agreement with Fish Springs Ranch, LLC which entitles Vidler Water to receive interest on certain development costs, construction costs, and accrued interest at a rate of LIBOR plus 450 basis points. The Company is in the process of evaluating the alternatives to the LIBOR rate.

In February 2016, the Financial Accounting Standards Board ("FASB") issued guidance which establishes a right-of-use model that requires a lessee to record a right-of-use ("ROU") asset and a lease liability on the balance sheet for all leases with terms longer than twelve months. Leases will be classified as either "finance" or "operating," with classification affecting the pattern of expense recognition in the income statement. This update requires a modified retrospective transition as of the beginning of the earliest comparative period presented in the financial statements. This update is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted.

The Company adopted this lease standard effective January 1, 2019, applying an optional transition method that will allow the Company to continue to apply the current guidance of ASC 840 in the comparative periods in the year of adoption. The Company has elected the "package of practical expedients," which permits the Company not to reassess prior conclusions about lease identification, lease classification and initial direct costs. The Company has also made an accounting policy election to not recognize ROU assets or lease liabilities for leases with terms of 12 months or less. The adoption of this guidance has resulted in the recording of additional ROU assets and lease liabilities for operating leases of \$522,000 as of January 1, 2019. The adoption of this guidance did not have an impact on net income.

In May 2014, the FASB issued guidance regarding revenue from contracts with customers, which provides a consistent revenue accounting model across industries. The Company has reviewed this update and other guidance that was subsequently issued to further clarify the implementation guidance. Under this guidance, revenue is recognized as the transfer of goods and services to customers takes place and in amounts that reflect the payment or payments that are expected to be received from the customers for those goods and services and requires new disclosures about revenue. The Company adopted the guidance effective January 1, 2018 which did not have a material impact on its consolidated financial statements.

2. TANGIBLE WATER ASSETS AND REAL ESTATE, NET

The cost assigned to the various components of tangible water and real estate assets were as follows (in thousands):

	December 31,	
	2020	2019
Tangible water assets	\$ 26,546	\$ 26,570
Real estate and improvements held and used, net of accumulated amortization of \$ 12,003 at December 31, 2020 and December 31, 2019	9,469	9,469
Other real estate inventories	3,359	3,359
Total tangible water and real estate assets, net	<u>\$ 39,374</u>	<u>\$ 39,398</u>

The Company's real estate improvements were fully depreciated at December 31, 2016.

3. INTANGIBLE ASSETS

The Company's carrying amounts of its intangible assets were as follows (in thousands):

	December 31,	
	2020	2019
Pipeline rights, water rights, and water credits at Fish Springs Ranch	\$ 81,574	\$ 82,382
Pipeline rights and water rights at Carson-Lyon	25,643	25,644
Other	13,228	14,317
Total intangible assets	<u>\$ 120,445</u>	<u>\$ 122,343</u>

Fish Springs Ranch Pipeline Rights, Water Rights, and Water Credits:

There are 13,000 acre-feet per-year of permitted water rights at Fish Springs Ranch. The existing permit allows up to 8,000 acre-feet of water per year to be exported to support the development in the Reno, Nevada area. As at December 31, 2020, the Company has sold 304 acre-feet of water credits. Under a settlement agreement signed in 2007, the Pyramid Lake Paiute Tribe (the "Tribe") agreed to not oppose any permitting activities for the pumping and export of groundwater in excess of 8,000 acre-feet of water per year, and in exchange, Fish Springs Ranch will pay the Tribe 12% of the gross sales price for each acre-foot of additional water that Fish Springs Ranch sells in excess of 8,000 acre-feet per year, up to 13,000 acre-feet per year. The obligation to expense and pay the 12% fee is due only if and when the Company sells water in excess of 8,000 acre-feet, and accordingly, Fish Springs Ranch will record the liability for such amounts as they become due upon the sale of any such excess water. Currently, Fish Springs Ranch does not have regulatory approval to export any water in excess of 8,000 acre-feet per year from Fish Springs Ranch to support further development in northern Reno, and it is uncertain whether such regulatory approval will be granted in the future.

Carson-Lyon Pipeline Rights and Water Rights:

During the year ended December 31, 2019 an additional 279 acre-feet of municipal and industrial designated groundwater rights were purchased for \$ 4.2 million. No additional rights were purchased in 2020.

Impairment Losses:

There were no impairment losses recognized on intangible assets during the years ended December 31, 2020 and 2019.

4. LEASES

The Company has an operating lease for the office located in Carson City, Nevada which include monthly rental payments. The operating lease for the office located in La Jolla, California concluded at the end of May 2020.

Leases consisted of the following (in thousands):

Leases	December 31, 2020	December 31, 2019
Assets		
Operating lease ROU assets, net ⁽¹⁾	\$ 396	\$ 166
Liabilities		
Operating lease liabilities	\$ 396	\$ 166
Weighted Average Remaining Lease Term	2.5 years	0.5 years

⁽¹⁾ Operating lease ROU assets are recorded net of accumulated amortization of \$ 77,000 and \$356,000 as of December 31, 2020 and December 31, 2019 respectively.

Supplemental cash flow information related to leases is as follows (in thousands):

	Year Ended December 31, 2020	Year Ended December 31, 2019
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows for operating leases	\$ 244	\$ 356

5. COMMITMENTS AND CONTINGENCIES

The Company leases its office under a non-cancelable operating lease that expire at various dates through 2020. Rent expense for the years ended December 31, 2020 and 2019 for office space was \$244,000 and \$356,000, respectively.

Future minimum payments under all operating leases were as follows (in thousands):

<u>Year ended December 31,</u>	
2021	\$ 156
2022	159
2023	81
Thereafter	—
Total	<u>\$ 396</u>

Neither Vidler nor its subsidiaries are parties to any potentially material pending legal proceedings.

The Company is subject to various litigation matters that arise in the ordinary course of its business. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly subjective and requires judgments about future events. When evaluating contingencies, the Company may be unable to provide a meaningful estimate due to a number of factors, including the procedural status of the matter in question, the presence of complex or novel legal theories, and/or the ongoing discovery and development of information important to the matters. In addition, damage amounts claimed in litigation against the Company may be unsupported, exaggerated or unrelated to possible outcomes, and as such are not meaningful indicators of the Company's potential liability. The Company regularly reviews contingencies to determine the adequacy of accruals and related disclosures. The amount of ultimate loss may differ from these estimates, and it is possible that the Company's consolidated financial statements could be materially affected in any particular period by the unfavorable resolution of one or more of these contingencies.

Whether any losses finally determined in any claim, action, investigation or proceeding could reasonably have a material effect on the Company's business, financial condition, results of operations or cash flows will depend on a number of variables, including: the timing and amount of such losses; the structure and type of any remedies; the significance of the impact any such losses, damages or remedies may have on the consolidated financial statements; and the unique facts and circumstances of the particular matter that may give rise to additional factors.

6. STOCK-BASED COMPENSATION

At December 31, 2020, the Company had one stock-based payment arrangement outstanding, the Vidler Water Resources, Inc. 2014 Equity Incentive Plan (the "2014 Plan").

The 2014 Plan provides for the issuance of up to 3.3 million shares of common stock in the form of performance-based price-contingent stock options ("PBO"), restricted stock unit ("RSU"), stock-settled stock appreciation rights ("SAR"), non-statutory stock options, restricted stock awards ("RSA"), performance shares, performance units, deferred compensation awards, and other stock-based awards to employees, directors, and consultants of the Company (or any present or future parent or subsidiary corporation or other affiliated entity of the Company). The 2014 Plan allows for broker assisted cashless exercises and net-settlement of income taxes and employee withholding taxes. Upon exercise of a PBO, RSU, and SAR, the employee will receive newly issued shares of Vidler common stock with a fair value equal to the in-the-money value of the award, less applicable federal, state and local withholding and income taxes (however, the holder can elect to pay withholding taxes in cash).

The Company recorded total stock-based compensation expense of \$540,000 and \$87,000 during the years ended December 31, 2020 and 2019, respectively.

Performance-Based Options (PBO):

At various times, the Company has awarded PBO to various members of management. All of the PBO issued contain a market condition based on the achievement of a stock price target during the contractual term and vest monthly over a three-year period. The vested portion of the options may be exercised only if the 30-trading-day average closing sales price of the Company's common stock equals or exceeds 125% of the grant date stock price. The stock price contingency may be met any time before the options expire and it only needs to be met once for the PBO to remain exercisable for the remainder of the term. Compensation expense is amortized on a straight-line basis over the requisite service period for the entire award, which is the vesting period of the award. However, any unrecognized compensation expense for unvested awards can be accelerated if the vesting period is modified.

The estimated fair value of the Company's PBO was determined using a Monte Carlo model, which incorporated the following assumptions:

	2014 10-Year Option
Grant date	11/14/2014
Expiration date	11/14/2024
Grant date stock price	\$ 19.51
Historical volatility	35.00 %
Risk-free rate (annualized)	2.38 %
Dividend yield (annualized)	— %
PBO granted	167,619
Weighted average grant date fair value	\$ 6.51
Fair value of award on grant date	\$ 1,475,705

The determination of the fair value of PBO using an option valuation model is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. The volatility is calculated through an analysis based on historical daily returns of Vidler's stock over a look-back period equal to the PBO contractual term. The risk-free interest rate assumption is based upon a risk-neutral framework using the 10-year zero-coupon risk-free interest rates derived from the treasury constant maturities yield curve on the grant date, for the 10-year PBO award. The dividend yield assumption was based on the expectation of no future dividend payouts by the Company.

A summary of PBO activity was as follows:

	Performance-Based Options	Weighted-Average Exercise Price Per Share
Outstanding at December 31, 2018	167,619	\$ 14.51
Granted	—	
Forfeited	—	
Outstanding at December 31, 2019	167,619	\$ 14.51
Granted	—	
Forfeited	—	
Outstanding at December 31, 2020	<u>167,619</u>	<u>\$ 14.51</u>

At December 31, 2020, 167,619 PBO outstanding are exercisable for up to 10 years from the grant date.

	Performance-Based Options	Weighted- Average Exercise Price Per Share	Weighted-Average Contractual Term Remaining (Years)	Aggregate Intrinsic Value
Vested at December 31, 2018	167,619	\$ 14.51	5.9	\$ —
Vested	—			
Forfeited	—			
Vested at December 31, 2019	167,619	\$ 14.51	4.9	\$ —
Vested	—			
Forfeited	—			
Vested at December 31, 2020	<u>167,619</u>	<u>\$ 14.51</u>	<u>3.9</u>	<u>\$ —</u>

For the years ended December 31, 2020 and 2019, there were no PBO exercisable as the market condition had not been met. There was no unrecognized compensation cost related to unvested PBO at December 31, 2020 and 2019.

Restricted Stock Units (RSU):

RSU awards the recipient, who must be continuously employed by the Company until the vesting date, unless the employment contracts stipulate otherwise, the right to receive one share of the Company's common stock. RSU issued to management do not vote and are not entitled to receive dividends, however the RSU issued to the Company's directors are entitled to dividends.

A summary of RSU activity was as follows:

	RSU Shares	Weighted-Average Grant Date Fair Value Per Share
Outstanding and unvested at December 31, 2018	—	\$ —
Granted	9,268	\$ 9.44
Vested	(9,268)	\$ 9.44
Forfeited	—	\$ —
Outstanding and unvested at December 31, 2019	—	\$ —
Granted	58,938	\$ 9.17
Vested	(58,938)	\$ 9.17
Forfeited	—	\$ —
Outstanding and unvested at December 31, 2020	—	\$ —

There was no unrecognized compensation cost related to unvested RSU for the years ended December 31, 2020, and 2019.

7. FEDERAL AND STATE CURRENT AND DEFERRED INCOME TAX

The Company and its subsidiaries file a consolidated federal income tax return. Companies that are less than 80% owned corporations, or entities that are treated as partnerships for federal income tax purposes, file separate federal income tax returns. All of the Company's pre-tax book income from continuing operations in each of the two years ended December 31, 2020 and 2019 was generated in the U.S. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

The Company's income tax (provision) benefit for federal and state income taxes consisted of the following (in thousands):

	Year Ended December 31,	
	2020	2019
Current tax (provision) benefit	\$ (7)	\$ —
Deferred tax (provision) benefit	9,340	—
Total income tax (provision) benefit	<u>\$ 9,333</u>	<u>\$ —</u>

The difference between income taxes provided at the Company's federal statutory rate and effective tax rate was as follows (in thousands):

	Year Ended December 31,	
	2020	2019
Federal income tax (provision) benefit at statutory rate	\$ (147)	\$ (2,421)
Change in valuation allowance	10,275	3,038
State taxes, net of federal benefit	373	(6)
Expired credits	(1,505)	(614)
Deferred Tax true ups	362	—
Other	(25)	3
Total income tax (provision) benefit	<u>\$ 9,333</u>	<u>\$ —</u>

The significant components of deferred income tax assets and liabilities were as follows (in thousands):

	December 31,	
	2020	2019
Deferred tax assets:		
Net operating losses, capital losses, and tax credit carryforwards	\$ 57,901	\$ 60,318
Impairment loss on water assets	9,864	10,384
Employee benefits, including stock-based compensation	556	682
Excess tax basis in affiliate	475	496
Fixed assets	700	739
Other, net	450	761
Total deferred tax assets	69,946	73,380
Deferred tax liabilities:		
Revaluation of real estate and water assets	2,072	2,978
Other, net	449	508
Total deferred tax liabilities	2,521	3,486
Valuation allowance	(58,085)	(69,894)
Net deferred income tax asset	<u>\$ 9,340</u>	<u>\$ —</u>

Deferred tax assets and liabilities and federal income tax expense in future years can be significantly affected by changes in circumstances that would influence management's conclusions as to the ultimate realization of deferred tax assets. Valuation allowances are established and maintained for deferred tax assets on a "more likely than not" threshold. At December 31, 2011, the Company considered it more likely than not that the deferred tax assets would not be realized and a full valuation allowance was provided. At December 31, 2020, after evaluating the evidence, including positive objective evidence in the form of three years of cumulative historical pre-tax book income, management concluded that there was sufficient positive evidence to enable the Company to conclude that it was "more likely than not" that certain of these deferred tax assets would be realized, and the Company released a portion of the valuation allowance which resulted in the recognition of certain deferred tax assets with a corresponding decrease to income tax expense of \$9.3 million for the year ended December 31, 2020.

The Company had net operating loss carryforwards, federal tax credit carryforwards, and state capital loss carryforwards as of December 31, 2020, that will expire if not utilized. The following table summarizes such carryforwards and their expiration as follows (in thousands):

	Federal Net Operating Losses	Federal Tax Credits	State Net Operating Losses	State and Federal Capital Losses
Expire 2021	\$ —	\$ 173	\$ —	\$ —
Expire 2022 through 2027	—	622	—	84,242
Expire 2028 through 2032	50,333	3,459	34,268	—
Expire 2033 through 2039	98,705	1,104	94,858	—
Indefinite Expiry	6,256	—	—	—
Total	<u>\$ 155,294</u>	<u>\$ 5,358</u>	<u>\$ 129,126</u>	<u>\$ 84,242</u>

Utilization of the Company's U.S. federal and certain state net operating loss and tax credit carryovers may be subject to substantial annual limitation due to the ownership change limitations provided by the Internal Revenue Code and similar state provisions. Such an annual limitation could result in the expiration of the net operating loss carryforwards before utilization. As of December 31, 2020, the Company believes that utilization of its federal net operating losses and federal tax credits are not limited under any ownership change limitations provided under the Internal Revenue Code. The tax benefit preservation plan readopted by the Company in 2020 provides protections to preserve the Company's ability to utilize its net operating loss carryforwards as a result of certain stock ownership changes in the future.

The Company does not have any uncertain tax benefits recorded for the years ended December 31, 2020 and 2019. The Company's policy is to recognize interest and penalties related to uncertain tax benefits in its provision for income taxes. For the years ended December 31, 2020 and 2019 the Company has not recorded any interest or penalties related to uncertain tax benefits.

The Company is subject to taxation in the U.S. and various state jurisdictions. As of December 31, 2020, the Company's statute is open from 2017 and 2016 forward for federal and for state tax purposes, respectively. However, years prior to 2016 could still be considered open for adjustment to NOL and tax credit carryforwards.

8. RELATED-PARTY TRANSACTIONS

Executive Bonus Plan:

On August 2, 2018, the Company adopted an Amended and Restated Executive Bonus Plan (the "Amended Bonus Plan") to provide for the payment of bonuses to Ms. Timian-Palmer and Mr. Webb (collectively, the "Plan Participants"). The Amended Bonus Plan, which has a term of five years from January 1, 2018 through December 31, 2022, amends, restates and supersedes the Company's Executive Bonus Plan adopted on December 14, 2016 (the "Prior Bonus Plan").

Pursuant to the terms of the Amended Bonus Plan, a pool of funds will be created for distribution on a yearly basis (the "Bonus Pool"). The first step in calculating the Bonus Pool is to calculate the total revenues and other income of the Company during the year (other than any revenues or other income attributed to the Company's investments in Synthomics, Inc. and Mindjet Inc. and the Company's deferred compensation plans (the "Excluded Assets")) minus (a) the gross invested capital for each asset of the Company (other than an Excluded Asset) that was sold or otherwise disposed of during such year, defined as the book value of such asset as of the date of the sale (or other disposition) of such asset, as determined in accordance with U.S. GAAP and reflected in the Company's financial records as of such date, plus any impairment or depreciation charges taken by the Company with respect to such asset on or prior to such date; (b) an amount equal to the aggregate of the gross invested capital for each relevant asset as determined pursuant to the immediately preceding clause (a), multiplied by the amount of years (including any partial year) elapsed between January 1, 2018 and the date of the sale or other disposal of such asset, multiplied by 5%; and (c) administrative expenses specified in the Amended Bonus Plan (such resulting amount, the "Total Net Gain"). For assets sold (or otherwise disposed of) entirely or partially for non-cash consideration by the Company, the calculation of Total Net Gain with respect to the non-cash consideration will instead be made in the year in which the non-cash consideration is ultimately sold (or otherwise disposed of) for cash by the Company.

The second step in calculating the Bonus Pool is to multiply the Total Net Gain by the "Adjustment Factor", which is the greater of (i) a fraction, the numerator of which is the total amount of cash distributed (or committed to be distributed) to the Company's shareholders with respect to all such assets sold (or otherwise disposed of) during the year, and the denominator of which is the total amount of cash received (after payment of all selling costs, including bankers' fees and commissions) for which all such assets were sold (or otherwise disposed of) during the year, or (ii) such percentage (not to exceed 100%) as the Compensation Committee of the Board of Directors (the "Compensation Committee") determines in its sole discretion to utilize as the Adjustment Factor. The amount that results from multiplying the Total Net Gain by the Adjustment Factor is the "Adjusted Net Gain."

The final step in calculating the Bonus Pool is to multiply the Adjusted Net Gain by 8.75%, which results in the actual Bonus Pool. The Bonus Pool will be allocated 55% to Ms. Timian-Palmer and 45% to Mr. Webb. Each Plan Participant will be entitled to his or her allocated portion of the Bonus Pool for the year if he or she is employed by the Company on the last day of the year. Any bonus paid pursuant to the Amended Bonus Plan will be paid 50% in the form of cash and 50% in the form of a RSU award, except that if a Plan Participant incurs a separation from service prior to the date that such RSU awards are scheduled to be granted, such bonus will be paid entirely in the form of cash. Such RSU awards shall be granted pursuant to the terms of the 2014 Plan, will be fully vested on the date of grant, and the number of RSUs subject to such award will be equal to (x) the dollar value of 50% of the total amount of such bonus, divided by (y) the average of the daily volume weighted average prices (the "VWAP") of the Company's common stock for all of the trading days during the 30 calendar day period ending on (and including) the last trading day immediately prior to the grant date of such award, rounded down to the nearest whole share. The issuance of any shares pursuant to such RSU awards will occur on the earlier of (i) the third anniversary of the date of grant of such RSU award, (ii) a Plan Participant's separation from service or (iii) a change of control.

In the event that any Plan Participant's employment with the Company is terminated in certain circumstances as provided in a written agreement between the Company and such Plan Participant, as applicable, such terminated individual will be entitled to payment of an amount under the Amended Bonus Plan for a portion of the year in which such termination occurs. In order to calculate such amount, the Compensation Committee will first determine the Total Net Gain for the portion of the year prior to such individual's termination (which Total Net Gain will be determined in the same manner as described above based on the actual revenues or other income of the Company (including sales or other dispositions of assets) during such partial year period; provided, however, that the amount of administrative expenses for such portion of the year will be prorated based on the Compensation Committee's estimate of the total amount of administrative expenses for such year) (such amount, the "Pro Rata Net Gain"). Second, the Pro Rata Net Gain is multiplied by an adjustment factor which is the greater of (i) a fraction, the numerator of which is the amount of cash distributed (or committed to be distributed) to the Company's shareholders in connection with the Company's sale (or other disposition) of assets during such portion of the year, and the denominator of which is the total amount of cash received for which all assets were sold (or otherwise disposed of) during such portion of the year, or (ii) such percentage (not to exceed 100%) as the Compensation Committee determines in its sole discretion to utilize as the Adjustment Factor. The resulting amount is multiplied by 8.75% to arrive at the "Termination Bonus Pool." In the event that any Plan Participant is entitled to payment of an amount under the Amended Bonus Plan for the portion of the year in which such individual's termination occurs, such amount will be paid in the form of cash and will be equal to a percentage of the Termination Bonus Pool corresponding to such individual's allocated percentage of the Bonus Pool.

Under the terms of the Amended Bonus Plan the Company accrued \$ 20,500 for the year ended December 31, 2020 and \$ 783,000 for year ended December 31, 2019.

Severance Compensation

In connection with the execution of a transition agreement with the Company's former Chief Financial Officer, the company paid \$ 1,023,000 of severance benefits during the year ended December 31, 2019. There were no severance payments in 2020.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act) designed to provide reasonable assurance that the information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

These include controls and procedures designed to ensure that this information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Management, with the participation of the Chief Executive and Chief Financial Officers, evaluated the effectiveness of the Company's disclosure controls and procedures as of December 31, 2020. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of December 31, 2020.

Management's Annual Report on Internal Control over Financial Reporting.

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes of accounting principles generally accepted in the United States and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the Company's assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance of achieving their control objectives.

Management, with the participation of the Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2020. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework (2013). Based on this assessment, management, with the participation of the Chief Executive Officer and Chief Financial Officer, concluded that, as of December 31, 2020, the Company's internal control over financial reporting was effective based on the COSO criteria (2013).

Changes in Internal Control over Financial Reporting.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the quarter ended December 31, 2020, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item regarding directors will be set forth in the section headed "Election of Directors" in our definitive proxy statement with respect to our 2021 annual meeting of shareholders (the "2021 proxy statement"), to be filed on or before April 30, 2021 and is incorporated herein by reference. The information required by this item regarding the Company's code of ethics will be set forth in the section headed "Code of Ethics" in the 2021 proxy statement and is incorporated herein by reference. Information regarding executive officers is set forth in Item 1 of Part 1 of this Report under the caption "Executive Officers." Other information required by this item will be set forth in the sections headed "Corporate Governance" and "Delinquent Section 16(a) Reports" in the 2021 proxy statement and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item will be set forth in the section headed "Executive Compensation and Related Information" in the 2021 proxy statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT, AND RELATED STOCKHOLDER MATTERS

The information required by this item will be set forth in the sections headed "Security Ownership of Certain Beneficial Owners and Management" and "Equity Compensation Plan Information" in the 2021 proxy statement and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item will be set forth in the section headed "Certain Relationships and Related Persons Transactions" and "Compensation Committee, Interlocks and Insider Participation" in the 2021 proxy statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this item will be set forth in the sections headed "Independent Registered Public Accounting Firm Fees" and "Audit Committee Pre-Approval Policy" in the 2021 proxy statement and is incorporated herein by reference.

CERTIFICATION BY CHIEF EXECUTIVE OFFICER PURSUANT TO RULE 13a-14(a)/15d-14(a)
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Dorothy Timian-Palmer, certify that:

1. I have reviewed this annual report on Form 10-K of Vidler Water Resources, Inc. (the "Registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
